Established by the Millennium Challenge Act of 2003, the Millennium Challenge Corporation (MCC) has the statutory goal of providing assistance to the poorest countries in the world to promote economic growth, eliminate extreme poverty, and strengthen good governance, economic freedom, and investments in people. Since its inception, MCC has signed 32 compacts and 26 threshold program agreements, totaling nearly \$12 billion. These investments help foster stability through economic growth and poverty reduction in partner countries. MCC encourages policy reforms by working with only those countries that have created the conditions for growth by ruling justly, investing in their people, and committing to economic freedom, with a particular emphasis on fighting corruption and maintaining democratic rights. Countries develop their poverty reduction proposals in broad consultation with their own civil society and MCC. MCC's evidence-based approach leads to compacts that specifically define the implementation responsibilities of partner countries, including financial accountability and transparent and fair procurement practices, and require measurable results to ensure that MCC assistance is used responsibly and effectively.

This account supports U.S. foreign policy objectives by providing economic assistance to allies and countries in transition to democracy, supporting Middle East peace efforts, increasing stability in conflict/post-conflict environments, and financing economic growth and stabilization programs, frequently in a multi-donor context. Key objectives include:

1) Supporting strategically significant friends and allies through assistance designed to increase the role of the private sector in the economy, reduce government controls over markets, enhance job creation, and improve economic growth.

2) Developing and strengthening institutions necessary for sustainable democracy. Typical areas of assistance include technical assistance to administer and monitor elections, capacity-building for non-governmental organizations, judicial training, and women's participation in politics. Assistance is also provided to support the transformation of the public sector to encourage democratic development, including training to improve public administration; to promote decentralization; and to strengthen local governments, parliaments, independent media and non-governmental organizations.

3) Strengthening the capacity of partner governments to manage the human dimension of transitions out of instability and to help sustain the neediest sectors of the population during the transition period.

This account also includes funding for alternative development programs.

The Global Security Contingency Fund (GSCF) permits the Department of State and the Department of Defense to pool funding and expertise to

address emergent challenges and opportunities. The GSCF can be used to provide military and other security sector assistance to enhance a country's national-level military or other security forces' capabilities to conduct border and maritime security, internal defense, and counterterrorism operations, or to participate in or support military, stability, or peace support operations, consistent with U.S. foreign policy and national security interests. The GSCF can also be used to provide assistance to the justice sector (including law enforcement and prisons), rule of law programs, and stabilization efforts in cases where civilian providers are challenged in their ability to operate. Assistance programs under this account are collaboratively developed by the Department of State and the Department of Defense. The fund allows direct contributions from each Department to be transferred into the fund for implementation by the most appropriate agency in a given situation, be it State, Defense, the U.S. Agency for International Development, or others.

The Foreign Military Financing Direct Loan Program (FMFDLP) Account is a program account established pursuant to the Federal Credit Reform Act (FCRA) of 1990, as amended, to provide the funds necessary for the subsidy element of loans. As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from direct loans for foreign military financing obligated in 1992 and after. The foreign military financing credit program provides loans that finance sales of defense articles, defense services, and design and construction services to foreign countries and international or-

ganizations. The amounts in this account are a means of financing and are not included in budget totals. Expenditures from this account finance the subsidy element of direct loan disbursements and are transferred into the Foreign Military Financing Direct Loan Financing (FMFDLF) Account to make required loan disbursements for approved FMS or commercial sales. The FMFDLF is a financing account used to make disbursements of Foreign Military Loan funds for approved procurements and for subsequent collections for loans after September 30, 1991. The account uses permanent borrowing authority from the U.S. Treasury combined with transfers of appropriated funds from the Foreign Military Financing Direct Loan Program (FMFDLP) Account to make required disbursements to loan recipient country borrowers for approved procurements. Receipts of debt service collections from borrowers are used to repay borrowings from U.S. Treasury.

The Foreign Military Loan Liquidating Account (FMLLA) is a liquidating account that records all cash flows to and from the Government resulting from direct loans obligated and loan guarantees for foreign military financing committed prior to 1992. This account is shown on a cash basis and reflects the transactions resulting from loans provided to finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. No new loan disbursements are made from this account. Certain collections made into this account are made available for default claim payments. The Federal Credit Reform Act (FCRA) provides permanent indefinite authority to cover obligations for default payments if the liquidating account funds are otherwise insufficient. All new foreign military financing credit activity in 1992 and after (including modifications of direct loans or loan guarantees that resulted

As required by the Federal Credit Reform Act of 1990, the Military Debt Reduction Financing (MDRF) Account is a non-budgetary financing account that records all cash flows to and from the Government resulting from restructuring foreign military loans. The amounts in this account are a means of financing and are not included in budget totals. It is an account established for the debt relief of certain countries as established by Public Law 103-87, Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1994, Section 11, Special Debt Relief for the Poorest, Most Heavily Indebted Countries. The MDRF buys a portfolio of loans from the FMLLA, thus transferring the loans from the FMLLA Account to the MDRF Account.

The Clean Technology Fund (CTF) is a multibillion dollar effort to reduce the growth of greenhouse gas emissions in developing countries by catalyzing large-scale private and public investments through financing the additional costs of commercially available cleaner technologies over dirtier, conventional alternatives. By funding the extra cost of the cleaner technology, the CTF incentivizes cleaner projects that leverage development bank financing and attract new investor capital into low-carbon sectors. The CTF, one of the two multilateral Climate Investment Funds (CIFs), leverages the capital bases and country program expertise of the multilateral development banks (MDBs). To receive funding, eligible countries must first develop credible national investment plans that identify key high-emissions sectors where targeted projects could stimulate low-carbon growth and the scalable uptake of clean technologies. Since 2009, the CTF's

governing committee has endorsed 17 investment plans and programs with a combined CTF funding envelope of nearly \$6.1 billion and total planned investments of over \$49 billion. As of June 2015, the CTF has approved 84 individual projects using \$4.2 billion in funding. The 84 approved projects are expected to attract \$28.2 billion in co-financing from the private sector, governments, bilateral agencies, and other sources, with the MDBs providing a further \$10.5 billion to CTF projects. A further \$1.9 billion of CTF projects are under development. By the beginning of 2017, the United States will have fulfilled its \$2.0 billion pledge to the CIFs, including the CTF.

The Strategic Climate Fund (SCF) is a suite of three programs to pilot innovative approaches and scaled-up activities aimed at addressing specific climate change-related challenges in developing countries. The SCF is one of the two multilateral Climate Investment Funds (CIFs). By the beginning of 2017, the United States will have fulfilled its \$2.0 billion pledge to the CIFs.

The Pilot Program for Climate Resilience (PPCR) helps the most vulnerable populations in very poor countries better prepare for and respond to the effects of climate change through innovative development plans, strategies, and projects. The PPCR pilot programs are for Bangladesh, Bolivia, Cambodia, Mozambique, Nepal, Niger, Tajikistan, Yemen, Zambia, the Caribbean region (Dominica, Grenada, Haiti, Jamaica, Saint Lucia, Saint Vincent and the Grenadines), and the Pacific region (Papua New Guinea, Samoa, and Tonga). The value of currently planned PPCR investments is over \$1.1 billion. Ten other countries have been invited to develop programs.

The Forest Investment Program (FIP) helps protect our global forests by reducing deforestation in developing countries through improved gov-

ernance and forest management, and by addressing the drivers of deforestation. The FIP pilot programs are for Brazil, Burkina Faso, Democratic Republic of Congo, Ghana, Indonesia, Lao PDR, Mexico, and Peru. The value of currently planned FIP investments is \$490 million. Fifteen other countries have been invited to develop programs.

The Program for Scaling Up Renewable Energy in Low Income Countries (SREP) helps demonstrate the economic, social, and environmental viability of low-carbon development pathways in very poor countries. The SREP pilot programs are for Armenia, Bangladesh, Ethiopia, Ghana, Haiti, Honduras, Kenya, Liberia, Maldives, Mali, Mongolia, Nepal, Nicaragua, Rwanda, Solomon Islands, Tanzania, Uganda, and Vanuatu. The value of currently planned SREP investments is \$604 million. Nine other countries have been invited to develop programs.

Treasury requests \$23 million for the Global Agriculture and Food Security Program (GAFSP), a multi-donor trust fund called for by G-20 leaders at the November 2009 Pittsburgh Summit. GAFSP is the multilateral component of the President's Feed the Future initiative.

The GAFSP is a multilateral mechanism that funds projects supporting the agricultural investment plans of poor countries. The GAFSP, which is administered by the World Bank, leverages the expertise and implementing structures of other multilateral institutions such as the International Fund for Agricultural Development, the World Bank, and the regional development banks. Since its inception in 2010, the GAFSP public sector window has awarded \$ 1,019 million in grant financing to 30 low-income countries in Africa, Asia, and Latin America. These investments are expected to help smallholder farmers and their families increase their income and strengthen their nutritional outcomes. These grants were funded from contributions from Australia, the Bill and Melinda Gates Foundation, Canada, Ireland, South Korea, Spain, the United Kingdom, and the United States. The private sector window, which provides financing to small and medium-sized ag-

ribusinesses, has approved \$192.1 million of investments to date, funded from contributions from Canada, Japan, the Netherlands, the United Kingdom, and the United States.

In October 2012, the United States pledged to commit \$1 for every \$2 from other donors up to a total U.S. contribution of \$475 million during the pledge period. The United States is the largest of 10 donors to GAFSP, having contributed \$591.8 million since GAFSP's inception. Treasury continues to work closely with GAFSP's leadership and other donors to encourage additional contributions. In FY 2015, Australia, the Bill & Melinda Gates Foundation, and Germany made new contributions to GAFSP. During the course of FY 2016 Treasury also expects significant new financial commitments from new and existing GAFSP donors.

The Green Climate Fund (GCF) is a recently established multilateral fund designed to foster resilient, low-emission development. The GCF will advance its mission by using a range of financial instruments to support projects and programs in developing countries that promise the greatest impact in reducing greenhouse gas (GHG) emissions and building climate resilience. It will also advance its mission by mobilizing private sector capital and fostering stronger policy environments that better address the challenges of a changing climate.

The GCF will fund activities across a variety of sectors, including transport; water and other infrastructure; energy generation and efficiency; and land use, including agriculture and forestry. Through these investments, the GCF will support development that is resilient and resource-efficient and that minimizes the potential negative impact on citizens' health and well-being. The 2017 Budget includes \$250 million through Treasury toward the U.S. pledge to the GCF.

Treasury requests \$6 million for the International Bank for Reconstruction and Development (IBRD) to address shortfalls from FY 2013 appropriations that, if not paid, will result in a loss of U.S. shareholding at the IBRD.

The IBRD is the arm of the World Bank that provides financing to creditworthy middle-income countries to promote inclusive economic growth and reduce poverty. Middle-income countries—home to over 70 percent of the world's poor—rely on the IBRD for financial resources and strategic advice to meet their development needs.

Working across a range of sectors, including agriculture, sustainable infrastructure, health and nutrition, and education, the IBRD supports long-term human and social development needs that private creditors do not finance. During its 2015 fiscal year, the IBRD approved \$23.5 billion to support 112 projects. The largest share of this lending went to countries in the Europe and Central Asia region (\$6.7 billion) and the Latin America and Caribbean region (\$5.7 billion), followed by countries in the East Asia and Pacific region (\$4.5 billion).

The United States is the largest shareholder in the IBRD, with a 15.8 percent share of total voting power, followed by Japan and China. The United States is the only country with veto power over amendments to the Articles of Agreement.

### Global Environment Facility

The Global Environment Facility (GEF) is the largest funder of projects to improve the global environment, providing grants to address issues related to biodiversity, climate change, oceans, land degradation, and chemical pollution. The GEF supports innovative, cost-effective investments that can be replicated and scaled up by the public and private sectors. In 2015, the GEF approved 130 new projects totaling \$1.1 billion. Since its establishment in 1991, the GEF has allocated \$14.5 billion, supplemented by more than \$75 billion in co-financing, to fund almost 4,000 projects in 165 developing countries. The sixth replenishment to the GEF (GEF-6) began on July 1, 2014 and will conclude on June 30, 2018. The 2017 Budget requests \$146.6 million for the GEF, which includes \$136.6 million for the third of four annual installments to GEF-6 and \$10.0 million to help meet our earlier GEF-6 annual installment.

### International Finance Corporation

The International Finance Corporation (IFC), a member of the World Bank Group, is the largest global development institution exclusively focused on the private sector. It was established in 1956 to promote private sector development in developing countries by making loans and equity investments in private sector projects, mobilizing private capital alongside its own resources, and providing advisory and technical assistance services. In its 2015 fiscal year, the IFC approved \$10.5 billion from its own resources, and mobilized an additional \$7.1 billion from other sources, for 406 projects. The poorest countries (those eligible for funding from the World Bank's International Development Association (IDA)) received 36 percent of IFC projects in 2015. IFC investments in 2015 were spread across the globe, with the largest recipient regions being Latin American and the Caribbean (23 percent), East Asia and the Pacific (22 percent), and sub-Saharan Africa (17 percent). The top sectors for IFC investment in 2015 were Financial Markets (45 percent), Infrastructure (20 percent), and Agribusiness and Forestry (13 percent).

The 2017 Budget requests \$12.5 million for a contribution to the Central America and Caribbean Catastrophe Risk Insurance Program multi-donor trust fund, which has been established at the World Bank to support the expansion of sovereign catastrophe risk insurance coverage to Central America under the CCRIF Segregated Portfolio Company (formerly known as the Caribbean Catastrophe Risk Insurance Facility (CCRIF)) and to support related technical assistance. This contribution will support the availability of affordable insurance against natural disaster to as many as six Central American countries and the Dominican Republic, by expanding coverage under the CCRIF model. Parametric insurance coverage for natural disasters can be a sustainable and cost-effective way to increase financial resilience in vulnerable countries and to help countries quickly access emergency liquidity in the aftermath of major natural disasters, enabling an effective post-disaster response.

Treasury requests \$1,384 million for the International Development Association (IDA). This amount includes \$1,290.6 million for the third of three annual installments to the seventeenth replenishment of IDA and \$93.5 million to pay down unmet commitments to IDA.

IDA is the part of the World Bank that supports the growth and development of the world's 77 poorest countries, home to 2.8 billion people, in every region of the world. IDA works across a wide range of sectors including education, basic health, clean water and sanitation, the environment, infrastructure, and agriculture. Because countries receiving IDA financing are too poor to attract sufficient capital to support their urgent development needs, they depend on low-cost loans and grants to create jobs, build critical infrastructure, increase agricultural productivity, provide energy, and invest in the health and education of future generations.

IDA's goal is to help countries reduce poverty and achieve higher levels of growth and institutional capacity. Over time, IDA's support helps countries finance their development needs through domestic revenues and borrowing at non-concessional rates. To date, 33 countries once eligible for IDA assistance have graduated and no longer receive support from IDA.

Of the \$19 billion approved in IDA's 2015 fiscal year, more than half—\$10.4 billion—went to countries in sub-Saharan Africa. Countries

CONTRIBUTION TO THE INTERNATIONAL DEVELOPMENT ASSOCIATION—Continued in the South Asia region received \$5.8 billion, and \$1.8 billion went to countries in the East Asia and Pacific region. Thirteen percent of IDA's resources are provided as grants to fragile states and other countries at risk of debt distress.

### Multilateral Debt Relief Initiative

Launched in 2006 at the urging of the United States, the Multilateral Debt Relief Initiative (MDRI) provides 100 percent cancellation of eligible debt to the concessional financing windows of the World Bank and the African Development Bank. Countries become eligible for MDRI after completing the Heavily Indebted Poor Countries (HIPC) Initiative and demonstrating a track record of improved economic policy performance. The purpose of this debt reduction is to free up more resources in well-performing low-income countries for poverty-reducing expenditures in areas such as health, education, and rural development.

MDRI requires donors to compensate IDA for the cancelled debt on a dollar-for-dollar basis according to the payment schedules of the original loans. IDA calculates donors' MDRI commitments at the start of each three-year replenishment cycle according to a burden-sharing percentage. Each donor's commitments to MDRI at IDA must be met within the three-year replenishment period to avoid a negative impact on IDA's commitment capacity. With a 20.1 percent burden share, the U.S. share of the cost of MDRI under IDA-17 is \$565 million. In addition to these current commitments, the United States has \$246 million in unmet MDRI commitments from IDA-16. Altogether, the United States faces total commitments of \$811 million for MDRI at IDA over the FY 2015-FY 2017 period.

The Multilateral Investment Guarantee Agency (MIGA) is a member of the World Bank Group. MIGA is designed to encourage the flow of foreign private investment to and among developing countries by issuing guarantees against non-commercial risks and carrying out investment promotion activities. In 2015, MIGA issued a total of \$2.8 billion in guarantees for projects in developing countries. Negotiations on MIGA's first general capital increase (GCI) were completed in 1998. The United States committed to contribute a total of \$30 million in paid-in capital and nearly \$140 million in callable capital over three years. The GCI decision included commitments from MIGA on a range of policy issues of substantial importance to the United States, including environment, information disclosure, labor, and creation of an inspection function for greater accountability and transparency. In 2000, the Administration sought and received congressional authorization for the United States' full participation in the MIGA GCI.

Treasury is seeking \$22 million to address unmet commitments to the Inter-American Development Bank (IDB).

The IDB is the largest source of development financing for 26 countries in Latin America and the Caribbean, a strategically significant and economically important region for the United States and a region where 66 million people live in extreme poverty. In 2015, the IDB approved \$11.3 billion in financing for 172 projects. About 47 percent of commitments targeted small and vulnerable borrowing countries, such as El Salvador, Guyana, Honduras, and Jamaica.

The IDB works in a range of sectors and commits roughly half of its funding to support infrastructure and the environment through projects in water and sanitation, transportation and energy. The other half is split between capacity building, including reform of government operations and financial markets, and the social sector, including social investment, health, and education.

Given the IDB's significant response to the global financial crisis, in 2010, shareholders approved GCI-9 to ensure that the IDB had the resources necessary to assist countries that suddenly found themselves shut off from global capital markets. As part of the GCI-9 resolution, the IDB established a special grant facility for Haiti that will receive income transfers of \$200 million annually from the IDB through 2020. This facility provides Haiti with critical resources to support a long-term development agenda. Establishing this facility was a critical U.S. objective of GCI-9.

The United States is the largest shareholder in the IDB, with 30 percent of total shareholding, enabling the United States to wield significant influence over major decisions about the direction of the IDB.

#### Inter-American Investment Corporation

The Inter-American Investment Corporation (IIC), a member of the Inter-American Development Bank Group established in 1984, promotes development of private small- and medium-sized enterprises (SMEs) in Latin America and the Caribbean. It is a legally autonomous entity whose resources and management are separate from those of the Inter-American Development Bank itself. Through direct loans and equity investments in SMEs, as well as through lending to private financial intermediaries, the IIC helps SMEs in the region access the medium- and long-term capital necessary to start up, expand, or modernize operations. In 2015, the IIC

approved 79 projects totaling \$347 million. Since its inception, the IIC has approved a total of \$6 billion in financing.

The Asian Development Bank (AsDB) Group promotes broad-based sustainable economic growth and development, poverty alleviation, and regional cooperation and integration in the Asia-Pacific region. It has two main financing windows: 1) the Asian Development Bank's "hard-loan" window (known as the Ordinary Capital Resources (OCR) window); and 2) the Asian Development Fund's (AsDF) "soft-loan" window, which provides grants and lends at concessional rates to the region's poorest nations. Effective January 2017, AsDB will provide concessional loans to eligible countries through the OCR window. The AsDF will only provide grants to the region's poorest countries that are at moderate or severe risk of debt distress.

#### Asian Development Bank

The AsDB provides long-term loans at market rates to 23 middle-income Asian countries that lack the resources to finance their national economies and build critical infrastructure. The AsDB also supports private sector development with technical assistance, loans, guarantees, and direct equity investments in viable private sector projects with strong development impacts. In 2015, the AsDB approved \$13.2 billion worth of direct financing for projects and leveraged another \$10.1 billion in co-financing from official and commercial sources.

Through its lending, both for projects and for policy reforms, the AsDB supports the construction of critical economic infrastructure, the expansion of private enterprise, and environmentally-sustainable economic growth.

The majority of AsDB assistance is for investments in transportation, energy, finance, and industry and trade, with other sectors such as water supply, municipal infrastructure, agriculture and natural resources, and public sector management also receiving significant funding.

The AsDB is financed through capital contributions from donors, income earned on its loan and investment portfolios, public bond issues, and private placements. In April 2009, donors approved the AsDB's fifth general capital increase (GCI-V), which tripled the AsDB's capital base to \$165 billion. GCI-V was necessary to enable the AsDB to maintain an adequate level of lending after it stepped in with a significant increase in lending to assist developing Asian countries to withstand the effects of the global financial crisis.

#### Asian Development Fund

Treasury requests \$99.1 million for the AsDF. This amount includes \$89.9 million for the third of four installments to the AsDF's Tenth Replenishment (AsDF-11) and \$9.3 million to pay down unmet commitments to the AsDF.

The AsDF currently provides concessional loans and grants to the 29 poorest countries in Asia, including Afghanistan and Pakistan. It focuses on supporting inclusive, environmentally sustainable economic growth, and regional cooperation and integration. Specific sectors of focus include clean energy, sustainable transportation, and access to reliable water and sanitation. The AsDF also invests in cross-cutting activities, such as connecting entrepreneurial training with financing for SMEs. In 2015, the AsDF approved an estimated \$2.9 billion of loans and grants for AsDF-eligible countries. Historically, the AsDF has provided over \$50 billion for projects in developing member countries of the AsDB. Effective January 2017, AsDF will provide only grants.

Water, energy, and transportation infrastructure comprise 62 percent of all AsDF projects, while financial sector deepening, agriculture, and health projects make up the remainder of AsDF activities. In recent years, with U.S. encouragement, the AsDF has focused on countries where support strengthens U.S. national security priorities.

The African Development Bank Group comprises 1) the African Development Bank (AfDB), which lends at market-linked rates to middle-income African countries and Africa's private-sector; and 2) the African Development Fund (AfDF), which provides grants and concessional loans to the poorest African countries. The AfDF account includes a portion of the U.S. commitment to the Multilateral Debt Relief Initiative (MDRI).

**African Development Bank**

Treasury requests \$32.4 million for the sixth of eight installments for the AfDB's Sixth General Capital Increase (GCI-6).

The AfDB provides public sector financing at market-linked rates to 17 middle-income African countries, and provides loans, equity investments, lines of credit, and guarantees to the private sector in all 54 African member countries.

The AfDB had close to \$6.15 billion in lending approvals in 2015, two-thirds of which was for public sector projects and one-third for private sector projects. Almost half of AfDB approvals are for infrastructure (including sector support in energy, transportation, communication, and water and sanitation), 22 percent in the financial sector, 10 percent in agriculture, and the remainder in governance and social sectors.

The United States is the largest non-regional shareholder at the AfDB, with 6.5 percent of total shareholding, and the second-largest shareholder overall, after Nigeria.

**African Development Fund**

Treasury requests \$214.3 million for the AfDF. This amount includes \$195 million for the third of three installments to the thirteenth replenishment of the AfDF (AfDF-13) and \$19.3 million to partially pay down U.S. unmet commitments to the AfDF.

The AfDF is the AfDB Group's concessional lending window, providing grants and highly concessional loans to the poorest countries in Africa, of which nearly half are fragile or conflict-affected states. In 2015, the AfDF provided \$2.16 billion in financing, technical assistance, and capacity-building activities to the 39 countries that it serves. Many AfDF recipient countries are growing African economies that are becoming new, emerging markets and U.S. trading partners, while other AfDF recipient countries remain trapped in fragility, conflict, and poverty, are highly vulnerable to both internal and external shocks, and are in need of special assistance to achieve basic levels of service delivery.

The AfDF is the largest official financier of infrastructure in sub-Saharan Africa, committing over half of its funding to national and regional infrastructure projects, in sectors such as energy, transport, and water and sanitation. The remainder of its funding is devoted to governance, agriculture and food security, and human capital development (e.g., health and education). The AfDF also sets aside special funding for fragile and transitioning states and regional projects.

**Multilateral Debt Relief Initiative**

Launched in 2006 at the urging of the United States, MDRI provides 100 percent cancellation of eligible debt to the concessional financing windows of the World Bank and the AfDB. Countries become eligible for MDRI after completing the HIPC Initiative and demonstrating a track record of improved economic policy performance. The purpose of this debt reduction is to free up more resources in well-performing low-income countries for poverty-reducing expenditures in areas such as health, education, and rural development.

MDRI requires donors to compensate AfDF for cancelled debt under MDRI on a dollar-for-dollar basis according to the payment schedules of the original loans. Similar to IDA, AfDF calculates donors' MDRI commitments at the start of each three-year replenishment cycle according to a burden-sharing percentage. Donor commitments must be met within the three-year replenishment period to avoid a negative impact on the AfDF's commitment capacity.

At 11.8 percent burden share, the U.S. share of the cost of MDRI under AfDF-13 is \$55 million. The United States also has over \$29 million in unmet MDRI commitments from AfDF-12. Altogether, the United States faces total commitments of \$84 million for MDRI at the AfDF over the FY 2015-FY 2017 period.

The European Bank for Reconstruction and Development (EBRD) supports market-oriented economic reform and democratic pluralism predominantly through private-sector lending and investments. Its original field of operation in the countries of Central and Eastern Europe and the former Soviet Union was expanded in 2012 to aid in the transitions of key countries in the Middle East and North Africa. The United States and other shareholders signed the Agreement Establishing the EBRD on May 29, 1990, and the Bank officially began operating on April 15, 1991. In April 1996, shareholders approved a doubling of the EBRD's capital base from EUR 10 billion to EUR 20 billion (approximately \$24 billion), which went into effect in April 1997. In 2012, the United States provided \$1.25 billion in callable capital to support increased resource demands that resulted from the 2008 financial crisis.

Treasury is seeking \$45 million for the second of five installments of the first North American Development Bank (NADB) general capital increase. NADB finances environmental infrastructure projects that have been certified by the U.S.-Mexico Border Environmental Cooperation Commission (BECC). BECC is NADB's sister institution and is designed to assist border states and local communities in identifying projects on both sides of the U.S.-Mexico border. To enhance efficiency and strengthen the environmental mandate of the NADB, the BECC is in the process of merging with the NADB.

Under its charter, the United States and Mexico contributed equally to NADB's capital—\$450 million in paid-in capital and \$2.55 billion in callable capital for a total capital base of \$3 billion. The proposed general capital increase would double NADB's capital base to \$6 billion.

As of September 2015, NADB had approved \$2.6 billion in loans and grants.

The Multilateral Investment Fund (MIF), administered by the Inter-American Development Bank, provides grants and loans to support private-sector development, as well as financial and labor sector reforms, in Latin America and the Caribbean. Special consideration is given to reforms that promote privatization and encourage private foreign direct investment. Grants and loans are used for technical assistance to identify and resolve investment constraints, for investment in human capital, and for business infrastructure and development. In 2015, the MIF approved 85 projects totaling \$87 million. Since its inception in 1992, the MIF has approved over 1,750 projects, for which the MIF contribution totaled approximately \$2 billion.

The United States made a \$500 million commitment to the MIF in 1992. Negotiations were completed in early 2005 for the first replenishment of the MIF (MIF-II), with a U.S. commitment of \$150 million to be paid annually in six equal installments. The United States achieved its key objectives in these negotiations: strengthening the commitment to measurable results, increasing efficiency, maintaining a focus on grants, allocating resources to maximize innovation, and reforming IDB procurement.

Treasury requests \$20 million for the Global Infrastructure Facility (GIF). The GIF will catalyze private investment in public infrastructure projects by addressing constraints arising from countries' legal and regulatory regimes, project design and implementation, and project financing structures. In doing so, the GIF will seek to develop and promote best practices for infrastructure investment, particularly with regard to social and environmental standards. The GIF will seek to support at least four significant and three to six smaller infrastructure projects across a range of countries and sectors during its initial, three-year pilot phase. GIF resources will be recovered through reimbursements or fees collected when an infrastructure project receives its financing through private investments.

As the global focus on infrastructure investment continues to grow, the United States must maintain its leadership in multilateral infrastructure initiatives like the GIF to ensure infrastructure projects around the world

## CONTRIBUTION TO GLOBAL INFRASTRUCTURE FACILITY—Continued

Our investment in GIF would allow us to engage with China and other emerging donors that are focused on infrastructure through a facility that we helped create and are confident will support the UN Sustainable Development Goals.

IFAD was established in 1977 as a multilateral financial institution focused on promoting rural agricultural development and food security in poorer countries. IFAD's specific mandate is to help rural small-scale producers and subsistence farmers increase their productivity and incomes, improve food security, and integrate them into larger markets.

Pursuant to OTA's authorizing statute, OTA provides technical assistance to facilitate the implementation of policy, management, and administrative reforms in the areas of budget, revenue, government debt, financial institutions and financial enforcement to developing and transition countries. This assistance supports U.S. foreign policy and national security objectives.

The 2017 Budget includes \$33.5 million to fund full-time resident technical assistance advisors, intermittent advisors, and program-related administrative costs. The appropriation will support technical assistance programs in Asia, the Middle East, Africa, Latin America, and the Caribbean. It will enable the provision of technical assistance to developing and transition countries to strengthen the capacity of finance ministries, central banks, and other government institutions to manage public finances and oversee the financial sector. Technical assistance projects support efficient revenue collection, well-planned and executed budgets, judicious debt management, sound banking systems, and strong controls to combat corruption and economic crimes, including terrorist financing. The appropriation will also support Treasury's work to strengthen the financial underpinnings for infrastructure development. OTA will continue to coordinate its activities with the Department of State, USAID, and other relevant U.S. Government agencies as well as international financial institutions, and other bilateral donors when determining where its technical assistance program can have the greatest positive impact.

Funds for debt restructuring are periodically needed to help countries remove the burden of unsustainable debts, thereby establishing a sounder footing for economic growth. Debt relief and restructuring can be fundamental to helping countries stabilize their economies, restart economic growth, and reduce poverty and instability. Through programs such as the Heavily Indebted Poor Countries (HIPC) Initiative, the Multilateral Debt Relief Initiative (MDRI), as well as through the Paris Club, countries that have demonstrated a commitment to economic reforms and poverty reduction can benefit from debt restructuring. These programs have provided authority and appropriations to reschedule and/or reduce the debt repayments to multilateral institutions and/or the U.S. Government, allowing beneficiary countries to increase poverty reduction expenditures in areas such as health, education, and rural development. Debt relief can also be used to promote other U.S. Government priorities. No funding is requested for the Debt Restructuring account in 2017, though the Budget includes authorization to transfer up to \$275 million to cover the cost of HIPC debt relief for Sudan, should the Secretary of State determine that Sudan has made sufficient progress along the various fronts the U.S. has identified as pre-conditions for any U.S. support, including implementing the agreement reached by the Governments of Sudan and South Sudan under the Comprehensive Peace Agreement, and any other legislative requirements.

*Development Assistance Programs.*—The U.S. Agency for International Development (USAID) uses Development Assistance (DA) funding as one of its primary tools in meeting its mission by investing in partnerships that support ending extreme poverty and promoting resilient, democratic societies around the world. Achieving these goals requires enabling inclusive, sustainable growth; promoting free, peaceful, and self-reliant societies with effective, legitimate governments; and building human capital and creating social safety nets that reach the poorest and most vulnerable populations. USAID uses DA funds to apply proven solutions to the world's greatest development challenges through a focus on monitoring, evaluation, and results and by leveraging innovation, science, technology, partnerships, and local leadership. DA funds help drive progress toward meeting the global development vision and priorities adopted in the 2030 Agenda for Sustainable Development.

Approximately 40 percent of DA funding supports the Presidential Initiatives on Global Climate Change and Feed the Future. In Global Climate Change, DA programs support investments both in climate change adaptation as well as in clean and sustainable economic development and land use. These programs assist developing countries to adapt to climate change and to build the resilience of vulnerable populations to its negative impacts. They also help these countries to speed their transition to climate-resilient, low emission, sustainable economic growth and to implement their nationally determined contributions (NDCs) for reducing greenhouse gas emissions. The Feed the Future (FTF) initiative strives to invest in inclusive agriculture-led growth through improving agricultural productivity, expanding markets and trade, and increasing the economic resilience of vulnerable rural communities. Funding supports efforts to unleash the potential of agricultural producers and the private sector to connect smallholders to markets, and to reduce poverty and stunting by an average of 20 percent in targeted geographic regions. The FTF initiative also supports improving nutrient quality and food supply safety across the agricultural value chain.

DA funds furthermore support lines of effort under the U.S. Strategy for Engagement in Central America, an inclusive, whole-of-government approach to promoting prosperity, improved governance, and security in the region. In addition, funds support Power Africa activities to increase electricity access in sub-Saharan Africa, as well as the strategic rebalance to the Asia-Pacific to strengthen regional economic integration and trade that advance democratic and economic development.

DA also funds programs in the areas of governing justly and democratically, promoting economic growth, advancing basic and higher education, expanding efforts in the areas of innovation, science and technology, and empowering women and girls. Funding in these areas responds to longer-term challenges of human and economic security and helps protect U.S. national security in the long-run.

Prior to 2008, funds were appropriated to the Child Survival and Health Programs account to support activities that address family planning/reproductive health; child survival and maternal health, including activities directed at vulnerable children and the primary causes of morbidity and mortality, polio, micronutrients and iodine deficiency; preventing and treating infectious diseases such as malaria and tuberculosis; and reducing HIV transmission and the impact of the HIV/AIDS pandemic in developing

countries. Additional funding for HIV/AIDS was appropriated in the Global HIV/AIDS Initiative account for this purpose through 2007. Beginning in 2008, funds for these activities were appropriated in the Global Health and Child Survival (now Global Health Programs) account, and will continue to be requested in that account.

The purpose of the Assistance for Europe, Eurasia and Central Asia (AEECA) account was to support programs to foster the democratic and economic transitions of the countries of Southeastern Europe and the independent states that emerged from the dissolution of the Soviet Union, as well as related efforts to address social sector reform and combat transnational threats in these countries. From 2013 through 2015, funding for the programs formerly funded through AEECA were included in the Economic Support Fund (ESF), International Narcotics Control and Law Enforcement (INCLE), and Global Health Programs (GHP) accounts. In 2016, Congress reinstated the AEECA account for those programs funded with ESF and INCLE; however the 2017 request proposes funding all of these programs through the ESF, INCLE, and GHP accounts.

The International Disaster Assistance (IDA) account provides funds to save lives, reduce human suffering, and mitigate and prepare for natural and complex emergencies overseas. Specifically, these funds provide for the management of humanitarian assistance, rehabilitation, disaster risk reduction, and transition to development assistance programs. Humanitarian relief interventions include, but are not limited to, shelter, emergency health and nutrition, and the provision of safe drinking water.

IDA programs target the most vulnerable populations who are affected by the shock of a disaster, including those who are internally displaced.

This request also funds emergency food interventions such as local and regional purchase of food near crises, food vouchers, or cash transfers.

The Transition Initiatives (TI) account addresses opportunities and challenges facing conflict-prone countries and those countries making the transition from the initial crisis stage of a complex emergency to sustainable development and democracy. Programs are focused on advancing peace and stability, including promoting responsiveness of central governments to local needs, civic participation programs, media programs raising awareness of national issues, addressing underlying causes of instability, and conflict resolution measures. Recent country examples where TI funds were used include Pakistan, Honduras, Lebanon, Libya, Syria, Burma, and Macedonia.

TI funding provides core operational funds for the Office of Transition Initiatives within the U.S. Agency for International Development Bureau for Democracy, Conflict, and Humanitarian Assistance.

The Fund, authorized by section 635(m) of the Foreign Assistance Act of 1961, finances on a reimbursable basis the costs associated with providing administrative support to other agencies under the International Cooperative Administrative Support Services (ICASS) program overseas. Under ICASS, each agency pays a proportional share of the cost of those services they have agreed to receive. Working through inter-agency councils at post, all agencies have a say in determining which services the USAID mission will provide, defining service standards, reviewing costs, and determining funding levels. The Fund is also used for deposit of rebates from the use of Federal credit cards, the deposits then being made available for start-up costs at new ICASS service-provider missions and technical support to missions currently providing services.

As required by the Federal Credit Reform Act of 1990, this account records, for the Development Credit Authority, the subsidy costs associated with direct loans obligated and loan guarantees committed in 1992 and

beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program and legacy USAID credit programs. The subsidy amounts are estimated on a net present value basis; the administrative expenses are estimated on a cash basis.

In 2017, the U.S. Agency for International Development (USAID) will use the Development Credit Authority (DCA) transfer authority to support DCA projects in every region of the globe and every economic sector targeted by USAID. DCA augments grant assistance by mobilizing private capital in developing countries for sustainable development projects. Credit assistance under DCA is principally intended for use where a development activity is financially viable, where borrowers are creditworthy, and where there is true risk sharing with private lenders.

In 2017, the request for \$60 million in DCA transfer authority will continue to support the flow of credit to microfinance institutions, small and medium enterprises, and agribusinesses. DCA will also take advantage of more developed municipal capacity and capital markets to expand successful sub-sovereign financing models developed in Asia and Eastern Europe. The request for \$10 million in credit program administrative expenses will fund the total cost of development, implementation, and financial management of the DCA program, as well as the continued administration of USAID's legacy credit portfolios.

The Overseas Private Investment Corporation encourages the participation of United States private sector capital and skills in the economic and social development of developing countries and emerging market economies. Its credit program is investment financing through loans and guaranteed loans.

As required by the Federal Credit Reform Act of 1990, the Program Account records the subsidy costs associated with the direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program. The subsidy amounts are estimated on a present value basis; the administrative expenses are estimated on a cash basis.

This account transfers funds to the operating expense account for the Peace Corps to finance upward adjustments of recorded obligations because of foreign currency fluctuations. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this account and are available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Peace Corps to withdraw unobligated balances from the operating expenses account from prior years as long as the authorized limit of \$5 million is not exceeded at the time of the transfer.

The Inter-American Foundation's (IAF) mission is to promote and invest in citizen-led grassroots development in Latin America and the Caribbean to help communities thrive. Communities that are productive, secure, inclusive and democratic are better able to address their own problems, including emigration of their children and young people. IAF funds self-help ideas and priorities articulated by poor communities in the region. Grantee partners invest their own resources and mobilize contributions from others. This approach is cost-efficient and results in effective, community-led development that is consistent with U.S. foreign policy goals in the region: to expand access to economic opportunities, enhance social inclusion, build citizen engagement in democratic processes at the grassroots level, and strengthen resilience to crime and violence.

The IAF's specialized expertise and experience investing in citizen-led development, its extensive network with Latin American civil society organizations, and its robust evaluation system complement the assets of other U.S. government agencies. The IAF uses these tools in collaborating and sharing lessons in development with public and private sector partners. As part of the U.S. Strategy for Engagement in Central America, the IAF invests in the organized poor so that they develop the capacity to advance their own communities, addressing the root causes of migration by improving economic opportunity, citizen security and civic participation. IAF investments help grassroots groups take advantage of large-scale investments, new markets and trade opportunities. Seventy-eight percent of IAF grantee partner respondents to a recent survey by the Center for Effective Philanthropy stated that working with the IAF had positively affected their opinion of the United States.

*Development Grants:* IAF works in 20 countries in Latin America and the Caribbean and maintains a portfolio of approximately 265 active projects, including agriculture and food production, enterprise development, education and training, cultural expression, environmental stewardship, and health programs. Advancing the inclusion of women, children and youth, indigenous peoples and African descendants, and persons with disabilities in economic and civic life are over-arching priorities.

In 2016, the IAF plans to award at least 120 new and supplemental grants. All grants are audited by an independent audit firm. In addition, the IAF conducts an end-of-project assessment of the results of every grant and an ex-post assessment on a sample of projects completed for at least five years.

*Focus on Central America:* The IAF has significantly increased its focus on Central America, with investments to address root causes of migration, consistent with the U.S. Strategy for Engagement. In FY15, 37 percent of the IAF's new grant funding went to Central America, up from 24 percent in FY11. The IAF's portfolio includes 91 active projects in the region for a total investment value of \$42.5 million, of which \$21.6 million is counterpart resources committed by grantee partners. The IAF is operating in over 900 communities and 16 percent of all municipalities in the northern triangle. Ninety percent of funding actions in Central America are in agriculture and food production, education and training, enterprise development

and environment. Forty-five percent of the IAF's activity in El Salvador, Guatemala and Honduras benefits young people directly.

*Leveraging of Resources:* Grantee partners invest their own resources and mobilize contributions from others in the local public and private sector; on average over the last five years, counterpart commitments have represented \$136,000 for every \$100,000 invested by the IAF. U.S. based hometown associations are also supporting IAF-funded grassroots development projects in their communities of origin. In addition, members of RedEAmérica, an IAF-initiated business sector alliance, commit to match IAF grant funds for projects at a three-to-one ratio. The IAF also manages resources from other public or private sources when objectives coincide and the partner wishes to take advantage of the efficiency and effectiveness of the IAF's investment platform.

*Program Implementation Activities:* The IAF complements and extends the impact of its development grants program with other investments designed to enhance the capabilities of grassroots organizations in the region as a learning and collaboration network. This includes investments in a robust evaluation system that prioritizes learning by our grantee partners; targeted training, technical assistance and peer-to-peer exchanges; and field research on relevant grassroots development topics by Ph.D. candidates at U.S. universities that also contributes to building a cadre of U.S. and Latin American specialists in the field.

The U.S. African Development Foundation (USADF) works directly with Africa's marginalized population to secure economic development and growth among the most vulnerable communities. As an independent agency of the U.S. Government, USADF's development priorities contribute to the overall U.S. foreign policy agenda by impacting 1,500,000 people each year in underserved communities across Africa. USADF's innovative small grants program (less than \$250,000 per grant) supports sustainable, community-driven enterprises that improve food security, generate jobs, and increase family incomes. Additionally, the Agency maintains African staff and offices in each country where it works. This enables on-the-ground program management and accountability, while establishing a network of in-country technical service providers with expertise critical to advancing the local community's long term development needs.

USADF operates in Africa using a cost-effective African-led and managed development model that "right sizes" efforts, directing development resources to rural areas of greatest need and potential for impact. By directing small amounts of development resources to disenfranchised and vulnerable groups in hard to reach, sensitive regions across Africa, USADF ensures that critical U.S. development initiatives such as Trade Africa, Feed the Future, Power Africa, and the Young African Leaders Initiative reach beyond urban areas to Africa's underserved rural populations. USADF programs also leverage funds from other donors. By matching U.S. Government funds with those from host African governments and/or other private sector foundations, USADF increases the development impact of each tax dollar appropriated. USADF's size and low-cost operating model

makes it a highly flexible, innovative, and effective foreign assistance provider to Africa.

The United States participates in the International Monetary Fund (IMF) through a quota subscription, denominated in Special Drawing Rights (SDRs). Under reforms to IMF quotas decided in 2010, the U.S. quota at the IMF is increased by SDR 40,871,800,000 (approximately \$57 billion) to SDR 82,994,200,000 (approximately \$115 billion). Quotas are the main metric used by the Fund to assign voting shares and to determine countries' contributions to the IMF's general resources and access to IMF financing.

The use of the U.S. quota resources by the IMF constitute an exchange of monetary assets and does not result in net budget outlays. When the United States transfers dollars or other reserve assets to the IMF under the U.S. quota subscription, the United States receives an equal, offsetting, and interest-bearing claim on the IMF, which is reflected as an increase in U.S. international monetary reserves. The U.S. reserve position in the IMF is readily available to meet a U.S. balance-of-payments financing need.

In 2010, G-20 Leaders and the IMF membership decided on a set of quota and governance reforms designed to enhance IMF effectiveness. The United States successfully achieved its negotiating priorities during this process: (1) a U.S. quota increase with a corresponding equivalent rollback in U.S. participation in the IMF's New Arrangements to Borrow (NAB) for no change in overall U.S. financial participation in the IMF; and (2) preservation of U.S. veto power in the IMF.

Title IX of The Department of State, Foreign Operations, and Related Programs Appropriations Act, 2016 (Public Law 114-113) directs that the budgetary authority and outlays of the 2016 quota increase be recorded on a present value basis with a fair value premium added to the discount rate. In addition, under the Act, the 2009 quota increase is also now executed on a present value basis.

For additional information, see the account entitled "United States Quota IMF Direct Loan Program Account", which addresses the 2009 appropriation, and on the budgetary treatment of the IMF, including the use of present value, see the Budget Concepts chapter of Analytical Perspectives volume.

The Supplemental Appropriations Act of 2009 (Public Law 111-32) provided authorization and appropriations for an increase in the U.S. quota to the IMF by the dollar equivalent of SDR 4,973,100,000 (about \$6.9 billion as of December 31, 2015). This increase in the U.S. quota entered into effect on March 25, 2011.

While the U.S. quota in the IMF is not a credit program, the Supplemental Appropriations Act of 2009 directed that the 2009 appropriation to increase the U.S. quota in the IMF be scored on a credit reform basis, per the Federal Credit Reform Act of 1990, as amended (FCRA), with an additional adjustment to the discount rate for market risk. The application of FCRA by operation of law to the 2009 quota appropriation was a significant change in the budgetary treatment of the U.S. quota to the IMF that only applied to the 2009 appropriations. Pursuant to Title IX of The Department of State, Foreign Operations, and Related Programs Appropriations Act, 2016 (Public Law 114-113), the 2009 direction to apply FCRA rules no longer

applies to the 2009 quota appropriation, and the account will be closed in 2016.

For additional information, see the account entitled "United States Quota, International Monetary Fund". See also the discussion of the IMF budgetary treatment in the Budget Concepts chapter of the Analytical Perspectives volume.

As directed by the Supplemental Appropriations Act of 2009 (Public Law 111-32), this non-budgetary account recorded all cash flows to and from the Government resulting from the 2009 increase in the U.S. quota in the IMF, consistent with Federal Credit Reform Act (FCRA) rules. The amounts in this account are a means of financing and do not affect the deficit and are not included in the budget totals.

While the U.S. quota in the IMF is not a credit program, the Supplemental Appropriations Act of 2009 directed that the 2009 appropriation to increase the U.S. quota in the IMF be scored on a FCRA basis, with an additional adjustment to the discount rate for market risk. 5115 New Arrangements to Borrow, total .....	10,563	41,191	41,191

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's quota resources to forestall or cope with an impairment of the international monetary system. GAB participants decided in early 1983 to increase their financial commitments to the GAB from approximately SDR 6.3 billion to SDR 17 billion (about \$17.9 billion at that time), with the U.S. share rising from SDR 1.9 billion to approximately SDR 4.25 billion (about \$5.9 billion as of December 31, 2015).

In January 1997, the Executive Board of the IMF approved the creation of the New Arrangements to Borrow (NAB), which is a standing arrangement among certain IMF members to supplement the IMF's quota resources as needed to forestall or cope with an impairment of the international monetary system or to deal with an exceptional situation that poses a threat to the stability of the system. The NAB became effective on November 17, 1998, and was activated for the first time in December 1998 to finance an IMF arrangement for Brazil. The IMF repaid the NAB participants in March 1999. From 1999 through March 2011 the NAB was not activated.

In 2015, forty countries and institutions participated in the NAB for a total of SDR 370 billion (about \$513 billion as of December 31, 2015), of which the U.S. share in 2015 was approximately SDR 69 billion (about \$96 billion as of December 31, 2015). After the activation period from October 2014 expired on March 31, 2015, the IMF activated the NAB for two additional six-month periods in 2015, commencing on April 1 and October 1. As of end 2015, the IMF had accessed SDR 6.7 billion (about \$9 billion) of the U.S. arrangement under the NAB.

The sum of U.S. resources made available to the IMF under the NAB and GAB cannot exceed the total U.S. NAB participation.

With respect to this account, resources provided by the United States under the GAB and NAB constitute an exchange of monetary assets and do not result in any net budgetary outlays because such transactions result in an equivalent increase in U.S. international reserve assets in the form of an equal, offsetting, interest-bearing claim on the IMF. U.S. claims on the IMF under the GAB and NAB are readily available to meet a U.S. balance-of-payments financing need.

In 2010, G-20 Leaders and the IMF membership decided on a set of quota and governance reforms designed to enhance IMF effectiveness. The United States successfully achieved its negotiating priorities during this process: (1) a U.S. quota increase with a corresponding equivalent rollback in U.S. participation in the IMF's NAB for no change in overall U.S. financial participation in the IMF; and (2) preservation of U.S. veto power in the IMF.

Title IX of The Department of State, Foreign Operations, and Related Programs Appropriations Act, 2016 (Public Law 114-113) rescinds SDR 40,871,800,000 from U.S. participation in the NAB. The Act also directs that the budget authority and outlays of the NAB rescission be recorded

on a present value basis with a fair value premium added to the discount rate. In addition, under the Act, the 2009 NAB increase is also now executed on a present value basis.

For additional information, see the account entitled "Loans to IMF Direct Loan Program Account", which addresses the 2009 appropriation, and for the budgetary treatment of the IMF, including the use of present value, see the Budget Concepts chapter of Analytical Perspectives volume.

At the G-20 Leaders' Summit in London in April 2009, the President secured agreement to expand participation and increase the size of the New Arrangements to Borrow (NAB) by up to \$500 billion to restore global confidence and ensure the IMF has adequate resources to play its central role in resolving and preventing the spread of international economic and financial crises. As part of this agreement, the United States committed to increase its participation in the NAB by up to \$100 billion, which required congressional action. The Supplemental Appropriations Act of 2009 (Public Law 111–32) provided authorization and appropriations for an increase in the United States participation in the NAB by up to SDR 75 billion. This SDR amount was subject, as a practical matter, to the public commitment to an increase by up to \$100 billion. This increase in the U.S. participation in the NAB, equivalent to SDR 62.4 billion, entered into effect on March 11, 2011.

While the U.S. participation in the NAB is not a credit program, the Supplemental Appropriations Act of 2009 (Public Law 111–32), directed the 2009 increase in the U.S. participation in the NAB to be scored on a Federal Credit Reform Act (FCRA) basis, including an adjustment to the discount rate for market risk. The application of FCRA by operation of law to the 2009 NAB appropriation was a significant change in the budgetary treatment of the U.S. participation in the NAB that only applied to the 2009 appropriations. Pursuant to Title IX of The Department of State, Foreign Operations, and Related Programs Appropriations Act, 2016 (Public Law 114–113), the 2009 direction to apply FCRA rules no longer applies to the 2009 quota appropriation, and the account will be closed in 2016.

For additional information about NAB, see the account entitled "Loans to International Monetary Fund". See also the discussion of the IMF budgetary treatment in the Budget Concepts chapter of the Analytical Perspectives volume.

As directed by the Supplemental Appropriations Act of 2009 (Public Law 111-32), this non-budgetary account recorded all cash flows to and from the Government resulting from the 2009 increase in U.S. participation in the New Arrangements to Borrow (NAB), consistent with Federal Credit Reform Act (FCRA) rules. The amounts in this account are a means of financing and do not affect the deficit and are not included in the budget totals.

While the U.S. participation in the NAB is not a credit program, the Supplemental Appropriations Act of 2009 directed that the 2009 appropriation to increase the U.S. participation in the NAB be scored on a FCRA basis, with an additional adjustment to the discount rate for market risk. The application of FCRA by operation of law to the 2009 NAB appropriation was a significant change in the budgetary treatment of the U.S. participation in the NAB that only applied to the 2009 appropriations. Pursuant to Title IX of The Department of State, Foreign Operations, and Related Programs Appropriations Act, 2016 (Public Law 114-113), the 2009 direction to apply FCRA rules no longer applies to the 2009 NAB appropriation, and the account will be closed in 2016.

The Special Defense Acquisition Fund (SDAF) helps to better support coalition and other U.S. partners participating in U.S. overseas contingency and other operations; and expedite the procurement of defense articles for provision to foreign nations and international organizations. The FY 2017 request reflects \$900 million in new SDAF obligation authority, to be funded by offsetting collections. In FY 2017, offsetting collections will be derived from SDAF sales of stock as well as other receipts consistent with section 51(b) of the Arms Export Control Act. The FY 2017 request will support advance purchases of high-demand equipment that has long pro-

curement lead times, which is often the main limiting factor in our ability to provide coalition partners with critical equipment to make them operationally effective in a timely manner. Improving the mechanism for supporting U.S. partners is a high priority for both the Departments of State and Defense.

The Fixing America's Surface Transportation (FAST) Act (Public Law 114–94) was enacted on December 4, 2015. Among the new provisions

NATIONAL SURFACE TRANSPORTATION AND INNOVATIVE FINANCE BUREAU—Continued included in this Act, is the establishment of a new National Surface Transportation and Innovative Finance Bureau (the Bureau) within the Office of the Secretary of Transportation that will align, coordinate, or consolidate aspects of the U.S. Department of Transportation's (USDOT) existing surface transportation innovative finance programs with or within the new Bureau. The FAST Act calls for the Bureau to fulfill a number of specific responsibilities, including the following: Provide assistance and communicate best practices and financing and funding opportunities to entities eligible under USDOT infrastructure finance programs; Administer the application process for USDOT infrastructure finance programs; Administer the application process for a new Nationally Significant Freight and Highway Projects program; Reduce uncertainty and delays related to environmental reviews and permitting, as well as project delivery and procurement risks and costs for projects financed by the USDOT infrastructure finance programs and the new Nationally Significant Freight and Highways Projects programs; Increase transparency and the public availability of information regarding projects financed by the USDOT infrastructure finance programs and the new Nationally Significant Freight and Highway Projects program; and Promote best practices in procurement for projects financed by the USDOT infrastructure finance programs and the new Nationally Significant Freight and Highway Projects program by developing benchmarks related to procurement. The Bureau will build on a number of actions that USDOT has taken to advance these goals, including the establishment of USDOT's Build America Transportation Investment Center in 2014 as a single point of contact and coordination for states, municipalities and project sponsors looking to utilize federal transportation expertise, apply for federal transportation credit programs, and explore ways to access private capital through public private partnerships. Notably, in their explanatory statement of the FAST Act, Congressional conferees explicitly recognized the accomplishments of the Administration's Build America Investment Initiative to increase infrastructure investment and economic growth. To assist with establishing the Bureau, the FAST Act provides the Secretary with certain authorities to redirect personnel and budgetary resources, if necessary, to support the establishment and effectiveness of the Bureau. These authorities are available for two years. The FAST Act requires that, within 90 days of enactment and in 90-day intervals thereafter, USDOT report to Congress on how these authorities are being implemented, and any additional legislative actions that may be needed. The Bureau will be managed by an Executive Director reporting to the Under Secretary of Transportation for Policy. The FAST Act also establishes a new Council on Credit and Finance (the Council) chaired by the Deputy Secretary, which is charged with the review and approval of innovative finance applications, making recommendations to the Secretary, and reviewing approved projects on a regular basis. The Council may build on the Credit Council that USDOT had previously established through administrative measures.

The Office of the Secretary's (OST) National Infrastructure Investments program, also known as the Transportation Generating Economic Recovery (TIGER) program, provides funding for grant awards or credit assistance on a competitive basis for capital investments in surface transportation infrastructure that will have a significant impact on the Nation, a metropolitan area or a region. No funds are requested in this account for 2017. The Administration is proposing funding for this program within the multi-year clean transportation plan proposal. As part of that proposal, programs currently administered from this account would be continued in a new National Infrastructure Investments Trust Fund account that would be funded from the Multimodal Account of the Transportation Trust Fund.

The Federal Aviation Reauthorization Act of 1996 (P.L. 104-264) authorized the collection of user fees for services provided by the Federal Aviation Administration (FAA) to aircraft that neither take off nor land in the United States, commonly known as overflight fees. The Act permanently appropriated the first \$50 million of such fees for the Essential Air Service (EAS) program and rural airport improvements. In addition, the FAA Modernization and Reauthorization Act (P.L. 112-95) requires that, in any fiscal year, overflight fees collected in excess of \$50 million will be available to carry out the EAS program.

The 2017 Budget presents the Office of the Secretary's clean transportation plan proposal and account structure, including the creation of a new National Infrastructure Investments account. The Administration proposes to fund this account from the Multimodal Account of the Transportation Trust Fund.

The 2017 Budget request includes \$1.25 billion for this account. For 2017, this account's program includes: funding for grant awards or credit assistance on a competitive basis for capital investments in surface transportation infrastructure that will have a significant impact on the Nation, a metropolitan area or a region.

The Administration proposes to move a number of current General Fund programs into the Transportation Trust Fund, as part of the multi-year clean transportation plan proposal. Amounts reflected in this schedule represent the new mandatory contract authority and outlays supporting these programs. PAYGO costs will be calculated as the change between these amounts and reclassified baseline amounts in the existing General Fund accounts.

Through 1997, the Essential Air Service program was funded from the Airport and Airway Trust Fund. Starting in 1998, the Federal Aviation Administration reauthorization funded it as a mandatory program supported by overflight fees under the Essential Air Service and Rural Airport Improvement Fund. In addition to mandatory funding supported by overflight fees, direct appropriations from the Airport and Airway Trust Fund to Payments to Air Carriers have been enacted every year beginning in 2002 to meet the needs of the essential air service program. For 2017, \$150 million is requested from the Airport and Airway Trust Fund for Payments to Air Carriers.

For 2017, the Budget requests \$9,994 million for Federal Aviation Administration (FAA) operations. These funds will be used to continue to promote aviation safety and efficiency. The Budget provides funding for the Air Traffic Organization (ATO) which is responsible for managing the air traffic control system. As a performance-based organization, the ATO is designed to provide cost-effective, efficient, and, above all, safe air traffic services. The Budget also funds the Aviation Safety Organization which ensures the safe operation of the airlines and certifies new aviation products. In addition, the request also funds regulation of the commercial space

transportation industry, as well as FAA policy oversight and overall management functions.

The fund provides direct support for the aviation insurance program (chapter 443 of title 49, U.S. Code). In December 2014, Congress sunset part of the aviation insurance program. Specifically, Congress returned U.S. air carriers to the commercial aviation market for all of their war risk insurance coverage by ending the FAA's authority to provide war risk insurance for a premium. Pursuant to 49 U.S.C. 44305, the FAA may provide insurance without premium at the request of the Secretary of Defense or the head of a department, agency, or instrumentality designated by the President when the Secretary of Defense or the designated head agrees to indemnify the Secretary of Transportation against all losses covered by the insurance. The "non-premium" aviation insurance program is authorized through December 31, 2018.

In 1997, the Federal Aviation Administration (FAA) established a franchise fund to finance operations where the costs for goods and services provided are charged to the users on a fee-for-service basis. The fund improves organizational efficiency and provides better support to FAA's internal and external customers. The activities included in this franchise fund are: training, accounting, travel, duplicating services, multi-media services, information technology, material management (logistics), and aircraft maintenance.

Subchapter I of chapter 471, title 49, U.S. Code provides for airport improvement grants, including those emphasizing capacity development, safety and security needs; and chapter 475 of title 49 provides for grants for aircraft noise compatibility planning and programs. The 2017 budget request proposes to lower funding for the airport grants program to \$2.9 billion, offset in part by eliminating passenger and cargo entitlement funding for large hub airports. To assist those airports that need the most

help, the Administration proposes to focus Federal grants to support smaller commercial and general aviation airports that do not have access to additional revenue or other outside sources of capital. The Budget also proposes to allow all commercial service airports to increase the non-Federal Passenger Facility Charge, thereby giving airports greater flexibility to generate their own revenue. The combination of these changes to the AIP and PFC programs will allow airports to effectively transition to a reduced AIP level without hindering their ability to meet existing capital needs of the national airport system.

SEC. 112. The Administrator of the Federal Aviation Administration may reimburse amounts made available to satisfy 49 U.S.C. 41742(a)(1) from fees credited under 49 U.S.C. 45303 and any amount remaining in such account at the close of that fiscal year may be made available to satisfy section 41742(a)(1) for the subsequent fiscal year.

SEC. 113. Amounts collected under section 40113(e) of title 49, United States Code, shall be credited to the appropriation current at the time of collection, to be merged with and available for the same purposes of such appropriation.

SEC. 116. The Secretary shall apportion to the sponsor of an airport that received scheduled or unscheduled air service from a large certified air carrier (as defined in part 241 of title 14 Code of Federal Regulations, or such other regulations as may be issued by the Secretary under the authority of section 41709) an amount equal to the minimum apportionment specified in 49 U.S.C. 47114(c), if the Secretary determines that airport had more than 10,000 passenger boardings in the preceding calendar year, based on data submitted to the Secretary under part 241 of title 14, Code of Federal Regulations.

SEC. 117. None of the funds in this Act may be obligated or expended for retention bonuses for an employee of the Federal Aviation Administration without the prior written approval of the Assistant Secretary for Administration of the Department of Transportation.

SEC. 118. Notwithstanding any other provision of law, none of the funds made available under this Act or any prior Act may be used to implement or to continue to implement any limitation on the ability of any owner or operator of a private aircraft to obtain, upon a request to the Administrator of the Federal Aviation Administration, a blocking of that owner's or operator's aircraft registration number from any display of the Federal Aviation Administration's Aircraft Situational Display to Industry data that is made available to the public, except data made available to a Government agency, for the noncommercial flights of that owner or operator.

SEC. 119. None of the funds in this Act shall be available for salaries and expenses of more than nine political and Presidential appointees in the Federal Aviation Administration.

SEC. 119A. None of the funds made available under this Act may be used to increase fees pursuant to section 44721 of title 49, United States Code, until the FAA provides to the House and Senate Committees on Appropriations a report that justifies

FEDERAL HIGHWAY ADMINISTRATION

The Fixing America's Surface Transportation (FAST) Act (Public Law 114-94), signed into law by President Obama on December 4, 2015, provides five years of stable funding that will create jobs, strengthen our transportation system, grow our economy, and allow States to initiate sound, multi-year investments. The 2017 Budget, which reflects the second year of the five-year FAST Act, provides the needed funding to: improve the safety, condition and performance America's roads and bridges; support American exports by improving movement within the Nation's freight networks; improve regional coordination by Metropolitan Planning Organizations to stimulate economic development; and advance the Climate Action Plan by building more resilient infrastructure, and encouraging sounder transportation planning.

The 2017 Federal Highway Administration (FHWA) Budget consists of \$44,025 million in budget authority and \$43,531 million in outlays (with both totals excluding transfers from the General Fund).

The table below reflects the budget authority requested for all existing FHWA programs.

In addition to the budget authority provided by the FAST Act, as reflected in the table below, \$7,500 million in new budget authority is requested through the 21st Century Clean Transportation Plan investment initiative for the following new FHWA-administered programs: Future Freight System; Climate Smart Performance Program; 21st Century Regions Grants Program; Clean Communities Grant Program; and Resilience Competition.

Inclusive of the 21st Century Clean Transportation Plan proposal, \$51,525 million in resources is being requested in 2017 for FHWA.

Enacted on February 17, 2009, the American Recovery and Reinvestment Act of 2009 (Recovery Act) provided \$27.5 billion from the General Fund to the Federal Highway Administration (FHWA), of which \$26.6 billion was apportioned to States based on formulas described in the Recovery Act and \$0.9 billion was allocated to programs identified in the Recovery Act, including the Indian Reservation Roads Program, Park Roads and Parkway Program, Forest Highway Program, Refuge Roads Program, Disadvantaged Business Enterprise Bonding Assistance, Territorial Highway Program, Puerto Rico Highway Program, and the Ferry Boat Discretionary Program. Administrative oversight funds were available through September 30, 2012 and all other funds were available through September 30, 2010. The FHWA Recovery Act funds have been used to invest in transportation, environmental protection, and other infrastructure that will provide longer term economic benefits to the Nation. The Recovery Act funds augmented existing investments, authorized by the Safe, Accountable, Flexible, Efficient Transportation Equity Act of 2005: A Legacy for Users, enabled States, regional, and local governments to accelerate to completion a number of highway infrastructure projects planned or underway. Since the Recovery Act was enacted in February 2009, more than 42,000 miles of pavement across the United States have been improved. As of September 30, 2015, States have expended 100% of Recovery Act obligations and closed 12,585 of 12,913 projects. As of September 30, 2015 Recovery Act funds are cancelled and are no longer available for expenditure. No new budget authority is requested for 2017.

The Office of the Secretary of Transportation (OST) received appropriations totaling \$1,127 million for TIGER discretionary grants as part of the 2010 and 2011 Department of Transportation (DOT) appropriations acts. The appropriations authorized DOT to pay subsidy and administrative costs, not to exceed \$300 million, of projects eligible for Federal credit assistance under Chapter 6 of Title 23 United States Code. In 2012, \$45 million was provided for TIGER discretionary grants as part of the 2012 DOT appropriation act to pay subsidy and administrative costs. OST has delegated the authority to negotiate and administer Transportation Infrastructure Finance Innovation Act of 1998 loans under this program to the Federal Highway Administration.

No further amounts are requested for 2017.

The Federal-Aid Highway Act of 1968 authorized the establishment of a right-of-way revolving fund. This fund was used to make cash advances to States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from significantly increasing construction costs. The purchase of right-of-way is an eligible expense of the Federal-Aid Highway program.

This program was terminated by the Transportation Equity Act for the 21st Century of 1998 but will continue to be shown for reporting purposes as loan balances remain outstanding. No new budgetary resources are requested in 2017.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the General Fund to the Highway Trust Fund of revenue from the motor fuel tax and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs as specified by law.

The following Status of Funds table presents the status of the proposed Transportation Trust Fund.

**Cash balances.**—The Status of Funds table begins with the unexpended balance on a "cash basis" at the start of the year. The table shows the amount of cash invested in Federal securities at par value and the amount of cash on hand, i.e., uninvested balance. Next, the table provides the amounts of cash income and cash outlays during each year to show the cash balance at the end of each year.

**Revenues.**—The Budget presentation includes estimated receipts from existing Highway Trust Fund excise taxes, which would continue to be deposited into the Highway and Mass Transit Accounts of the Highway Trust Fund in the same manner as current law.

**General Fund Transfers.**—The Moving Ahead for Progress in the 21st Century Act (Public Law 112-141) authorized transfers into the Highway Trust Fund of \$2.4 billion from the Leaking Underground Storage Tank (LUST) Trust Fund in 2012, \$6.2 billion from the General Fund in 2013, and \$12.6 billion from the General Fund in 2014. The Highway and Transportation Funding Act of 2014 (Public Law 113-159) authorized transfers into the Highway Trust Fund of \$1.0 billion from the LUST Trust Fund in FY 2014, and \$9.8 billion from the General Fund in 2014. The Surface Transportation and Veterans Health Care Choice Improvement Act of 2015 (Public Law 114-41) authorized the transfer into the Highway Trust Fund of \$8.068 billion from the General Fund of the Treasury in 2015. This transfer was not subject to sequestration. The Fixing America's Surface Transportation (FAST) Act (Public Law 114-94) authorized the transfer into the Highway Trust Fund of \$70.0 billion from the General Fund of the Treasury in 2016. This transfer was not subject to sequestration.

The Federal-aid Highways (FAH) program is designed to aid in the development, operations, and management of an intermodal transportation system that is economically efficient, environmentally sound, provides the foundation for the Nation to compete in the global economy, and moves people and goods safely. All programs included within FAH are proposed to be financed from the Highway Account of the Transportation Trust Fund (currently the Highway Trust Fund), and most are distributed via apportionments and allocations to States. Liquidating cash appropriations are subsequently requested to fund outlays resulting from obligations incurred under contract authority.

On December 4, 2015, President Obama signed into law the first long-term, fully-funded surface transportation bill in a decade, the Fixing America's Surface Transportation (FAST) Act. The President has been very clear that increasing investment in our Nation's transportation infrastructure is a top priority. The five-year FAST Act authorization will make our roads and bridges safer, repair and modernize our aging transportation infrastructure, spur economic growth, and create jobs. Moreover, after years of uncertainty, States and local governments can now move forward with critical transportation projects with the confidence that they will have a Federal partner over the long-term. Moving forward with the FAST Act and the resources requested in this budget will allow States and local governments to make significant, critical investments now—investments that will be costlier if deferred. FHWA programs will continue the focus on

safety, streamlines project delivery, and enhanced performance management, while increasing our investment in projects that facilitate the movement of freight, repair structurally deficient bridges, improve safety on rural roads, empower local communities, and provide ladders of opportunity that connect people to employment, education, and services.

The Federal Highway Administration's (FHWA) 2017 budget consists of the following programs: Highway Safety Improvement Program; National Highway Freight Program; National Highway Performance Program; Surface Transportation Block Grant Program; Congestion Mitigation and Air Quality Improvement Program; Metropolitan Transportation Planning Program; Federal Lands and Tribal Transportation Programs; Nationally Significant Freight and Highway Projects; Transportation Infrastructure Finance and Innovation Act (TIFIA) Program; Research, Technology and Education Program; and Federal Allocation Programs.

*Highway Safety Improvement Program.*—The performance-based Highway Safety Improvement Program (\$2.5 billion) provides funding to significantly reduce traffic fatalities and serious injuries on all public roads, including non-State-owned public roads and roads on Tribal land, and the program is directly tied to the Department's safety goal and Roadway Safety Plan principles. The request represents a modest increase over the Fiscal Year 2015 safety program. Improving roadway safety is a top priority of the Department, and has been designated one of DOT's Agency Priority Goals. FHWA, through national leadership and innovation, focuses on improving the safety of roadway infrastructure on all public roads. The program provides a data- and performance-driven strategic approach to improving traffic safety to reduce fatalities and serious injuries. It strengthens coordination among all highway safety modes, including National Highway Traffic Safety Administration (NHTSA) and Federal Motor Carrier Safety Administration (FMCSA) safety programs in conjunction with all Department safety initiatives. It continues the requirement that each State utilize a Strategic Highway Safety Plan. This statewide, coordinated safety plan provides a comprehensive framework for establishing statewide goals, objectives, and performance targets while ensuring the effective use of safety-focused funding. The Highway Safety Improvement Program includes a \$230 million targeted set-aside, the Railway-Highway Crossings Program, to fund safety improvements to reduce the number of fatalities, injuries, and crashes at public grade crossings.

*National Highway Freight Program.*—The National Highway Freight Program (\$1.1 billion), is a new formula program established by the FAST Act that will provide States with necessary funds for vital projects that will improve the movement of freight on the National Highway Freight Network, which is comprised of the 41,500-miles Primary Highway Freight System, all other Interstates not on the PHFS, and other State-identified critical rural and urban corridors. The FAST Act requires all States using formula dollars to complete a multimodal State Freight Plan.

*National Highway Performance Program.*—The National Highway Performance Program (\$22.8 billion) is a formula-based program that focuses significant Federal resources for the following purposes: to support the condition and performance of the National Highway System (NHS); to support the construction of new facilities on the NHS; and to ensure that investments of Federal-aid funds in highway construction support progress toward the achievement of performance targets for the NHS. The program includes performance management features, holds States accountable for achieving performance targets, and provides flexibility to States for making transportation investment decisions. The 220,000-mile NHS is comprised of rural and urban roads serving major population centers, international border crossings, intermodal transportation facilities, and major travel destinations. The NHS includes the Interstate System, all principal arterials, intermodal connectors, and other roads important to mobility, commerce, national defense, and intermodal connectivity. The NHS provides mobility to the vast majority of the Nation's population and almost all of its commerce, supports national defense, and promotes intermodal connectivity. While NHS mileage accounts for a small portion of the Nation's public road mileage, it carries 58 percent of all vehicular traffic. The majority of

truck-borne freight uses it at some point in its journey. While the NHS comprises 53 percent of of U.S. highway border crossings, it handles 98 percent of the value of total truck trade with Canada and Mexico.

*Surface Transportation Block Grant Program.*—The Surface Transportation Block Grant Program (\$11.4 billion) provides flexible funding that may be used by States and localities for projects to preserve and improve the condition and performance on any Federal-aid highway, bridges on any public road, and transit capital projects, including intercity bus terminals. Additionally, projects that expand transportation choice and enhance the transportation experience are eligible, such as, bicycle and pedestrian infrastructure and safety programs, historical preservation, and environmental mitigation. The flexible nature of this program allows States to direct funding to areas of greatest need while also fostering innovation. This program gives State transportation agencies the ability to target funding to State and local priorities. States will identify projects for funding in consultation with local transportation officials in rural areas and in cooperation with the Metropolitan Planning Organization (MPO) in metropolitan areas.

*Congestion Mitigation and Air Quality Improvement Program.*—The Congestion Mitigation and Air Quality (CMAQ) Improvement Program (\$2.4 billion) will help States, local governments, and private-sector sponsors reduce highway congestion and harmful emissions, and assist many areas in reaching attainment of the National Ambient Air Quality Standards (NAAQS), an environmental priority. The CMAQ program provides a flexible funding source for State and local governments to fund transportation projects and programs that are designed to help localities meet the requirements of the Clean Air Act and its amendments, and help reduce regional congestion on transportation networks. CMAQ investments support transportation projects that are designed to reduce the emissions from mobile sources in areas that have been designated as in nonattainment or in maintenance of the NAAQS by the Environmental Protection Agency. To date, each MPO with a transportation management area that serves more than one million people and represents a nonattainment or maintenance area has developed and will continue to update biennially a performance plan to achieve air quality and congestion reduction targets.

*Metropolitan Transportation Planning Program.*—The Metropolitan Transportation Planning Program (\$336 million) provides funds for use by Metropolitan Planning Organizations (MPOs) for multimodal transportation planning and programming in metropolitan areas. Metropolitan planning activities include: the collection and analysis of data on demographics, trends, and system performance; travel demand and system performance forecasting; identification and prioritization of transportation system improvement needs; and coordination of the planning process and decision-making with the public, elected officials, and stakeholder groups. The planning process will provide consideration for projects that increase safety, support economic vitality, increase accessibility, mobility, and connectivity, protect and enhance the environment, emphasize the preservation of existing infrastructure, and increase security of the transportation system.

*Federal Lands and Tribal Transportation Programs.*—The Federal Lands and Tribal Transportation Programs (\$1.1 billion) provide funding for transportation projects on Federal and Tribal lands for construction and engineering projects that will: provide multi-modal access to basic community services including safer all-weather access to schools and healthcare facilities for 566 federally-recognized sovereign Tribal governments; improve multi-modal access to recreational areas on public lands/national treasures; and expand economic development in and around Federal and Tribal lands while preserving the environment and reducing congestion.

*Nationally Significant Freight and Highway Projects.*—The Nationally Significant Freight and Highway Projects (\$850 million) program is a new discretionary grant program, established by the FAST Act, for major highway and freight projects that will achieve national transportation objectives. This program will be led by the newly created National Surface Transportation and Innovative Finance Bureau. Selected projects must re-

FEDERAL-AID HIGHWAYS—Continued

ceive grants of at least \$25 million and have a total project cost of \$100 million or more.

**Transportation Infrastructure Finance and Innovation Act (TIFIA) Program.**—The TIFIA Program (\$275 million) provides contract authority to cover the subsidy cost of providing credit assistance for nationally or regionally significant transportation projects. The TIFIA Program leverages Federal dollars in a time of scarce budgetary resources, facilitating private participation in transportation projects and encouraging innovative financing mechanisms that help advance projects sooner. This program offers flexible repayment terms and attracts private capital to facilitate transportation projects that would otherwise go unfunded.

**Research, Technology, and Education Program.**—The Research, Technology, and Education (RT&E) Program (\$418 million) provides for a comprehensive, nationally-coordinated research, technology, and education program that will advance the Department of Transportation's organizational goals, while accelerating innovation delivery and technology implementation. FHWA research, development and technology activities include: a highway research and development program; a technology and innovation deployment program; an intelligent transportation systems program; and a training and education activities program. The RT&E Program also supports activities in the areas of safety, infrastructure preservation, operations, environmental sustainability, and policy. FHWA is in a unique leadership position to identify and address issues that require high-risk, long-term research, and research on emerging issues of national significance. FHWA's leadership role is necessary to build effective partnerships to maximize the investment in the transportation system. The entire innovation lifecycle is covered under the RT&E Program umbrella from agenda setting to the deployment of technologies and innovations.

**Federal Allocation Programs.**—This categorization consists of funding (\$404 million) for several important programs: Emergency Relief; Territorial and Puerto Rico Highway Program; Construction of Ferry Boats and Ferry Terminal Facilities; On-the-Job Training; Disadvantaged Business Enterprise; and Highway Use Tax Evasion Projects. The Emergency Relief Program has been funded through a recurring annual authorization of \$100 million since 1972. Emergency Relief funding assists Federal, State, Tribal, and local governments with the expense of repairing serious damage to Federal-aid, Tribal, and Federal Lands highways resulting from natural disasters or catastrophic failures. The Territorial and Puerto Rico Highway Program provides funding for critical highway programs in Puerto Rico and the four territories of American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, and the United States Virgin Islands. The Construction of Ferry Boats and Ferry Terminal Facilities program provides funding for the construction of ferry boats and ferry terminal facilities which will improve connectivity between NHS segments, provide travel mode options, and reduce congestion. The On-the-Job Training program provides funding for developing, conducting, and administering surface transportation and technology training, including skill improvement programs and job readiness. The Disadvantaged Business Enterprise program provides funding for developing, conducting, and administering training and assistance programs to increase the proficiency of minority businesses to compete, on an equal basis, for contracts and subcontracts. The Highway Use Tax Evasion Projects program provides funding to the Internal Revenue Service, other Federal agencies, and the States to carry out intergovernmental enforcement efforts along with training and research to reduce evasion of payment of motor fuel and other highway use taxes, which are the principal sources for Federal and State highway funding.

**FEDERAL MOTOR CARRIER SAFETY ADMINISTRATION**

The Federal Motor Carrier Safety Administration (FMCSA) was established within the Department of Transportation by the Motor Carrier Safety Improvement Act of 1999 (P.L. 106-159). Prior to this legislation, motor carrier safety responsibilities were under the jurisdiction of the Federal Highway Administration.

FMCSA's mission is to promote safe commercial motor vehicle operation and reduce truck and bus crashes. The agency accomplishes this mission by reducing fatalities and property losses associated with commercial motor vehicles through education, regulation, enforcement, and research and innovative technology, thereby achieving a safer and more secure transportation environment. FMCSA is also responsible for enforcing Federal motor carrier safety and hazardous materials regulations for all commercial vehicles entering the United States along its southern and northern borders.

Motor Carrier Safety Grants support States to conduct compliance reviews, identify and apprehend traffic violators, conduct roadside inspections, and support safety audits on new entrant carriers. Using take-down funds, the Federal Motor Carrier Safety Administration (FMCSA) also supports States by conducting training for State agency personnel to accomplish motor carrier safety objectives. In addition, FMCSA reviews State commercial driver's license (CDL) oversight activities to prevent unqualified drivers from being issued CDLs, and is initiating an Innovative Technology program to improve the safety and productivity of commercial vehicles and drivers. The Motor Carriers Safety Grants account maintains the Agency's individual grants under the Compliance, Safety and Accountability Program.

The Operations and Programs account provides the necessary resources to support program and administrative activities for motor carrier safety. The Federal Motor Carrier Safety Administration (FMCSA) will continue to improve safety and reduce severe and fatal commercial motor vehicles crashes by raising the bar to entry into the commercial motor vehicle industry, by requiring operators to maintain standards to remain in the industry, and by removing high-risk carriers, vehicles, drivers and service providers from operation. Funding supports nationwide motor carrier safety and consumer enforcement efforts, including the continuation of the Compliance, Safety and Accountability Program; regulation and enforcement of movers of household goods, and Federal safety enforcement activities at the borders to ensure that foreign-domiciled carriers entering the U.S. are in compliance with FMCSA Regulations. Resources are also provided to fund regulatory development and implementation, investment in research and technology, and safety outreach and education. The 2017 funding request reflects FMCSA's requirements to fund critical safety and operational facility improvements at border and domestic posts, fund important safety and safety mission support training for FMCSA staff, and to support the effective implementation of FMCSA's programs through the implementation of FMCSA's Program Integration Office.

The Vehicle Safety programs support activities to reduce highway fatalities, prevent injuries, and reduce their associated economic toll by research into, and implementation of, Federal motor vehicle safety standards. NHTSA's research areas include biomechanics, crash avoidance and mitigation technologies, and vehicle safety issues related to fuel efficiency and alternative fuels. NHTSA's Operation and Research programs fund a broad range of initiatives, including promulgation of Federal motor vehicle safety standards for motor vehicles and safety related equipment; automotive fuel economy standards required by the Energy Policy and Conservation Act, as amended by the Energy Independence and Security Act of 2007; international harmonization of vehicle standards; and consumer information on motor vehicle safety, including the New Car Assessment Program. NHTSA conducts compliance programs for motor vehicle safety and automotive fuel economy standards; investigations of safety-related motor vehicle defects; enforcement of Federal odometer law; support of enforcement of State odometer law; and safety recalls when warranted. Motor vehicle safety research and development supports NHTSA programs through the collection and analysis of crash data to identify safety problems, development of alternative solutions, and assessments of costs, benefits, and effectiveness. Research continues on standards and technologies to improve vehicle crashworthiness and crash avoidance, with emphasis on reducing crashes through vehicle-to-vehicle communication system and active safety technologies.

No funds are requested in this account for 2017. The Administration is proposing funding for these programs within the multi-year clean transportation plan. As part of that proposal, programs currently administered from this account would be continued in an Operations and Research account that would be funded from the Highway Account of the Transportation Trust Fund.

The 2017 Budget presents the National Highway Traffic Safety Administration's program and account structure. The Administration proposes to fund this account from the Highway Account of the Transportation Trust Fund.

The Highway Safety Research and Development programs support research, demonstrations, technical assistance, and national leadership for highway safety programs conducted by State and local governments, and various safety associations and organizations. These programs emphasize alcohol and drug countermeasures, driver and passenger occupant protection, traffic enforcement and justice services, emergency medical and trauma care systems, traffic records and licensing, State and community evaluation, motorcycle rider safety, pedestrian and bicycle safety, pupil

transportation, young and older driver safety, and development of improved accident investigation procedures.

NHTSA will continue its efforts to further quantify the magnitude and nature of the emerging problem of distracted driving, assess the impact of distraction on driver behavior and driving performance, and inform public attitudes and opinions about distraction. In addition, NHTSA will continue to analyze the impact of product design on the potential for driver distraction, and assess how to effectively manage driver workload to reduce distraction.

NHTSA will continue to operate the National Driver Register's Problem Driver Pointer System, which helps to identify drivers who have been suspended for or convicted of serious traffic offenses, such as driving under the influence of alcohol or other drugs. Finally, NHTSA will improve its vital data collection and analysis which form the basis of its research, rulemaking, and performance measurement activities.

The 2017 Budget presents the National Highway Traffic Safety Administration's clean transportation plan proposal and account structure, including the creation of a new Operations and Research account. The Administration proposes to fund this account from the Highway Account of the Transportation Trust Fund.

The 2017 Budget request includes \$250 million for this account. For 2017, this account's programs include:

The Vehicle Safety programs support activities to reduce highway fatalities, prevent injuries, and reduce their associated economic toll by research into, and implementation of, Federal motor vehicle safety standards. NHTSA's research areas include biomechanics, crash avoidance and mitigation technologies, and vehicle safety issues related to fuel efficiency and alternative fuels. NHTSA's Operation and Research programs fund a broad range of initiatives, including promulgation of Federal motor vehicle safety standards for motor vehicles and safety related equipment; automotive fuel economy standards required by the Energy Policy and Conservation Act, as amended by the Energy Independence and Security Act of 2007; international harmonization of vehicle standards; and consumer information on motor vehicle safety, including the New Car Assessment Program. NHTSA conducts compliance programs for motor vehicle safety and automotive fuel economy standards; investigations of safety-related motor vehicle defects; enforcement of Federal odometer law; support of enforcement of State odometer law; and safety recalls when warranted. Motor vehicle safety research and development supports NHTSA programs through the collection and analysis of crash data to identify safety problems, development of alternative solutions, and assessments of costs, benefits, and effectiveness. Research continues on stand-

ards and technologies to improve vehicle crashworthiness and crash avoidance, with emphasis on reducing crashes through vehicle-to-vehicle communication system and active safety technologies.

The Administration proposes to move a number of current General Fund programs into the Transportation Trust Fund, as part of the multi-year clean transportation plan proposal. Amounts reflected in this schedule represent the new mandatory contract authority and outlays supporting these programs. PAYGO costs will be calculated as the change between these amounts and reclassified baseline amounts in the existing General Fund accounts.

The 2017 Budget presents the National Highway Traffic Safety Administration's program and account structure. The Administration proposes to fund this account from the Highway Account of the Transportation Trust Fund.

NHTSA provides grants to States for activities related to the promotion of highway traffic safety. The Fixing America's Surface Transportation Act provided multi-year surface transportation authorization legislation. For the 2017 Budget the agency is projected to receive \$585.372 million for these grant programs to remain available until expended. Under Section 402, the agency supports State highway safety programs, approved by the Secretary, which are designed to reduce traffic accidents and the resulting deaths, injuries and property damage. The agency will continue to implement and promote the use of performance measures and targets as a condition of approval in these programs and to ensure efficient and effective use of funds. The agency also will use dedicated funds from the program to support high visibility enforcement campaigns in the States that promote the use of seat belts and the reduction of drunk driving. Under Section 405, the agency will make grant awards to States that focus on specific national priority traffic safety areas aimed at reducing highway deaths and injuries. The agency will make grants to States that develop qualifying plans and complying laws in accordance with the statutory criteria. The focus areas under the grant program include occupant protection, state traffic safety information system improvements, impaired driving countermeasures, distracted driving, motorcyclist safety, state graduated driving licensing and non motorized safety programs.

Funding requested in the Railroad Research and Development Program is focused on improving railroad safety. It provides scientific and engineering support for the Federal Railroad Administration's rail safety rulemaking and enforcement efforts. It also identifies and develops emerging technologies for the rail industry to adopt voluntarily. The outcomes of the research and development reduced accidents and incidents. The program also supports intercity passenger rail development by providing technical assistance, equipment specifications, proposal evaluations and Buy America compliance. In addition to improving safety, the program contributes significantly towards achieving the Department of Transportation's (DOT) other strategic goals, e.g., state of good repair.

The program focuses on the following areas of research:

- Track Program.*—Reducing derailments due to track related causes.
- Rolling Stock Program.*—Reducing derailments due to equipment failures, to minimize the consequences of derailments, and to minimize hazardous material releases.
- Train Control and Communication.*—Reducing train to train collisions and train collisions with objects on the line of grade crossings.
- Human Factors Program.*—Reducing accidents caused by human error.
- Railroad System Issues Program.*—Prioritizing Research and Development (R&D) projects on the basis of relevance to safety risk reduction and other DOT goals.

Funds are used to redevelop the Pennsylvania Station in New York City, which involves renovating the James A. Farley Post Office building. Funding for this project was included in the Grants to the National Railroad Passenger Corporation appropriation in 1995 through 1997, and the Northeast Corridor Improvement Program in 1998. In 2000, FRA received an advance appropriation of \$20 million for 2001, 2002, and 2003. In 2001, the Congress specified that the \$20 million advance appropriation for the Farley Building be used exclusively for fire and life safety initiatives. No new funds are requested for this program in 2017.

The National Railroad Passenger Corporation (Amtrak) was established in 1970 through the Rail Passenger Service Act. Amtrak is operated and managed as a for-profit corporation with all Board members appointed by the President, with the advice and consent of the Senate. Amtrak is not an

GRANTS TO THE NATIONAL RAILROAD PASSENGER CORPORATION—Continued  
agency or instrument of the U.S. Government, although since the railroad's creation FRA has provided it annual grants for operating and capital costs.

Prior to 2006, FRA received annual appropriations in this account for grants to Amtrak. Since that time, FRA has received individual appropriations for capital, operating, and efficiency incentive grants.

In addition, the American Recovery and Reinvestment Act of 2009 (Recovery Act) provided \$1.3 billion to Amtrak for capital grants, of which \$450 million was for improving security and \$850 million was for improving infrastructure.

In 2013, FRA received \$112 million in this account from the Disaster Relief Appropriations Act of FY 2013 (P.L. 113–2) to fund Amtrak's recovery from Super storm Sandy, including \$30 million for repair work and \$81 million for disaster mitigation projects. FRA also received a \$185 million transfer from the Federal Transit Administration for the Hudson Yards disaster resiliency project in New York City. No funds are requested for this account for 2017.

The Federal Railroad Administration receives appropriations to this account to make quarterly grants to the National Railroad Passenger Corporation for the operation of intercity passenger rail.

No funds are requested for this account in 2017. The Administration is proposing funding for these programs within the multi-year clean transportation plan proposal. As part of that proposal, programs currently administered from this account would be continued in a new Current Passenger Rail Service account that would be funded from the Rail Account of the Transportation Trust Fund.

This competitive grant program encourages state participation in passenger rail service. Under this program, a State or States may apply for grants for up to 50 percent of the cost of capital investments necessary to support improved intercity passenger rail service that either requires no operating subsidy or for which the State or States agree to provide any needed operating subsidy. To qualify for funding, States must include intercity passenger rail service as an integral part of statewide transportation planning as required under 23 U.S.C. 135. Additionally, the specific project must be on the Statewide Transportation Improvement Plan at the time of application.

No new funds are requested for this program in 2017.

This program provided funds to continue the upgrade of passenger rail service in the corridor between Washington, District of Columbia, and Boston, Massachusetts. Since 2001, capital funding has been provided in the National Railroad Passenger Corporation (Amtrak) appropriation. For 2016, \$19 million was provided for grants to Amtrak for shared use infra-

structure on the Northeast Corridor identified in the Northeast Corridor Operations Advisory Commission's 5 year capital plan. No funds are requested for this account in 2017. The Administration is proposing funding for these programs within the multi-year clean transportation plan proposal. As part of that proposal, programs currently administered from this account would be continued in a new Current Passenger Rail Account account that would be funded from the Rail Account of the Transportation Trust Fund.

The Railroad Safety Technology Program is a competitive grant program for the deployment of train control technologies to passenger and freight rail carriers, railroad suppliers, and State and local governments. Projects may include the deployment of train control technologies, train control component technologies, processor-based technologies, electronically controlled pneumatic brakes, rail integrity inspection systems, rail integrity warning systems, switch position indicators and monitors, remote control power switch technologies, track integrity circuit technologies, and other new technologies that improve the safety of railroad systems.

FRA has given priority to projects that make technologies interoperable between railroad systems; accelerate the deployment of train control technology on high risk corridors, such as those that have high volumes of hazardous materials shipments, or over which commuter or passenger trains operate; or benefit both passenger and freight safety and efficiency.

No new funds are requested in this account for fiscal year 2017.

The Transportation Equity Act of the 21st Century of 1998 established the Railroad Rehabilitation and Improvement Financing loan and loan guarantee program. The Safe, Accountable, Flexible, Efficient Transportation Equity Act of 2005: A Legacy for Users, changed the program to allow FRA to issue direct loan and loan guarantees up to \$35,000,000,000, and it required that no less than \$7,000,000,000 be reserved for projects primarily benefiting freight railroads other than Class I carriers. The program was expanded by the Rail Safety Improvement Act of 2008 and again by the Fixing America's Surface Transportation Act in 2015. The funding may be used: (1) to acquire, improve, or rehabilitate intermodal or rail equipment or facilities, including track, components of track, bridges, yards, buildings, or shops; (2) to refinance debt; or (3) to develop and establish new intermodal or railroad facilities, (4) to reimburse related planning and design expenses; (5) and to finance (by December 2019) certain economic development related to passenger rail stations. For 2016, \$1.96 million was made available to assist Class II and Class III railroads to applicant expenses in preparing to apply and applying for direct loans and loan guarantees.

CURRENT PASSENGER RAIL SERVICE—Continued

The 2017 budget presents the Federal Railroad Administration (FRA) proposed reauthorization program account structure, including the creation of a new Current Passenger Rail Service account. The Administration proposes to fund this account from the Rail Account of the Transportation Trust Fund (TTF). Through the Current Passenger Rail Service program, FRA will make grants according to the authorities provided in the Fixing America's Surface Transportation (FAST) Act, specifically FAST Act Sections 11101 and 11103. Section 11101 authorizes Grants to Amtrak including grants for the Northeast Corridor and the National Network, which includes Amtrak's state-supported routes, long-distance routes, and other Amtrak costs not allocated to the Northeast Corridor. Section 11103 authorizes FRA to make grants under the Federal State Partnership for State of Good Repair program to bring publicly-owned or Amtrak-owned infrastructure, equipment, and facilities into a state of good repair. The 2017 Budget includes \$1.9 million for Grants to Amtrak and \$400 million for Federal State Partnership for State of Good Repair.

The Administration proposes to move a number of current General Fund programs into the Transportation Trust Fund, as part of the multi-year clean transportation plan proposal. Amounts reflected in this schedule represent the new mandatory contract authority and outlays supporting these programs. PAYGO costs will be calculated as the change between these amounts and reclassified baseline amounts in the existing General Fund accounts.

FEDERAL TRANSIT ADMINISTRATION

The Federal Transit Administration (FTA) provides grant funding to State and local governments, public and private transit operators and other recipients to enhance public transportation across the United States. FTA programs fund the construction of new public transit systems, purchase and maintain transit vehicles and equipment, subsidize limited public transit operations, support regional transportation planning efforts, and improve technology and service methods critical to the delivery of public transportation. In 2015, a new five year surface transportation authorization law was enacted—Fixing America's Surface Transportation Act or the FAST Act. The FAST Act provides steady and predictable funding for five years and a renewed focus on reinvesting in and modernizing transit assets to help bring transit systems throughout the country into a state of good repair.

FTA's budget proposal builds on the successes of the previous authorization of MAP-21 and includes new features in the FAST Act. The account structure is generally comparable to FTA's funding under MAP-21, except where Congress consolidated programs in other accounts and moved them into the Transit Formula Grants account. The Administration proposes \$19.9 billion for FTA in 2017. This proposal includes \$9.7 billion to support FTA's base formula programs that provide assistance to transit agencies in both urban and rural areas, with an additional investment in programs improving the state of good repair of rail transit and recapitalizing bus and bus facilities through a new discretionary grant program. The budget request also includes funding to help finance the installation of positive train control systems for eligible transit providers. The Administration proposes \$ 3.5 billion in new budget authority for Capital Investment Grants, to support new fixed guideway investments (New Starts and Small Starts) as well as

projects aimed at improving or restoring the core capacity of existing fixed guideway systems. Within the total, the Budget proposes \$6.4 billion in resources for FTA programs in the 21st Century Clean Transportation Plan Investments account.

The Administration's proposal demonstrates a strong commitment to build on the strengths of MAP-21 to improve the condition and safety of transit while enhancing economic opportunities in communities and the quality of life for all Americans. The table below presents actual funding enacted for 2015 and 2016 and the requested 2017 funding. Additional detail is provided in the program budget schedules that follow.

The Federal Transit Administration's (FTA) Administrative Expenses appropriation provides resources for salaries, benefits, and administrative expenses for 560 full-time equivalents employees (FTEs) to carry out the Agency's stewardship of over \$19.9 billion in Federal funds. Priorities for the 2017 Administrative Expenses appropriation include enhancement of the Office of Safety and Oversight's workforce to strengthen and expand the framework of the robust State Safety Oversight Program and Safety for all modes of transit, including Accident Investigation Oversight; the implementation of the FAST Act to include required rulemakings, policy updates, and strategic planning; the provision of technical assistance to grantees during project development and program implementation; Capital Project Management Oversight and grantee compliance; and support for Transit Asset Management activities, which includes developing objective standards to measure capital asset condition and collecting data on the asset condition of the FTA grantees. No funds are requested in this account for 2017. The Administration is proposing funding for these programs within the multi-year clean transportation plan proposal. As part of that proposal, programs currently administered from this account will be continued in a new Administrative Expenses account that will be funded from the Mass Transit Account of the Transportation Trust Fund.

The Federal Transit Administration's (FTA) Capital Investment Grants program is designed to increase the capacity of local transit networks and to meet ridership demands in communities across the nation. These objectives of this program are accomplished by supporting the construction of

new fixed guideway systems or extensions to fixed guideways, corridor-based bus rapid transit systems, and core capacity improvement projects. These projects include heavy rail, light rail, commuter rail, bus rapid transit, ferries, and streetcar systems. FTA allocates resources to grantees through a multi-year, multi-step competitive process. Prior to funding, each project is required to obtain an acceptable rating under a set of statutorily defined criteria that examine project merit and local financial commitment. No funds are requested in this account for 2017. The Administration is proposing funding for these programs within the multi-year clean transportation plan proposal. As part of that proposal, programs currently administered from this account would be continued in a new Capital Investment Grants account that would be funded from the Mass Transit Account of the Transportation Trust Fund.

The Public Transportation Emergency Relief Program helps transit agencies restore needed transportation services immediately following disaster events. Both capital and operating costs are eligible for funding following an emergency; however, this program does not replace the Federal Emergency Management Agency's capital assistance program. FTA administers the \$10.9 billion supplemental appropriation (adjusted to \$10.2 billion after sequestration and the transfer of funds to the Office of the Inspector General and the Federal Railroad Administration) provided by the Disaster Relief Appropriations Act, 2013 (Public Law 113-2) following Hurricane Sandy through this account. The Hurricane Sandy funds are only available for emergency relief, recovery and resiliency projects in the areas impacted by Hurricane Sandy. No funds are requested in this account for 2017.

The American Recovery and Reinvestment Act of 2009 provided \$6.9 billion to fund transit capital assistance to create jobs to bolster the American economy. Transit capital assistance was provided through urbanized area formula grants, non-urbanized area formula grants, and discretionary Tribal Transit grants. Funds were used for eligible capital projects, preventive maintenance, and to purchase buses and rail rolling stock. Funds were also used for a new discretionary grant program, Transportation Investments in Greenhouse Gas and Energy Reduction, to increase the use of environmentally sustainable operations in the public transportation sector. This schedule shows the obligation and outlay of remaining amounts made available for administration and oversight of these formula apportionments and discretionary grant awards and the associated capital and preventive maintenance projects and vehicle procurements.

The 2017 Budget presents the Federal Transit Administration's (FTA) clean transportation plan proposal and account structure, including the creation of a new Capital Investment Grants account. The Administration proposes to fund this account from the Mass Transit Account of the Transportation Trust Fund.

The 2017 Budget request includes \$3.5 billion for this account to increase the capacity of the nation's transit network and to meet ridership demands in many communities. This is accomplished by supporting the construction of new fixed guideway systems or extensions to fixed guideways, corridor-based bus rapid transit systems, and core capacity improvement projects. These projects include heavy rail, light rail, commuter rail, bus rapid transit, and streetcar systems that are administered by communities across the country. FTA allocates resources to grantees through a multi-year, multi-step competitive process. Prior to funding, each project is required to obtain an acceptable rating under a set of statutorily defined criteria that examine project merit and local financial commitment.

The Administration proposes to move a number of current General Fund programs into the Transportation Trust Fund, as part of the multi-year clean transportation plan proposal. Amounts reflected in this schedule represent the new mandatory contract authority and outlays supporting these programs. PAYGO costs will be calculated as the change between these amounts and reclassified baseline amounts in the existing General Fund accounts.

The 2017 Budget presents the Federal Transit Administration's clean transportation plan proposal and account structure, including the creation of a new Administrative Expenses account. The Administration proposes to fund this account from the Mass Transit Account of the Transportation Trust Fund.

The 2017 Budget requests \$115 million for salaries, benefits and administrative expenses for 560 full-time equivalents employees (FTEs) to carry out the Agency's stewardship of over \$19.9 billion in Federal funds. Priorities for the 2017 Administrative Expenses appropriation include enhancement of the Office of Safety and Oversight's workforce to strengthen and expand the framework of the robust State Safety Oversight Program and Safety of all modes of transit, including Accident Investigation Oversight; the implementation of the FAST Act to include required rulemakings, policy updates, and strategic planning; the provision of technical assistance to grantees during project development and program implementation; Capital Project Management Oversight and grantee compliance; and support

FTA's 2017 budget request builds upon the successes of the previous authorization, MAP-21, which provided two years of stable funding for transit programs. The account structure is generally comparable to FTA's funding under MAP-21. The Transit Formula Grants account is funded from the Mass Transit Account of the Transportation Trust Fund.

Transit Formula Grants funds can be used for transit capital purposes including bus and rail car purchases, facility repair and construction, as well as maintenance, and where eligible, planning and operating expenses. These funds help existing transit systems provide safe and reliable transportation options, and promote economically vibrant communities. The 2017 Budget request includes \$9.734 billion for Transit Formula Grants. The 2017 formula grant program structure includes:

*Urbanized Area Formula.*—\$4.630 billion. For formula grants to urbanized areas with populations of 50,000 or more. Funds may be used for any

transit capital purpose. Operating costs continue to be eligible expenses for all urban areas under 200,000 in population; and, in certain circumstances, operating costs may be eligible expenses in urban areas with populations over 200,000. Additionally, Urbanized Area grants may be used to support Job Access and Reverse Commute activities.

**State Safety Oversight Program.**—\$23 million. Each State with rail systems not regulated by the Federal Railroad Administration (FRA) will meet requirements for a State Safety Oversight (SSO) program. To aid grantees in meeting new requirements, funding will be provided by a formula developed by FTA based on revenue miles, route miles, and passenger miles. The maximum Federal share for these grants is 80 percent.

**State of Good Repair Grants.**—\$2.550 billion. For a formula-based capital maintenance program to restore and replace aging transportation infrastructure through reinvestment in existing fixed guideway systems and buses on high occupancy vehicle (HOV) lanes.

**Rural Area Formula.**—\$632 million. For formula grants to provide funds for capital, planning and operating assistance grants for transit service implemented by States in rural areas with populations of less than 50,000. Funding may also be used to support intercity bus service. Additionally, Rural Area grants may be used to support Job Access and Reverse Commute activities. Within this amount, \$30 million in formula funds and \$5 million in discretionary grant funds will support the Public Transportation on Indian Reservations program and \$20 million will support the Appalachian Development Public Transportation Assistance Formula Program.

**Growing States and High Density States.**—\$544 million. For funds that are divided between the Urban and Rural Area programs based on the legislative funding formula for this program.

**Enhanced Mobility of Seniors and Individuals with Disabilities.**—\$268 million. Supports local governments and public and private transportation providers that serve special needs of these specific transit-dependent populations beyond traditional public transportation services, including complementary paratransit service.

**Bus and Bus Facilities Grants.**—\$720 million. For formula funding (61%) and discretionary funding (39%) to replace, rehabilitate, and purchase buses and related equipment, and to construct bus-related facilities States may use these funds to supplement Urbanized Area and Rural Area formula grant programs. Funding also supports low and zero emission bus and bus facilities.

**Bus Testing Facility.**—\$3 million. Funding supports a facility where all new bus models purchased using FTA capital assistance will be tested for compliance with performance standards for safety, structural integrity, reliability, performance (including braking performance) maintainability, emissions, noise and fuel economy. FTA must develop a Pass/Fail rating system for buses. FTA grantees will not be able use Federal funds to purchase buses that do not receive a "pass" rating.

**Planning Programs.**—\$133 million. Funding supports cooperative, continuous, and comprehensive transportation infrastructure investment planning. The program requires that all Metropolitan Planning Organizations (MPOs), and States, develop performance-driven, outcome-based transportation plans.

**Transit Oriented Development Pilot.**—\$10 million. This pilot program funds planning for projects that support transit-oriented development associated with new fixed-guideway and core capacity improvement projects.

**National Transit Institute.**—\$5 million. To fund projects that enable FTA to partner with higher education to develop and provide training and educational programs to transit employees and others engaged in providing public transit services.

**National Transit Data Base (NTD).**—\$4 million. For operation and maintenance of the NTD, a database of nationwide statistics on the transit industry, which FTA is legally required to maintain under 49 U.S.C. 5335(a)(1)(2). NTD data serves as the basis for FTA formula grant apportionments and is used to track the condition and performance of our Nation's transit infrastructure.

**Positive Train Control.**—\$199 million. For financing the installation of positive train control systems required under section 20157 of title 49, USC.

**Public Transportation Innovation.**—\$28 million. This program provides assistance for projects and activities to advance innovative public transportation research, demonstration, deployment and development and testing, evaluating and analyzing low or no emission vehicle components intended for use in low or no emission vehicles.

**Technical Assistance and Workforce Development.**—\$9 million. This program enables FTA to provide technical assistance to the public transportation industry and to develop stands for transit serve provision, with an emphasis on improving access for all individuals and transportation equity. Through this program, FTA is able to assist grantees to more effectively and efficiently provide public transportation and administer federal funding in compliance with the law.

**Pilot Program for Enhanced Mobility.**—\$3 million. This pilot program assists in financing innovative projects for the transportation disadvantaged that improve the coordination of transportation services and non-emergency medical transportation services.

The Pipeline and Hazardous Materials Safety Administration (PHMSA) is responsible for the Department's Pipeline Safety program. PHMSA provides safety oversight of the nation's 2.6 million miles of gas and hazardous liquid pipelines, which are owned and operated by private industry. PHMSA and its state pipeline safety partners use a data-driven process to identify pipelines and pipeline operators most at risk of failing. They combine to use regulation, inspection and enforcement to reduce the likelihood of harm failing pipelines would have on our communities and the environment.

The Pipeline Safety program encompasses data analysis; damage prevention; education and training; developing and enforcing regulations and standards; research and development; grants to support up to 80 percent of the cost of state pipeline safety programs; and emergency planning and response to accidents. PHMSA passes along nearly all of its operational costs to the pipeline industry through the assessment of fees and use of the Oil Spill Liability Trust Fund.

Federal hazardous materials law (49 U.S.C. 5101 et seq.) established a national registration program for shippers and carriers of hazardous materials in 1992. The law also established collection of fees from registrants. These fees finance emergency preparedness planning and training grants; development of training curriculum guidelines for emergency responders and technical assistance to states, political subdivisions, and American Indian tribes; publication and distribution of the Emergency Response Guidebook; and administrative costs for operating the program. The proposed changes to the appropriations language aligns with the FAST Act.

The Oil Pollution Act of 1990 requires the preparation of spill response plans by operators that store, handle or transport oil to minimize the environmental impact of oil spills and to improve public and private sector response. The Pipeline and Hazardous Materials Safety Administration (PHMSA) reviews response plans submitted by operators of onshore oil pipelines to ensure the plans comply with PHMSA regulations. These plans also must be regularly updated by the operator and submitted for subsequent review by PHMSA. PHMSA also seeks to improve oil spill preparedness and response through data analysis; spill monitoring; mapping pipelines in areas unusually sensitive to environmental damage; and advanced technologies to detect and prevent leaks from hazardous liquid pipelines. These and related activities are funded in part by the Oil Spill Liability Trust Fund.

The Ship Disposal program provides resources to properly dispose of obsolete government-owned merchant ships maintained by the Maritime Administration in the National Defense Reserve Fleet. The Maritime Administration contracts with domestic shipbreaking firms to dismantle these vessels in accordance with guidelines set forth by the U.S. Environmental Protection Agency. In 2017, the Ship Disposal program requests \$20 million which includes \$9 million to support continued obsolete vessel disposal, \$8 million to begin the decommissioning process of the Nuclear Ship (N.S.) Savannah, and \$3 million for maintaining the N.S. Savannah in protective storage.

The Maritime Security Program provides direct payments to U.S. flag ship operators engaged in foreign commerce to partially offset the higher operating costs of U.S. registry. The purpose of the program is to establish and sustain a fleet of active ships that are privately owned, commercially viable, and militarily useful to meet national defense and other emergency sealift requirements. Participating operators are required to make their

ships and commercial transportation resources available upon request by the Secretary of Defense during times of war or national emergency. Commercial transportation resources include ships, logistics management services, port terminal facilities, and U.S. citizen merchant mariners to crew both commercial and government-owned merchant ships. The 2017 Budget proposes to increase flexibility of P.L. 480 Title II to respond to food aid emergencies, which could, over time, reduce overall volumes of agricultural commodities available for transport on U.S.-flag vessels. The Maritime Administration requests \$186 million for the Maritime Security program base. Additionally, \$25 million is requested as a component of the proposal to allow more flexible responses to food aid crises, for support to mariners and vessel operators in foreign trade and to accelerate the training and credentialing of mariners in occupations deemed critical to sustain a balanced and capable U.S. citizen merchant marine.

This fund is authorized for the receipt of sales proceeds from the disposition of obsolete government-owned merchant vessels. The Maritime Administration is authorized to reactivate, maintain, operate, deactivate and dispose government-owned merchant vessels comprising the National Defense Reserve Fleet (NDRF) and the Ready Reserve Force (RRF), a subset of the NDRF. Resources for RRF vessel maintenance, preservation, activation and operation costs, as well as RRF infrastructure support costs and additional Department of Defense/Navy-sponsored sealift activities and special projects, are provided by transfer from the Department of Defense Operations and Maintenance, Navy account. Through fiscal year 2010, interagency agreement transactions to fund and administer these programs were reflected in this fund. Beginning in fiscal year 2011, these interagency agreement transactions are instead reflected in the RRF account. Direct appropriations for the disposal of obsolete government-owned merchant vessels are provided to the Ship Disposal account.

The Maritime Guaranteed Loan (Title XI) program provides for a full faith and credit guarantee of debt obligations issued by U.S or foreign ship owners to finance or refinance the construction, reconstruction, or reconditioning of U.S. flag vessels or eligible export vessels in U.S. shipyards; or for a full faith and credit guarantee of debt obligations issued by U.S.

shipyard owners to finance the modernization of shipbuilding technology at shipyards located in the United States.

As required by the Federal Credit Reform Act of 1990, this account also includes the subsidy costs associated with loan guarantee commitments made in 1992 and subsequent years which are estimated on a present value basis. The account also reflects the administrative expenses of the program which are estimated on a cash basis. Funds for administrative expenses are appropriated to this account, then paid to the Maritime Administration's Operations and Training account. This appropriation will provide \$3 million in resources for the administrative expenses of the program, including management of the loan portfolio which has \$1.4 billion in loan guarantees and approximately 30 guarantee contracts.

The Department of the Treasury is of enormous importance to the national and world economy, with trillions of dollars flowing through its information systems—several of which the Administration's Cybersecurity Strategy and Implementation Plan identified as High Value Assets. As a result, Treasury is a constant target for sophisticated threat actors. To protect against these threats in a proactive and strategic way, the Budget proposes the creation of a centralized Cybersecurity Enhancement Account. A team, led by the Deputy Secretary, will centrally manage the account which includes initiatives with Department-wide and Bureau-specific impacts as well as expanding the public-private partnership with the financial services sector. For example, the account proposes Department-wide investments for critical improvements to the Treasury Secure Data Network and Bureau-specific investments for the Internal Revenue Service to bolster network security, protect and safeguard sensitive taxpayer information, and improve fraud detection and prevention. This centralization of funds will allow Treasury to leverage enterprise-wide services and capabilities across the Department.

**PAY FOR SUCCESS**

The Budget proposes a \$300 million one-time mandatory appropriation for a new Pay for Success (PFS) program in the Department of the Treasury. This program will support the growing number of state and local governments seeking to establish PFS projects that leverage private investment to provide preventive social services that measurably improve outcomes for families and communities while generating value to the Government, including savings. The program's focus on measurable outcomes will encourage innovation and accelerate the use of evidence-based approaches. The program will provide credit enhancements and results-based payments to eligible intermediaries, including state and local governments. This support will enable state and local governments to attract additional investment in services that result in Federal, state, and local government savings and will lower and share the risk associated with initial private investments. The PFS Incentive Fund will help to strengthen the ability of state and

local governments, and it will support the evolution of this nascent field into a more robust and sustainable public and private market.

FINANCING AMERICA'S INFRASTRUCTURE RENEWAL (FAIR) PROGRAM

The Budget proposes to establish a new Federal credit program within the Department of the Treasury that would provide direct loans to U.S. infrastructure projects developed through a public-private partnership (P3). The program seeks to reduce the financing cost gap between P3s and traditional procurement, which will level the playing field for P3s and encourage the public sector, including state and local governments, to evaluate the merits of P3s for a given project.

While P3s are not a solution to the Nation's overall infrastructure funding needs, which continue to deserve greater Federal investment, they may generate certain public benefits. P3s are a financing and procurement tool that, in some circumstances, can accelerate the delivery of complex projects, leverage the resources and expertise of the private sector, mitigate construction and operational risks to the public sector, and reduce the likelihood of deferred maintenance on a project.

Eligible projects under the program will encompass the transportation, water, energy, and broadband sectors, as well as certain social infrastructure, such as educational facilities. The Budget estimates that the FAIR program

will provide \$15 billion in direct loans with no taxpayer subsidy from 2018 to 2026. Administrative costs for the program are estimated to be \$2 million annually from 2017 to 2026.

The Office of Inspector General (OIG) conducts audits, investigations, and reviews designed to: (1) promote integrity, efficiency, and effectiveness in programs and operations within the Department and across the OIG's jurisdiction; and (2) keep the Secretary and the Congress fully and currently informed of problems and deficiencies in the administration of Departmental programs and operations. The OIG conducts audits, investigations, and reviews of Treasury programs and operations except those under jurisdictional oversight of the Treasury Inspector General for Tax Administration and the Special Inspector General for the Troubled Asset Relief Program. Additionally, the Treasury Inspector General functions as the Chair of the Council of Inspectors General on Financial Oversight. Finally, the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act (RESTORE Act) tasked the OIG

with providing oversight of all projects, programs, and operations of the Gulf Coast Restoration Trust Fund.

The 2017 request for the OIG will be used to fund critical audit, investigative, and other mission support activities to meet the requirements of the Inspector General Act, and a number of other statutes including, but not limited to, the Dodd-Frank Wall Street Reform and Consumer Protection Act, Federal Information Security Management Act (FISMA), Government Management Reform Act, Improper Payments Elimination and Recovery Act, Digital Accountability and Transparency Act of 2014, Federal Deposit Insurance Act, Small Business Jobs Act of 2010, and the RESTORE Act. Specific mandates include audits of the Department's financial statements, the Department's compliance with FISMA, and failed insured depository institutions regulated by Treasury. With the resources available after mandated requirements are met, the OIG will conduct audits and reviews of the Department's highest risk programs and operations such as: (1) cybersecurity threats; (2) management of Treasury's authorities intended to support and improve the economy; (3) efforts to promote spending transparency and to prevent and detect improper payments; (4) anti-money laundering and terrorist financing/Bank Secrecy Act Enforcement; and (5) Gulf Coast Restoration Trust Fund Administration. The OIG will also respond to stakeholder requests for specific work as appropriate.

The Office of Audit expects to complete 100 percent of statutory audits by the required deadline and to complete 86 audit products in 2017. The Office will continue to provide oversight, on a reimbursable basis, of the Small Business Lending Fund and the State Small Business Credit Initiative. The programs were created by the Small Business Jobs Act of 2010 and assigned to the Department of the Treasury for management and execution.

In 2017, the OIG Office of Investigations will continue to investigate all reports of fraud, waste, and abuse and other criminal activity, such as financial programs where fraud and other crimes are involved in the issuance of licenses or benefits to citizens, and will conduct proactive efforts to detect, investigate, and deter electronic crimes and other threats to Treasury's physical and IT critical infrastructure. The Office of Investigations will continue current efforts to aggressively investigate, close, and refer cases for criminal prosecution, civil litigation, or corrective administrative action in a timely manner.

The Treasury Inspector General for Tax Administration (TIGTA) conducts independent audits, investigations, and inspections and evaluations of

Treasury Department matters relating to the Internal Revenue Service (IRS), the IRS Oversight Board, and the IRS Office of Chief Counsel. TIGTA's oversight helps ensure that the IRS accomplishes its mission; improves its programs and operations; promotes economy, efficiency, and effectiveness; and prevents and detects fraud, waste, and abuse. TIGTA also continues to play a key role in ensuring the provisions of the Affordable Care Act are implemented and administered in accordance with the law and the intent of Congress.

In 2017, TIGTA's Office of Investigations will concentrate on three core areas: (1) employee integrity; (2) employee and infrastructure security; and (3) external attempts to corrupt tax administration. As the principal law enforcement agency responsible for protecting the integrity of tax administration, Investigations seeks to protect the IRS's ability to process approximately 242 million tax returns and collect over \$3.1 trillion in annual revenue for the Federal Government by investigating IRS employee misconduct and criminal activity, threats to IRS employees and facilities, and attempts to impede with the IRS's collection efforts.

In 2017, TIGTA's Office of Audit (OA) will focus on the major management and performance challenges and key issues confronting the IRS by balancing statutory audit coverage and high-risk audit work. The statutory coverage will include audits mandated by the IRS Restructuring and Reform Act of 1998 and other statutory authorities and standards involving computer security, taxpayer privacy and rights, and financial management. The remaining balance of TIGTA's audit work will focus on high-risk tax administration areas and the IRS's progress in achieving its strategic goals. Audits will address areas of concern to Congress, the Secretary of the Treasury, and the IRS Commissioner. OA's 2015 highlights include issuing 92 audit reports, and approximately \$26.6 billion in potential financial benefits.

In 2017, TIGTA's Office of Inspections and Evaluations (I&E) will conduct strategic reviews targeting specific tax administration problems. I&E provides responsive, timely, and cost-effective inspections and evaluations of challenging areas in IRS programs. I&E's oversight activities include inspecting IRS's compliance with established system controls and operating procedures and evaluating IRS operations for high-risk systemic inefficiencies.

The Terrorism Risk Insurance Program Reauthorization Act of 2015 (P.L. 114-1) reauthorized and revised the program established by the Terrorism Risk Insurance Act (TRIA) of 2002 (P.L. 107-297). The 2015 Act extended the Terrorism Risk Insurance Program for six years, through December 31, 2020, and made several program changes to reduce the potential costs associated with Federal payments of terrorism risk insurance losses under the Program. The Budget baseline includes the estimated Federal cost of providing payments in connection with terrorism risk insurance losses, reflecting the Program changes under the 2015 TRIA extension. While the Budget does not forecast any specific act of terrorism, on a probabilistic basis and using market data, the Budget baseline projects net spending of \$0.233 billion for 2017, \$1.404 billion over the 2017-2021 period, and \$1.183 billion over the 2017-2026 period.

The mission of the Treasury Forfeiture Fund (Fund) is to influence the consistent and strategic use of asset forfeiture by participating agencies to disrupt and dismantle criminal enterprises. The Fund supports Federal, state, and local law enforcement's use of asset forfeiture to punish and deter criminal activity. Proceeds from non-tax forfeitures made by participating bureaus of the Department of the Treasury and the Department of Homeland Security are deposited into the Fund and are available to pay or reimburse certain costs and expenses related to seizures and forfeitures that occur pursuant to laws enforced by the bureaus and other expenses authorized by 31 U.S.C. 9705. Forfeiture proceeds can also be used to fund Federal law enforcement related activities based on requests from Federal agencies and evaluation by the Secretary of the Treasury. The Budget proposes to permanently cancel \$657 million of unobligated balances.

The Office of Financial Research (OFR) and the Financial Stability Oversight Council (Council) were established under the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the Act) (P.L. 111-203).

The OFR was established to serve the Council, its member agencies, and the public by improving the quality, transparency, and accessibility of financial data and information, by conducting and sponsoring research related to financial stability, and by promoting best practices in risk management. The OFR is an office within the Department of the Treasury.

The OFR's public research products include an Annual Report, the OFR Working Papers, Staff Discussion Papers, and Briefs, as well as products for the Council that the Council may make public. These products are made available to the public on the OFR website. The OFR coordinates among the Council member agencies by facilitating data requests, promoting a culture of data sharing, and enhancing the quality, consistency, and usability of financial data available to member agencies. The products and services developed by the OFR are designed to provide both direct monetary and risk-reduction value to constituents.

The Council is comprised of 10 voting members, including all Federal financial regulators, and five non-voting members. The Secretary of the Treasury serves as Chair of the Council. The Council's purpose is to identify risks to the financial stability of the United States, promote market discipline, and respond to emerging threats to the stability of the U.S. financial system.

As required under Section 210(n)(10) of the Act, the Council's expenses also include reimbursements of certain reasonable implementation expenses incurred by the Federal Deposit Insurance Corporation in the development of policies, procedures, rules, and regulations and other planning activities consistent with carrying out Orderly Liquidation Authority provided by Title II of the Act. These expenses are treated as expenses of the Council, and are estimated at \$6.6 million in 2016 and \$9.5 million in 2017.

The OFR and the Council were funded through transfers from the Board of Governors of the Federal Reserve System until July 20, 2012. Subsequently, the OFR and the Council have been funded through assessments on certain bank holding companies with total consolidated assets of \$50 billion or greater and nonbank financial companies supervised by the Board of Governors. Expenses of the Council are considered expenses of, and are paid by, the OFR. OFR expenses are paid for out of the Financial Research Fund, which was established by the Act and which is managed by the Department of the Treasury. Projected fees and assessments are estimates and may change.

Individual Federal income tax returns include an optional Federal income tax designation of \$3 that an individual may elect to be paid to the Presidential Election Campaign Fund (PECF). In recent years, fewer than 7 percent of individuals have elected to make this designation, resulting in less than \$40 million being paid into the PECF annually. The Department of the Treasury collects the income tax designations and makes distributions from the PECF to qualified presidential candidates and, starting in 2014, to the Pediatric Research Initiative Fund at the National Institutes of Health (NIH). Money for the public funding of presidential elections can only come from the PECF; if the PECF were to exhaust its fund balances, no other public funding could be used.

The Federal Election Commission administers the public funding program, determining which candidates are eligible, the amount to which they are entitled, and auditing their use of funds. Current uses of the PECF are given below.

**Matching Funds for Presidential Primary Candidates.**— Upon certification by the Federal Election Commission—based on a demonstration of broad national support, adherence to spending limits, and other qualifica-

tions—every eligible presidential primary candidate is entitled to receive \$250 in Federal matching funds for the first eligible \$250 of private contributions received from an individual. The private contributions must be received after the beginning of the calendar year immediately preceding the election year through the end of the calendar year of the election.

**Candidates for General Elections.**—By statute, eligible candidates of each major party in a presidential election are entitled to equal payments in an amount that may not exceed \$20 million (adjusted for inflation since 1974) per party. In 2012, this amounted to \$91.2 million for each candidate, but neither major party candidate accepted general election funding. Eligibility for this funding depends on meeting several criteria, such as agreeing to limit spending to amounts specified by campaign finance laws. In addition, candidates from new parties, minor parties, and non-major parties who receive in excess of 5 percent of the popular vote may be entitled to a pro rata portion of the major party amount in the general election.

**Nominating Party Conventions.**—On April 3, 2014, the President signed into law the Gabriella Miller Kids First Research Act, P.L. 113–94. This Act amended the Internal Revenue Code to terminate the entitlement of any political party to a payment from the PECF for a presidential nominating convention. The Act also mandated the transfer of amounts in the PECF for nominating party conventions to a newly created 10-Year Pediatric Research Initiative Fund at NIH and authorized appropriations for the new Fund.

Under the law creating the Exchange Stabilization Fund (ESF), section 10 of the Gold Reserve Act of 1934, as amended, codified at 31 U.S.C.

5302, the Secretary of the Treasury, with the approval of the President, is authorized to deal in gold, foreign exchange, and other instruments of credit and securities, as the Secretary considers necessary, consistent with U.S. obligations in the International Monetary Fund (IMF) regarding orderly exchange arrangements and a stable system of exchange rates. All earnings and interest accruing to the ESF are available for the purposes thereof. Transactions in Special Drawing Rights (SDRs) and U.S. holdings of SDRs are administered by the fund. By law, the fund is not available to pay administrative expenses.

Since 1934, the principal sources of the fund's income have been earnings on investments held by the fund, including interest earned on fund holdings of U.S. Government securities.

The amounts reflected in the 2016 and 2017 estimates entail only projected net interest earnings on ESF assets. The estimates are subject to considerable variance, depending on changes in the amount and composition of assets and the interest rates applied to investments. In addition, these estimates make no attempt to forecast gains or losses on SDR valuation or foreign currency valuation.

The Treasury Franchise Fund (the Fund) was established by P.L. 104–208, made permanent by P.L. 108–447 and codified as 31 U.S.C. 322, note. The Fund is revolving in nature and provides accounting, procurement, travel, human resources, and information technology services through its three business lines: the Administrative Resource Center (ARC), Fiscal IT, and the Shared Services Program (SSP). SSP was transferred in from the Treasury Working Capital Fund on October 1, 2013. Services are provided to Federal customers on a reimbursable, fee-for-service basis. The 2017 Budget includes funding to reduce DATA Act implementation costs that ARC would otherwise have fully passed onto Federal customers.

Section 1603 of the American Recovery and Reinvestment Act of 2009 requires the Secretary of the Treasury to make payments in lieu of tax credits to entities that place in service specified energy property. This account presents the estimated disbursements for this program.

This program provides payments for specified energy property, which includes qualified facilities that produce electricity from wind, biomass, and certain other renewable resources; solar property; qualified fuel cell property; geothermal property; qualified microturbine property; combined heat and power system property; and geothermal heat pump property. Payments are available for property placed in service in 2009, 2010, or 2011. In some cases, if construction began in 2009, 2010, or 2011, the payment can be claimed for property placed in service before 2013, 2014, or 2017, depending on the type of property.

In general, projects that meet the eligibility criteria for the investment tax credit (ITC) are eligible for the payments. These projects include qualified renewable energy facilities that meet the eligibility criteria for the production tax credit and have elected to instead claim the ITC. An entity receiving a Section 1603 payment for specified energy property may not also claim the ITC or the production tax credit with respect to the same property. In the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 (P.L. 111–312), section 707(a) extended for one year, through 2011, the time within which certain eligible property must be placed in service or start construction.

The Community Development Financial Institutions (CDFI) Fund promotes economic and community development through investment in and assistance to CDFIs, which include community development banks, credit unions, loan funds, and venture capital funds, in order to expand the availability of financial services and affordable credit for underserved populations, including distressed urban, rural, Native American, Native Hawaiian, and Alaska Native communities.

The 2017 Budget provides funding for the CDFI Program, the Healthy Food Financing Initiative, the Native American CDFI Assistance Program, and the Bank Enterprise Award Program. The 2017 Budget also provides funding for the Small Dollar Loan Program, authorized by Section 1206 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (P.L. 111–203). This Program will support broader access to safe and affordable financial products and provide an alternative to predatory lending by encouraging CDFIs to establish and maintain small dollar loan programs.

The CDFI Fund's Bond Guarantee Program supports CDFI lending and investment activity by providing a source of long-term capital in low-income and underserved communities. The proceeds of guaranteed bonds spur job creation among small businesses and entrepreneurs, and provide needed financing for infrastructure development projects such as community facilities and affordable housing. The Budget proposes to extend the program's authorization, with an annual guarantee level not to exceed \$1 billion. The Budget also proposes reforms to the Bond Guarantee Program to increase participation and ensure credit-worthy CDFIs have access to this important source of capital while continuing to maintain strong protections against credit risk. The CDFI Bond Guarantee Program will continue to operate at no budgetary cost for new issuances.

The 2017 Budget proposes an increase of \$1 million in administrative funding for the development of the Community Development Impact Measuring Estimator (CDIME). This modeling tool will improve the data quality of reported social impact measures and will allow for more efficient funding through CDFI Fund programs.

FINANCIAL INNOVATION FOR WORKING FAMILIES FUND

The Budget proposes \$100 million for the Department of the Treasury to encourage the development of effective financial products that would help low- to moderate-income workers build up "rainy day" reserves. The reserves would provide these workers and their families with a buffer against shocks to income and spending needs. The program will fund grants and contracts to eligible competitors, including nonprofits, community banks, Community Development Financial Institutions, entrepreneurial incubators, financial intermediaries, financial service providers (depository and non-depository), and other businesses that offer appropriate products. Recipients would use the funds to develop and study new financial products designed to overcome barriers to working families saving. To ensure that the products meet the program's goals, demonstrations would be tied to strong evaluation plans. Demonstrations may include large-scale explorations of financial innovations with some existing track record.

The Emergency Economic Stabilization Act of 2008 (EESA) (P.L. 110-343) authorized the establishment of the Troubled Asset Relief Program (TARP) and the Office of Financial Stability (OFS) to purchase and insure certain types of troubled assets for the purpose of providing stability to and preventing disruption in the economy and financial systems and protecting taxpayers. The Act gives the Secretary of the Treasury broad and flexible authority to purchase and insure mortgages and other troubled assets, as well as inject capital by taking limited equity positions, as needed to stabilize the financial markets. This account provides for the administrative costs for the OFS, which oversees and manages the TARP.

The Making Home Affordable (MHA) initiative was launched in March 2009 under the authority of sections 101 and 109 of the Emergency Economic Stabilization Act of 2008, as amended (EESA) (P.L. 110-343). The centerpiece of MHA is its first lien modification program, the Home Affordable Modification Program (HAMP), which offers affordable and sustainable mortgage modifications to responsible homeowners at risk of losing their homes to foreclosure. In addition to HAMP, MHA includes other programs intended to help homeowners who are unemployed, "underwater" on their loan (i.e. those who owe more on their home than it is currently worth), or are struggling with a second lien. MHA also includes options for homeowners who would like to transition to a more affordable living situation through a short sale or deed-in-lieu of foreclosure. In December 2015, the Consolidated Appropriations Act, 2016 (P.L. 114-113) codified the current application deadline of December 31, 2016, for HAMP and other MHA programs. Additionally, State Housing Finance Agencies in 18 States and the District of Columbia that have been most heavily impacted by the housing crisis, have been allocated a total of \$7.6 billion under EESA through the Hardest Hit Fund (HHF) to initiate locally-tailored foreclosure prevention programs, which may include such programs as mortgage payment assistance for unemployed or underemployed homeowners, principal reduction to help homeowners get into more affordable mortgages, funding to eliminate homeowners' second lien loans, funding for blight elimination activities, funding for down payment assistance to homebuyers, and help for homeowners who are transitioning out of their homes into more affordable living situations. The Consolidated Appropriations Act, 2016, extended Treasury's authority under EESA to incur certain obligations for the HHF through December 31, 2017; Treasury expects to allocate \$2 billion in additional funds to currently participating jurisdictions in early 2016. Funds under EESA also support a Federal Housing Administration (FHA) refinance program that allows overleveraged homeowners to refinance into a new FHA-insured loan if their existing mortgage holders agree to a short refinance and to write down principal. The Office of the Special Inspector General for the Troubled Asset Relief Program (SIGTARP) was established by section 121 of the Emergency Economic Stabilization Act of 2008 (EESA) (P.L. 110-343). SIGTARP is the only agency solely charged with the mission to advance economic stability through transparency, coordinated oversight, and robust enforcement related to the Troubled Asset Relief Program (TARP). SIGTARP is a white-collar law enforcement agency and delivers accountability for TARP-related criminal and civil misconduct. SIGTARP investigates fraud, waste, and abuse related to TARP, thereby being a voice for, and protecting the interests of, taxpayers.

In 2017, SIGTARP will continue to design and conduct programmatic and forensic audits of TARP operations, as well as recipients' compliance with their obligations under relevant law and contract, to increase transparency and identify fraud, waste, and abuse. SIGTARP will also continue to conduct and supervise criminal and civil investigations into any parties suspected of fraud related to TARP.

SIGTARP received an initial appropriation of \$50 million in permanent, indefinite budget authority in EESA. The Public-Private Investment Program Improvement and Oversight Act of 2009 (12 U.S.C. 5231a) provided \$15 million in supplemental funding to conduct audits and investigations of TARP programs designed to restart the asset-backed securities markets. Since 2010, SIGTARP has received annual appropriations to fund its operations.

Enacted into law as part of the Small Business Jobs Act of 2010 (P.L. 111-240), the Small Business Lending Fund (SBLF) is a dedicated investment fund that encourages lending to small businesses by providing capital to qualified community banks and community development loan funds (CDLFs) with assets of less than \$10 billion. Through the SBLF, participating Main Street lenders and small businesses can work together to help create jobs and promote economic growth in local communities across the Nation.

In total, the SBLF provided \$4.0 billion to 332 community banks and CDLFs in 2011. Since these institutions leverage their capital, the SBLF could help increase lending to small businesses in an amount that is multiples of the total capital provided.

The account totals also include the costs of administering the program, estimated at \$13.4 million for 2017.

ALLOTMENT FOR PUERTO RICO EITC PAYMENTS

The Budget proposes a \$600 million annual allotment, indexed to inflation, to create a locally-administered refundable Earned Income Tax Credit (EITC) for residents of Puerto Rico. Unlike Americans living in the fifty states and the District of Columbia, residents of Puerto Rico are not eligible for an EITC. Given Puerto Rico's low labor force participation rate, the existence of an EITC should increase employment in Puerto Rico's official sector by providing higher incomes to workers who file taxes. This added incentive for participation in Puerto Rico's formal economy should also increase Puerto Rican tax compliance and tax revenues.

The Small Business Jobs Act of 2010 (P.L. 111-240) created the State Small Business Credit Initiative (SSBCI), which was funded with \$1.5 billion, inclusive of administrative costs, to strengthen state programs that leverage private lending and investing to help finance small businesses and manufacturers that are creditworthy, but are not getting the loans or investments they need to expand and create jobs. The SSBCI allows states flexibility to build on successful models for state small business programs, including collateral support programs, capital access programs, loan guarantee programs, loan participating programs, and venture capital programs. Since the passage of the Act, SSBCI has positively impacted small business access to capital and local economies around the Nation, supported over 12,400

private sector loans or investments to small businesses, and helped create or retain over 140,000 jobs as reported by the small businesses who received the loans and investments. In addition, through 2014, SSBCI operations have generated \$7.36 in new small business lending or investing for every \$1 of Federal support. Private sector leverage is expected to increase before the program concludes.

The President's Budget proposes a new authorization of \$1.5 billion for SSBCI to build on the momentum of the program's first round, strengthen the Federal Government's relationships with state economic development agencies, and to provide capital to America's diverse community of entrepreneurs. This additional \$1.5 billion would be awarded in two allocations: \$1 billion awarded on a competitive basis to states best able to target local market needs, promote inclusion, attract private capital for start-up and scale-up businesses, strengthen regional entrepreneurial ecosystems, and evaluate results; and \$500 million awarded by formula based on economic factors such as job losses and pace of economic recovery.

In 2008, under temporary authority granted by section 1117 of the Housing and Economic Recovery Act of 2008 (P.L. 110-289), Treasury entered into agreements with Fannie Mae and Freddie Mac (the GSEs) to purchase senior preferred stock of each GSE and to provide up to \$100 billion when needed to ensure that each company maintains a positive net worth. In May 2009, Treasury increased the Senior Preferred Stock Purchase Agreement (PSPA) funding commitment caps to \$200 billion for each GSE, and in December 2009 Treasury modified the funding commitment caps in the PSPAs to be the greater of \$200 billion or \$200 billion plus cumulative net worth experienced during 2010-2012, less any surplus remaining as of December 31, 2012. Based on the financial results reported by each GSE as of December 31, 2012, and under the terms of the PSPAs, the combined cumulative funding commitment cap for Fannie Mae and Freddie Mac was set at \$445.5 billion. Treasury's authority to purchase obligations or other securities of the GSEs or to increase the funding commitment expired on December 31, 2009. Under the PSPAs, Treasury has maintained the solvency of the GSEs by providing \$187.5 billion of investment to the GSEs. The PSPAs also require the GSEs to pay dividends to Treasury that are recorded as offsetting receipts and are not reflected in this expenditure account. Through December 31, 2015, the GSEs have paid \$241.2 billion in dividend payments to Treasury on the senior preferred stock.

In September 2008, Treasury initiated a temporary program to purchase mortgage-backed securities (MBS) issued by Fannie Mae and Freddie Mac, which carry the GSEs' standard guarantee against default. The purpose of the program was to promote liquidity in the mortgage market and, thereby, affordable homeownership by stabilizing the interest rate spreads between mortgage rates and Treasury issuances. Treasury purchased \$226 billion in MBS through December 31, 2009. In March of 2011, Treasury announced that it would begin selling off up to \$10 billion of its MBS holdings per month, subject to market conditions. Treasury completed the orderly disposition of its MBS portfolio on March 19, 2012.

Beginning in December 2009, Treasury implemented two additional programs as part of the Housing Finance Agencies Initiative to support state and local housing financing agencies (HFAs). Treasury purchased a participation interest in the Fannie Mae and Freddie Mac Temporary Credit and Liquidity Facilities to establish the Temporary Credit and Liquidity Program (TCLP), which provided HFAs with credit and liquidity facilities supporting up to \$8.2 billion in existing HFA bonds, and temporarily replaced private market facilities that were expiring or imposing unusually high costs to the HFAs due to market conditions. The TCLP was originally to remain open to the end of calendar year 2012, but due to continued strain on the market for HFA liquidity facilities, Treasury granted an extension to the end of the calendar year 2015 for six HFAs. In July 2015, the last participating HFA received alternative liquidity facilities from private sector banks, resulting in the closure of the TCLP.

Under the New Issuance Bond Program (NIBP) Treasury purchased \$15.3 billion in securities of Fannie Mae and Freddie Mac backed by new HFA housing bonds, supporting over 135,000 new mortgages and 40,000 rental housing units for working families. The original deadline for HFAs to use

NIBP funds was December 31, 2010, but Treasury granted two one-year extensions until the end of 2012. The authority for all of the programs displayed in this account was provided in section 1117 of the Housing and Economic Recovery Act of 2008 (P.L. 110-289). As required by the Federal Credit Reform Act of 1990 as amended, this account records the subsidy costs associated with the GSE MBS purchase and State HFA programs, which are treated as direct loans for budget execution. The subsidy amounts are estimated on a present value basis.

The purpose of the Capital Magnet Fund (CMF) is to provide financial assistance grants to Community Development Financial Institutions (CDFIs) and qualified nonprofit housing providers that would be leveraged to attract other financing sources for affordable housing and related economic development activities. The CMF was established by the Housing and Economic Recovery Act of 2008 (HERA), which added section 1339 to the Federal Housing Enterprises Financial Safety and Soundness Act of 1992. HERA directs Fannie Mae and Freddie Mac to set aside in each fiscal year 4.2 basis points of each dollar of the unpaid principal balance of new business purchases to be allocated to the CMF and the Housing Trust Fund. The Federal Housing Finance Agency (FHFA), as regulator for Fannie Mae and Freddie Mac, suspended these assessments in November 2008 when Fannie Mae and Freddie Mac were placed into conservatorship. In 2010, the CMF received a one-time discretionary appropriation of \$80 million. In December 2014, the FHFA directed Fannie Mae and Freddie Mac to begin allocating funds to the CMF. The Budget estimates that the CMF will receive assessments for the first time in 2016.

The mission of the Fiscal Service is to promote the financial integrity and operational efficiency of the U.S. Government through exceptional accounting, financing, collections, payments, and shared services. Fiscal Service plays a key role in strengthening the Department's leadership in financial management across the Federal Government while maintaining existing core Federal financial management operations. This includes providing the disbursement of Federal Government payments; collecting receipts and delinquent debt; providing government-wide accounting and reporting services; borrowing the money needed to operate the Federal Government; accounting for the debt; and providing accounting and other reimbursable services to Government agencies.

The Budget provides resources to support the core operational activities of the Fiscal Service, with a focus on increasing the number of electronic transactions with the public; reducing improper payments; improving the effectiveness of debt collection activities; and developing new solutions for streamlining government-wide accounting. The Budget also provides resources to support the Bureau's government-wide leadership role in spending transparency including necessary technology upgrades as well as continued implementation efforts to support the execution of the Digital Accountability and Transparency Act of 2014.

The Financial Institutions Reform, Recovery, and Enforcement Act of 1989 authorized and appropriated to the Secretary of the Treasury such sums as may be necessary to cover interest payments on obligations issued by the Resolution Funding Corporation (REFCORP). REFCORP was established under the Act to raise \$31.2 billion for the Resolution Trust Corporation (RTC) in order to resolve savings institution insolvencies.

Sources of payment for interest due on REFCORP obligations include REFCORP investment income, proceeds from the sale of assets or warrants acquired by the RTC, and annual contributions by the Federal Home Loan Banks. If these payment sources are insufficient to cover all interest costs, indefinite, mandatory funds appropriated to the Treasury shall be used to meet the shortfall.

This account pays interest on the invested balances of guaranteed and direct loan financing accounts. For guaranteed loan financing accounts, balances result when the accounts receive up-front payments and fees to be held in reserve to make payments on defaults. Direct loan financing accounts normally borrow from Treasury to disburse loans and receive interest and principal payments and other payments from borrowers. Because direct loan financing accounts generally repay borrowing from Treasury at the end of the year, they can build up balances of payments received during the year. Interest on invested balances is paid to the financing accounts from the general fund of the Treasury, in accordance with section 505(c) of the Federal Credit Reform Act of 1990.

The Bureau of Customs and Border Protection, Department of Homeland Security, collects duties assessed pursuant to a countervailing duty order, an antidumping duty order, or a finding under the Antidumping Act of 1921. Under a provision enacted in 2000, the Bureau of Customs and Border Protection, through the Treasury, distributes these duties to affected domestic producers. These distributions provide a significant additional subsidy to producers that already gain protection from the increased import prices provided by the tariffs. The authority to distribute assessments on entries made after October 1, 2007, has been repealed. Assessments on entries made before October 1, 2007, will be disbursed as if the authority had not been repealed. Assessments collected on eligible entries are to be disbursed within 60 days of the end of the fiscal year in which they were collected.

This Fund was established as a permanent, indefinite appropriation in order to maintain adequate funding of the Check Forgery Insurance Fund. The Fund facilitates timely payments for replacement Treasury checks necessitated due to a claim of forgery. The Fund recoups disbursements through reclamations made against banks negotiating forged checks.

To reduce hardships sustained by payees of Government checks that have been stolen and forged, settlement is made in advance of the receipt of funds from the endorers of the checks. If the U.S. Treasury is unable to recover funds through reclamation procedures, the Fund sustains the loss.

P.L. 108-447 expanded the use of the Fund to include payments made via electronic funds transfer. A technical correction to the Fund's statutes to ensure and clarify that the Fund can be utilized as a funding source for relief of administrative disbursing errors was enacted by P.L. 110-161, Division D, section 119.

Pursuant to section 604(b) of the Water Resources Development Act of 1999 (P.L. 106-53), after the funds were fully capitalized by deposits from the General Fund of the Treasury, interest earned became available to the Tribes to carry out the purposes of the Funds. Full capitalization occurred in 2010; therefore no additional deposits will be provided by the General Fund of the Treasury. The Tribes are only able to draw down on the interest earned from these investments.

The Federal Financing Bank (FFB) was created in 1973 to reduce the costs of certain Federal and federally-assisted borrowing and to ensure the coordination of such borrowing from the public in a manner least disruptive to private financial markets and institutions. Prior to that time, many agencies borrowed directly from the private market to finance credit programs involving lending to the public at higher rates than on comparable Treasury securities. With the implementation of the Federal Credit Reform Act in 1992, however, agencies finance such loan programs through direct loan financing accounts that borrow directly from the Treasury. In certain cases, the FFB finances Federal direct loans to the public that would other-

wise be made by private lenders and fully guaranteed by a Federal agency. FFB loans are also used to finance direct agency activities such as construction of Federal buildings by the General Services Administration and activities of the U.S. Postal Service.

Lending by the FFB may take one of three forms, depending on the authorizing statutes pertaining to a particular agency or program: (1) the FFB may purchase agency financial assets; (2) the FFB may acquire debt securities that the agency is otherwise authorized to issue to the public; and (3) the FFB may originate direct loans on behalf of an agency by disbursing loans directly to private borrowers and receiving repayments from the private borrower on behalf of the agency. Because law requires that transactions by the FFB be treated as a means of financing agency obligations, the budgetary effect of the third type of transaction is reflected in the Budget in the following sequence: a loan by the FFB to the agency, a loan by the agency to a private borrower, a repayment by a private borrower to the agency, and a repayment by the agency to the FFB.

By law, the FFB receives substantially less interest each year on certain Department of Agriculture loans that it holds than it is contractually entitled to receive. For example, during 2015, as a result of this provision, the FFB received \$60.4 million less than it was contractually entitled to receive.

In 2014, the FFB's net inflows were \$520 million, while in 2015, FFB's net inflows were \$352 million.

In addition to its authority to borrow from the Treasury, the FFB has the statutory authority to borrow up to \$15 billion from other sources. Any such borrowing is exempt from the statutory ceiling on Federal debt. The FFB used this authority most recently in October 2015, as explained in the chapter on Federal Borrowing and Debt in the Analytical Perspectives volume of the Budget.

The following table shows the annual net lending by the FFB by agency and program and the amount outstanding at the end of each year.

The Alcohol and Tobacco Tax and Trade Bureau (TTB) enforces various Federal laws and regulations relating to alcohol and tobacco by working directly and in cooperation with other agencies to: (1) provide the most effective and efficient system for the collection of all revenue that is rightfully due, and eliminate or prevent tax evasion and other criminal conduct, (2) prevent consumer deception relating to alcohol beverages, ensure that regulated alcohol and tobacco products comply with various Federal commodity, product integrity, and distribution requirements, and (3) provide high quality customer service while imposing the least regulatory burden.

The Budget proposes an amendment to section 251 of the Balanced Budget and Emergency Deficit Control Act (BBEDCA) of 1985, as amended, to provide a statutory change that will allow adjustments to the discretionary caps for additional IRS appropriations, including \$5 million to be transferred to TTB to improve alcohol and tobacco enforcement and compliance. The cap adjustment is premised on fully funding the 2017 Budget request for TTB base resources. The new tax enforcement and compliance initiatives for TTB are to be funded via transfers from the IRS cap adjustments through 2026. The program integrity cap proposal entails 10 years of cap adjustments for TTB costing \$189 million while generating additional tax revenue of \$338 million, for a net savings of \$149 million. These estimates do not include the revenue effect from the deterrence component of these investments and other TTB enforcement programs, which is conservatively estimated to be three times the direct revenue impact. See additional discussion in the Budget Process chapter in the Analytical Perspectives volume.

The mission of the Bureau of Engraving and Printing (BEP) is to develop and produce U.S. currency notes that are trusted worldwide. Additionally, in 2005, the BEP was given legal authority to print currency for foreign countries with approval of the State Department. The operations of the Bureau are financed by a revolving fund established in 1950 in accordance with Public Law 81-656 (31 U.S.C. 181), which requires the Bureau to be reimbursed by customer agencies for all costs of manufacturing products provided and services performed. In 1977, Public Law 95-81 authorized

the Bureau to assess customer agencies for amounts necessary to acquire capital equipment and provide for working capital needs.

BEP's strategic goals are to produce U.S. currency that functions flawlessly in commerce; create innovative currency designs to provide effective counterfeit deterrence and meaningful access to currency note usage for all; and achieve organizational excellence and customer satisfaction through balanced investment in people, processes, facilities, and technology. In addition to producing currency notes, activities at the Bureau include engraving plates and dies; manufacturing inks used to print security products; purchasing materials, supplies, and equipment; and storing and delivering products in accordance with the requirements of customers. The Bureau also provides technical assistance and advice to other Federal agencies in the design and production of documents that, because of their innate value or other characteristics, require counterfeit deterrence.

For 2017, BEP is planning for an expected currency production order of about eight billion notes, representing a slight decrease from the number of notes ordered by the Federal Reserve Board for 2016. 2017 priorities include: (1) producing and delivering currency notes ordered by the Federal Reserve Board that consistently meet high quality standards, (2) conducting research and development and collaborating with key stakeholders to deter counterfeiting and maintain public trust in the security and reliability of U.S. currency notes, (3) assisting users of U.S. currency, including the blind and visually impaired, with the use and denomination of currency, and (4) modernizing the production process in the District of Columbia region.

Research into and the development of new technologies for possible use in currency production are priorities at the Bureau as more sophisticated counterfeit deterrent features are needed to protect future generations of currency notes. In 2017, BEP will continue its efforts to research and develop security features working with the National Research Labs to expand outreach to identify new technologies that may be used in feature development. In addition, via its website, [www.bep.gov](http://www.bep.gov), BEP seeks information on technologies that would enhance the longevity and durability of currency notes in circulation and new technologies or materials that could be developed for future use in counterfeit deterrence.

Because aggressive law enforcement, effective note design, and public education are all essential components of an effective anti-counterfeiting program, the Bureau will continue its work in 2017 with the Advanced Counterfeit Deterrence (ACD) Steering Committee to research and develop future currency designs that will enhance and protect U.S. currency notes. The ACD Steering Committee includes representatives from BEP, the Department of the Treasury, the U.S. Secret Service, and the Federal Reserve Board. In 2017, BEP will continue working with the ACD Steering Committee to research and develop security features for the next family of redesigned notes that will enhance and protect U.S. currency notes. The \$10 note is the first note in the family to be redesigned.

The United States Mint mints and issues circulating coins, produces and distributes numismatic items, and provides security and asset protection. Since 1996, the Mint's operations have been funded through the Public Enterprise Fund (PEF) established by section 522 of Public Law 104-52 (codified at section 5136 of Title 31, United States Code). The operations of the Mint are divided into two major components, circulating coinage and numismatic products. Finances for the two components are accounted for separately; receipts from circulating coinage operations are not used to fund numismatic operations and receipts from numismatic operations are not used to fund circulating coinage operations. The Mint generates revenue through the issuance of circulating coins to the Federal Reserve Banks (FRBs) and the sale of numismatic products to the public and bullion coins to authorized purchasers. The Mint submits annual audited financial statements to the Secretary of the Treasury and to the Congress in support of the operations of the PEF. In 2015, the Mint transferred \$561 million to the General Fund.

**Circulating Coinage.**—This activity funds the minting and issuance of circulating coins to the FRBs in amounts that the Secretary of the Treasury determines are necessary to meet the needs of the United States. The 2017 Budget reflects production volumes that correspond to expected demand and raw materials costs, which are driven by commodity prices and volumes. The Mint receives funds from the Federal Reserve equal to the face value of the circulating coins shipped to the FRB. The Mint is credited with the full cost of producing and distributing the coins that are put into circulation, including the depreciation of manufacturing facilities and equipment. The difference between the face value of the coins and the full cost of producing the coins is called seigniorage, which is a means of financing the deficit and transferred periodically to the General Fund. Amounts used to finance the Mint's capital acquisitions are recorded as budget authority in the year that funds are obligated.

The 2017 Budget includes a proposal to limit the requirement that the number of \$1 coins minted and issued in a year with the Sacagawea design on the obverse be not less than 20 percent of the total number of \$1 coins minted and issued. Limiting the 20-percent requirement to circulating coins avoids the need to mint and issue Native American \$1 coins in excess of the amounts that numismatic customers demand. FRBs hold excessive inventories of \$1 coins because depository institutions are re-depositing significant amounts of the coins with the FRBs. To address the excessive \$1 coin inventory, in December 2011, the Mint suspended production of all \$1 coins for circulation and, since that time, has minted and issued \$1 coins solely for numismatic purposes.

**Numismatic Items.**—This activity funds the manufacturing of numismatic items, which include collectible coins and sets, medals, bullion coins, and other products for sale to collectors and other members of the public who desire high-quality or investment-grade versions of the Nation's coinage. These products include annual proof and uncirculated sets; investment-grade silver and gold bullion coins; uncirculated silver and gold coins; proof silver, gold, and platinum coins; and commemorative coins and medals that are authorized to commemorate events, individuals, places, or other subjects. Prices for numismatic products are based on the estimated product cost plus a reasonable margin to assure that the numismatic program operates at no net cost to the taxpayer. Similarly, bullion coins are priced based on the market price of the precious metals plus a premium to cover manufacturing, marketing, and distribution costs. Making numismatic

products accessible, available, and affordable to Americans who choose to purchase them is the highest priority of the Mint's numismatic operations.

INTERNAL REVENUE SERVICE

The Internal Revenue Service (IRS) collects the revenue that funds the Government and administers the Nation's tax laws. During 2015, the IRS processed 201 million tax returns and collected \$3.3 trillion in taxes (gross receipts before tax refunds), totaling 93 percent of Federal Government receipts. The IRS taxpayer service program assists millions of taxpayers in understanding and meeting their tax obligations. The IRS tax enforcement and compliance program deters taxpayers inclined to evade their responsibilities while pursuing those who violate tax laws.

The 2017 Budget provides \$12,280 million for the IRS to implement key strategic priorities.

**Enforcement Program.**—The Budget includes an Enforcement account increase to implement enacted legislation; protect revenue by identifying fraud and preventing issuance of questionable refunds including those related to identity theft; increase compliance by addressing offshore tax evasion; strengthen examination and collection programs, including return preparer; and address compliance issues in the tax-exempt sector. This increase includes a program integrity cap adjustment totaling \$515 million, which supports the Enforcement (\$231 million) and the Operations Support accounts (\$283 million), including a \$5 million to transfer to the Alcohol and Tobacco Tax and Trade Bureau (TTB) for high return on investment (ROI) tax enforcement activities. The Budget proposes an amendment to section 251 of the Balanced Budget and Emergency Deficit Control Act (BBEDCA) of 1985, as amended, to provide a statutory change that will allow adjustments to the discretionary caps for additional IRS appropriations. To ensure full funding of the cost increases, this cap adjustment is permissible in 2017 only if the base level for the IRS Enforcement, Operations Support, and TTB accounts are funded at or above \$8,854 million. The new 2017 enforcement initiatives funded out of this cap adjustment will generate more than \$2.6 billion in additional annual enforcement revenue once the new hires reach full potential in 2019. At full performance,

these resources are expected to generate an ROI of nearly \$6-to-\$1, not including the indirect revenue effect of the deterrence value of these enforcement investments, which is estimated to be at least three times the direct revenue impact. In addition to the new enforcement initiatives for 2017, the Budget also proposes new tax enforcement and compliance initiatives for the IRS and TTB funded via cap adjustments through 2021 and sustained with additional adjustments through 2026. In total, the proposal entails 10 years of cap adjustments costing \$18 billion while generating \$64 billion, for a net savings of \$46 billion. See additional discussion in the Budget Process chapter in the Analytical Perspectives volume.

**Taxpayer Service Program.**—The Budget includes a significant investment in Taxpayer Services that will allow the IRS to further improve customer service to meet taxpayer demand and continue delivering services to taxpayers using a variety of in-person, telephone, and web-based methods. These tools will help taxpayers understand their obligations, correctly file their returns, and pay taxes due in a timely manner. The IRS is committed to increasing the service options available through the IRS website and mobile application, allowing more taxpayers to reach the IRS through the Internet. Notably, in 2015, there were more than 493 million visits to *www.IRS.gov*, and taxpayers checked their refund status more than 234 million times by accessing *Where's My Refund?* on the IRS website in English or Spanish. Taxpayers can also use automated features on the IRS toll-free phone system. Additionally, the IRS2Go mobile application had over 3.8 million active users in 2015. While the IRS works to move taxpayer interactions to more efficient web-based channels, the 2017 Budget provides enough resources to increase the telephone level of service to 70 percent.

**Modernization Program.**—IRS modernization efforts focus on building and deploying advanced information technology systems, processes, and tools to improve efficiency and enhance productivity. Since 2012, the IRS has processed individual taxpayer returns on a daily processing cycle that has enhanced IRS tax administration and improved customer service by allowing faster refunds for more taxpayers, more timely account updates, and faster issuance of taxpayer notices. The Budget provides new investments in the Business Systems Modernization (BSM) Program to expand the capabilities of the Customer Account Data Engine (CADE) 2 relational database and address IRS's financial material weakness, enhance the taxpayer's online experience and provide secure digital communications; complete the design, development, and testing of various estate and gift tax forms for electronic acceptance; and increase fraud detection, resolution, and prevention through use of the Return Review Program (RRP). Using leading-edge technologies that promote speed and enhance data analytics, RRP will advance IRS effectiveness in detecting, addressing, and preventing tax refund fraud and in protecting the Nation's revenue stream. RRP will eventually replace the legacy Electronic Fraud Detection System built in the mid-1990s. The IRS is expanding its web-based customer service channel by building on existing capabilities to simplify and improve the taxpayer's online experience, provide secure digital communications, and add more interactive capabilities to existing web self-service products.

This appropriation provides resources for the examination of tax returns, both domestic and international; the administrative and judicial settlement of taxpayer appeals of examination findings; technical rulings; monitoring employee pension plans; determining qualifications of organizations seeking tax-exempt status; examining the tax returns of exempt organizations; enforcing statutes relating to detection and investigation of criminal violations of the internal revenue laws and other financial crimes; identifying underreporting of tax obligations; securing unfiled tax returns; and collecting unpaid accounts. Further, the 2017 Budget protects revenue by identifying fraud and preventing the issuance of erroneous refund payments, including tax-related identity theft. A portion of the appropriation (\$231 million) is requested as part of the \$515 million program integrity cap ad-

justment that will reduce the deficit through above-base funding for high return on investment tax enforcement and compliance initiatives, including \$5 million to transfer to the Alcohol and Tobacco Tax and Trade Bureau. In conjunction with specified funds provided to the IRS Operations Support account, this increment will support tax compliance initiatives expected to generate over \$2.6 billion in additional annual enforcement revenue once the new hires reach full potential in 2019. Language presented in this account, the Operations Support account, and section 126 of the Department of the Treasury's Administrative Provisions is provided to effectuate the cap adjustment in conjunction with an amendment to section 251 of the Balanced Budget and Emergency Deficit Control Act (BBEDCA) of 1985, as amended.

This appropriation provides resources for support functions that are essential to the successful operation of IRS programs. These functions include: overall planning and direction of the IRS; shared service support related to facilities maintenance, rent payments, printing, postage, and security; resources for headquarters management activities such as communications and liaison, finance, human resources, equity, diversity and inclusion; research and statistics of income; protection of sensitive information and the privacy of taxpayers and employees; and necessary expenses for telecommunications support and the development and maintenance of IRS operational information systems. This appropriation also includes specific funds to support multi-year facility and real estate planning to improve the IRS investment process, as well as funds needed to implement an array of significant new tax legislation. A portion of the appropriation (\$283 million) is requested as part of the \$515 million program integrity cap adjustment that will reduce the deficit through above-base funding for high return on investment tax enforcement and compliance programs. In conjunction with specified funds provided to the IRS Enforcement account, this increment will support new tax compliance initiatives that are expected to generate high returns on investment in the form of increased tax revenues. In total, the proposal entails 10 years of adjustments costing \$18 billion while generating \$64 billion, for a net savings of \$46 billion.

This appropriation provides resources for the planning and capital asset acquisition of information technology to modernize the IRS business systems, including labor and related contractual costs. The Government Accountability Office regularly reviews the status of key Business Systems Modernization (BSM) investments and the IRS submits quarterly information technology reports to the House and Senate Committees on Appropriations.

The projects within the BSM program represent investments to ensure that the IRS continues to move forward and use technologies to improve performance. The Budget provides investments to modernize core tax systems and fundamentally change how taxpayers interact with the IRS, including the creation of online tax filing status and payment options.

The American Recovery and Reinvestment Act of 2009 (P.L. 111-5), section 1531, allows state and local governments to issue Build America Bonds through December 31, 2010. These tax credit bonds, which include Recovery Zone Bonds, differ from tax-exempt governmental obligation bonds in two principal ways: (1) interest paid on tax credit bonds is taxable; and (2) a portion of the interest paid on tax credit bonds takes the form of a Federal tax credit. The bond issuer may elect to receive a direct payment in the amount of the tax credit for obligations issued before January 1, 2011. This account reflects the continuing interest payments over time.

The Budget proposes a new permanent America Fast Forward Bond program that will be an optional alternative to traditional tax-exempt bonds. This program will be similar to the expired Build America Bond program. The America Fast Forward Bonds will be conventional taxable bonds issued by state and local governments in which the Federal Government makes direct subsidy payments to state and local governmental issuers (refundable tax credits). Eligible uses would include financing of governmental capital projects, current refunding or refinancing of prior capital project financings, short-term governmental working capital financings for governmental operating expenses, and financing for the types of projects and programs that can be financed with qualified private activity bonds, subject to applicable state bond volume caps. The subsidy rate for the America Fast Forward Bonds is proposed at 28 percent, which is revenue neutral relative to the estimated future Federal tax expenditure for tax-exempt bonds. The American Fast Forward Bond program will be effective for bonds issued after the date of enactment.

As provided by law, there are instances where the earned income tax credit (EITC) exceeds the amount of tax liability owed through the individual income tax system, resulting in an additional payment to the taxpayer. Congress originally authorized the EITC in the Tax Reduction Act of 1975 (P.L. 94–12) and made it permanent in the Revenue Adjustment Act of 1978 (P.L. 95–600). The Tax Reform Act of 1986 and the Omnibus Budget Reconciliation Acts of 1990 and 1993 increased the credit amount and expanded eligibility for the EITC.

The Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA) (P.L. 107–16) increased the income level at which the credit begins to phase out for married taxpayers filing joint returns, and made other changes to simplify the credit and improve compliance.

The American Recovery and Reinvestment Act of 2009 (ARRA) (P.L. 111–5), section 1002, temporarily increased the EITC for working families with three or more children, and increased the threshold for the phase-out range for all married couples filing a joint return for 2009 and 2010 tax returns. The Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 (P.L. 111–312), section 103(c), extended the EGTRRA and ARRA benefits through tax year 2012.

The American Taxpayer Relief Act of 2012 (P.L. 112–240), section 103(c), extended the EGTRRA and ARRA benefits through tax year 2017 (a five-year extension). The Protecting Americans From Tax Hikes Act of 2015 (P.L. 114–113, permanently extended the EGTRRA and ARRA benefits.

As provided by law, there are instances where the child tax credit exceeds the amount of tax liability owed through the individual income tax system, resulting in an additional payment to the taxpayer.

The Congress originally authorized the child tax credit in the Taxpayer Relief Act of 1997 (P.L. 105–34). The credit amount and extent to which the credit is refundable were increased by the Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA) (P.L. 107–16). The American Recovery and Reinvestment Act of 2009 (ARRA) (P.L. 111–5), section 1003, further expanded the extent to which the credit is refundable. The credit was refundable to the extent of 15 percent of an individual's earned income in excess of \$3,000 for 2010 and 2011. The Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 (P.L. 111–312), section 103(b), extended this temporary benefit for 2011 and 2012. The American Taxpayer Relief Act of 2012 (P.L. 112–240), section 103(b), extended the ARRA benefits through tax year 2017 (a five-year extension). The Protecting Americans From Tax Hikes Act of 2015 (P.L. 114–113), permanently extended the EGTRRA and ARRA benefits.

The Trade Act of 2002 established the Health Coverage Tax Credit (HCTC), a refundable tax credit for a portion of the cost of qualified insurance, which may be paid in advance. This credit is available to certain recipients of Trade Adjustment Assistance (TAA) and Pension Benefit Guaranty Corporation pension beneficiaries who are aged 55–64.

The Congress expanded the HCTC program in the American Recovery and Reinvestment Act of 2009 (P.L. 111–5), sections 1899A–1899J. These increased benefits for certain HCTC eligible individuals include payment of 80 percent (up from 65 percent) of health insurance premiums, up to 24 months of coverage for qualified family members, and extension of COBRA benefits. The Omnibus Trade Act of 2010 (P.L. 111–344), sections 111–118, extended these benefits until February 13, 2011. The bill to extend the Generalization System of Preference (P.L. 112–040), section 241, extended the credit through December 31, 2013, and reduced the credit percentage to 72.5 percent, and eliminated the credit entirely as of January 1, 2014.

The Trade Preferences Extension Act of 2015 (P.L. 114–27), section 407, retroactively reinstated the HCTC to January 1, 2014, through December 31, 2019. The Act also provided that an eligible individual could not claim both the HCTC and the premium tax credit provided under the Affordable Care Act (ACA) for the same coverage for the same month and that individual health insurance coverage purchased through the Health Insurance Marketplace is qualified coverage for coverage months in 2014 and 2015. Lastly, the Act reinstated the advance payment of the HCTC, effective not later than June 28, 2016 (one year after date of enactment).

The Patient Protection and Affordable Care Act (PPACA) of 2010 (P.L. 111–148), section 1421, allows certain small employers (including small tax-exempt employers) to claim a credit when they pay at least half of the health care premiums for single health insurance coverage for their employees. Small employers can claim the credit for 2010 through 2013 and for two years after that. Generally, employers that have fewer than 25 full-time equivalent employees and pay wages averaging less than \$50,000 per employee per year may qualify for the credit. The Budget proposes to expand the credit by increasing the maximum employer size, modifying the interaction of the employer size and wage phaseouts, and simplifying eligibility requirements.

The Budget proposes to expand and simplify the tax credit provided to qualified small employers for non-elective contributions to employee health insurance. The proposal would expand the credit to employers with up to 50 (rather than 25) full-time equivalent employees (FTEs) and begin the phaseout of the maximum credit at 20 FTEs (the credit would be reduced on a sliding scale between 20 and 50, rather than between 10 and 25, FTEs). In addition, there would be a change to the coordination of the phaseouts of the credit that apply as the number of FTEs and average wages increase (using a formula that is multiplicative rather than additive) so as to provide a more gradual combined phaseout and to ensure that employers with fewer than 50 FTEs and an average wage less than \$50,000 may be eligible for the credit, even if they are nearing the end of both phaseouts. The Budget also proposes to reduce taxpayer complexity by eliminating the requirement that an employer make a uniform contribution on behalf of each employee (although applicable non-discrimination laws will still apply), and eliminating the reduction in the qualifying contribution for premiums that exceed

The Tax Relief and Health Care Act of 2006 (P.L. 109-432) allowed certain taxpayers to claim a refundable credit for a portion of their unused long-term alternative minimum tax (AMT) credits each year. The Emergency Economic Stabilization Act of 2008 (P.L. 110-343), Division C, section 103, increased the AMT refundable credit portion from 20 percent to 50 percent of unused long-term minimum tax credits for the taxable year in question. This provision was effective for any taxable year beginning before January 1, 2013, and has now expired. However, outlays are expected from this account through 2017 as reconciliations occur.

The Housing and Economic Recovery Act of 2008 (P.L. 110-289), section 3081, allowed certain businesses to accelerate the recognition of a portion of their unused pre-2006 alternative minimum tax (AMT) or research and development (R&D) credits in lieu of taking bonus depreciation. The maximum increase amount is capped at the lesser of \$30 million or 6 percent of eligible AMT and R&D credits. The accelerated credit amount is refundable. The American Recovery and Reinvestment Act of 2009 (P.L. 111-5), section 1201(b), extended this temporary benefit through 2009. The Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 (P.L. 111-312), section 401(c), extended this temporary benefit through the end of 2012, but only with respect to AMT credits. The Administration proposes to provide two tax incentives to the 20 designated Promise Zones. First, an employment credit would be provided to businesses that employ zone residents that would apply to the first \$15,000 of qualifying wages annually. The credit rate would be 20 percent for zone residents who are employed within the zone and 10 percent for zone residents employed outside of the zone. Second, qualifying property placed in service within the zone would be eligible for additional first-year depreciation of 100 percent of the adjusted basis of the property. Qualifying property would generally consist of depreciable property with a recovery period of 20 years or less. Zone designations for the purpose of the tax incentives would be in effect from January 1, 2017, through December 31, 2026.

The Budget proposes to allocate \$2 billion as a new refundable investment tax credit for projects at new and retrofitted electric generating units that capture and permanently sequester carbon dioxide (CO<sub>2</sub>). A minimum of 70 percent of the credits would be required to flow to projects fueled by greater than 75 percent coal. The Budget also proposes a new refundable sequestration tax credit for qualified investments at a rate of (1) \$50 per metric ton of CO<sub>2</sub> permanently sequestered and not beneficially reused (e.g., in an enhanced oil recovery operation) and (2) \$10 per metric ton for CO<sub>2</sub> that is permanently sequestered and beneficially reused. Under certain circumstances, as provided in 26 U.S.C. 6611, interest is paid on Internal Revenue collections that must be refunded. The Tax Equity and Fiscal Responsibility Act of 1982 (P.L. 97-248) provides for daily compounding of interest. Under the Tax Reform Act of 1986 (P.L. 99-514), interest paid on Internal Revenue collections will equal the Federal short-term rate plus two percentage points, with such rate to be adjusted quarterly.

The Patient Protection and Affordable Care Act (PPACA) of 2010 (P.L. 111-148) established the Refundable Premium Tax Credit. This credit is an advanceable, refundable tax credit designed to help eligible individuals and families with low or moderate income afford health insurance purchased through the Health Insurance Marketplace, also known as the Exchange, beginning in 2014. The credit can be paid in advance to the taxpayer's insurance company to lower the monthly premiums, or it can be claimed when a taxpayer files their income tax return for the year. If the credit is paid in advance, the taxpayer must reconcile the advance credit payments with the actual credit computed on the tax return, subject to certain caps.

Section 1402 of PPACA provides for reductions in cost sharing for eligible individuals enrolled in qualified health plans purchased on the Exchanges. The reduction in cost sharing will first be achieved by reducing applicable out-of-pocket limits under section 1302 of PPACA. An additional reduction will be allowed for lower income insured individuals and special rules will apply for American Indians and Alaska Natives.

Section 1131 of PPACA provides for the establishment of a Basic Health Program, under which a state may offer standard health plans to eligible individuals in lieu of offering such individuals coverage through an Exchange. Eligible individuals include state residents without access to affordable, minimum essential coverage (including those not eligible to enroll in the state's Medicaid program) who meet certain income, residency, and age requirements.

Section 1412 of PPACA provides for advance payments of the premium tax credit and cost-sharing reductions.

The premium assistance tax credit has outlay effects (in millions of dollars) of: 2015 \$20,925; 2016 \$30,718; 2017 \$47,837; 2018 \$68,343; 2019 \$86,732; 2020 \$94,583; 2021 \$100,106; 2022 \$106,132; 2023 \$110,949; 2024 \$116,077; 2025 \$121,436; 2026 \$126,721.

The premium assistance tax credit has income tax effects (in millions of dollars) [a (-) indicates reduced receipts] of: 2015 -\$2,316; 2016 -\$2,152; 2017 -\$3,452; 2018 -\$4,503; 2019 -\$6,274; 2020 -\$7,498; 2021 -\$7,743; 2022 -\$8,131; 2023 -\$8,441; 2024 -\$8,820; 2025 -\$9,134; 2026 -\$9,471.

The American Jobs Creation Act of 2004 (P.L. 108-357) allowed the IRS to use private collection contractors to supplement its own collection staff efforts to ensure that all taxpayers pay what they owe. The IRS used this authority to contract with several private debt collection agencies starting in 2006. In March 2009, the IRS allowed its private debt collection contracts to expire, thereby administratively terminating the program.

Section 32102(a) of the Fixing America's Surface Transportation Act of 2015 (P.L. 114-94), amended section 6306 of the Internal Revenue Code (IRC) and requires the Secretary of the Treasury to enter into one or more qualified tax collection contracts for the collection of all outstanding inactive tax receivables. These agreements are applicable to tax receivables as identified by the Secretary after December 4, 2015. Section 6306 of the IRC prohibits the payment of fees for all services in excess of 25 percent of the amount collected under a tax collection contract. In addition, up to 25 percent of the amount collected may be used for IRS collection enforcement activities.

Inactive tax receivables are defined as any tax receivable (1) removed from the active inventory for lack of resources or inability to locate the taxpayer, (2) for which more than 1/3 of the applicable limitations period has lapsed and no IRS employee has been assigned to collect the receivable; or (3) for which a receivable has been assigned for collection but more than 365 days have passed without interaction with the taxpayer or a third party for purposes of furthering the collection. Tax receivables are defined as any outstanding assessment that the IRS includes in potentially collectible inventory.

As provided by law (26 U.S.C. 7623), the Secretary of the Treasury may make payments to individuals who provide information that leads to the collection of Internal Revenue taxes. The Taxpayer Bill of Rights of 1996 (P.L. 104-168) provides for payments of such sums to individuals from the proceeds of amounts collected by reason of the information provided, and any amount collected shall be available for such payments. This information must lead to the detection of underpayments of taxes, or detection and bringing to trial and punishment of persons guilty of violating the Internal Revenue laws. This provision was further amended by the Tax Relief and Health Care Act of 2006 (P.L. 109-432) to provide for mandatory payments in certain circumstances and to encourage use of the program. A reward payment typically ranges between 15 and 30 percent of the collected proceeds for cases where the amount of collected proceeds exceeds \$2,000,000. Lower payments are allowed in certain circumstances, including cases in which information is provided that was already available from another source.

This revolving fund was established pursuant to section 112(a) of the Federal Tax Lien Act of 1966, to serve as the source of financing the redemption of real property by the United States. During the process of collecting unpaid taxes, the Government places a tax lien on real estate in order to protect the Government's interest. Situations arise where property of this nature is collateral for other indebtedness and the tax lien is subordinate to the original indebtedness. In this circumstance, it is often in the Government's interest to purchase the property during the foreclosure sale. The advantage arises when the property is worth substantially more than the first lien-holder's equity but is being sold for an amount that barely covers that equity, thereby leaving no proceeds to apply against delinquent taxes. Under these circumstances, if the Government buys the property and subsequently puts it up for sale under more advantageous conditions, it is possible to realize sufficient profit on the transaction to fully or partially collect the amount of taxes due. The revolving fund is reimbursed from the proceeds of the sale in an amount equal to the amount expended from the fund for the redemption. The balance of the proceeds is applied against the amount of the tax, interest, penalties, and additions thereto, and for the costs of sale. The remainder, if any, would revert to the parties legally entitled to it.

The Office of the Comptroller of the Currency (OCC) was created by Congress to charter national banks; oversee a nationwide system of banking institutions; and ensure national banks are safe and sound, competitive and profitable, and capable of serving in the best possible manner the banking needs of their customers. The National Currency Act of 1863 (12 U.S.C. 1 et seq., 12 Stat. 665), rewritten and reenacted as the National Bank Act of 1864, provided for the chartering and supervising functions of the OCC. The income of OCC is derived principally from assessments paid by national banks and interest on investments in U.S. Government securities. The OCC receives no appropriated funds from Congress.

Effective on July 21, 2011, Title III of the Dodd-Frank Wall Street Reform and Consumer Protection Act (P.L. 111-203) transferred to the OCC the responsibility for the supervision of Federal savings associations and rulemaking authority for all savings associations.

As of September 30, 2015, the OCC supervised 1,010 national bank charters, 49 Federal branches of foreign banks, and 416 Federal savings associations (including approximately 165 mutual institutions). In total,

For 2018, the Budget requests \$66.4 billion in advance appropriations for the four medical care appropriations: Medical Services, Medical Community Care, Medical Support and Compliance, and Medical Facilities. This request for advance appropriations fulfills the Administration's commitment to provide reliable and timely resources to support the delivery of accessible and high-quality medical services for veterans. This funding enables timely and predictable funding for VA's medical care to prevent our Nation's veterans from being adversely affected by budget delays, and provides opportunities to more effectively use resources in a constrained fiscal environment.

For 2017, Medical Care appropriations are increased by \$1.7 billion over the 2017 advance appropriations request of \$63.3 billion. Each year, VA updates its budget estimates to incorporate the most recent data on health care utilization rates, actual program experience, and other factors, such as economic trends in unemployment and inflation. As a result of these updates, the adjusted budget estimates more accurately reflect the projected medical demands of veterans enrolled in the VA health care system.

The Veterans Access, Choice, and Accountability Act of 2014 ("Veterans Choice Act"), Public Law 113-146 provided \$5 billion in mandatory funding to increase veterans' access to health care by hiring more physicians and staff and improving VA's physical infrastructure. It also provided \$10 billion in mandatory funding through 2017 to establish a temporary program ("Veterans Choice Program") improving veterans' access to health care by allowing eligible veterans who meet certain wait-time or distance standards to use eligible health care providers outside the VA system.

With the resources requested for 2017 and 2018, VA will provide the highest quality health care services for veterans. VA estimates it will treat 7.0 million patients in 2017 and 7.1 million patients in 2018. Operation Enduring Freedom, Operation Iraqi Freedom, and Operation New Dawn (OEF/OIF/OND) veterans are expected to reach 922,664 in 2017 (13.2 percent of the total) and 995,196 in 2018 (14.0 percent of the total).

*Medical Care Collections Fund (MCCF).*—VA estimates collections of nearly \$3.6 billion in 2017 and over \$3.6 billion in 2018, representing over five percent of available Medical Care resources in both years. VA has the authority to collect inpatient and outpatient co-payments, medication co-payments, and nursing home co-payments; authority for certain income verification; authority to recover third-party insurance payments from veterans for nonservice-connected conditions; and authority to collect revenue from enhanced use leases. These collections also include those collected from the Compensated Work Therapy Program, Compensation and Living Expenses Program, and the Parking Program.

*Medical Services.*—For Medical Services, the Budget reflects the following discretionary appropriation funding: the 2016 enacted advance appropriation of \$47.6 billion, augmented with \$2.4 billion (as provided in Public Law 114-113); the 2017 enacted advance appropriation of \$51.7 billion, together with an additional \$1.1 billion as requested in this Budget; and the 2018 advance appropriation request of \$44.9 billion. This appropriation provides for a comprehensive, integrated health care delivery system that addresses the needs of eligible veterans and beneficiaries in VA medical centers, outpatient clinic facilities, contract hospitals, State homes, and outpatient programs on a fee basis. Hospital and outpatient care is also provided by the private sector for certain dependents and survivors of veterans under the Civilian Health and Medical Programs for the Department of Veterans Affairs (CHAMPVA). In addition to this funding, the Budget reflects mandatory funding provided in section 801 of the Veterans Choice Act (Public Law 113-146): \$1.7 billion remains in 2016.

**WORKLOAD**

Estimated obligations and workload for six categories of health care services are shown below: outpatient care, inpatient care, mental health care, long term services and supports, prosthetics care, and dental care. In addition, estimated obligations and workload are also shown for four programs: CHAMPVA and other dependent programs, readjustment counseling, Caregivers, and non-VA care. In each of the six categories of health care services, the obligations and workload shown reflect only the provision of care by VA providers; obligations and workload for all types of non-VA care are displayed separately in the section on non-VA care. Finally, the obligations for each of the six categories of health care services do not include the funding provided by section 801 of the Veterans Choice Act, but the estimated workload levels do include the additional workload associated with this funding.

*Outpatient care.*—Obligations in the Medical Services account for 2017 are estimated to be \$26,028 million for this health service category, which includes funding for ambulatory care in VA hospital-based and community-based clinics.

Estimated operating levels are:

Outpatient Visits (excludes Mental Health):	2015 actual	2016 est.	2017 est.
Staff .....	70,350,501	72,933,627	75,043,060

*Mental health care.*—Obligations in the Medical Services account for 2017 are estimated to be \$5,852 million for the inpatient, residential, and outpatient care of veterans with conditions related to mental illness, including alcohol and drug problems. Mental health services and operations ensure the availability of a range of services, from treatment of a variety of common mental health conditions in primary care to more intensive interven-

tions in specialty mental health programs for more severe and persisting mental health conditions. Specialty services such as evidence-based psychotherapies, intensive outpatient programs, residential rehabilitation treatment, and inpatient care are available to meet the range of veterans' needs.

**Long term services and supports.**—Obligations in the Medical Services account for 2017 are estimated to be \$3,166 million for the care of veteran residents in VA-operated long-term care programs. VA offers a spectrum of geriatric and extended care services to veterans enrolled in its health care system. The spectrum of long-term care services includes non-institutional and institutional services. All VA medical centers provide home- and community-based long-term care programs. The patient-focused approach supports veterans who wish to live safely at home in their own communities for as long as possible. In addition, veterans receive institutional long-term care through one of four venues: VA Community Living Centers (CLCs); Community Nursing Homes; State Veterans Nursing Homes; and State Veterans Home Domiciliaries. The operating levels for institutional care below represent only VA CLCs.

Estimated operating levels are:

	2015 actual	2016 est.	2017 est.
Institutional (ADC) .....	9,226	8,975	8,711
Non-Institutional Visits/Procedures .....	2,602,003	2,750,302	2,795,947

**Prosthetics care.**—Obligations in the Medical Services account for 2017 are estimated to be \$3,646 million for veterans. Prosthetic and Sensory Aids Service is an integrated delivery system designed to provide medically prescribed prosthetic and sensory aids, medical devices, assistive aids, repairs and services to eligible disabled veterans to maximize the independence and enhance their quality of life. This includes, but is not limited to, artificial limbs, hearing aids, and home oxygen; items that improve accessibility such as ramps and vehicle modifications, wheelchairs and mobility aids; and devices surgically placed in the veteran, such as stents.

**Dental care.**—Obligations in the Medical Services account for 2017 are estimated to be \$1,089 million for the treatment of veterans who require dental care. Dental care services are provided to eligible veterans with a "medical condition negatively impacted by poor dentition." These patients may include poorly controlled diabetic patients, patients with head or neck cancer, organ transplant patients, and others. Veterans with a 100 percent service-connected disability are eligible for comprehensive dental care as needed. In addition, homeless veterans enrolled in certain residential treatment programs are also eligible for dental treatment.

Estimated operating levels are:

	2015 actual	2016 est.	2017 est.
Dental Procedures .....	4,261,946	4,467,837	4,636,882

**Rehabilitation.**—Obligations in the Medical Services account for 2017 are estimated to be \$655 million for the provision of rehabilitative care, including Blind Rehabilitation and Spinal Cord Injury programs. These services include inpatient and outpatient blind and vision rehabilitation programs, adjustment to blindness counseling, patient and family education, and assistive technology. The mission of Spinal Cord Injury and Disorders (SCI/D) Services is to promote the health, independence, quality of life and productivity of individuals with spinal cord injury and disorders through efficient delivery of acute rehabilitation, psychological, social, vocational, medical and surgical care, professional training, as well as patient and family education.

Estimated operating levels are:

	2015 actual	2016 est.	2017 est.
ADC .....	1,143	1,134	1,135

**Civilian Health and Medical Program of the Department of Veterans Affairs (CHAMPVA) Programs.**—Obligations in the Medical Services account for 2017 are estimated to be \$300 million (excludes care in the

community portion found under the new Medical Community Care appropriation) for pharmacy and medical service personnel dealing with CHAMPVA matters.

**Readjustment Counseling.**—Obligations in the Medical Services account for 2017 are estimated to be \$243 million. This program provides readjustment counseling services at VA Vet Centers. Vet Centers are community-based counseling centers that provide a wide range of social and psychological services to include: professional readjustment counseling to veterans who have served in a combat zone, military sexual trauma counseling, bereavement counseling for families who experience an active duty death, substance abuse assessments and referral, medical referral, VBA benefits explanation and referral, and employment counseling. Services are also extended to the family members of eligible veterans for issues related to military service and the readjustment of those veterans.

Estimated operating levels are:

	2015 actual	2016 est.	2017 est.
Visits .....	1,661,145	1,710,979	1,762,309

**Caregivers (Title I) Programs.**—Obligations in the Medical Services account for 2017 are estimated to be \$700 million. The Caregivers and Veterans Omnibus Health Services Act of 2010, Public Law 111–163, authorized VA to provide assistance and support services for Caregivers of eligible veterans. For 2018, the Budget requests \$6.7 billion in advance appropriations for Medical Support and Compliance. This request for advance appropriations fulfills the Administration's commitment to provide reliable and timely resources to support the delivery of accessible and high-quality medical services for veterans.

For Medical Support and Compliance, the Budget reflects the following discretionary appropriation funding from 2016 through 2018: the 2016 enacted advance appropriation of \$6.1 billion, the 2017 enacted advance appropriation of \$6.5 billion, and the 2018 advance appropriation request of \$6.7 billion. In addition to this funding, the Budget reflects mandatory funding provided in section 801 of the Veterans Access, Choice, and Accountability Act of 2014 (Public Law 113-146): \$27 million remains available in 2016.

Medical Support and Compliance appropriation finances the expenses of management, security, and administration of the VA health care system through the operation of VA medical centers, other facilities, Veterans In-

tegrated Service Network offices and facility director offices, chief of staff operations, quality of care oversight, legal services, billing and coding activities, procurement, financial management, and human resource management.

The purpose of the Department of Defense-Veterans Affairs Health Care Sharing Incentive Fund, often referred to as the Joint Incentive Fund (JIF), is to enable the Departments to carry out a program to identify and provide incentives to implement creative sharing initiatives at the facility, intra-regional and nationwide levels. The JIF promotes collaboration and new approaches to problem solving to enable the Departments to improve the coordination of health care services. The Departments have established the fund and developed processes and criteria to solicit and select projects. Section 721 of the 2003 National Defense Authorization Act, Public Law 107-314, established the fund and requires VA and Department of Defense to establish a joint incentive program. In 2017, each Secretary shall contribute a minimum of \$15 million to the fund after the appropriation is enacted.

For 2018, the Budget requests advance appropriations of \$5.4 billion for Medical Facilities. This request for advance appropriations fulfills the Administration's commitment to provide reliable and timely resources to support the delivery of accessible and high-quality medical services for veterans.

For Medical Facilities, the Budget reflects the following discretionary appropriation funding from 2016 through 2018: the 2016 enacted advance appropriation of \$4.9 billion, together with an additional \$105 million (as directed in Public Law 114–113); the 2017 enacted advance appropriation request of \$5.1 billion, together with an additional \$649 million as requested in this Budget; and the 2018 advance appropriation request of \$5.4 billion. In addition to this funding, the Budget reflects mandatory funding provided in section 801 of the Veterans Access, Choice, and Accountability Act of 2014 (Public Law 113–146): \$1.2 billion remains available in 2016.

Medical Facilities provides for the operations and maintenance of the capital infrastructure required to provide health care to the Nation's veterans. These costs include utilities, engineering, capital planning, leases, laundry services, grounds maintenance, trash removal, housekeeping, fire protection, pest management, facility repair and maintenance, and property disposition and acquisition.

For 2017, the total budgetary resources of \$1.9 billion is comprised of \$663 million in direct appropriations, \$564 million in medical care support such as physicians' pay, utilities and other overhead, \$500 million in Fed-

MEDICAL AND PROSTHETIC RESEARCH—Continued

eral grants, and \$185 million in other non-federal resources. The research program will support 3,521 full time equivalents through direct appropriation.

This account is an intramural program that has had outstanding success performing research that has led to critical clinical achievements that improve the health and quality of life for veterans and the Nation. VA research transforms medicine by engaging veterans as research volunteers and utilizing the results of that research in clinical care. Through technology, advancements, innovations, and information, research helps transform VA's health care into a leading example of medicine in the twenty-first century.

In 2017, VA's research priorities focus on ensuring world-class care for veterans throughout their lives, emphasizing personalized precision medicine approaches to improve clinical outcomes, and developing a Learning Health Care System. Health services research will continue to advance implementation of improved treatments in the VA health care system and optimize systems approaches to care delivery. VA will advance engineering research and development to improve the lives of disabled veterans by personalizing prosthetic systems that replace lost limbs or activate remaining nerves and muscles.

Building on the Million Veteran Program (MVP) to advance the President's Precision Medicine initiative (PMI) is a major goal for VA Research in 2017 and 2018. MVP, a groundbreaking genomic research program, seeks to collect genetic samples and general health information from one million veterans. This program will use genetic analysis to show how to improve treatments by understanding individual patients, thus improving care for veterans and the Nation. MVP has enrolled more than 438,000 veterans. An initial genetic analysis is ongoing; some data are now available to investigators who are beginning studies on posttraumatic stress disorder, schizophrenia, bipolar disorder, and Gulf War Illness. VA research is committed to ensuring the success of the PMI, and in FY 2017 will re-prioritize program spending to provide additional support to this initiative.

Research to benefit Gulf War veterans remains a priority. Over the past several years, the number of projects funded and the level of funding have increased each year. As directed by Senate Report 111-40, the VA research program ensures that no less than \$15 million is available for Gulf War research each year; the actual amount spent on such research depends on the quantity and quality of research proposals. VA has worked to develop Gulf War researchers to ensure that research proposals of high scientific merit are submitted. Funding increased from \$9.7 million in 2014, to \$10.5 million in 2015, \$12.5 million in 2016, with a 2017 estimate of \$15 million.

VA is expanding research efforts to improve women veterans' health, by studying how VA provides for women veterans' general and gender-specific health care needs, and understanding military experiences of women veterans as well as later health risk factors.

VA works closely with other federal agencies to assure effective use of scarce taxpayer resources in executing its research mission. We conduct joint programmatic reviews with the Department of Defense (DoD) and National Institutes of Health to ensure that our research efforts are well coordinated and Under the President's National Research action Plan (NRAP), VA and DoD created research consortia for traumatic brain injury and posttraumatic stress disorder, investing \$107 million over five years. High level coordination has become routine for all three agencies, benefit veterans and the American public.

Veterans' health issues are addressed comprehensively in the following four program divisions and the medical care research support required for these programs:

**Biomedical laboratory.**—Supports preclinical research to understand life processes from a molecular, genomic, and physiological level in regard to diseases affecting veterans.

**Clinical science.**—Administers investigations (i.e., human subject research such as drug, surgical, single subject, pilot, and multi-center cooperative studies as well as feasibility trials) aimed at instituting new, more effective clinical care.

**Health services.**—Supports studies to identify and promote effective and efficient strategies to improve the delivery of health care to veterans.

**Rehabilitation.**—Develops novel approaches to restoring veterans with traumatic amputation, central nervous system injuries, loss of sight and/or hearing, or other physical and cognitive impairments to full and productive lives.

VA's Medical and Prosthetic Research programs are included in the Federal Research and Development (R&D) budget.

The Department of Veterans Affairs (VA) and the Department of Defense (DOD) will each contribute funding to the Joint Department of Defense-Department of Veterans Affairs Medical Facility Demonstration Fund, established by section 1704 of Public Law 111-84, the National Defense Authorization Act for Fiscal Year 2010. This funding will support the continuing operations of the Captain James A. Lovell Federal Health Care Center (FHCC), which opened on December 20, 2010. In 2016 and 2017, VA expects to transfer funds from the Medical Services, Medical Support and Compliance, Medical Facilities, and Information Technology Systems accounts, while DOD expects to transfer funds from the Defense Health Program account.

VA has the authority to collect co-payments, which are deposited into the Medical Care Collections Fund (MCCF) receipt account. As allowed by the provisions of the appropriations Act, these receipts are transferred to Medical Services, Medical Community Care, and the Joint Department of Defense-Department of Veterans Affairs Medical Facility Demonstration Fund (Joint Demonstration Fund) appropriations where they remain available until expended for the purposes of this account. In 2015, nearly \$3.5 billion was collected in the MCCF receipt account and transferred to the Medical Services appropriation and Joint Demonstration Fund to provide health care to our veterans. These collections consist of co-payments from veterans for inpatient, outpatient, and nursing home care, and prescribed medications; third-party insurance payments from veterans for nonservice-connected conditions; and collections from enhanced-use leases, the Compensated Work Therapy Program, Compensation and Living Expensed Program, and the Parking Program.

The Veterans Access, Choice, and Accountability Act of 2014 ("Veterans Choice Act"), Public Law 113-146, provided \$10 billion in mandatory funding through 2017 to establish a temporary program ("Veterans Choice Program") improving veterans' access to health care by allowing eligible veterans who meet certain wait-time or distance standards to use eligible health care providers outside the VA system. The law directed that this funding be deposited in the Veterans Choice Fund. In July 2015, Congress provided emergency funding for Hepatitis C (\$500,000,000) and Care in the Community (\$2,848,500,000) by passing Public Law 114-41, the Surface Transportation and Veterans Health Care Choice Improvement Act of 2015, which gave VA temporary authority to use Veterans Choice Fund dollars on other programs. This authority ended on October 1, 2015 and does not extend into fiscal year 2016.

This fund consists of gifts, bequests, and proceeds from the sale of property left in the care of the facilities by former beneficiaries; patients' fund balances; and proceeds from the sale of effects of beneficiaries who die leaving no heirs or without having otherwise disposed of their estate. Such funds are used to promote the comfort and welfare of veterans at hospitals, nursing homes, and domiciliaries where no general appropriation is available. Public Law 102-54 authorizes compensation work therapy and therapeutic transitional housing and loan programs to be funded from the General Post Fund. (38 U.S.C. chs. 83 and 85.)

For 2018, the Budget requests \$90,119,449,000 in advance appropriations for Compensation and Pensions. This request satisfies the requirement created by the Consolidated and Further Continuing Appropriations Act, 2015 (Public Law 113-235) and prevents our Nation's veterans from being adversely affected by budget delays.

This appropriation provides for the payment of compensation, pension, and burial benefits to veterans and survivors.

Compensation is paid to veterans for disabilities incurred in or aggravated during active military service. Dependency and Indemnity Compensation is paid to survivors of servicepersons or veterans whose death occurred while on active duty or as a result of service-connected disabilities. Compensation and vocational rehabilitation is provided to the children of Vietnam veterans who were born with certain birth defects. The Secretary may pay a clothing allowance to each veteran who uses a prescribed medication for a service-connected skin condition or wears a prosthetic or orthopedic appliance (including a wheelchair) which, in the judgment of the Secretary, tends to damage or tear the clothing of such veteran.

Miscellaneous benefits provided for are:

(a) payments for claims made pursuant to the provision of the World War Adjusted Compensation Act of 1924, as amended;

(b) a special allowance (38 U.S.C. 1312) to dependents of certain veterans who died after December 31, 1956, but who were not fully and currently insured under the Social Security Act; and

(c) payments authorized by the Equal Access to Justice Act.

The appropriation also provides for a program to allow VA to perform income matches for certain compensation recipients.

In accordance with Public Law 97-377, the Reinstated Entitlement Program for Survivors (REPS) program restores Social Security benefits to certain surviving spouses or children of veterans who died of service-connected causes.

Legislation is proposed to provide a cost-of-living adjustment comparable to the annual social security increase to recipients of disability compensation, dependency and indemnity compensation, and clothing allowances. The increase, effective with payments made on January 1, 2017, is expected to be 0.8 percent.

Pension benefits may be paid to veterans or their survivors. A veteran's entitlement is based on active duty service of a specific length (normally 90 days or more) during a designated war period, disabilities considered permanent and total, and countable income below established levels. There is no disability requirement for survivor cases or veterans age 65 or older. Income support is provided at established benefit levels.

An automatic annual cost-of-living increase comparable to the annual social security increase is provided for those pensioners in the improved program and to parents receiving dependency and indemnity compensation. The increase, effective with payments made on January 1, 2017, is expected to be 0.8 percent.

For 2018, the Budget requests \$13,708,648,000 in advance appropriations for Readjustment Benefits. This request satisfies the requirement created by the Consolidated and Further Continuing Appropriations Act, 2015 (Public Law 113-235) and prevents our Nation's Veterans from being adversely affected by budget delays.

This appropriation finances educational assistance allowances for certain servicemembers, veterans, and for eligible dependents of those: (a) veterans who died from service-connected causes or have a total and permanent rated service-connected disability; and (b) servicemembers who were captured or missing in action. In addition, certain disabled veterans are provided with vocational rehabilitation, specially adapted housing grants, and automobile grants with the associated approved adaptive equipment. Voluntary contributions by eligible servicemembers and matching contributions provided by the Department of Defense are included in the Post-Vietnam Era Veterans Education Account.

*The Post 9-11 GI Bill (Chapter 33).*—Public Law 110-252 greatly expanded education benefits beginning on August 1, 2009. Based on length of active duty service and training rate, trainees may be entitled to benefits including: tuition and fees, housing allowance, books and supplies stipend,

kickers, and Yellow Ribbon matching payments. Certain active duty members of the Armed Forces may transfer benefits to a spouse or children.

*All volunteer force educational assistance (Montgomery GI Bill).*—Public Law 98-525, enacted October 19, 1984, established two new educational programs: an assistance program for veterans who enter active duty during the period beginning July 1, 1985; and an assistance program for certain members of the Selected Reserve. Public Law 108-375 established a program to provide educational assistance to members of the reserve components called or ordered to active service in response to a war or national emergency declared by the President or the Congress, in recognition of the sacrifices that those members make in answering the call to duty. The Readjustment Benefit appropriation pays the basic benefit allowance for veterans, except for certain Post-Vietnam Era Veterans Education participants who transferred to the Montgomery GI Bill program. Supplementary educational assistance, Post-Vietnam Era Veterans Education converters, reservists, and the National Call to Service Program are financed by payments from Department of Defense.

*Survivors and Dependents Educational Assistance (Chapter 35).*—Benefits are provided to children and spouses of veterans who died of a service-connected disability or whose service-connected disability is rated permanent and total. In addition, dependents of servicemembers missing in action or interred by a hostile foreign government for more than 90 days are also eligible. The following table provides a comparison of trainees and costs for the Dependents Educational Assistance.

*The Veterans Retraining Assistance Program.*—Established under Public Law 112-56, is a program that, from July 1, 2012 through March 31, 2014, provides up to 12 months of retraining assistance to veterans at least 35 years of age but not more than 60 years of age, who are unemployed, received an honorable discharge and have no eligibility remaining for other education benefits. Veterans participating in this program would receive monthly payments equal to the three-year payment rate under the Montgomery GI Bill (MGIB) chapter 30.

The following table shows a caseload and cost comparison for these beneficiaries under existing legislation.

**Vocational Rehabilitation and Employment (Chapter 31).**—Servicemembers and veterans with service-connected disabilities receive the assistance necessary to help them prepare for, obtain, and maintain suitable employment. Comprehensive assessments may include interest and aptitude testing as well as specialized assessments such as functional capacity examinations. During the training phase of the program, eligible servicemembers and veterans are provided assistance for necessary training such as tuition, fees, books and supplies at colleges, technical schools and other training programs. A veteran enrolled in training receives a monthly subsistence allowance. Eligible veterans may also receive specialized or adaptive equipment to help them overcome a disability or enable them to compete with non-disabled individuals. At the completion of training, veterans are provided with employment and placement services, including supplies and equipment needed to enter employment, adaptive equipment and workplace accommodations, incentives to employers to reimburse them for hiring and training veterans with disabilities, and two final months of subsistence allowance.

**Tuition Assistance.**—Public Law 106–398, enacted October 30, 2000, allows the military services to pay up to 100 percent of tuition and expenses charged by a school for servicemembers. If a service department pays less than 100 percent, a servicemember eligible for the Montgomery GI Bill Active-duty (MGIB) or the Post 9–11 GI Bill (Chapter 33) can elect to receive VA benefits for all or a portion of the remaining expenses. Public Law 108–454 established a program that provides availability of education benefits for payment for national admissions exams and national exams for credit at institutions of higher education.

**The National Exams.**—The benefit allows VA to reimburse for the fee charged for national tests for admission to institutions of higher learning and national tests providing an opportunity for course credit at institutions of higher learning.

**Licensing and Certification Test Payments.**—Under Public Law 106–419, veterans and other eligible persons may receive up to \$2,000 to pay fees required for civilian occupational licensing and certification examinations needed to enter, maintain, or advance in employment in a vocation or profession, effective March 1, 2001.

**National Call to Service.**—The 2003 National Defense Authorization Act directs the Department of Defense to offer an active duty enlistment option of 15 months plus training time to facilitate interest in National Service. Program participants will be given the opportunity to select one of the following incentives: a \$5,000 enlistment bonus, repayment of student loans up to \$18,000, or one of two education allowances.

**Work-Study.**—Certain veterans, reservists, and dependents pursuing a program of rehabilitation, education or training, who are enrolled as full-time students, can work up to 250 hours per semester, receiving the Federal (\$7.25 as of July 24, 2009) or state minimum wage rate, whichever is higher.

**Payments to States.**—State approving agencies are reimbursed for the costs of inspecting, approving, and supervising programs of education and training offered by educational institutions and training establishments in which veterans, dependents, and reservists are enrolled or are about to enter.

**Reporting Fees.**—Reporting fees are paid to education and training institutions to help defray the costs of certifying education enrollment for veterans enrolled in training during a calendar year.

**Specially Adapted Housing Grants.**—Specially adapted housing grants are provided to certain severely disabled veterans. In 2016, the maximum grant amount was \$73,768. Veterans who suffer service-connected blindness or who have lost the use of both upper extremities can receive up to \$14,754 in 2016.

**Specially Adapted Housing Assistive Technology Grants.**—Under the Veterans Benefits Act of 2010, (Public Law 111–275), VA may provide grants of up to \$200,000 per fiscal year to individuals or entities for the development of specially adapted housing assistive technologies and limits to \$1 million the aggregate amount of such grants VA may award in any fiscal year.

**Automobile Grants and Adaptive Equipment.**—Certain disabled veterans are provided with automobile grants with the associated approved adaptive equipment. An allowance is provided to certain service-disabled veterans and servicemembers toward the purchase price of an automobile. The maximum allowance increased to \$20,114.34 in 2015, under The Veterans Benefits Act of 2010, (Public Law 111–275) and will continue to increase based on the CPI-U. Adaptive equipment and the maintenance and replacement of such equipment is also provided.

Insurance awards .....	207,551	206,400	195,190

For military and naval insurance, national service life insurance, servicemen's indemnities, service-disabled veterans insurance, and veterans mortgage life insurance as authorized by chapters 19 and 21, title 38, United States Code \$124,504,000, to remain available until expended, of which \$107,899,000 shall become available on October 1, 2017. Public Law 114-113, Consolidated Appropriations Act, 2016 on December 18, 2015, enacted associated advance 2017 appropriations of \$91,920,000 that shall become available on October 1, 2016.

Note.—Department of Veterans Affairs insurance policy loans are not an extension of Federal credit. Credit schedules previously shown for this account have been discontinued.

The insurance business line administers six life insurance programs, including two trust funds, two public enterprise funds, a trust revolving fund, and Veterans' Mortgage Life Insurance (VMLI), and supervises four additional programs for the benefit of servicepersons, veterans, and their beneficiaries through contracts with a commercial company. All programs are operated on a commercial basis, to the extent possible, consistent with all applicable statutes. The insurance appropriation is the supplemental funding mechanism for the following Government life insurance activities: National Service Life Insurance (NSLI); Service-Disabled Veterans Insurance Fund (S-DVI); and Veterans' Mortgage Life Insurance.

National Service Life Insurance.—Payments are made to the NSLI fund for certain World War II veterans for: (a) extra hazards of service; (b) gratuitous insurance granted to certain persons unable to apply for National Service Life Insurance; and (c) death claims on policies under the waiver of a premium while the insured was on active duty.

Payment to Service-Disabled Veterans Insurance Fund.—Payments are made to the S-DVI fund to supplement the premiums and other receipts of the fund in amounts necessary to pay claims on insurance policies issued to veterans with service-connected disabilities.

Veterans' Mortgage Life Insurance.—Payments are made to mortgage holders under this program, which provides mortgage protection life insurance to veterans who have received a grant for specially adapted housing due to severe disabilities. The trend in the number and amount of insurance policies in force appears in the following table.

The Insurance Act of 1951 established the Service-Disabled Veterans Insurance (S-DVI) program for veterans with service-connected disabilities. S-DVI is open to veterans who separated from the service on or after April 25, 1951. This fund finances the payment of claims on existing life insurance policies and remains open for new issues at standard rates to veterans having service-connected disabilities.

OPERATING COSTS

*Death claims.*—Represents payments to designated beneficiaries.

*All other.*—Represents payments to policyholders who surrender their policies for their cash value and hold endowment policies which have matured.

*Capital investment.*—A policyholder may borrow up to 94 percent of the value of his or her policy.

*Administration.*—Represents the administrative costs of claims processing and account maintenance.

The trend in the number and amount of policies in force is indicated in the following table.

POLICIES AND INSURANCE IN FORCE

	2015 actual	2016 est.	2017 est.
Number of policies (EOY) .....	266,840	273,120	278,780
Insurance in force (dollars in millions) (EOY) .....	\$2,794	\$2,865	\$2,945

*Financing.*—Operations are financed from premiums and other receipts. Additional funds are received by transfer from the Veterans Insurance and Indemnities appropriation, instead of direct appropriations to this fund.

*Operating results and financial condition.*—Since premium and other receipts are insufficient to cover operations, the fund continues to project liabilities in excess of assets. The deficit is expected to reach an estimated \$ 1,399 million by September 30, 2017. The expected deficit is financed by additional funds from the above-mentioned Veterans Insurance and Indemnities appropriations.

This fund pays claims and administrative costs on participating life insurance policies issued during the period May 1, 1965, through May 2, 1966, under three life insurance programs: 1) service-disabled standard insurance; 2) service-disabled rated insurance; and 3) nonservice-disabled insurance availing disabled World War II and Korean conflict veterans an opportunity to acquire life insurance coverage who were no longer eligible for other government insurance.

*Budget program:*

*Death claims.*—Represents payments to designated beneficiaries.

*Dividends.*—Policyholders participate in the distribution of annual dividends.

*All other.*—This represents resources for the administrative costs of processing claims and maintaining the accounts, and to those policyholders who: (a) surrender their policies for cash value; (b) hold endowment policies which have matured; and (c) have purchased total disability income coverage and subsequently become disabled.

*Policy loans made.*—A policyholder may borrow up to 94 percent of the cash value of his policy at an interest rate adjusted to reflect private sector borrowing costs.

The following table reflects the decrease in the number of policies and the amount of insurance in force:

This fund finances the payment of group life insurance premiums to private insurance companies under the Servicemembers' Group Life Insurance (SGLI) Act of 1965, as amended. SGLI is a program for Servicemembers on active duty, ready reservists, members of the National Guard, members of the Commissioned Corps of the National Oceanic and Atmospheric Administration and the Public Health Service, cadets and midshipmen of the four service academies, and members of the Reserve Officer Training Corps. SGLI coverage is available in \$50,000 increments up to the maximum of \$400,000. Veterans' Group Life Insurance (VGLI) is a program of post-separation insurance which allows Servicemembers to convert their SGLI coverage to renewable term insurance. Family Servicemembers' Group Life Insurance (FSGLI) is a program extended to the spouses and dependent children of members insured under the SGLI program. FSGLI provides up to a maximum of \$100,000 of insurance coverage for spouses, not to exceed the amount of SGLI the insured member has in force, and \$10,000 of free coverage for dependent children. Spousal coverage is issued in increments of \$10,000.

The Servicemembers' Group Life Insurance Traumatic Injury Protection Program (TSGLI) became effective December 1, 2005. TSGLI provides for payment between \$25,000 and \$100,000 (depending on the type of injury) to any member of the uniformed services covered by SGLI who sustains a traumatic injury that results in certain serious losses.

*Veterans Affairs (VA) Housing Program Account.*—The housing program helps eligible veterans, active duty personnel, surviving spouses, and members of the Reserves and National Guard purchase, retain, and adapt homes in recognition of their service to the Nation. When a borrower purchases a home, the program operates by substituting the Federal Government's guaranty for a down payment that might otherwise be required.

Under 38 U.S.C. 3703, the guaranty amount for a borrower with full entitlement (first-time users of the program or users whose entitlement is fully restored) is as follows:

- (a) 50 percent for loans of \$45,000 or less;
- (b) \$22,500 for loans greater than \$45,000, but no more than \$56,250;
- (c) The lesser of \$36,000 or 40 percent of the loan amount for loans greater than \$56,250, but not more than \$144,000;
- (d) 25 percent of the loan amount for loans of \$144,001 to \$417,000; or
- (e) For certain loans in excess of \$417,000, the guaranty will be the lesser of: 25 percent of the county loan limit, or 25 percent of the loan.

This appropriation provides for the corporate leadership and operational support to VA's Housing business line. The Housing Program facilitates the extension of private capital, on more liberal terms than generally available to nonveterans, to assist veterans and servicemembers in obtaining housing credit, and assist veterans in retaining their homes during periods of temporary economic difficulty through intensive supplemental mortgage loan servicing.

*Guaranteed transitional housing loans for homeless veterans.*—Established as a pilot project by the Veterans Benefits Improvement Act of 1998, Public Law 105-368, this program does not require any new loan subsidy funding. The program has originated no new loans since 2009. The program was canceled in 2012. The existing loan will continue to be serviced within the program's financing account.

The Native American Veterans Housing Loan program provides direct loans to veterans living on trust lands under 38 U.S.C. chapter 37, section 3761. These loans are available to purchase, construct, or improve homes to be occupied as the veteran's residence. This program began as a pilot in 1993 and was made permanent on June 15, 2006, through Public Law 109-233.

The Vocational Rehabilitation Loan Program provides temporary loans to cover the costs of subsistence, tuition, books, supplies, and equipment in conjunction with service-connected disability benefits provided to veterans participating in VA's Vocational Rehabilitation and Counseling Program as authorized by chapter 31 of title 38, United States Code. Repayment of these loans is made in monthly installments, without interest, through deductions from future payments of compensation, pension, subsistence allowance, educational assistance allowance, or retired pay.

*Note.*—Department of Veterans Affairs insurance policy loans are not an extension of Federal credit. Credit schedules previously shown for this account have been discontinued.

This fund was established in 1940. It is for the World War II servicemembers' and veterans' insurance program. Over 22 million policies were issued under this program. Activity of the fund reflects a declining claim workload. The trend in the number and amount of policies in force is shown as follows:

**POLICIES AND INSURANCE IN FORCE**

	2015 actual	2016 est.	2017 est.
Number of policies .....	370,281	308,655	252,815
Insurance in force (dollars in millions) .....	\$4,655	\$3,810	\$3,236

This fund is operated on a commercial basis to the extent possible. The income of the fund is derived from premium receipts, interest on investments, and payments which are made to the fund from the Veterans Insurance and Indemnities appropriation.

Assets of the fund, which are largely invested in special interest-bearing Treasury securities and in policy loans, are expected to decrease from an estimated \$4,410 million as of September 30, 2016 to \$3,742 million as of September 30, 2017. The actuarial estimate of policy obligations as of September 30, 2017, totals \$3,667 million, leaving a balance of \$75 million for contingency reserves.

Note.—Department of Veterans Affairs insurance policy loans are not an extension of Federal credit. Credit schedules previously shown for this account have been discontinued.

This fund was established in 1919 to receive premiums and pay claims on insurance issued under the provisions of the War Risk Insurance Act. The general decline in the activity of the fund is indicated in the following table:

POLICIES AND INSURANCE IN FORCE

	2015 actual	2016 est.	2017 est.
Number of policies	672	325	150
Insurance in force (dollars in millions)	\$1	\$7	\$2

The fund is operated on a commercial basis to the extent possible. The income of the fund is derived from interest on investments. Effective January 1, 1983, premiums were discontinued because reserves held in the fund were adequate to meet future liabilities of the program.

Assets of the fund, which are largely invested in interest-bearing securities and policy loans, are estimated to decrease from \$3.7 million as of September 30, 2016, to \$2.4 million as of September 30, 2017, as an increasing number of policies mature through death or disability. The actuarial evaluation of policy obligations as of September 30, 2017, totals \$2.1 million, leaving a balance of \$0.3 million for contingency reserves.

No new policies can be issued. Policyholders may elect to purchase total disability income coverage with the payment of additional premiums.

Benefit program:

Death claims.—Represents payments to designated beneficiaries.

Cash surrenders.—A policyholder may terminate his or her insurance by cashing in the policy for its cash value.

Dividends.—Policyholders participate in the distribution of annual dividends.

All other.—Classified in this category are payments to policyholders who: (a) hold endowment policies which have matured; (b) have purchased total disability income coverage and subsequently become disabled; and (c) are paid interest on dividend credits and deposits.

The mission of the National Cemetery Administration is to honor veterans with final resting places in national shrines and with lasting tributes that commemorate their service to our Nation. The National Cemetery Administration's vision is to serve all veterans and their families with the utmost dignity, respect, and compassion. Every national cemetery will be a place that inspires visitors to understand and appreciate the service and sacrifice of our Nation's veterans. There are six related programs managed by the National Cemetery Administration including: 1) burying eligible veterans and their family members in national cemeteries and maintaining the graves and their environs as national shrines; 2) administering grants to States and Tribal organizations in establishing, expanding, improving, or operating veterans cemeteries; 3) providing headstones and markers for the graves of eligible veterans; 4) providing presidential memorial certificates to family and friends of deceased veterans, recognizing the veterans' contribution and service to the Nation; 5) providing graveliners or partial reimbursement for a privately purchased outer burial receptacle for each new grave in open national cemeteries administered by the National Cemetery

NATIONAL CEMETERY ADMINISTRATION—Continued

Administration; and 6) recording First Notice of Veteran Deaths into VA electronic files to ensure timely termination of benefits and next-of-kin notification of possible entitlement to survivor benefits.

The National Cemetery Administration also reflects budget information for the National Cemetery Gift Fund and the National Cemetery Administration Facilities Operation Fund. Through the Gift Fund, the Secretary is authorized to accept gifts and bequests which are made for the purpose of beautifying national cemeteries or are determined to be beneficial to such cemeteries, or are made for the purpose of the operation, maintenance, or improvement of the National Memorial Cemetery of Arizona. Through the Facilities Operation Fund, the Secretary is authorized to lease any undeveloped land and unused or underutilized buildings of the National Cemetery Administration, or parts or parcels thereof, for a term not to exceed 10 years. Proceeds from such leases are deposited in the Facilities Operation Fund, and are available to cover costs incurred by the National Cemetery Administration in the operation and maintenance of property of the Administration.

The VA Franchise Fund was established under the authority of the Government Management Reform Act of 1994 and the VA and Housing and Urban Development and Independent Agencies Act of 1997. VA was selected by the Office of Management and Budget (OMB) in 1996 as one of the six executive branch agencies to establish a franchise fund pilot program. Created as a revolving fund, the VA Franchise Fund began providing common administrative support services to the VA and other government agencies in 1997 on a fee-for-service basis. In 2006, under the Military Quality of Life and Veterans Affairs Appropriations Act, Public Law 109-114, permanent status was conferred upon the VA Franchise Fund. VA Enterprise Centers are the lines of business within the VA Franchise Fund and are expected to have net billings of about \$965 million and employ 1,769 in 2017. The Franchise Fund concept is intended to increase competition for government administrative services, resulting in lower costs and higher quality.

This appropriation funds the construction, replacement, rehabilitation, and expansion of water resources projects whose principal purpose is to provide commercial navigation, flood and storm damage reduction, or aquatic ecosystem restoration benefits to the Nation, and related efforts. The Budget shows all funding provided through the Inland Waterways Trust Fund as well as a portion of the funding from the Harbor Maintenance Trust Fund as transferred to and executed in the Construction account.

This account allocates funds on a performance basis to high-performing projects. The Budget funds those investments within the three main mission areas of the Corps civil works program — commercial navigation, flood and storm damage reduction, and aquatic ecosystem restoration — as well as related efforts (such as hydropower at multi-purpose dams) that provide the best economic, environmental, and public safety returns to the Nation.

This account includes \$75 million for work under the Comprehensive Everglades Restoration Plan (CERP), which represents approximately 7 percent of the total amount in this account and approximately 2 percent of the total amount in the civil works program. Funding CERP at this level would not have a significant impact on the overall civil works program in 2017. Construction account funding for CERP in future years will depend on the availability of funds, so the impact of such future funding on the overall civil works program cannot be determined at this time. Funding for the Department of the Interior (DOI) includes an additional \$8 million for work under CERP. This account also includes approximately \$31 million for other ecosystem restoration work by the Corps in South Florida, including the Everglades ecosystem. Funding for DOI includes \$55 million for such non-CERP work. The Budget for the two agencies includes a total of \$169 million for ecosystem restoration work in South Florida, of which \$83 million is for CERP and \$86 million is for non-CERP work.

This appropriation also funds the Corps continuing authorities programs, which involve the planning, design, and construction of smaller projects that do not require specific authorizing legislation.

This appropriation funds inspection, operation, maintenance, and related activities for water resources projects operated and maintained by the Corps. These projects include navigation channels, navigation locks and dams, structures to reduce the risk of flood and storm damage (e.g., levees), and

multi-purpose projects, as authorized in River and Harbor, Flood Control, and Water Resources Development Acts and other laws. Key infrastructure that is of central importance to the Nation and the continued safety of the public is given the highest priority for funding in this account. The Budget shows a portion of the funding provided through the Harbor Maintenance Trust Fund as transferred to and executed in the Operations and Maintenance account.

This appropriation funds all of the costs associated with protecting Corps facilities from potential security threats. It also funds the national emergency preparedness program under Executive Order 11490.

This account provides \$300 thousand for operation and maintenance of ecosystem restoration work in South Florida. None of these funds is for CERP work. The operation and maintenance funding of CERP and non-CERP work is expected to slowly increase over time as construction projects are completed. The future impact of this on the civil works program is therefore linked in part to the pace of construction, which depends on the availability of funding and cannot be determined at this time.

This revolving fund provides for the acquisition, operation, and maintenance of plant and equipment used by the civil works program and for temporary financing of services chargeable to the civil works program. The fund also initially finances Corps district office operating expenses, which the districts later reimburse with project-specific funds. In addition, payments are made into the fund when other agencies or entities use plant and equipment acquired by the fund.

The Harbor Maintenance Trust Fund is authorized under the Harbor Maintenance Revenue Act of 1986 (P.L. 99-662, Title XIV), as amended. Revenue is derived from a 0.125 percent ad valorem tax imposed upon commercial users of specified U.S. ports, Saint Lawrence Seaway tolls, and investment interest. The Budget shows all funding provided through the Harbor Maintenance Trust Fund as transferred to and executed in the Construction, Operation and Maintenance, and Mississippi River and Tributaries accounts.

The Harbor Maintenance Revenue Act authorizes expenditures from this fund to finance up to 100 percent of eligible Corps harbor operation and maintenance costs, including the operation and maintenance of Great Lakes

navigation projects. The fund fully finances eligible operation and maintenance costs of the Saint Lawrence Seaway Development Corporation. The Water Resources Development Act of 1996 (P.L. 104-303, section 201) authorizes the fund to pay the Federal share of the costs for the construction of dredged material disposal facilities that are necessary for the operation and maintenance of coastal or inland harbors, the dredging and disposal of contaminated sediments that are in or affect the operation and maintenance of Federal navigation channels, the mitigation of impacts resulting from Federal navigation operation and maintenance activities, and the operation and maintenance of dredged material disposal facilities.

The North American Free Trade Agreement Implementation Act (26 U.S.C. 9505(c)(3)) authorizes the fund to pay all expenses of administration incurred by the Department of the Treasury, the Corps, and the Department of Commerce related to the administration of the harbor maintenance tax (under 26 U.S.C. 4461 et seq.), but not in excess of \$5 million for any fiscal year.

In 1998, the U.S. Supreme Court excluded all U.S. exports from the harbor maintenance tax. The Court found that the tax violated Article I, section 9, clause 5 of the constitution because the value of the cargo, which is the basis for calculating this tax, does not fairly match the use of port services and facilities by exporters.

The Inland Waterways Trust Fund is authorized under the Inland Waterways Revenue Act of 1978 (P.L. 95-502), as amended by the Water Resources Development Act of 1986 (P.L. 99-662). The fund is used to pay one-half of the costs associated with the construction, replacement, rehabilitation, and expansion of Federal inland waterways projects, except as otherwise specifically provided for in law. Under current law, revenue is derived from an excise tax imposed on diesel fuel for commercial vessels on most of the inland waterways, plus investment interest. The Budget shows all funding provided through the Inland Waterways Trust Fund as transferred to and executed in the Construction account.

The 2017 payment to the Military Retirement Fund includes funds for the amortization of the unfunded liability for all retirement benefits earned by military personnel for service prior to 1985. The amortization schedule for the unfunded liability is determined by the Department of Defense Retirement Board of Actuaries. Included in the unfunded liability are the consolidated requirements of the military departments to cover retired officers and enlisted personnel of the Army, Navy, Marine Corps, and Air Force; retainer pay of enlisted personnel of the Fleet Reserve of the Navy and Marine Corps; and survivors' benefits.

The 2004 National Defense Authorization Act (P.L. 108-136) created additional benefits for certain retirees who receive disability compensation from the Department of Veterans Affairs and moved the responsibility for payments under the Combat Related Special Compensation program to the Military Retirement Fund. Any additional funding requirements for retirees with service prior to 1985 will be included in this payment.

The 2016 National Defense Authorization Act (P.L. 114-92) enacted substantial changes to the current military retirement system. The new retirement system, scheduled to take effect January 1, 2018, is a blend of several components to include a defined retired pay benefit, a defined contribution with the Thrift Savings Plan, and a bonus (continuation pay) paid to the member to maintain Service retention requirements. Currently serving members will remain grandfathered under the current retirement system. The Budget includes a proposal to amend the new blended retirement system to address the military department's priorities to include

flexibility in the payment of continuation pay, TSP matching amounts, TSP matching start date, and when TSP matching contributions terminate.

Public Law 98-94 provided for accrual funding of the military retirement system and for the establishment of a Department of Defense Military Retirement Fund in 1985. The fund has three sources of income. The first is payments from the military personnel accounts, which cover the accruing costs of the future retirement benefits being earned by today's service members. The second source is interest on investments of the fund. The third source is made up of two payments from the general fund of the Treasury. The first Treasury payment covers a portion of the accrued unfunded liability for all the retirees and current members who had earned benefits before the accrual funding system was set up. The second Treasury payment covers the liability for concurrent receipt of military retired pay and disability compensation paid by the Department of Veterans Affairs. This benefit was added in the 2004 National Defense Authorization Act.

The 2016 National Defense Authorization Act (P.L. 114-92) enacted substantial changes to the current military retirement system. The new retirement system, scheduled to take effect January 1, 2018 is a blend of several components to include, a defined retired pay benefit, a defined contribution with the Thrift Savings Plan, and a bonus (continuation pay) paid to the member to maintain Service retention requirements. Currently serving members will remain grandfathered under the current retirement system. The Budget includes a proposal to amend the new blended retirement system to address the military department's priorities to include flexibility in the payment of continuation pay, TSP matching amounts, TSP matching start date, and when TSP matching contributions terminate.

The status of the fund is as follows:
