Operations and Support funds necessary operations, mission support, and associated management and administration costs. The 2017 President's Budget proposes the Congress rename the Chemical, Biological, Radiological, Nuclear, and Explosives Office (CBRNE) Management and Administration account as the "Operations and Support" account. This account supports Management and Administration; Radiological and Nuclear Detection, Forensics, and Prevention Capability; and Chemical, Biological, and Emerging Infectious Diseases Capability for the Chemical, Biological, Radiological, Nuclear, and Explosives Office (CBRNE). The Radiological and Nuclear Detection, Forensics, and Prevention Capability program was established to protect against radiological and nuclear threats directed against the United States or its interests. The Radiological and Nuclear Detection, Forensics, and Prevention Capability program serves as the primary entity of the United States Government to further develop, acquire, and support the deployment of an enhanced system to detect and report on attempts to import, possess, store, transport, develop, or use an unauthorized nuclear explosive device, fissile material, or radiological material in the United States, and improve that system over time. Chemical, Biological, and Emerging Infectious Diseases Capability programs coordinate and maintain department-wide chemical, biological, health and medical, and emerging infectious disease-related strategy, policy, situational awareness, periodic threat and risk assessments, contingency planning, and all elements of Presidential Policy Directive 8, National Preparedness. These programs support the President's Global Health Security Agenda and prioritization of activities to counter biological threats through bio-detection and biosurveillance. The Management and Administration request includes most contributions to the Department of Homeland Security Working Capital Fund. Management and Administration funds will be available for obligation until the end of the fiscal year. Radiological and Nuclear Detection, Forensics, and Prevention Capability funds will be available for obligation for three years. Chemical, Biological, and Emerging Infectious Diseases Capability funds will be available for obligation for two years.

Research and Development includes funds necessary for supporting the search for new or refined knowledge and ideas and for the application or use of such knowledge and ideas for the development of new or improved products and processes with the expectation of maintaining or increasing national economic productive capacity or yielding other future benefits. The 2017 President's Budget requests the Congress establish a "Research and Development" account under the Chemical, Biological, Radiological, Nuclear, and Explosives Office (CBRNE). This account supports the engineering, research, development, and technical nuclear forensics programs of the Chemical, Biological, Radiological, Nuclear, and Explosives Office (CBRNE). CBRNE is dedicated to the development of advanced nuclear detection systems; coordination of effective sharing of nuclear detection-related information; coordination of nuclear detection development; and technical nuclear forensics. The 2017 Budget provides for a systems development program that is responsive to the commercial marketplace while providing near-term technical solutions addressing pressing operational requirements. Funding is provided for the test and evaluation of all developed systems prior to acquisition decisions, ensuring that a full systems characterization is conducted prior to any deployments. The budget supports

transformational research and development providing break-through technologies that address gaps in the Global Nuclear Detection Architecture and have a positive impact on capabilities to detect nuclear threats. Research and Development funds for each fiscal year will be available for obligation for three years.

PROCUREMENT, CONSTRUCTION, AND IMPROVEMENTS—Continued

Procurement, Construction, and Improvements provides funds necessary for the planning, operational development, engineering, and purchase of one or more assets prior to sustainment. The 2017 President's Budget requests the Congress establish a "Procurement, Construction, and Improvements" account under the Chemical, Biological, Radiological, Nuclear, and Explosives Office (CBRNE). Procurement, Construction, and Improvements provides funds used to procure a full range of radiation detection technologies for Department of Homeland Security components such as U.S. Customs and Border Protection, Transportation Security Administration, and the U.S. Coast Guard. These technologies are deployed at and between the Nation's ports of entry as well as in the maritime domain. Procurement, Construction, and Improvements funds in Fiscal Year 2017 will be used to procure a mix of Radiation Portal Monitors and Human Portable Radiation Detection Systems. Procurement, Construction, and Improvements funds for each fiscal year will be available for obligation for three years.

Federal Assistance provides monetary or non-monetary support to any entity. Support may be provided in the form of grants or grant agreements, loan guarantee commitments, interest subsidies, insurance and other federal support, but not including amounts received as reimbursement for services rendered to individuals in accordance with guidance issued by the Director of OMB. The 2017 President's Budget requests the Congress establish a "Federal Assistance" account under the Chemical, Biological, Radiological, Nuclear, and Explosives Office (CBRNE). Federal Assistance provides support for Radiological and Nuclear Detection, Forensics, and Prevention Capability and Bombing Prevention for the Chemical, Biological, Radiological, Nuclear, and Explosives Office (CBRNE). The Radiological and Nuclear Detection, Forensics, and Prevention Capability includes funding for operational support programs that provide information analysis and situational awareness, technical support, training curricula, and response protocols to field-users. Funding also supports efforts to build basic radiological and nuclear detection capabilities in high risk urban regions. The Bombing Prevention program leads and coordinates DHS efforts to protect life and critical infrastructure by building capabilities across the private and public sectors to prevent, protect against, respond to, and mitigate bombing incidents. Radiological and Nuclear Detection, Forensics, and Prevention Capability funds will be available for obligation for three years. The 2017 Budget provides \$50 million for the Rental Assistance Demonstration (RAD) program and expands its authority to convert additional properties to long-term, project-based Section 8 contracts that can leverage private financing for capital improvements. Under existing authorities, Public Housing Authorities (PHAs) and other owners of rental properties assisted under the Public Housing, Moderate Rehabilitation (Mod Rehab), Moderate Rehabilitation Single-Room Occupancy (Mod Rehab SRO), Rent Supplement (Rent Supp) and Rental Assistance Payment (RAP) programs are offered the option to convert their properties to Section 8 contracts. The Budget expands this authority to enable Section 202 Housing for the Elderly Project Rental Assistance Contracts (PRACs) the option to also convert to Section 8 contracts.

In addition to no-cost conversions, the requested \$50 million would be awarded to both PHAs and Section 202 PRAC owners to cover the incremental subsidy necessary for properties to feasibly convert. HUD would prioritize properties that are located in high poverty neighborhoods, including designated Promise Zones, where the Administration is supporting comprehensive revitalization efforts or other efforts to significantly increase opportunities for the residents. HUD also intends to prioritize conversions of Section 202 PRAC properties that have significant recapitalization needs in high need areas, as well as other criteria, including those properties with service coordinators for frail and elderly residents.

The Budget also includes the following proposals to facilitate additional conversions of HUD-assisted properties: 1) eliminates the 185,000 unit cap on Public Housing conversions; 2) eliminates the deadline of September 30, 2018, for submission of RAD applications; 3) standardizes ownership and control requirements for converted Public Housing properties in situations where low-income housing tax credits are used or where foreclosure,

bankruptcy, or default occurs; and 4) protects tenants' right to continue occupancy under second component conversions.

The 2017 Budget provides \$20.9 billion for the Tenant-Based Rental Assistance program (also known as the Housing Choice Voucher program), which is the Federal government's largest and most income-targeted rental assistance program. With this funding, the Housing Choice Voucher program will provide housing assistance to over 2.2 million extremely low- to very low-income families to rent decent, safe, and sanitary housing in the private market. About 2,300 state and local Public Housing Authorities (PHAs) administer the Housing Choice Voucher program.

The Budget provides \$18.5 billion in contract renewals to continue assistance for families anticipated to be under lease at the end of 2016, including renewing 14,000 housing vouchers for persons with disabilities.

Based on studies that show that moving to higher opportunity areas can have significant and positive long-term earnings and college attainment outcomes for children, the Budget includes investments in the Housing Choice Voucher program to improve the mobility of low-income families. The Budget requests \$2.1 billion in PHA administrative fees to not only support fundamental functions, such as housing quality inspections and tenant income certifications, but to ensure that PHAs have sufficient resources to promote mobility and give low-income families greater access to areas with lower crime, more job opportunities, and better schools. In addition, the Budget requests \$15 million and statutory authority to implement a Mobility Counseling Demonstration program to help families with housing vouchers move and stay in areas of opportunities. The funds would be used to pay for counseling, outreach to landlords, portability coordination, security deposits, and other administrative functions.

The Budget provides targeted discretionary funding increases to address homelessness, including \$88 million for 10,000 housing vouchers for homeless families with children. These housing vouchers will be awarded to PHAs in geographic areas with demonstrated need, in coordination with local Continuum of Care programs, and will complement the \$11 billion mandatory proposal to end family homelessness, as discussed in the "Homeless Assistance for Families" account.

The Budget requests \$110 million for tenant protection vouchers, which are provided to families who must relocate due to actions beyond their control, such as public housing demolition or redevelopment, and when private owners of multi-family developments choose to leave the project-based program or convert to long-term Section 8 contracts, as a part of the Rental Assistance Demonstration program.

The Budget provides \$7 million for the Tribal HUD-VA Supportive Housing (HUD-VASH) program, to serve homeless or at risk of homeless Native American veterans living in and around designated tribal areas.

The Budget also proposes the following statutory improvements to the Housing Choice Voucher program: 1) increasing the threshold used to determine deductions for unreimbursed medical expenses from 3 to 10 percent of family income; 2) improving the process for establishing Fair Market Rents; 3) simplifying the calculation of the 20 percent project-based voucher cap by basing the maximum on units rather than funding level; 4) implementing a new formula to allocate administrative fees; and 5) extending the maximum term of Family Unification Program vouchers issued to youths aging out of foster care from 18 to 60 months.

Until 2005, the Housing Certificate Fund provided funding to both the project-based and tenant-based components of the Section 8 program. Project-Based Rental Assistance and Tenant-Based Rental Assistance are now funded in separate accounts. The Housing Certificate Fund retains and recovers balances from previous years' appropriations, and uses those balances to support contract renewals, amendments, and performance-based contract administrators.

The Budget proposes \$1.865 billion for the Public Housing Capital Fund, a formula program designed to address the capital and management improvement needs of Public Housing properties. This program preserves and enhances a valuable affordable housing resource that serves approximately 1.1 million low-income families. Of the amount requested, approximately \$1.8 billion will fund capital grants to Public Housing Authorities (PHAs). The balance includes \$35 million for Jobs-Plus, an evidence-based program for increasing the employment and earnings of Public Housing residents, of which up to \$5 million may be used to implement a demonstration of the Jobs-Plus model in Indian country; \$5 million for ConnectHome, a project aimed at narrowing the digital divide for students and families in public housing; up to \$20 million for emergency capital needs resulting from non-Presidentially declared emergencies and natural disasters; up to \$10 million for financial and physical assessments of Public Housing and other HUD-assisted properties; and up to \$1 million for administrative and judicial receiverships.

The Budget also includes a legislative proposal to allow limited capital funds to be used for operating purposes, and operating funds for capital improvements.

PUBLIC HOUSING OPERATING FUND

For [2016] 2017 payments to public housing agencies for the operation and management of public housing, as authorized by section 9(e) of the United States Housing Act of 1937 (42 U.S.C. 1437g(e)), [ \$4,500,000,000 ] \$4,569,000,000, to

The Budget requests \$4.569 billion for the Public Housing Operating Fund, which provides subsidies to Public Housing Authorities (PHAs) to assist in funding the operating expenses of Public Housing units in accordance with Section 9(e) of the United States Housing Act of 1937. The Budget proposes cross-cutting legislative reforms to HUD's core rental assistance programs, namely increasing the threshold used to determine deductions for unreimbursed medical expenses from 3 to 10 percent of tenant income. In addition, the Budget includes two proposals specific to Public Housing: 1) additional flexibility for PHAs to use their operating funds for Capital Fund activities, and vice versa; and 2) a utilities conservation pilot to encourage PHAs to undertake energy and water conservation measures and reduce Federal costs.

The Budget provides \$200 million for Choice Neighborhoods to continue the transformation of neighborhoods of concentrated poverty into sustainable, mixed-income neighborhoods with well-functioning services, schools, public assets, transportation, and access to jobs. The goal of the program is to transform distressed neighborhoods and improve the quality of life of current and future residents by coordinating and concentrating neighborhood investments from multiple sources. The Budget will fund approximately six implementation grants and five to ten planning grants.

Choice Neighborhoods also supports the Administration's Promise Zones initiative, which is creating partnerships between the Federal government, local communities and businesses to create jobs, increase economic security, expand educational opportunities, increase access to quality, affordable housing, and improve public safety. The Budget includes companion investments of \$128 million in the Department of Education's Promise Neighborhoods program and \$24 million in the Department of Justice's Byrne Criminal Justice Innovation Grants program, as well as tax incentives to promote investment and economic growth in the Zones.

The Budget includes proposals to 1) make the allocation of Choice Neighborhoods funding for the HOPE VI Main Street Housing Grants program an option instead of a requirement, and 2) allow flexibility to reduce the term of the 20-year affordability requirement for homeownership units. HUD will consider homeownership affordability requirements across other HUD programs in determining minimum affordability periods for Choice grantees.

The HOPE VI program, in coordination with funding from the Public Housing Capital Fund, has accomplished its goal of contributing to the demolition of approximately 100,000 severely distressed Public Housing units. The Budget proposes no additional funds for this program. Instead, the Budget builds on the success of HOPE VI with the Choice Neighborhoods program, which makes a broad range of transformative investments in high-poverty neighborhoods where Public Housing and other HUD-assisted housing is located.

The Budget requests \$75 million for the Family Self-Sufficiency (FSS) Program to help Housing Choice Voucher, Public Housing, and Project-Based Rental Assistance (PBRA) residents achieve self-sufficiency and economic independence. FSS provides service coordination through community partnerships that link assisted residents with employment assistance, job training, child care, transportation, financial literacy, and other supportive services. Residents participating in FSS are provided an interest bearing escrow account; any rent increase resulting from increased earned income during their participation in the program is credited to the escrow account.

The Budget supports FSS through competitive funding for public housing agencies and authority for PBRA owners to use funds from their residual receipt accounts or other sources to hire service coordinators.

The Budget proposes \$700 million for the Native American Housing Block Grant (NAHBG) program. This program allocates funds on a formula basis to approximately 360 recipients representing more than 550 Indian tribes to help them address housing and other needs within their communities.

In real terms, funding for NAHBG has declined approximately 25 percent since the program's first year of funding in 1998. At the same time, American Indian and Alaska Natives (AIANs) continue to face severe housing challenges both in absolute terms and relative to the general population. For example, 8.1 percent of AIAN households are overcrowded compared to 3.3 percent of all households (based on 2010-2014 Census data). The requested increase for this program would partially restore the eroding real value of grant funds and accelerate tribal efforts to alleviate overcrowding and substandard housing conditions in Indian Country.

The Budget also proposes three changes to the Native American Housing and Self-Determination Act (NAHASDA) to support program management and oversight: 1) clarifying that carryover authority does not preclude HUD from recapturing funds when grantees fail to carry out eligible activities in a timely manner; 2) strengthening HUD authority to temporarily suspend recipients' access to grant funds when funds are being spent on ineligible activities; and 3) clarifying HUD authority to recapture funds distributed based on inaccurate formula data.

Within the total amount requested, \$2 million is for the Title VI loan guarantee program. The Title VI program provides a Federal guarantee of notes or other obligations issued by Indian tribes or tribally-designated housing entities for the purpose of financing affordable housing activities. The amount requested is sufficient to guarantee \$17.86 million in loans.

The Indian Housing Loan Guarantee program (also known as the Section 184 program) provides access to private mortgage financing for Indian families, Indian tribes, and their tribally-designated housing entities who otherwise could not acquire such financing because of the unique legal status of Indian trust land. The Budget provides \$5.5 million to support \$1.3 billion in loan guarantees. Of the requested amount, up to \$750 thousand may be used for administrative contract expenses.

The 2013 Appropriations Act gave HUD authority to collect an annual fee of up to 1 percent (100 basis points), and this fee is currently set at 15 basis points. To ensure that budgetary resources are sufficient to meet program demand, HUD will raise the annual fee to 25 basis points in 2017—a modest increase of 10 basis points from the current level. For the typical homebuyer, this change will translate into an \$11 increase in their monthly mortgage payment. HUD will consult with tribes prior to implementation of this policy.

The Budget also proposes statutory changes to reduce program losses and protect the Section 184 Fund, including HUD authority to: 1) seek indemnification for any loss on a mortgage that was not originated in accordance with HUD requirements; and 2) terminate lenders from the direct guarantee process if mortgages originated by a lender present an unacceptable risk to the Section 184 Fund based on comparisons with other lenders or evidence of fraud. In addition, the Budget updates several statutory program definitions to align them with the Native American Housing Assistance and Self-Determination Act.

The 2017 Budget provides \$335 million for the Housing Opportunities for Persons with AIDS (HOPWA) program, the only Federal program dedicated to address the housing needs of low-income Americans living with HIV and AIDS. HOPWA funding provides States and localities with resources to devise long-term comprehensive strategies for planning and providing housing and supportive services to meet the housing needs of persons living with HIV and AIDS and their families. HOPWA funds have been demonstrated to help reduce the risk of homelessness, increase housing stability, and improve access to HIV care and health outcomes for program participants.

Ninety percent of HOPWA funds are distributed to States and eligible metropolitan areas according to a formula, which is based on cumulative AIDS cases. The remaining ten percent are awarded competitively to States, local governments, and private nonprofit entities for projects of national significance and long-term comprehensive strategies for projects in non-formula areas. The statutory HOPWA formula does not reflect the current nature and distribution of the epidemic. To modernize the program, the Budget is proposing an updated formula based on cases of persons living with HIV and adjusted for an area's fair market rent and poverty rates, focusing HOPWA funds on areas that have the most need. The proposal also includes several changes that will allow better targeting of HOPWA resources and more flexibility for grantees to provide the most cost-effective, timely interventions.

HUD is working in partnership with Federal agencies through the HIV Care Continuum to improve outcomes that promote greater achievements in viral suppression through the coordination and alignment of housing support with medical care for people living with HIV. Furthermore, HUD is placing greater emphasis on coordinating local planning and service delivery of HOPWA housing resources with local homeless Continuums of Care. This effort is expected to increase local collaborations in the delivery of housing and services, and reduce duplication of local systems of support.

The Budget includes \$2.8 billion for the Community Development Block Grant (CDBG) program, an additional \$80 million for the Indian CDBG program, and legislative changes related to the CDBG and CDBG Disaster Recovery (CDBG-DR) programs.

**CDBG.**—The CDBG program provides over 1,250 annual formula grants to States, local governments, and Insular Areas to benefit mainly low- to moderate-income persons, and support a wide range of community and economic development activities, such as public infrastructure improvements (which account for approximately 33 percent of all CDBG funds), housing rehabilitation and construction (approximately 25 percent of funds), job creation and retention, and public services (e.g., child care). Seventy percent of CDBG formula grants are distributed to mainly urban areas (entitlement communities), and 30 percent are distributed to States (non-entitlement communities).

HUD has developed a set of legislative proposals to ensure the program delivers value and results to the nation's communities, and more specifically to low- and moderate-income populations. These legislative changes will reduce the number of small grantees to better align program operations with the current funding level; help grantees target funding resources to areas of greatest need; enhance program accountability; synchronize critical program cycles with the consolidated plan cycle; and provide more options for regional coordination, administration, and planning. Regional coordination will allow grantees to achieve administrative savings and pool resources to make strategic investment decisions. The Department will also evaluate a series of potential regulatory updates to the CDBG program, as significant portions of the CDBG regulations have not been updated in more than 20 years.

The Budget proposes to increase the set-aside for colonias to allow more funding to be directed to these rural border communities, many of which lack adequate water and sewer systems and/or decent housing. This change would increase the maximum set-aside for the colonias from 10 percent to 15 percent, and would affect the state CDBG programs of Texas, New Mexico, Arizona, and California.

The Budget proposes to make the CDBG program part of the Upward Mobility Project, a new initiative to allow states, localities or consortia of the two to blend funding across four block grants, including the Department of Health and Human Services' (HHS) Social Services Block Grant and Community Services Block Grant, as well as HUD's HOME Investment Partnerships Program and CDBG, that share a common goal of promoting opportunity and reducing poverty. In exchange for more accountability for results, state and localities would be able to use the funds beyond the current allowable purposes of these programs to implement evidence-based or promising strategies for helping individuals succeed in the labor market and improving economic mobility, children's outcomes, and the ability of communities to expand opportunity. Participating communities would also be eligible to receive a total of \$1.5 billion over five years in new funding through HHS in addition to flexibility with currently provided resources.

In 2016 and 2017, the Department will work with grantees to promote the use of CDBG funds to address a range of Administration policy priorities. Consistent with the Administration's Build America Initiative launched in 2014, HUD will continue efforts to promote the use of CDBG funds to

support infrastructure pre-development and resilient infrastructure. HUD will also work with select grantees to promote: 1) a more integrated approach to the consolidated plan process, 2) innovative strategies to help address the lack of affordable housing units, and 3) implementation of place-based strategies.

**Indian Community Development Block Grant (ICDBG).**—The Budget includes \$80 million for the ICDBG program. This program provides grants to help develop viable American Indian and Alaska Native Communities with decent housing, a suitable living environment, and economic opportunities, primarily for low- and moderate-income persons. Within this program, up to \$20 million will be used for projects that directly support Native youth, such as community facilities, pre-school centers, and transitional housing, and to attract and retain high-quality teachers in Indian Country by improving the availability and physical condition of teacher housing. This set-aside is one of several investments supporting Generation Indigenious, an Administration initiative focused on removing barriers to success for Native youth.

**CDBG Disaster Recovery.**—Since 2000, over \$45 billion in CDBG Disaster Recovery (CDBG-DR) funding has been provided to communities impacted by major disasters, and CDBG-DR has played an increasingly significant role in long-term recovery. To ensure a more orderly and efficient recovery process, in 2016, the Administration will work with agencies across the Federal Government, as well as public stakeholders to develop a standing authorization proposal for the provision of CDBG-DR funds. This proposed authorization would incorporate lessons learned from previous disasters, provide clarity and predictability over CDBG-DR funding and program guidelines, and improve the alignment of CDBG-DR funds with other Federal disaster programs.

The Budget also proposes to consolidate administrative funds that are associated with specific CDBG-DR supplemental appropriations to support the Department's oversight of the full and growing CDBG-DR portfolio.

This account contains previously appropriated CDBG-DR funding. The majority of these balances are from the \$15.2 billion in CDBG-DR funding (post-sequestration) provided by Public Law 113–2 to support communities affected by Hurricane Sandy and other Presidentially-declared disasters that occurred in calendar years 2011, 2012, and 2013. This includes \$1 billion that was recently awarded through the National Disaster Resilience Competition (NDRC) to rebuild disaster-impacted areas, while also supporting innovative resilience projects, policy changes and activities that better prepare communities for the future impacts of extreme weather and climate change. This account also contains \$300 million in CDBG-DR funding appropriated in 2016 (Public Law 114–113) for relief from the consequences of Hurricane Joaquin, Hurricane Patricia, and other flood events in 2015.

The 2017 Budget requests no funding for the Brownfields Economic Development Initiative (BEDI), which was a competitive grant program designed to assist cities with the redevelopment of brownfield sites for the purposes of economic development and job creation. Local governments have access to other public and private funds, including Community Development Block Grant (CDBG) funds, for similar purposes. The Consolidated and Further Continuing Appropriations Act, 2015 (Public Law 113-235) permanently rescinded all unobligated balances of BEDI funds, including carryover and recaptures.

The Budget requests \$950 million for the HOME Investment Partnerships Program (HOME), of which \$10 million is set aside for the Self-help Homeownership Opportunity Program (SHOP). The HOME program provides flexible annual formula grant assistance to States and units of local government to increase the supply of affordable housing and expand homeownership for low- to very-low income persons through a wide range of activities that build, buy, and/or rehabilitate affordable housing. Sixty percent of the formula grant funds is awarded to participating local governments and 40 percent is awarded to states. Projects funded by HOME often leverage private dollars and are used in conjunction with other funds such as the Low-Income Housing Tax Credit (LIHTC), Community Development Block Grant, and local funds. Over time, the requested HOME funding is estimated to result in the production of approximately 34,000 units of affordable housing through new construction, rehabilitation, and/or acquisition. It is also estimated that communities will use a portion of their funding to support tenant-based rental assistance for approximately 7,800 units.

The 2017 Budget proposes statutory changes that would eliminate the 24-month commitment requirement; eliminate the 15 percent Community Housing Development Organization (CHDO) set-aside; establish a single qualification threshold of \$500,000 irrespective of the appropriation amount; revise the current "grandfathering" provision so that participating jurisdictions that fall below the threshold three years out of a five-year period are ineligible for direct formula funds; and allow recaptured HOME CHDO technical assistance funds be reallocated as HOME technical assistance funds. When implemented, these changes will improve the targeting focus and effectiveness of the overall administration of the program.

In addition, the HOME program is part of the proposed Upward Mobility Project, a new initiative to allow states, localities or consortia of the two to blend funding across four block grants, including the Department of Health and Human Services' (HHS) Social Services Block Grant and Community Services Block Grant, as well as HUD's Community Development Block Grant and HOME, that share a common goal of promoting opportunity and reducing poverty. In exchange for more accountability for results, state and localities would be able to use the funds beyond the current

allowable purposes of these programs to implement evidence-based or promising strategies for helping individuals succeed in the labor market and improving economic mobility, children's outcomes, and the ability of communities to expand opportunity. Participating communities would also be eligible to receive a total of \$1.5 billion in new funding over five years through HHS, in addition to flexibility with currently provided resources.

SHOP is a competitive grant program that provides funds to increase the ability of non-profit organizations to assist low-income homebuyers willing to contribute "sweat equity" toward the construction of their homes. Communities can further leverage SHOP grants by using other sources of funding, including HOME funds, which can also be used for sweat equity projects. The Budget also proposes statutory changes that would improve the administration of the SHOP program. These include allowing HUD to develop program regulations, extending the standard grant term to 36 months, establishing a deadline for completion of SHOP units, and explicitly including planning, administrative, and management costs as eligible activities, to be capped at 20 percent.

The 2017 Budget proposes a \$300 million mandatory appropriation for a new Local Housing Policy Grants program. This program would provide grants to localities and regional coalitions of localities to support new policies, programs, or regulatory initiatives that create a more elastic and diverse housing supply. The goal of this initiative is to demonstrate that concentrated and coordinated efforts across a number of housing markets can significantly expand the supply and affordability of housing, increase access to jobs, and fuel economic growth. This program would support a range of activities that reduce barriers to housing development, such as design options, process changes, and land use regulations, and funds would be used to support related investments, including infrastructure expansion and/or improvement, market evaluation, code writing assistance, and stakeholder education and outreach. The funds would also establish a learning network that would provide ongoing capacity building, facilitate shared learning opportunities, and disseminate best practices.

The 2017 Budget requests no separate funding for the Self-Help and Assisted Homeownership Opportunity Program (SHOP) account. Instead, funding for the SHOP program is included as part of the request for the HOME Investment Partnerships Program. Funding for capacity building activities is included as part of the request for the Research and Technology (R&T) account. Within the R&T account, HUD will continue its integrated approach to technical assistance and capacity building, including activities to develop, enhance, and strengthen the technical and administrative capabilities of community development corporations to carry out community development and affordable housing activities for low- and moderate-income persons that support and address local needs and priorities.

The Neighborhood Stabilization Program (NSP) was first authorized by the Housing and Economic Recovery Act of 2008 (HERA) and funded at \$3.92 billion. In response to the foreclosure crisis, HERA directed HUD to develop a formula to distribute the funds to State and local governments with the greatest need. Grantees were allowed to use NSP funds for a number of eligible activities, including establishing financing mechanisms; purchasing and rehabilitating abandoned or foreclosed properties; establishing land banks; demolishing blighted structures; and redeveloping vacant or demolished property.

The American Recovery and Reinvestment Act of 2009 (ARRA) made several changes to the NSP program as enacted by HERA and appropriated an additional \$2 billion in funding for the NSP program. The ARRA funding for the second round of NSP funding (NSP2) is reflected within the Community Development Fund account.

The Dodd-Frank Financial Reform and Consumer Protection Act of 2010 (Dodd-Frank Act) appropriated an additional \$1 billion for a third iteration of NSP (NSP3) in July 2010.

As of December 2015, NSP grantees had expended (including program income) an amount equivalent to 116 percent of the total program funds allocated for all iterations of NSP. Grantees have approximately \$185 million in NSP-generated program income that must be expended prior to drawing down the remaining grant funds that are reflected in this account. HUD is closely monitoring efforts to expend these funds consistent with NSP requirements and the Department's timeline for closing out all grants.

The Homeless Assistance Grants account provides funds for the Emergency Solutions Grant (ESG) and Continuum of Care (CoC) programs. These programs, which award funds through formula and competitive processes, enable localities to shape and implement comprehensive, flexible, coordinated approaches to address the multiple issues of homelessness.

The 2017 Budget provides \$2.664 billion for a wide range of activities to assist homeless persons and prevent future occurrences of homelessness. The Budget supports \$2.387 billion for the CoC program, including funding for competitive renewals, new permanent supportive housing for persons experiencing chronic homelessness, new rapid rehousing for families with children experiencing homelessness, and projects targeted to youth experiencing homelessness; \$270 million for ESG formula funding for communities to address emergency needs such as emergency shelter, street outreach, essential services, homelessness prevention, and rapid rehousing; and \$7 million for the National Homeless Data Analysis Project.

The 2017 Budget sustains funding to support programs dedicated to ending veteran homelessness, and makes further progress toward the Administration's goals of ending chronic homelessness and ending homelessness for families, youth and children. In addition to targeted increases in HUD's Homeless Assistance Grants, the Budget provides 10,000 new Housing Choice Vouchers targeted to homeless families with children. Complementing these investments, the Budget also includes an \$11 billion mandatory proposal over ten years to reach and maintain the goal of ending homelessness among families with children by 2020, as described under the "Homeless Assistance for Families" account.

The 2017 Budget also proposes a series of legislative changes to address emerging program needs. These changes would: 1) allow for more timely and effective property reviews under Title V of the McKinney-Vento Act, which enables eligible organizations to use unutilized, underutilized, excess, or surplus Federal properties as facilities that assist homeless persons; 2) allow CoC grantees to receive one-year transition grants, which will better allow projects to maintain service to program participants as those projects transition from one CoC program component to another (e.g., from transitional housing to permanent supportive housing); and 3) allow public housing agencies (PHAs) to be eligible subrecipients of ESG program funds, since PHAs are highly qualified homeless services providers in many communities.

The Budget proposes \$11 billion over ten years to reach and maintain the goal of ending homelessness among all of America's families in 2020. This significant investment builds on the success of ending veteran homelessness in communities across the country, and is informed by recent research that found that families who utilized vouchers — compared to alternative forms of homeless assistance — had fewer incidents of homelessness, child separations, intimate partner violence and school moves, less food insecurity, and generally less economic stress. This investment will enable communities to properly scale their response to family homelessness

HOMELESS ASSISTANCE FOR FAMILIES—Continued

and significantly expand the availability of rapid rehousing and Housing Choice Vouchers, serving an estimated 550,000 vulnerable families with children experiencing homelessness over the next ten years. These two interventions offer the most flexible, targeted, and cost effective interventions for communities seeking to move families out of emergency shelter quickly and into their own permanent housing units. Rapid rehousing offers time-limited rental assistance and case management services designed to help families stabilize in housing and connect to other needed services in the community. The Housing Choice Voucher program offers a permanent housing subsidy that can be coordinated with supportive services funded through other resources, including mainstream systems.

Complementing this mandatory proposal, the Budget provides targeted discretionary increases to address homelessness, including 10,000 new vouchers targeted to homeless families with children (in the Housing Choice Voucher account), 25,500 new units of permanent, supportive housing to end chronic homelessness, \$25 million to test innovative projects that support homeless youth, and 8,000 new units of rapid rehousing (in the Homeless Assistance Grants account).

The Supplemental Appropriations Act, 2008 (Public Law 110-252) provided \$73 million for permanent supportive housing assistance as referenced in the Road Home Program of the Louisiana Recovery Authority (LRA). Of the total amount appropriated, \$50 million was for permanent supportive housing, serving approximately 1,000 homeless individuals and families living with disabilities. The LRA is eligible to apply for Homeless Assistance Grants to renew this assistance. Additionally, this account provided \$23 million in project-based rental assistance vouchers to LRA to support an estimated 2,000 elderly and disabled disaster victims, as authorized. Beginning in 2010, these vouchers have been renewed within the Tenant-Based Rental Assistance account upon the termination of the original subsidy.

The Budget does not provide funding for the Rural Housing and Economic Development (RHED) program. RHED was created to support housing and economic development activities in rural communities. The Consolidated Appropriations Act, 2016 (Public Law 114-113) permanently rescinded all unobligated balances of RHED funds, including carryover and recaptures.

The Revolving Fund (liquidating programs) was established by the Independent Offices Appropriations Act of 1955 for the efficient liquidation of assets acquired under a number of housing and urban development programs, all of which are no longer active. For example, the Section 312 loan program portfolio, which provided first and junior lien financing at below market interest rates for the rehabilitation of homes in low-income

neighborhoods, constituted a large portion of the account activities but has not originated new loans for over 20 years. The operational expenses are financed from a permanent, indefinite appropriation to administer the remaining repayments of loans, recaptures, and lien releases in the portfolio. Any remaining unobligated balances in the account are returned to the Treasury annually.

The Community Development Loan Guarantee program (Section 108) supports economic development projects, housing rehabilitation, and the rehabilitation, construction or installation of public facilities for the benefit of low- to moderate-income persons or to aid in the prevention of slums.

On November 3, 2015, the Department issued a final rule in the Federal Register to allow HUD to collect fees to offset credit subsidy costs such that the program operates at a zero credit subsidy cost. The Budget proposes a guaranteed loan limit of \$300 million, with a fee of 2.59 percent of the principal amount of the loan for fiscal year 2017. The Budget also proposes legislative changes to the Housing and Community Development Act of 1974 to permanently allow for the new fee structure.

The Housing Trust Fund was authorized by section 1131 of the Housing and Economic Recovery Act of 2008 (Public Law 110-289), which directed

the account to be funded from assessments on Fannie Mae and Freddie Mac. The Federal Housing Finance Agency (FHFA), as regulator of Fannie Mae and Freddie Mac, suspended these assessments in November 2008. In December 2014, FHFA announced that the assessments would be reinstated effective January 2015, subject to the terms and conditions prescribed by FHFA.

The Budget estimates that \$136 million will be allocated to the Housing Trust Fund in 2017 to provide grants to States to increase and preserve the supply of affordable rental housing and homeownership opportunities for extremely low-income families. This allocation is in addition to the estimated \$170 million that will be made available in 2016. Funds will be distributed by formula to States or State-designated entities to be used primarily for the construction, preservation, and rehabilitation of affordable rental housing, with up to ten percent of the funding for similar eligible activities that support homeownership.

The Budget requests \$10.816 billion for Project-Based Rental Assistance (PBRA), of which \$400 million is requested as an advance appropriation to become available in 2018. The PBRA program assists approximately 1.2 million extremely low- to low-income households in obtaining decent, safe, and sanitary housing in private accommodations. PBRA serves families, elderly and disabled households and provides transitional housing for the homeless. Through this funding, HUD supports approximately 17,200 contracts with private owners of multifamily housing by paying the difference between what a household can afford, generally 30 percent of its eligible income, and the approved market-based rent for a housing unit. The Budget continues to support the program's calendar year funding cycle and provides 12 months of funding for all contracts from January through December 2017.

The Budget proposes legislative reform to HUD's core rental assistance programs, namely increasing the threshold used to determine deductions for unreimbursed medical expenses from 3 to 10 percent of family income. The Budget also includes a proposal to expand HUD's authority to seek double the specified financial damages when project owners fail to maintain their properties in accordance with program requirements, to include PBRA, Section 202, and Section 811. This proposal is part of a larger effort being

## PROJECT-BASED RENTAL ASSISTANCE—Continued

undertaken by HUD to evaluate and strengthen enforcement authorities across its portfolio of assisted properties, including a potential rulemaking to update Real Estate Assessment Center (REAC) physical inspection criteria. Finally, the Budget proposes technical amendments to the Low-Income Housing Preservation and Resident Homeownership Act (LIHPRHA) to align with amendments made by the FAST Act (Public Law 114–94), to support effective implementation of owner distribution policies, and to encourage preservation transactions that maintain property affordability.

Program activities include the following:

**Contract Renewals and Amendments.**—These activities provide funding for HUD to renew expiring contracts and amend contracts that have not expired but require additional funding for HUD to meet remaining payment obligations. Appropriations for these activities are supplemented with recoveries of excess balances remaining on expired contracts that utilized less than anticipated resources during their initial terms.

**Contract Administrators.**—This activity funds the local level administration of the program through HUD agreements with performance-based contract administrators (PBCAs). These entities, which are typically public housing authorities or state housing finance agencies, are responsible for conducting on-site management reviews of assisted properties; adjusting contract rents; reviewing, processing, and paying monthly vouchers submitted by owners; renewing contracts with property owners; and responding to health and safety issues at properties. In 2017, the Budget requests up to \$235 million for PBCAs from the PBRA account, in addition to \$60 million in anticipated recaptures in the Housing Certificate Fund to supplement the requested appropriation.

**Tenant Resource Network.**—The Budget provides up to \$4 million in 2017 for technical assistance to tenant groups, nonprofit groups, and public entities to support their efforts to preserve affordability of assisted properties and improve tenant services.

Since 1959, the Housing for the Elderly program (Section 202) has supported the construction and operation of supportive housing for very low-income elderly households, including the frail elderly. The Budget provides \$505 million for this program, including \$427 million to renew and amend operating subsidy contracts for existing Section 202 housing, \$75 million to support service coordinators who work on-site to help residents obtain critical services, and \$3 million for property inspections and related expenses. Consistent with the 2016 Appropriations Act, the request for contract renewals and amendments under this account includes amounts for Senior Preservation Rental Assistance Contracts (SPRACs). HUD will continue the execution of a five-year Supportive Housing demonstration with funding provided for this purpose as authorized in 2014; no additional funding is requested. The demonstration is testing whether housing and supportive services with a health/wellness component can successfully and cost-effectively help elderly residents maintain their housing and health while avoiding costly institutional care. The Budget supports preservation of Section 202 properties through the expansion of the Rental Assistance

Demonstration program to include elderly properties developed through the Capital Advance program. The Budget also seeks renewed authority to make better use of existing resources. HUD will identify residual receipts collections, recaptures, and other unobligated balances to redirect as additional investments in SPRACs, Service Coordinators, or other authorized purposes.

The Budget also includes a proposal to expand HUD's authority to seek double the specified financial damages when project owners fail to maintain their properties in accordance with program requirements, to include Section 202, Housing for Persons with Disabilities (Section 811), and Project-Based Rental Assistance. Finally, the Budget proposes to expand the list of violations that may incur a monetary penalty of Section 202 property owners to include failure to maintain the property.

The Housing Counseling Assistance Program provides comprehensive housing counseling services to eligible homeowners and tenants through grants, oversight, technical assistance and training to non-profit intermediaries, state governmental entities, and other agencies with a local or national presence. Eligible housing counseling activities include pre- and post-purchase homeownership education and counseling, personal financial management, reverse mortgage education counseling, foreclosure prevention, loss mitigation, homelessness prevention, and rental counseling. The objectives of the Housing Counseling program include overcoming barriers to stable and affordable housing, expanding sustainable homeownership opportunities, preventing foreclosure, and deterring discrimination, scams and fraud.

The 2017 Budget includes \$47 million for this program, the bulk of which funds grants to HUD-approved Housing Counseling agencies for direct services. In particular, the Office of Housing Counseling is focused on expanding the number of counseled FHA borrowers and increasing access to resources that create more sustainable housing opportunities for households. As the economy improves and the number of first-time homebuyers increases, the need and demand for housing counseling will increase as well.

In accordance with the Dodd-Frank Wall Street Reform and Consumer Protection Act, the Housing Counseling Assistance Program is implementing and overseeing the individual testing and certification of all housing counselors providing HUD-approved counseling and will launch the Office of Housing Counseling Federal Advisory Committee.

The Other Assisted Housing account contains the programs listed below:  
*Rent Supplement.*—Rent Supplement assistance payments will continue to be made on behalf of qualified low-income tenants in assisted units that have not converted to Section 8.

*Section 235.*—The Housing and Urban-Rural Recovery Act of 1983 (Public Law 98-181) authorized a restructured Section 235 (Homeownership Assistance) program that provided homeowners a ten-year interest reduction subsidy on their mortgages.

OTHER ASSISTED HOUSING PROGRAMS—Continued

**Section 236.**—The Housing and Urban Development Act of 1968, as amended, authorizes the Section 236 Rental Housing Assistance Program, which subsidizes the monthly mortgage payment that an owner of a rental or cooperative project is required to make. This interest subsidy reduces rents for lower income tenants. Some Section 236 properties also have rental assistance contracts with HUD through the Rental Assistance Payment (RAP) program.

As an increasing number of Rent Supplement and RAP rental assistance contracts reach the ends of their terms, HUD is taking steps to preserve this affordable housing stock. The Rental Assistance Demonstration (RAD) enables owners of properties with expiring Rent Supplement or RAP contracts to convert their assistance to long-term, project-based Section 8 contracts. More information on this Demonstration is available under the RAD heading.

The Homeownership and Opportunity for People Everywhere Program, funded from 1992-1995, provided affordable homeownership opportunities for low-income families. Units were converted to homeownership from public and Indian housing properties in HOPE I, from FHA-insured and Government-held multifamily properties in HOPE II, and from Government-owned or -held single family properties in HOPE III. HOPE Grants were used for property acquisition, rehabilitation, mortgage subsidies, security measures, and technical assistance. In addition, grants have been devoted to counseling and training of residents, and other activities intended to help them become economically self-sufficient homeowners.

The Flexible Subsidy Fund assisted financially troubled subsidized projects under certain Federal Housing Administration (FHA) authorities. The subsidies were intended to prevent potential losses to the FHA fund resulting from project insolvency and to preserve these projects as a viable source of housing for low and moderate-income tenants. Priority was given to projects with Federal insurance-in-force and then to those with mortgages that had been assigned to the Department of Housing and Urban Development.

The HOPE for Homeowners program was created by the Housing and Economic Recovery Act of 2008 to help homeowners at risk of default and foreclosure refinance into affordable, sustainable loans. Under the Program, eligible homeowners refinanced their current mortgage loans into a new mortgage insured by FHA. The program ended on September 30, 2011. This account now only reflects the liquidation of prior year obligations. In 2016, excess HOPE Bond proceeds in the amount of \$455 million will be transferred to the HOPE Reserve Fund, and used to retire the HOPE Bonds. Remaining HOPE Bond activity is shown in the HOPE Reserve Fund.

The Federal Housing Administration (FHA) provides mortgage insurance to encourage lenders to make credit available to borrowers for whom the conventional market does not adequately serve. These include first-time homebuyers, minorities, lower-income families, and residents of underserved areas (central cities and rural areas). In recent years, FHA has also provided broad access to credit as conventional financing became scarce.

In 2017, the Budget requests a limitation of \$400 billion on loan guarantees for the Mutual Mortgage Insurance (MMI) Fund. The Budget projects insurance of \$204 billion in single family forward mortgages and \$18.5 billion in Home Equity Conversion Mortgages (HECMs) with additional commitment authority available in case these amounts are exceeded during execution.

The Budget requests an appropriation of \$160 million in administrative expenses, which will allow FHA to implement improved risk management and program support processes which are critical for FHA's oversight of its insured portfolio. The Budget also requests authority to charge lenders an administrative support fee on a prospective basis with a sunset expiration date, which would generate an estimated \$30 million in offsetting collections in this account. These additional resources will fund enhancements to administrative contract support and information technology, with a focus on enhanced risk management tools to reduce losses to the FHA insurance fund. The Budget allows for a transfer of up to \$30 million from this account to the Office of Housing Salaries and Expenses account and the Information Technology Fund. Any funds transferred will be used for FHA salaries and expenses and information technology purposes and any unobligated balances will be transferred back to the MMI Program account.

FHA has made multiple policy changes to strengthen the MMI Fund and now requires manual underwriting for loans with credit scores below 620 and debt-to-income ratios greater than 43 percent to ensure that such borrowers possess compensating factors that accord with FHA underwriting guidelines. To improve access to credit without negatively impacting the

upward trajectory of the MMI Capital Reserve Fund, FHA implemented a 0.5 percentage point reduction in the annual insurance premium in January 2015.

HUD is pursuing comprehensive legislative changes to give FHA the tools it needs to build upon the many administrative steps it has taken since 2009 to improve FHA single family programs. These proposals will allow FHA to enhance enforcement, create certainty for FHA approved lenders, and increase loss mitigation opportunities for borrowers with FHA approved loans. In total, these steps will reduce losses to the MMI Fund.

*Enhanced Indemnification Authority to Obtain Indemnification for Direct Endorsement Lenders.*—To originate FHA insured loans, lenders must be approved by FHA to be either a Lender Insurance or a Direct Endorsement Lender. FHA can only seek indemnification from lenders with Lender Insurance approval. HUD seeks authority that would provide the ability to treat both classes of FHA approved lenders equally with respect to non-compliant loans.

*Authority to Terminate Origination and Underwriting Approval.*—HUD continues to seek authority to terminate lender approval on a broader geographic basis for institutions with default rates significantly higher than their peers.

*Directed Sub-Servicing.*—HUD seeks authority enabling FHA to, on a case by case basis, require third party servicing of loans by institutions better equipped to reduce losses to the fund and assist borrowers.

*Revise FHA's Compare Ratio.*—In an effort to provide greater clarity and certainty to lenders while enabling FHA to more effectively minimize poor lender performance and resulting losses, HUD seeks legislative authority to revise the calculation for the Compare Ratio to better reflect the modern lending environment.

The Capital Reserve account is the ultimate depository for all net budgetary resources collected by the Mutual Mortgage Insurance (MMI) Fund programs. Negative credit subsidy receipts from new loan guarantees and downward re-estimates as well as interest earnings on Treasury investments are recorded in this account. This account has no authority to obligate funds but transfers balances of budget authority as necessary for the cost of upward credit subsidy re-estimates to the MMI Program Account.

FHA's General Insurance and Special Risk Insurance (GI/SRI) programs provide mortgage insurance for a variety of purposes, including financing for the development and rehabilitation of multifamily housing, residential care facilities, and hospitals. The Budget requests a limitation of \$30 billion on loan guarantees for the GI/SRI Fund. It does not request an appropriation of new credit subsidy funds.

In 2016, FHA will reduce upfront and annual premiums for affordable and energy efficient rental housing. For loans insured under FHA's three signature new construction/substantial rehabilitation and refinance programs, the annual premium will be reduced by a range of 10 to 40 basis points. These targeted reductions will: 1) support the production and preservation of affordable rental housing; 2) incent energy efficiency improvements in both affordable and market rate housing; and 3) improve housing choice for low-income families by tying certain premium reductions to landlord acceptance of Federal rental vouchers.

FHA is also continuing its partnership with the Federal Financing Bank (FFB) to provide FFB financing for multifamily loans guaranteed by FHA under the Section 542(b) Qualified Participating Entity and Section 542(c) Housing Finance Agency (HFA) risk sharing programs. FFB financing is designed to reduce the cost of funds supporting affordable rental housing, thereby increasing levels of rehabilitation or offsetting the need for gap financing. FFB financing is available on an interim basis until the Congress

approves the proposal to permit Ginnie Mae securitization of such mortgages, which is included in a general provision at the end of this budget chapter. These FFB-financed guaranteed loans are treated as direct loans in the Budget.

The National Manufactured Housing Construction and Safety Standards Act of 1974, as amended, authorizes the development and enforcement of appropriate standards for the construction, design, and performance of manufactured homes to assure their quality, durability, affordability, and safety. All manufactured homes produced since the standards took effect in 1976 must comply with Federal construction and safety standards. Thirty-seven States participate in the program under HUD-approved State compliance plans and are reimbursed by HUD for their activities. HUD administers a compliance program for the remaining states. HUD is considering options for improving operational efficiency and program support for the Office of Manufactured Housing, including potentially transferring the responsibilities of the program to other offices within HUD.

HUD administers the Manufactured Housing Consensus Committee to recommend revisions to and interpretations of the manufactured housing standards. HUD also develops and implements model standards for installation of manufactured housing, as well as an installation enforcement

program. Finally, HUD administers a dispute resolution program for manufactured housing homeowners and builders.

Fees are charged to the manufacturers for each transportable section produced to offset the expenses incurred by the Department in carrying out the responsibilities under the authorizing legislation. The Budget proposes to fund the costs of authorized activities with an estimated \$11.5 million in fees to ensure HUD is able to fund all of its statutory requirements. The Budget also proposes a general provision that would allow HUD to implement future fee changes via notice with comment.

**GOVERNMENT NATIONAL MORTGAGE ASSOCIATION**

The Government National Mortgage Association (GNMA) was established by Federal charter in 1968. It is a wholly owned government corporation within the U.S. Department of Housing and Urban Development (HUD). It was established to support Federal housing initiatives by providing liquidity to the secondary mortgage market and to attract capital from the global capital markets for the nation's mortgage markets. Its primary function is to guarantee the timely payment of principal and interest on Mortgage-Backed Securities (MBS) that are backed by loans insured or guaranteed by the Federal Housing Administration (FHA), the Department of Veterans Affairs (VA), Rural Development in the U.S. Department of Agriculture, and HUD's Office of Public and Indian Housing.

In 2013, a Capital Reserve account was established for the Government National Mortgage Association (GNMA). Financial reserves of GNMA were transferred from the Reserve Receipt and Liquidating accounts to the Capital Reserve account. This mandatory account earns interest on Treasury investments and is the eventual depository for all budgetary resources collected by GNMA including negative subsidy receipts from new security guarantees, downward re-estimates and loan repayments from the Financing Account. This account has no authority to obligate funds but transfers resources to the GNMA Program Account as necessary for mandatory spending authorized in that account.

The Budget requests loan commitment authority of \$500 billion in 2017. The Budget also requests \$23 million for the personnel costs of the Government National Mortgage Association (GNMA), to be offset by Commitment and Multiclass fees. Before 2012, personnel expenses were funded in the "Office of Government National Mortgage Association" appropriation under the Management and Administration section of the HUD budget. This funding level will enable GMNA to keep pace with growing demands and respond to the complexities of the current market, including a growing number of security issuers and the entry of new types of issuer firms, such as non-depository institutions.

The Housing and Urban Development Act of 1970 directs the Secretary to undertake programs of research, studies, testing, and demonstrations related to HUD's mission. These functions are carried out by HUD's Office of Policy Development and Research (PD&R) through in-house analysis by staff; contracts with industry, nonprofit research organizations, and educational institutions; and cooperative agreements with educational, governmental, and philanthropic entities.

The 2017 Budget requests \$185 million for HUD's Research and Technology (R&T) program through a combination of direct appropriations and

program transfer authority. The request consists of \$65 million in direct appropriations for core research support, surveys, data infrastructure, and knowledge management (i.e., research dissemination), and authority to transfer up to \$120 million from various HUD program accounts to the R&T account for research, evaluations, and demonstrations (\$33 million); technical assistance (\$52 million); and capacity building (\$35 million).

The Budget includes direct funding to restore and enhance various national housing surveys that are rich sources of data on the nation's housing stock, including the American Housing Survey, the Survey of New Home Sales and Completions, the Survey of Market Absorption of Multifamily Units, the Survey of New Manufactured Housing Placements, and the Rental Housing Finance Survey. Also included in the request is funding for knowledge management activities, for the Urban Data Systems, for housing finance studies, for Research Partnerships, and for a new category of core research support, which includes: 1) the long-term commitment to evaluate Moving-to-Work policy initiatives and expansion, and 2) research on new innovation that facilitates behavior changes among builders, property owners and tenants that results in lower consumption of carbon based energy.

Program transfers to R&T reflect HUD's enterprise-wide commitment to integrate evidence and cross-disciplinary intelligence throughout program policy, management, and operations. The transfer authority provides a devoted source of funds for three complementary purposes: 1) research, evaluations, and demonstrations; 2) technical assistance; and 3) capacity building.

The research, program evaluations, and demonstrations supported through program transfers to R&T complement the data infrastructure activities of the R&T direct appropriation. PD&R's intent is to fund priority research guided by HUD's Research Roadmap, and to complete and leverage previously initiated research efforts before beginning new projects.

Technical assistance supported by program transfer funding has allowed HUD to support its partners with better coordinated, cross-program TA rather than the conventional, program-oriented technical assistance. Because HUD's mission for affordable housing and community development is carried out in a complex community environment, the more comprehensive approach is valuable for helping grantees, PHAs, and other partners implement programs in an informed, aligned, and holistic way.

The proposed program transfers will also support activities previously funded through the Self-Help and Assisted Homeownership Opportunity Program (SHOP) account to enhance the capacity and ability of community development corporations (CDCs) and community housing development organizations (CHDOs) to carry out community development and affordable housing activities that benefit low-income persons.

The following table illustrates the estimated transfers from HUD's programs into the R&T account in fiscal year 2017.

FAIR HOUSING ACTIVITIES—Continued

The Budget requests \$70 million for fair housing activities to support efforts to end housing discrimination. Of the amount requested, \$21.9 million is for the Fair Housing Assistance Program (FHAP), \$46 million is for the Fair Housing Initiatives Program (FHIP), \$1.8 million is for the National Fair Housing Training Academy, and \$300 thousand is for the Limited English Proficiency Initiative (LEPI).

FHAP, authorized by Title VIII of the Civil Rights Act of 1968, as amended, provides funding to State and local agencies to assure prompt and effective processing of complaints under substantially equivalent State and local fair housing laws. To be eligible for assistance through FHAP, an agency must demonstrate that the fair housing law it administers is substantially equivalent to the Fair Housing Act. It is estimated that there will be a total of 89 FHAP jurisdictions in 2017. The funding requested for FHAP will support fair housing enforcement by funding State and local fair housing organizations to meet the needs of currently underserved populations. It will also address the national and ongoing problem of discrimination against minority homebuyers and renters, as identified in the 2012 Housing Discrimination Against Racial and Ethnic Minorities Study.

FHIP, authorized by the Housing and Community Development Act of 1987, as amended by the Housing and Community Development Act of 1992, provides funding to States and local governments, and to public and private non-profit organizations that administer programs to prevent or eliminate discriminatory housing practices through enforcement, education, and outreach.

The National Fair Housing Training Academy (NFTHA) provides comprehensive fair housing and civil rights training for investigators, local agencies, educators, attorneys, industry representatives and other housing industry professionals.

LEPI provides funds for oral interpretation and written translation services, which help make fair housing programs and activities accessible to people who are not proficient in English.

Title X of the Housing and Community Development Act of 1992 (Public Law 102-550), known as the Residential Lead-Based Paint Hazard Reduction Act, authorized the Secretary to establish the Lead-Based Paint Hazard Control Grant Program. The primary purpose of the program is to reduce the exposure of young children to lead-based paint and other environmental hazards in their homes, including protecting them from permanent developmental problems and asthma, and exposure to pesticides and carbon monoxide.

The program plays a critical role in addressing the number one environmental disease impacting children: lead poisoning. The Budget request of \$110 million includes \$83 million for HUD's Lead Hazard Control Program, \$25 million for the Healthy Homes Program, and \$2 million for technical studies. The Budget includes an appropriations provision that would allow the transfer of unobligated balances and recaptured funds from undersubscribed competitive programs to other competitive programs experiencing oversubscription. The Budget also includes two general provisions: the first would grant the Secretary authority to carry out investigations, administer oaths, and subpoena documents related to violations of the Lead Disclosure provision of Title X; the second would increase the threshold for requiring lead abatement to reflect inflation, providing grantees more flexibility in how they address lead-based paint in a residence. In addition, following the Budget, HUD will submit a legislative package with updates to program standards and definitions.

The Lead Hazard Control Grant Program provides grants of \$1 million to \$3 million to State and local governments and Indian tribes for control of lead-based paint hazards in private low-income rental and owner-occupied housing. The grants are also designed to facilitate the development of a housing maintenance and rehabilitation workforce trained in lead-safe

work practices and a certified hazard evaluation and control industry. In awarding grants, HUD promotes the use of new, low-cost approaches to hazard control that can be replicated across the nation.

The Healthy Homes Program enables the Department to assess and control housing-related hazards that contribute to childhood diseases and injuries. With funding from this program, grantees implement and evaluate methods for controlling two or more housing-related diseases through a single intervention.

The Office of Lead Hazard Control and Healthy Homes will continue its Technical Support program, which includes public education; support for State and local agencies, private property owners, HUD programs and field offices and professional organizations; technical studies to improve program policy and implementation; quality control to ensure that the evaluation and control of lead-based paint hazards is done properly in HUD-assisted housing; and development of standards, technical guidance, regulations and improved testing and hazard control methods.

Beginning with the passage of the Consolidated Appropriations Act, 2008, this account no longer receives annual appropriations for Departmental administrative expenses. Instead, salary and expense funds are distributed across multiple accounts, achieving greater transparency and accountability within the Department. Resources in this account reflect prior-year disaster supplemental appropriations.

The Budget also proposes to consolidate administrative funds that are associated with specific Community Development Block Grant-Disaster Recovery (CDBG-DR) supplemental appropriations to support the Department's oversight of the full and growing CDBG-DR portfolio.

The Transformation Initiative (TI) was initiated in 2010 to increase the effectiveness of HUD's program and service delivery, improve program outcomes, and enable innovative approaches to address the Nation's housing and urban development problems. A central concept of TI was to make the Department's investments increasingly coordinated, efficient, and effective through focused investments in three complementary purposes: 1) research and evaluation, 2) program demonstrations, and 3) technical assistance and

capacity building for HUD's customers and partners. The Budget does not request funding or transfer authority for the Transformation Initiative. Instead, the Budget requests the authority to transfer a portion of program funds to the Office of Policy Development and Research's Research and Technology account to support continued investments in these important activities.

(b) **PHASED TRANSFERS.**—Transfers of project-based assistance under this section may be done in phases to accommodate the financing and other requirements related to rehabilitating or constructing the project or projects to which the assistance is transferred, to ensure that such project or projects meet the standards under subsection (c).

SEC. [225]216. (a) The Secretary of Housing and Urban Development shall take the required actions under subsection (b) when a multifamily housing project with a section 8 contract or contract for similar project-based assistance:

- (1) receives a Real Estate Assessment Center (REAC) score of 30 or less; or
- (2) receives a REAC score between 31 and 59 and:

- (A) fails to certify in writing to HUD within 60 days that all deficiencies have been corrected; or
- (B) receives consecutive scores of less than 60 on REAC inspections.

Such requirements shall apply to insured and noninsured projects with assistance attached to the units under section 8 of the United States Housing Act of 1937 (42 U.S.C. 1437f), but do not apply to such units assisted under section 8(o)(13) (42 U.S.C. 1437f(o)(13)) or to public housing units assisted with capital or operating funds under section 9 of the United States Housing Act of 1937 (42 U.S.C. 1437g).

(D) seek judicial appointment of a receiver to manage the property and cure all project deficiencies or seek a judicial order of specific performance requiring the owner to cure all project deficiencies.

(c) The Secretary shall also take appropriate steps to ensure that project-based contracts remain in effect, subject to the exercise of contractual abatement remedies to assist relocation of tenants for imminent major threats to health and safety after written notice to and informed consent of the affected tenants and use of other remedies set forth above. To the extent the Secretary determines, in consultation with the tenants and the local government, that the property is not feasible for continued rental assistance payments under such section 8 or other programs, based on consideration of (1) the costs of rehabilitating and operating the property and all available Federal, State, and local resources, including rent adjustments under section 524 of the Multifamily Assisted Housing Reform and Affordability Act of 1997 ("MAHRAA") and (2) environmental conditions that cannot be remedied in a cost-effective fashion, the Secretary may, in consultation with the tenants of that property, contract for project-based rental assistance payments with an owner or owners of other existing housing properties, or provide other rental assistance. 【SEC. 239. The Secretary of Housing and Urban Development shall increase, pursuant to this section, the number of Moving to Work agencies authorized under section 204, title II, of the Departments of Veterans Affairs and Housing and Urban Development and Independent Agencies Appropriations Act, 1996 (Public Law 104–134; 110 Stat. 1321) by adding to the program 100 public housing agencies that are designated as high performing agencies under the Public Housing Assessment System (PHAS) or the Section Eight Management Assessment Program (SEMAP). No public housing agency shall be granted this designation through this section that administers in excess of 27,000 aggregate housing vouchers and public housing units. Of the agencies selected under this section, no less than 50 shall administer 1,000 or fewer aggregate housing voucher and public housing units, no less than 47 shall administer 1,001–6,000 aggregate housing voucher and public housing units, and no more than 3 shall administer 6,001–27,000 aggregate housing voucher and public housing units. Of the 100 agencies selected under this section, five shall be agencies with portfolio awards under the Rental Assistance Demonstration that meet the other requirements of this section, including current designations as high performing agencies or such designations held immediately prior to such portfolio awards. Selection of agencies under this section shall be based on ensuring the geographic diversity of Moving to Work agencies. In addition to the preceding selection criteria, agencies shall be designated by the Secretary over a 7-year period. The Secretary shall establish a research advisory committee which shall advise the Secretary with respect to specific policy proposals and methods of research and evaluation for the demonstration. The advisory committee shall include program and research experts from the Department, a fair representation of agencies with a Moving to Work designation, and independent subject matter experts in housing policy research. For each cohort of agencies receiving a designation under this heading, the Secretary shall direct one specific policy change to be implemented by the agencies, and with the approval of the Secretary, such agencies may implement additional policy changes. All agencies designated under this section shall be evaluated through rigorous research as determined by the Secretary, and shall provide information requested by the Secretary to support such oversight and evaluation, including the targeted policy changes. Research and evaluation shall be coordinated under the direction of the Secretary, and in consultation with the advisory committee, and findings shall be shared broadly. The Secretary shall consult the advisory committee with respect to policy changes that have proven successful and can be applied more broadly to all public housing agencies, and propose any necessary statutory changes. The Secretary may, at the request of a Moving to Work agency and one or more adjacent public housing agencies in the same area, designate that Moving to Work agency as a regional agency. A regional Moving to Work agency may administer the assistance under sections 8 and 9 of the United States Housing Act of 1937 (42 U.S.C. 1437f and g) for the participating agencies within its region pursuant to the terms of its Moving to Work agreement with the Secretary. The Secretary may agree to extend the term of the agreement and to make any necessary changes to accommodate regionalization. A Moving to Work agency may be selected as a re-

gional agency if the Secretary determines that unified administration of assistance under sections 8 and 9 by that agency across multiple jurisdictions will lead to efficiencies and to greater housing choice for low-income persons in the region. For purposes of this expansion, in addition to the provisions of the Act retained in section 204, section 8(r)(1) of the Act shall continue to apply unless the Secretary determines that waiver of this section is necessary to implement comprehensive rent reform and occupancy policies subject to evaluation by the Secretary, and the waiver contains, at a minimum, exceptions for requests to port due to employment, education, health and safety. No public housing agency granted this designation through this section shall receive more funding under sections 8 or 9 of the United States Housing Act of 1937 than it otherwise would have received absent this designation. The Secretary shall extend the current Moving to Work agreements of previously designated participating agencies until the end of each such agency's fiscal year 2028 under the same terms and conditions of such current agreements, except for any changes to such terms or conditions otherwise mutually agreed upon by the Secretary and any such agency and such extension agreements shall prohibit any statutory offset of any reserve balances equal to 4 months of operating expenses. Any such reserve balances that exceed such amount shall remain available to any such agency for all permissible purposes under such agreement unless subject to a statutory offset. In addition to other reporting requirements, all Moving to Work agencies shall report financial data to the Department of Housing and Urban Development as specified by the Secretary, so that the effect of Moving to Work policy changes can be measured.】

(4) the owner of the transferring housing shall consult with the disabled residents in the transferring housing about any proposed transfer under this section and shall notify the residents of the transferring housing who are eligible for assistance to be provided in the receiving housing that they shall not be required to vacate the transferring housing until the receiving housing is available for occupancy;

(5) the receiving housing shall meet or exceed applicable physical standards established or adopted by the Secretary; and

(6) if the receiving housing has a mortgage insured under title II of the National Housing Act, any lien on the receiving housing resulting from additional financing shall be subordinate to any federally insured mortgage lien transferred to, or placed on, such housing, except that the Secretary may waive this requirement upon determination that such a waiver is necessary to facilitate the financing of acquisition, construction, or rehabilitation of the receiving housing.

(1) redesignating paragraph (3) as paragraph (5); and

(2) striking paragraphs (1) and (2) and inserting the following:

"(1) FORMULA ALLOCATION.—The Secretary shall allocate 90 percent of the amount approved in appropriations Acts under section 863 among States and cities as follows:

"(A) 75 percent among—

"(i) cities that are the most populous unit of general local government in a metropolitan statistical area with a population greater than 500,000, as determined by data compiled by the U.S. Census Bureau, and more than 2,000 persons living with the human immunodeficiency virus (HIV), using the data specified in subparagraph (C); and

"(ii) States with more than 2,000 persons living with HIV outside of metropolitan statistical areas; and

"(B) 25 percent of funds among States and cities that are the most populous unit of general local government in a metropolitan statistical area with a population greater than 500,000, as determined by data compiled by the U.S. Census Bureau, and more than 2,000 persons living with the human immunodeficiency virus (HIV), using the data specified in subparagraph (C) based on a combination of the housing cost factor described in subparagraph (D) and the community need factor described in subparagraph (E). The housing cost factor and community need factor to qualify a city for an allocation under this subparagraph (B) shall be based on the metropolitan statistical area in which the city is located.

"(C) SOURCE OF DATA.—The data to be used for allocating formula funds for any fiscal year shall be the number of persons living with HIV reported to and confirmed by the Director of the Centers for Disease Control and Prevention, as of December 31 of the most recent calendar year for which such data are available.

"(D) HOUSING COST FACTOR.—For purposes of allocations under subparagraph (B), the Secretary shall use a housing cost factor to account for differences in housing costs among States and metropolitan statistical areas. The housing cost factor shall be based on the fair market rents established by the Secretary pursuant to section 8(c) of the United States Housing Act of 1937 (42 U.S.C. 1437f(c)) or such other methodology established by the Secretary through regulation.

"(E) COMMUNITY NEED.—For purposes of allocations under subparagraph (B), the Secretary shall use a community need factor to account for differences in

poverty rates among States and metropolitan statistical areas. The community need factor shall be based on area poverty indexes or such other methodology established by the Secretary through regulation.

"(2) STOP-LOSS PROVISION FOR STATES AND CITIES.—For purposes of the formula allocation under paragraph (1), for fiscal year 2017 through fiscal year 2019, the Secretary shall require that a grantee's share shall not decrease more than 10 percent nor gain more than 20 percent of the share of total available formula funds under subtitle D of title VIII of the Cranston-Gonzalez National Affordable Housing Act that the grantee received in the preceding fiscal year. This provision shall not apply in fiscal year 2020 and thereafter.

"(3) CONTINUED AND RE-DETERMINATION OF ELIGIBILITY.—In fiscal year 2017 and thereafter, an applicant that is not eligible to receive a formula allocation under subsection (c)(1)(A) and (B) of this section in any or all of three consecutive fiscal years but received a formula allocation in the immediately preceding fiscal year shall be eligible to receive a formula allocation that is equal to amount representing a share of the total available formula funds, that, in each such fiscal year, is decreased not more than 10 percent of the share of the total available formula funds that the applicant received in the preceding fiscal year. In the fourth consecutive year of ineligibility and thereafter, the applicant will receive no formula allocation until it again becomes eligible under subsection (c)(1)(A) or (B) of this section, or any other then-applicable criteria for receiving formula allocation. This paragraph shall not apply to a city that becomes ineligible to receive a formula allocation solely on account of the city no longer qualifying as the most populous unit of general local government in the metropolitan statistical area.

"(4) ALTERNATIVE APPLICANT AND REALLOCATIONS.—

"(A) ALTERNATIVE APPLICANT.—The Secretary may award funds to an alternative applicant if—

"(i) the eligible applicant makes a request for such award to the Secretary, and the Secretary approves the request;

"(ii) the request of the eligible applicant is made pursuant to a written agreement between the applicant and the alternative applicant that addresses how the alternative applicant will take actions consistent with a comprehensive housing affordability strategy under section 105 of this Act; and

"(iii) the alternative applicant is a Public Housing Agency, a Unified Funding Agency under section 401 (42 U.S.C. 11360) and section 402 (42 U.S.C. 11360a) of the McKinney-Vento Homeless Assistance Act, a State, a unit of general local government, or an instrumentality of State or local government.

"(B) AGREEMENT TERM.—The written agreement under paragraph (4)(A) may be for a maximum term of ten years. The agreement may be renewed by the parties with the approval of the Secretary.

"(C) REALLOCATIONS.—If an eligible State or city declines a formula allocation, or the Secretary determines, in accordance with criteria specified in regulation, that the eligible State or city is unable to properly administer its formula allocation, the Secretary shall reallocate the reserved funds to be administered in place of the State or city. The Secretary shall make the reallocations as follows:

"(i) STATES.—The Secretary shall reallocate funds reserved for a State to one or more units of general local government within the State, as determined by the Secretary, to carry out eligible activities that meet the needs of eligible persons within the State.

"(ii) CITIES.—The Secretary shall reallocate funds reserved for a city to the State(s) containing the metropolitan statistical area in which the city is located. When the metropolitan statistical area spans two or more states, the funds shall be reallocated pro rata based on the relative number of HIV cases or in accordance with other indications of need as prescribed by the Secretary. The state(s) shall use such reallocated funds to carry out eligible activities that address the needs within the metropolitan statistical area in which the city is located.

"(iii) PRO RATA.—If the Secretary is unable to make a reallocation under either clauses (i) or (ii), the funds shall be reallocated on a pro rata basis under paragraph (1)."; and

(3) inserting at the end the following:

"(6) INTEGRATION.—Notwithstanding any other provision herein, all housing provided under this section shall be provided in the most integrated setting appropriate to the needs of any qualified persons with disabilities and shall be subject to the integration regulations under Title II of the Americans with Disabilities Act of 1990 (42 U.S.C. 12131–34) and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 701). ### REVENUES FROM FEDERAL OIL AND GAS MANAGEMENT REFORMS

Federal oil and gas management reforms. The Budget includes a package of legislative reforms to bolster and backstop administrative actions being taken to reform the management of DOI's onshore and offshore oil and gas programs, with a key focus on improving the return to taxpayers from the sale of these Federal resources. Proposed statutory and administrative changes fall into three general categories: 1) advancing royalty reforms, 2) encouraging diligent development of oil and gas leases, and 3) improving revenue collection processes. Royalty reforms include: establishing minimum royalty rates for oil, gas, and similar products; adjusting the onshore oil and gas royalty rate; analyzing a price-based tiered royalty rate; and repealing legislatively-mandated royalty relief. Diligent development requirements include shorter primary lease terms, stricter enforcement of lease terms, and monetary incentives to get leases into production through a new statutory per-acre fee on nonproducing leases. Revenue collection improvements include simplification of the royalty valuation process and permanent repeal of DOI's authority to accept in-kind royalty payments. Collectively, these reforms will generate roughly \$1.7 billion in net receipts to the Treasury over 10 years, of which about \$1.2 billion would result from statutory changes. Many States will also benefit from higher Federal revenue sharing payments.

## LAND AND MINERALS MANAGEMENT

### BUREAU OF LAND MANAGEMENT

The Bureau of Land Management (BLM) is charged with the multiple use management of natural resources on more than 247 million acres of surface estate of public land, about one-eighth of the land in the United States. The BLM also administers approximately 700 million acres of onshore Federal mineral estate underlying BLM and other surface ownerships. In addition, BLM has trust responsibilities on 56 million acres of Indian trust lands for mineral operations and cadastral (land) surveys. The lands managed by BLM provide important natural resources, recreational and scenic values to the American people, as well as resource commodities and revenue to the Federal Government, States, and counties. It is the mission of BLM to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations. The Budget proposes legislation to establish a Congressionally-chartered National BLM Foundation. This Foundation will provide the BLM with an opportunity to broaden its partnership capabilities, leverage private funding, and focus public support for the BLM mission of protecting and restoring the natural, cultural, historical, and recreation resources on the Nation's public lands.

**Land resources.**—Provides for management of rangeland and forest resources; riparian areas; soil, water, and air activities; wild horses and burros; and cultural resources. The Budget funds rangeland management activities through a combination of direct appropriations and offsetting collections generated from a proposed three-year pilot program to assess an administrative processing fee on grazing permits. The fee recovers some costs associated with issuing grazing permits/leases on BLM lands. The funds from the fee will be used to address pending applications for grazing permit renewals. The BLM proposes a \$2.50 per Animal Unit Month fee, collected along with current grazing fees. The BLM will promulgate regulations for the continuation of the grazing administrative fee for cost recovery after the pilot expires.

**Wildlife and fisheries management.**—Provides for maintenance, improvement, or enhancement of fish and wildlife habitats as part of the management of public lands and ecosystems.

**Threatened and endangered species management.**—Provides for protection, conservation, consultation, recovery, and evaluation of populations and habitats of threatened, endangered and special status animal and plant species.

**Recreation management.**—Provides for management and protection of recreational resource values, designated and potential wilderness areas, and collection and expenditure of recreation user fees. The Administration proposes to permanently reauthorize the Departments of the Interior and Agriculture recreation fee program under the Federal Lands Recreation Enhancement Act, which is set to expire on September 30, 2017.

**Energy and minerals management.**—Provides for management of onshore oil and gas; coal; geothermal and renewable energy resources such as wind

and solar; other leasable minerals and mineral materials activities; and the administration of encumbrances on the mineral estate on Federal and Indian lands. The 2017 Budget funds oil and gas management activities through a combination of direct appropriations, permanent appropriations authorized by the National Defense Authorization Act of 2015, and offsetting collections generated from assessing fees for inspection activities. Proposed new inspection fees are expected to generate \$48 million in 2017 that will be used to offset the costs of administering the BLM's oil and gas program.

**Realty and ownership management.**—Provides for management and non-reimbursable processing of authorizations and compliance for realty actions and rights-of-way (including Alaska), administration of land title records and completion of cadastral surveys on public lands. Provides for the processing of communication site use authorization requests.

**Resource protection.**—Provides for management of the land use planning and National Environmental Policy Act processes, including assessment and monitoring activities. Also ensures the health and safety of users of the public lands through remediation of abandoned mine lands and protection from criminal and other unlawful activities; the effects of hazardous material and/or waste; and physical safety hazards.

**Transportation and facilities management.**—Provides for construction and maintenance of administrative and recreation sites, roads, trails, bridges and dams, including compliance with building codes and standards and environmental protection requirements. These funds allow for the systematic management of facilities with critical health and safety concerns, and ensure the protection of natural and cultural resources and the environment. BLM funds all construction and deferred maintenance projects from this activity, including those on the Oregon and California grant lands.

**Challenge Cost Share (CCS).**—This program leverages non-Federal funding, in-kind services, and materials with Federal funding to conduct on-the-ground projects that improve the condition of the public lands. These conservation, restoration, and enhancement projects benefit forestry, range, riparian, fish, wildlife, threatened and endangered species, recreation, and cultural resources. No funds are requested for Challenge Cost Share activities in 2017.

**National Conservation Lands.**—Provides for the management of National Monuments, National Conservation Areas, and other Congressional conservation designations in the National Conservation Lands. The program provides for the recurring operational (base) budgets of these units.

**Workforce and organizational support.**—Provides for the management of specified bureau business practices, such as human resources, Equal Employment Opportunity, financial resources, procurement, property, information technology, and fixed costs.

**Mining law administration.**—Provides for exploration and development of minerals on public lands pursuant to the General Mining Law of 1872, including validity examinations, patent application reviews, enforcement of environmental and bonding requirements, and recordation of mining claims. Program costs are expected to be fully offset by claim maintenance and other fees in 2017.

This appropriation provides for the acquisition of lands or interests in lands, by purchase, easement or exchange, when necessary for public access and recreation use, preservation of open space, resource protection, and/or other purposes related to the management of public lands. The 2017 Federal Land Acquisition program builds on efforts started in 2011 to strategically invest in interagency landscape-scale conservation projects while continuing to meet agency-specific programmatic needs. The Department of the Interior and the U.S. Forest Service collaborated extensively to develop a process to more effectively coordinate land acquisitions with government and local

community partners to achieve the highest priority shared conservation goals.

This appropriation is derived from: 1) revenues received to offset administrative and other costs incurred to process applications for rights-of-way, and the monitoring of construction, operation, and termination of rights-of-ways; 2) recovery of costs associated with the adopt-a-horse program; 3) revenues received for rehabilitation of damages to lands, resources, and facilities; 4) fees for processing specified categories of realty actions under the Federal Land Policy Management Act; 5) deposits received from contractors in lieu of completing contract requirements such as slash burning and timber extension expenses; 6) fees for costs of reproduction and administrative services involved in providing requested copies of materials; 7) fixed fees for energy and minerals lease applications, assignments, and transfers; 8) costs of processing applications and administering permits, including environmental analysis and monitoring of special recreation permits; and 9) rents received for permits to do commercial filming and photography on public lands. The Budget assumes BLM will continue to identify new opportunities to recover costs of services provided to benefiting public land users and reduce the need for direct appropriations from the Treasury.

Permanent operating funds accounts include:

*Operations and maintenance of quarters.*—Funds in this account are used to maintain and repair Bureau of Land Management (BLM) employee-occupied quarters from which rental charges are collected. Agencies are required to collect rental charges from employees who occupy Government-owned housing and quarters. This housing is provided only in isolated areas or where an employee is required to live on-site at a Federally owned facility or reservation.

*Forest ecosystems health and recovery.*—Funds in this account are derived from revenue generated from the Federal share of receipts from the sale of salvage timber from the Oregon and California grant lands, public domain lands, and Coos Bay Wagon Road lands. Pursuant to P.L.

PERMANENT OPERATING FUNDS—Continued

102–381, as amended, this account was established to allow BLM to more efficiently and effectively address forest health issues. Funds can be used for other forest health purposes, including release from competing vegetation and density control treatments. This account will expire on September 30, 2020 under current law.

*Timber sale pipeline restoration fund.*—This fund provides for the deposit and use of fees collected by BLM for sales of timber authorized by section 2001(k) of P.L. 104–19. Of the total deposited into this account, 75 percent is to be used for the preparation of timber sales to fill the timber pipeline on lands administered by BLM, and 25 percent is to be used to address recreation projects on BLM lands.

*Stewardship contract product sales.*—Stewardship contracting improves, maintains, or restores forest and rangeland health; restores or maintains water quality; improves fish and wildlife habitat; reestablishes native plant species and increases their resilience to insects and disease; and reduces hazardous fuels that pose risks to communities and ecosystem values. Stewardship contracting authority includes agreements with non-profits, best-value contracts, designation by description, end results, and goods for services.

*Expenses, road maintenance deposits.*—Users of certain roads under BLM's jurisdiction make deposits for maintenance purposes. Moneys collected are appropriated for necessary road maintenance. Moneys collected on Oregon and California grant lands are available only for those lands (43 U.S.C. 1762(c), 43 U.S.C. 1735(b)).

*Federal Lands Recreation Enhancement Act, BLM.*—The Federal Lands Recreation Enhancement Act (FLREA) was enacted on December 8, 2004, as part of the Consolidated Appropriations Act for 2005. The FLREA replaced the Recreation Fee Demonstration Program, and most current BLM sites have transitioned to the new program. All receipts collected under this authority are deposited to this account. The BLM returns 100 percent of these receipts back to the site where the fees were generated. The Administration proposes legislation to permanently authorize the recreation fee programs of the Departments of the Interior and Agriculture under FLREA. The FLREA is currently set to expire on September 30, 2017.

*Operations and acquisitions in Nevada from land sale receipts.*—Pursuant to P.L. 105–263, 85 percent of receipts from sales of public domain lands in southern Nevada are used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by the National Park Service, the U.S. Fish and Wildlife Service and BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse BLM for costs incurred arranging sales and exchanges under the Act.

*Lincoln County Land Sales Act.*—P.L. 106–298 authorizes the Secretary to dispose of certain lands in Lincoln County, Nevada, and distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the County; and 85 percent to an interest bearing account that is available for expenditure without further appropriation to be used by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the County, and for other specified administrative purposes.

*White Pine County Land Sales Act.*—P.L. 109–432 authorizes the Secretary to dispose of certain lands in White Pine County, Nevada, and to distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the County; and 85 percent to an account that is available for expenditure without further appropriation for the management of archaeological resources, wilderness protection, recreation activities, preparation of a management plan, reimbursement for sale costs, and other purposes.

*Leases from Naval Petroleum Reserve No 2.*—The 2005 Energy Policy Act established this fund for environmental investigation and restoration

on that site located in Kern County, California. A portion of revenue from new leases on the site is authorized to be deposited to this account.

*BLM Permit Processing Improvement Fund.*—The 2005 Energy Policy Act, as amended by the National Defense Authorization Act, 2015, established pilot offices to improve interagency coordination in processing onshore Federal oil and gas permits. Fifty-percent of the rents from non-geothermal onshore mineral leases are authorized to be deposited in this fund and used to facilitate BLM oil and gas permit processing in these pilot offices. In addition, in 2016 through 2026, fees collected for processing applications for permits to drill will be deposited to this fund.

*Federal land disposal.*—The Federal Land Transaction Facilitation Act, P.L. 106–248 (114 Stat. 613), provided authority for BLM to sell public lands that were classified as suitable for disposal under resource management plans in effect at the time of enactment. This law provided that receipts from such sales could be used to acquire non-Federal lands with significant resource values that fall within the boundaries of areas now managed by the Department of the Interior. This authority expired on July 25, 2010, and was later reauthorized through July 25, 2011. All funds not obligated by both expiration dates were transferred to the Land and Water Conservation Fund. The Budget includes a proposal to reauthorize the Federal Land Transaction Facilitation Act. A separate legislative proposal to permanently authorize the LWCF will also be submitted with the Budget.

*Owyhee Land Acquisition Account.*—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1039), provides that the Secretary may sell public land located within the Boise District of BLM that, as of July 25, 2000, was identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land in, or adjacent to, certain wilderness areas.

*Washington County, Utah Land Acquisition Account.*—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1091), authorizes the sale of public land located within Washington County, Utah, that, as of July 25, 2000, was identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land in, or adjacent to, certain wilderness areas.

*Silver Saddle Endowment Account.*—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1114), requires Carson City to deposit twenty-five percent of the difference between what the Secretary of the Interior and the City paid for the 62-acre Bernhard parcel before the Secretary conveys the land to the City. Amounts deposited in the account established by paragraph (1) shall be available to the Secretary, without further appropriation, for the oversight and enforcement of a certain conservation easement.

*Carson City Special Account.*—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1113), authorizes the sale of 158 acres of public land described in the statute. Five percent of the proceeds are paid to the State of Nevada for use for public education. The remainder is deposited to this account and used to acquire environmentally sensitive land or an interest in environmentally sensitive land in Carson City; to cover the cost of surveys and appraisals; and to reimburse BLM for administrative expenses.

*Ojito Land Acquisition.*—The Ojito Wilderness Act authorized the sale of land to the Pueblo Indian Tribe and the purchase of land from willing sellers within the State of New Mexico.

Miscellaneous permanent payments include:

*Payments for Oregon and California and Coos Bay Wagon Road grant lands, receipts.*—The Secure Rural Schools and Community Self-Determination Act of 2000 (P.L. 106-393), as amended by P.L. 110-343 and by P.L. 112-141, provides annual transition payments to the 18 O&C counties. These payments were derived from revenues from Federal activities on O&C lands in the previous fiscal year that were not deposited to permanent operating funds, supplemented by amounts from the General Fund when necessary. The last payment authorized under P.L. 106-393 was in 2006. Section 601 of Division C of P.L. 110-343 amended and reauthorized the Secure Rural Schools Act (P.L. 106-393). Amendments to P.L. 106-393 retained most provisions of the original Act, but reduced payments each year. Section 10(a) of P.L. 113-40, 127 Stat. 545, provided authorization for 2013, for payments made in 2014. The Secure Rural Schools Act (SRS Act) was reauthorized by section 524 of P.L. 114-10 for two years and signed into law by the President on April 16, 2015. The Budget proposes a five-year reauthorization of the Secure Rural Schools Act with funding through mandatory appropriations beginning in 2017. Counties not opting to receive a portion of the USDA Forest Service payments to communities will receive funds authorized under the 1937 and 1939 statutes. Payments to the Oregon counties under the 1937 statute

will be 50 percent of revenues from O&C grant lands. Payments under the 1939 statute are for lost tax revenue in two Oregon counties and are estimated to be 75 percent of all revenues from Coos Bay Wagon Road grant lands.

*Payments to States (proceeds of sales).*—States are paid five percent of the net proceeds from the sale of public land and public land products (31 U.S.C. 1305).

*Payments to States from grazing receipts, etc, public lands outside grazing districts.*—States are paid 50 percent of the grazing receipts from public lands outside of grazing districts (43 U.S.C. 315i, 315m).

*Payments to States from grazing receipts, etc, public lands within districts.*—States are paid 12.5 percent of grazing receipts from public lands inside grazing districts (43 U.S.C. 315b, 315i).

*Payments to States from grazing receipts, etc, public lands within grazing districts, miscellaneous.*—States are paid specifically determined amounts from grazing receipts derived from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

*Payments to counties, National Grasslands.*—Of the revenues received from the use of Bankhead-Jones Act lands administered by BLM, 25 percent is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

*Payments to Nevada from receipts on land sales.*—(A) P.L. 96-586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, the proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (five percent) and the county in which the land is located (10 percent). (B) P.L. 105-263, as amended by P.L. 107-282, authorizes the disposal through sale of approximately 49,000 acres in Clark County Nevada, the proceeds of which are to be distributed as follows: a) five percent for use in the general education program of the State of Nevada; b) 10 percent for use by the Southern Nevada Water Authority for water treatment and transmission facility infrastructure in Clark County, Nevada; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to be used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by the National Park Service, Fish and Wildlife Service, and BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails, and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse BLM for costs incurred arranging sales and exchanges under the Act. (C) P.L. 106-298 authorizes the sale of certain lands in Lincoln County, Nevada. The proceeds of these sales are to be distributed as follows: a) five percent to the State of Nevada for general education purposes; b) 10 percent to Lincoln County for general purposes with emphasis on supporting schools; and c) the remaining 85 percent to a special fund administered by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

*Cook Inlet Region, Incorporated Account.*—This account received funding appropriated by section 9102 of the fiscal year 1990 Department of Defense Appropriations Act for the acquisition of Federal real properties, improvements on such lands or rights to their use or exploitation, and any personal property related to the land purchased by the Cook Inlet Region, Incorporated as authorized by the provisions of section 12(b) of P.L. 94-204 (43 U.S.C. 1611). The BLM maintains an accounting of the funds used by the Cook Inlet Region, Incorporated to purchase properties.

*State 5 Percent Share, Carson City Land Sales.*—The 2009 Omnibus Public Land Management Act, Public Law 111-11 (123 STAT. 1113), requires that five percent of proceeds from the sale of 158 acres described

in the statute shall be paid to the State of Nevada for general public education purposes.

The Helium Act Amendments of 1960, P.L. 86-777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities. The Helium Privatization Act of 1996 (HPA), P.L. 104-273, provided for the eventual privatization of the program and its functions, specifying that once the helium debt is retired, the Helium Production Fund would be dissolved. The debt was repaid at the beginning of fiscal year 2014. The Helium Stewardship Act of 2013 (HSA), P.L. 113-40, provided for continued operation of the Helium program while facilitating a gradual exit from the helium market. The Helium program consists of: (a) continued storage and transmission of crude helium; (b) oversight of the production of helium on Federal lands; and (c) administration of in-kind and open market crude helium gas sale programs. To minimize impacts to the helium market, the HSA provides a "glide path" from the sales mandated under HPA, increasing the sales price of helium through an auction mechanism and reducing the total volume of helium sold each year, until the amount in storage reaches 3.0 billion cubic feet. At that point, the remaining helium will be reserved for Federal users. Additionally, HSA provides for a hard deadline to sunset the program and sell off the program assets by 2021.

The Bureau of Ocean Energy Management (BOEM) manages the exploration and development of the nation's offshore energy and marine mineral resources on the U.S. Outer Continental Shelf (OCS). These marine resources include vast deposits of oil and natural gas, non-energy minerals, as well as renewable resources such as offshore wind, wave and ocean currents. BOEM's goal is to balance economic development, energy security, and environmental protection through responsible and transparent management of offshore resources based on the best available science. In carrying out this mission, the Bureau manages a range of OCS activities. For offshore oil and gas, this includes conducting resource assessments; planning for the timing and location of OCS areas that will be offered for leasing; conducting lease sales; permitting geological and geophysical activities; reviewing and approving exploration and development plans; and conducting environmental reviews at multiple steps in the process. In addition, BOEM supports planning, leasing, and permitting for OCS renewable energy development, as well as managing OCS sand and gravel resources.

The Ocean Energy Management account includes the following budget activities: Renewable Energy, Conventional Energy, Environmental Programs, and Executive Direction.

**Renewable Energy.**—Oversees renewable energy program development and implementation, including: identification of wind energy areas; environmental and compliance work; issuance of offshore renewable energy leases; review of site assessment, construction, and operation plans; and consultation with state and local governments, Federal agencies, and other stakeholders.

**Conventional Energy.**—Supports OCS oil and gas leasing, including development of the Five Year OCS Oil and Gas Leasing Program; conducting

lease sales; administering leases; reviewing exploration and development plans; conducting technical and economic resource evaluation; and engaging in planning activities involving minerals other than oil and gas.

**Environmental Programs.**—Develops the environmental impact statements and environmental assessments needed to consider the potential environmental impacts of proposed actions in accordance with the National Environmental Protection Act, the OCS Lands Act, and numerous other environmental statutes, regulations, and executive orders. Also conducts specific studies that address information needs associated with both conventional and renewable energy leasing activities on the Outer Continental Shelf.

**Executive Direction.**—Funds bureau-wide leadership, management, coordination, and outreach. This includes budget management, congressional and public affairs, and program policy and analysis.

The Bureau of Safety and Environmental Enforcement (BSEE) was established on October 1, 2011, to ensure the safe and responsible development of our Nation's offshore energy resources. BSEE's continued focus is on safety and goes beyond simple compliance with regulations towards the adoption, by both industry and regulators, of a meaningful safety culture that permeates all offshore activities. The Bureau is responsible for the oversight of exploration, development, and production operations for oil and natural gas on the U.S. Outer Continental Shelf (OCS). The Offshore Safety and Environmental Enforcement (OSEE) account is BSEE's primary operating account and funds the following activities: Operations, Safety, and Regulation; Environmental Enforcement; Administrative Operations; and Executive Direction.

**Operations, Safety, and Regulation.** Funds safety activities associated with OCS oil and gas development plans and permits, including drilling permit application reviews; conducts facility inspections, including overseeing critical high-risk activities and identifying incidences of noncompliance with safety requirements; ensures offshore operators comply with oil spill planning and preparedness requirements; conducts accident investigations; oversees operator training and audit programs; conducts annual operator performance reviews; conducts research on emerging energy development technologies; and performs inspection verification of oil and gas production levels to help ensure the public receives a fair return from the sale of these public resources.

**Environmental Enforcement.** Funds environmental compliance activities related to issuing permits; inspections of environmental measures and enforcement of incidences of noncompliance, and monitoring industry compliance with mitigation and other environmental requirements through office and field inspections.

**Administrative Operations.** Funds general administration and ethics programs, equal employment opportunity services, emergency management, finance, human resources, procurement, and information management. This activity also provides a full range of administrative and information management services to the Bureau of Ocean Energy Management (BOEM), as well as select services to other Departmental entities.

**Executive Direction.** Funds bureau-wide leadership, direction, management, coordination, communications strategies, and outreach. This includes functions such as budget, congressional and public affairs, and policy and program analysis.

**Environmental protection.**—This activity funds those functions that directly contribute to ensuring the environment is protected during surface coal mining operations. It also addresses activities to ensure coal operators adequately reclaim the land after mining is completed.

Under this activity, the Office of Surface Mining Reclamation and Enforcement provides grants and support to States to operate enforcement programs on State and private lands under the terms of the Surface Mining Control and Reclamation Act of 1977. This activity also provides for the operation of enforcement programs on Federal and Indian lands, as well as Federal oversight of these regulatory programs.

**Technology development and transfer.**—This activity provides funding to enhance the technical skills that States and Indian Tribes need to operate their regulatory programs. It provides technical tools, such as the Applicant Violator System, to States and Indian Tribes to solve problems related to the environmental effects of coal mining and technical assistance to address specific coal mining issues.

**Financial management.**—This activity provides resources for managing, accounting, and processing collections and for pursuing delinquent civil penalties. This includes developing and maintaining information management systems that support these functions and enhance the agency's ability to deny new mining permits to applicants with unabated State or Federal violations.

**Executive direction and administration.**—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services, such as rent, telephones, and postage.

*Environmental restoration.*—This activity funds those functions that contribute to reclaiming lands affected by past coal mining practices. This activity provides discretionary funding for the Federal reclamation program for watershed restoration projects and for the evaluation of State and tribal

reclamation programs that now receive mandatory funding for reclamation activities.

*Technology development and transfer.*—This activity provides funding to enhance the technical skills that the States and Indian Tribes need to operate their reclamation programs. The Office of Surface Mining Reclamation and Enforcement (OSMRE) provides technical assistance on mining and reclamation-related problems.

*Financial management.*—This activity provides funds to identify, notify, collect, and audit fees from coal operators for the Abandoned Mine Reclamation Fund. OSMRE seeks to maximize voluntary compliance with the Surface Mining Control and Reclamation Act's reclamation fee provisions.

*Executive direction and administration.*— This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services such as rent, telephones, and postage.

In order to address the continuing legacy of abandoned mine lands (AML) on the health, safety, and environment of communities, the Budget proposes to make available to States and Tribes \$1 billion from the unappropriated balance of the AML Trust Fund. The AML funding would be used to target reclamation of AML sites and associated polluted waters in a manner that promotes sustainable revitalization in economically depressed coalfield communities. Additionally, the budget proposes to return coal reclamation fee rates to their historic (pre-FY 2008) level and eliminate all payments to States who have certified the highest priority abandoned coal mines have been reclaimed.

P.L. 109-432, as amended, authorizes mandatory Treasury payments to all States and Tribes equivalent to their share of the accumulated balance of the Abandoned Mine Reclamation Fund (i.e. prior balance funds). Prior balance fund payments were made over the past seven years and were exhausted in FY 2015. The payments also return half of annual coal fee collections to States and Tribes that have certified completion of their abandoned coal mine reclamation programs.

The Budget proposes to eliminate mandatory payments from the Treasury to States and Tribes that have been certified as completing reclamation of their abandoned coal mines, so that abandoned mine lands funds are only used to clean up the most hazardous abandoned coal mines. The Budget also proposes to return coal reclamation fee rates to their historic (pre-FY 2008) levels so that additional funding will be available to reduce some of the remaining dangerous coal AML sites nationwide.

The Budget proposes to terminate the payments to certified States and Tribes. States and Tribes that have been certified as completing their coal AML reclamation work receive unrestricted payments from the Treasury for a share of industry coal fee contributions generated within their state. These States and Tribes have already certified that they have completed their abandoned coal mine reclamation projects and are now permitted to use their AML payments for any purpose.

P.L. 109-432 authorizes mandatory Treasury payments to three United Mine Workers of America retiree health benefit plans (the Combined Benefit Fund, the 1992 Plan, and the 1993 Plan), to the extent that other Federal funding sources do not meet the plans' expenditure needs, subject to certain limitations. Interest earned on Abandoned Mine Land trust fund balances is available for transfer to cover funding shortfalls in the plans;

unobligated balances in the fund are used to generate interest for this purpose.

Under current law, total obligations derived from the general fund for Surface Mining, Control, and Reclamation Act (SMCRA) purposes cannot exceed \$490 million a year. The Budget includes legislative proposals that would: (1) revise the formula for general fund payments to the 1993 Health Benefit Plan by taking into account all beneficiaries enrolled in the Plan as of enactment, as well as those retirees whose health benefits were denied or reduced as the result of a bituminous coal industry bankruptcy proceeding commenced in 2012, and (2) transfer to the 1974 UMWA pension plan the difference between that cap and other OSM obligations to the states and other health care plans. Payments would be made by the Pension Benefit Guaranty Corporation within the Department of Labor. The 1974 plan, which covers more than 100,000 mineworkers, is underfunded and approaching insolvency. Payments would continue until the plan is fully funded on a current liability basis.

**WATER AND SCIENCE**

BUREAU OF RECLAMATION

Appropriations to the Bureau are made from the General Fund and special funds. The source of funds are a) the General Fund, which funds other projects or programs. Among the projects funded from the General Fund are the Colorado River Basin Project and the Colorado River Storage Project; b) the Reclamation Fund, derived from repayments and other revenues from water and power users, receipts from the sale, lease, and rental of Federal lands, and certain oil and mineral revenues. Program activities that can be financed from the Reclamation Fund are those that directly benefit the 17 Western States and are for the purposes authorized under "Reclamation Law"; c) the Central Valley Project Restoration Fund, consisting of revenues from project beneficiaries; and d) other sources such as the Colorado River Dam Fund, which generates revenue from the sale of Boulder Canyon power, and the recreation, entrance, and user fee account, consisting of fees collected pursuant to the Land and Water Conservation Fund Act of 1965, as amended. Non-Federal entities also advance funds for operation and maintenance and provide funds under the Contributed Funds Act. The Water and Related Resources account supports the development, management, and restoration of water and related natural resources in the 17 Western States. The account includes funds for operating and maintaining existing facilities to obtain the greatest overall level of benefits, to protect public safety, and to conduct studies on ways to improve the use of water and related natural resources. Work will be done in partnership and cooperation with non-Federal entities and other Federal agencies to reduce conflict, facilitate solutions to complex water issues, and stretch limited water supplies. The American West faces serious water challenges. Adequate and safe water supplies are fundamental to the health, economy, security, and ecology of the country. With increased demands for water, amplified recognition of environmental water requirements, and the potential for decreased supplies due to drought and climate change, a water balance cannot be achieved without water conservation and water reuse. In 2017, Reclamation will help address these issues through a water conservation program, which includes cost-shared grants for conservation and water and energy management improvement projects; basin-wide planning studies that will evaluate and address the impacts of climate change; cooperative watershed management; and funding of water reuse and recycling projects. Reclamation will also partner with States, Tribes and local entities under the program to develop incentives and best practices for implementing water and energy conservation and water recycling projects.

This fund was established to carry out the provisions of the Central Valley Project Improvement Act—to provide funding from project beneficiaries for habitat restoration, improvement and acquisition, and other fish and wildlife restoration activities in the Central Valley Project area of California. Resources are derived from donations, revenues from voluntary water transfers and tiered water pricing. The account is also financed through additional mitigation and restoration payments collected on an annual basis from project beneficiaries.

This account receives funding (user fees and repayment receipts) from the Friant Division long-term water contractors and other Federal and non-Federal sources to implement the provisions described in the Settlement (Settlement) for the National Resources Defense Council et. al. v. Rodgers lawsuit. The Settlement's two primary goals are: 1) To restore and maintain fish populations in "good condition" in the main stem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish; and 2) To reduce or avoid adverse water supply impacts to all of the Friant Division long-term contractors that may result from the Interim Flows and Restoration Flows provided for in the Settlement.

The U.S. Geological Survey (USGS) provides research and scientific information to support the mission of the Department of the Interior and its science requirements. The USGS also works in collaboration with other Federal, State, and tribal cooperators to conduct research and provide scientific data and information concerning natural hazards and environmental issues, including the water, land, geologic, and biological resources of the Nation. The USGS budget continues science programs that generate relevant, objective information for natural resource managers and for communities throughout the Nation and engages in partnerships with universities, research institutions, and major public and private laboratories.

**Ecosystems.**—The USGS Ecosystems mission area monitors and inventories biological resources and ecological systems; provides scientific information for the management of biological resources and their habitats; studies and predicts the consequences of environmental change and the effects of alternative management actions on plants, animals, and their habitats; conducts high priority ecological and biological research needed by Interior for sound management decisions; and operates the Cooperative Research Unit program, a university-based fish and wildlife research program focusing on graduate education and training of future natural resource professionals.

**Climate and Land Use Change.**—The USGS Climate and Land Use Change mission area conducts scientific research, monitoring, remote sensing, modeling, and forecasting to address the effects of climate and land use change on the Nation's natural resources. The resulting research and products are provided as the scientific foundation upon which policy-makers, natural resource managers, and the public make informed decisions about the management of natural resources. Landsat satellites and data systems are developed, operated, and maintained to ensure a continuous, authoritative global record of changes to the Earth's land surface.

**Energy and Mineral Resources and Environmental Health.**—The USGS Energy and Mineral Resources and Environmental Health mission area includes scientific activities that support decision making related to natural resource security; environmental, wildlife, and human health; land and resource management; and economic development. The mission area provides scientific information for assessments and research on mineral and energy resource potential, production and consumption, and environmental impacts of permitting, extraction, and use in the United States and around the world. The mission area also provides information and tools to decision makers and the public regarding environmental contaminants and toxic substances, including impacts on susceptible ecosystems and implications for human, wildlife and fish health.

**Natural Hazards.**—The USGS plays a critical role in providing policy-makers and the public with a clear understanding of potential threats from natural hazards, societal vulnerability to these threats, and strategies for achieving resilience to earthquakes, volcanic eruptions, landslides, floods, hurricanes, solar storms, tsunamis, and wildfires. The USGS Natural Hazards mission area is working with its partners and stakeholders to define and mitigate risks, build understanding of natural hazard processes, and characterize the potential impact and consequences on human activity, health, the economy, and the environment. This mission area includes USGS activities that characterize and assess coastal and marine processes, conditions, change and vulnerability.

**Water Resources.**—The USGS is one of the primary Federal science agencies that provides information about water resources. To fulfill this responsibility, the USGS Water Resources mission area produces data, analyses, and assessments, and develops methodologies to support Federal,

State, tribal, and local government decisions in managing water resources for domestic, agricultural, commercial industrial, recreational, and ecological uses; protecting and enhancing water resources for human health, aquatic health, and environmental quality; minimizing loss of life and property as a result of water-related natural hazards, such as floods, droughts, and land movement; and contributing to sustainable stewardship and development of the Nation's resources for the benefit of present and future generations.

**Core Science Systems.**—The USGS Core Science Systems mission area conducts fundamental research and provides data about the Earth, its complex processes, and its natural resources. These activities provide the Nation with natural science information to support response planning for natural hazards and to manage natural resources. Core Science Systems produces geological, geographical, geophysical, and geochemical maps and three-dimensional geologic frameworks that provide critical data for sustaining and improving the quality of life and economic vitality of the Nation. As the Federal steward of elevation and hydrography information, Core Sciences Systems makes this information and other geospatial information available to the public through The National Map. This mission area creates the informatics framework and provides scientific content needed for understanding and stewardship of our Nation's ecological, geologic, and geospatial resources.

**Science Support.**—The USGS Science Support program funds essential science leadership as well as critical functions such as: scientific integrity processes; sharing and communicating science findings; purchasing science equipment and field supplies; executing science agreements with partners; contracting for support scientists and researchers; safety training; hazardous waste management; succession planning and execution; and information technology, which supports the scientific process and information management of scientific data. Science Support also provides Bureau-wide executive direction and coordination, business administration and financial management.

**Facilities.**—The USGS Facilities program provides safe, functional workspace, state of the art labs, and facilities for the USGS to accomplish its scientific mission. The mission area provides rental payments and operation and maintenance for properties and maintenance and capital improvement for existing assets.

**Reimbursable program.**—Reimbursements from non-Federal sources are from States, Tribes, and municipalities for: cooperative efforts and proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for mission-related work performed at the request of the financing agency.

*Ecological Services.*—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, Tribes, non-governmental organizations, and other Federal agencies. These partnership activities help protect and recover species that are listed under the Endangered Species Act and work toward making the listing of additional species unnecessary. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize adverse environmental effects of development projects. Contaminants are investigated, monitored, and assessed for effects on trust resources.

*Habitat Conservation.*—Through technical and financial assistance, the Service promotes the protection, conservation, and restoration of the Nation's fish and wildlife resources. These conservation activities are accomplished through a voluntary citizen and community based stewardship program with partners on private lands. Conserving the nation's coastal trust resources is accomplished through collaboration with others on public and private lands.

*National Wildlife Refuge System.*—The Service maintains the National Wildlife Refuge System consisting of 563 refuges, waterfowl production areas in 209 counties managed by 38 wetland management districts, and 50 wildlife coordination areas. The National Wildlife Refuge System administers this network of land and waters to conserve and restore fish, wildlife, plants, and their habitats, for the benefit of present and future generations of Americans.

*Conservation and Enforcement.*—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 1,000 species of birds. Grants and partnerships are key to these programs, such as Joint Ventures that implement the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protection laws, and works in partnership with international, State, and Tribal counterparts to conserve wildlife resources. The Service, through the International Affairs Program, works with private citizens, local communities, State and Federal agencies, foreign governments, and non-governmental organizations in the United States and internationally to promote a coordinated domestic and international strategy to protect, restore, and enhance the world's diverse wildlife and their habitats, with a focus on species of international concern.

RESOURCE MANAGEMENT—Continued

**Fish and Aquatic Conservation.**—The Fish and Aquatic Conservation Program consists of 72 interconnected National Fish Hatcheries, one historic National Fish Hatchery, nine Fish Health Centers, seven Fish Technology Centers, 65 Fish and Wildlife Conservation Offices, and the Aquatic Animal Drug Approval Partnership Program. Working with partners, the program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American public.

**Cooperative Landscape Conservation.**—Through a national network of Landscape Conservation Cooperatives (LCCs), and in cooperation with both Federal and non-Federal partners, the Service enhances its core capacity in biological planning and conservation design to strategically address the problems fish, wildlife, and plants will face in the future. The information gathered helps to define clear conservation objectives, inform conservation management decisions, focus management actions where they will most affect the landscape, and supply scientific knowledge and expertise needed most by the Service and its partners.

**Science Support.**—Science Support provides funding for applied science directed at high impact questions surrounding threats to fish and wildlife resources. This science provides critically needed information to inform regulatory and policy decisions to best manage species at healthy and sustainable levels across broader landscapes.

**General Operations.**—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all of the Fish and Wildlife Service's programs. The funds also support the National Conservation Training Center and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

The State and Tribal Wildlife Grants program provides funds to States, Commonwealths, the District of Columbia, and Territories primarily through a formula-based apportionment. Additionally, a competitive program uses a merit-based process to fund the best outcome-oriented, results-based projects. At the discretion of affected States, the competitive program may be used by regional associations of State fish and wildlife agencies. Tribes also receive funds through a national competitive award process. These funds are provided to stabilize, restore, enhance, and protect species and their habitat that are of conservation concern, thereby avoiding the costly and time-consuming process that occurs when habitat is degraded or destroyed and species populations plummet.

Federal Land Acquisition funds are used to protect areas that have native fish or wildlife values and provide natural resource benefits over a broad geographical area. Funds in this account also cover acquisition management activities, such as title fees and land surveys. The Fish and Wildlife Service places emphasis on acquiring important fish, wildlife, and plant habitat for the conservation of listed endangered and threatened species. The Federal Land Acquisition program uses alternative and innovative conservation tools, including conservation easements, and implements projects that have the input and participation of the affected local communities and stakeholders. In addition, the 2017 Federal Land Acquisition program builds on efforts started in 2011 to strategically invest in interagency landscape-scale conservation projects while continuing to meet agency-specific programmatic needs. The Department of the Interior and the U.S. Forest Service collaborated extensively to develop a process to more effectively coordinate land acquisitions with government and local community partners to achieve the highest priority shared conservation goals.

The Landowner Incentive Program provided cost-shared, competitive grants to States, Commonwealths, the District of Columbia, Territories, and Tribes to create, supplement or expand upon new or ongoing landowner incentive programs. These programs provided technical and financial assistance to private landowners to help them protect and manage imperiled species and their habitat, while continuing to engage in traditional land use or working conservation practices. The program was phased out in 2008 and minimal balances remain in this account.

Funds deposited into this account include import duties on arms and ammunition and receipts in excess of U.S. Postal Service expenses from the sale of Migratory Bird Hunting and Conservation Stamps, also known as Duck Stamps. These funds are used to acquire land and water for migratory bird refuges and waterfowl production areas. In addition, any funds reverted from the States within the Federal Aid in Wildlife Restoration Fund are available for this purpose. The Federal Duck Stamp Act of 2014 (P.L. 113–264) increased the price of Duck Stamps from \$15 to \$25, with the \$10 increase to be dedicated to the acquisition of conservation easements for conservation of migratory birds. The 2017 budget proposes legislation to enable future stamp fee increases with the approval of the Migratory Bird Conservation Commission.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707). The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. Interest on obligations held in the Federal Aid in Wildlife Restoration Fund is also available for this purpose. In addition, a portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration, and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include the obtaining of a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. territories for species and habitat conservation actions on non-federal lands, including habitat acquisition, conservation planning, habitat restoration, status surveys, captive propagation and reintroduction, research, and education for species that are listed or are candidates for listing, as threatened or endangered. These activities support recovery efforts and Habitat Conservation Plans in partnership with local governments and other interested parties to protect species. Appropriations to this account are financed by the Land and Water Conservation Fund and the Cooperative Endangered Species Conservation Fund. The latter is an unavailable receipt account that receives a transfer from the General Fund of the U.S. Treasury equal to five percent of receipts deposited to the Federal Aid in Wildlife and Sport Fish Restoration accounts plus Lacey Act receipts over \$500,000. Funds made available for grants from the two accounts are subject to annual appropriations authorized by Congress.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes the Service to make payments to counties in which Fish and Wildlife Service fee lands are located from the revenues resulting from the sale of products from Service lands, less expenses for producing the revenue and activities related to revenue sharing. While direct appropriations have previously been used to supplement revenues, the 2017 Budget eliminates discretionary funding as formulas contained in the Act do not account for the economic benefits which refuges provide.

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005. Approximately 164 Fish and Wildlife Service sites collect entrance fees

and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program demonstrates the feasibility of user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on Federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address maintenance needs, enhance resource protection, and cover the costs of collection. Recreation fees are often used at Service sites to fund student interns and for various youth programs focusing on hunting, fishing, wildlife observation, wildlife photography, environmental education, and environmental interpretation. The 2017 Budget proposes legislation to permanently authorize the recreational fee programs of the Departments of the Interior and Agriculture under FLREA.

The Federal Aid in Wildlife Restoration Act (16 U.S.C. 669 et seq.), also known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise tax on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multistate Conservation Grant Program, as well as the Firearm and Bow Hunter Education and Safety Program that provides grants to the States.

The Energy Policy Act of 2005 (P.L. 109-58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be distributed annually to coastal States that have submitted approved coastal impact assistance plans. The formula for distribution is based on the amount of qualified OCS revenues generated off the coastline of each producing State. In addition, 35 percent of each State's allocable share is to be distributed to coastal political subdivisions based on population, coastline, and distance to applicable OCS leases. In FY 2011, this program was transferred from the Bureau of Ocean Energy Management, Regulation, and Enforcement to the Fish and Wildlife Service.

The Federal Aid in Sport Fish Restoration Act, also known as the Dingell-Johnson Sport Fish Restoration Act (16 U.S.C. 777 et seq.), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment and certain other sport fish related products and fuel.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multistate Conservation Grant Program. It also provides funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

The Sport Fish Restoration Act specifies that the net deposits made into the Sport Fish Restoration and Boating Safety Trust Fund, minus the distributions for administrative expenses for the Fish and Wildlife Service and the United States Coast Guard, special commissions, and the Boating Council, be distributed to support the following:

*The Coastal Wetlands Planning, Protection, and Restoration Act (16 U.S.C. 3951 et seq.).*—18.673 percent of net deposits, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, are to be made available and distributed as follows: 70 percent to the U.S. Army Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects per the North American Wetlands Conservation Act (16 U.S.C. 4407).

*Boating Safety Programs.*—17.315 percent of net deposits are to be made available to the United States Coast Guard for State recreational boating safety programs.

*Boating Infrastructure Improvement.*—4 percent of net deposits are to be made available to the Secretary of the Interior to make grants to 1) States, as determined through a competitive award process, for the development and maintenance of facilities for transient non-trailerable recreational vessels 26 feet or longer or 2) States, Commonwealths, the District of Columbia and Territories, as determined through a competitive award process, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities, as well as for educational programs on proper disposal of sewage. Not more than 75 percent of the 4 percent shall be available for grants under either of the award processes referenced in this paragraph.

*National Outreach and Communications Programs.*—2 percent of net deposits are to be made available to the Secretary of the Interior to develop national and State outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources.

*Grants to States.*—58.012 percent of net deposits are provided to the States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, acquisition and improvement of fish habitat, and provision of access for public use and \$3 million is reserved for Multistate Conservation Activities.

The National Park Service administers 409 areas and over 84.6 million acres of land in 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the Northern Marianas. In FY 2014, park visits totaled 284 million. This annual appropriation funds the operation of areas and facilities administered under the National Park System through two budget activities. Funds within this appropriation are available for one year, with the exception of repair and rehabilitation funds and funds for the cooperative restoration of the Everglades, which are both available

for two years. In addition, this account contains reimbursable activity such as recovery of costs associated with special use permits.

The first activity, Park Management, covers the management and operation of park areas, and is divided into five subactivities that represent functional areas:

**Resource stewardship.**—Encompasses resource management operations that provide for the protection and preservation of unique natural, cultural, and historical features of units of the National Park System.

**Visitor services.**—Includes operations that provide orientation, educational, and interpretive programs to enhance the visitor's park experience. It also provides for the efficient management of commercial services for the benefit of visitors and the protection of resources.

**Park protection.**—Provides for the protection of park resources, visitors, and staff. Funding supports law enforcement operations, including the United States Park Police, that reduce vandalism and other destruction of park resources, safety, and public health operations.

**Facility operations and maintenance.**—Encompasses the maintenance and protection of buildings, other facilities, lands, and other government investments.

**Park support.**—Covers the management, supervision, and administrative operations for park areas and partnerships.

The second activity, External Administrative Costs, funds costs which are largely determined by organizations outside the National Park Service and for which funding requirements are less flexible. The requirements for these costs are mandated in accordance with applicable laws. To promote the efficient performance of the National Park Service, these costs are most effectively managed on a centralized basis.

The National Recreation and Preservation appropriation covers a broad range of activities relating to outdoor recreation planning, preservation of natural, cultural and historic resources, and environmental compliance. These programs provide a central point at the Federal level for recreation and preservation planning; the coordination of Federal and State policies, procedures and guidelines; and the administration of technical and financial assistance to international, Federal, State, and local governments and private organizations. This appropriation is comprised of the following seven budget activities:

*Recreation Programs.*—Provides technical assistance to State and local governments and transfers surplus Federal real property to local governments for recreation uses.

*Natural Programs.*—Increases river and trail opportunities through Rivers, Trails, and Conservation Assistance, State and local technical assistance and Chesapeake Bay Gateway and Water Trails grants; creates river conservation and recreational opportunities that are compatible with continuing and future operations of hydropower facilities, fulfills National Park Service responsibilities under the Federal Power Act, and protects park resources through the Hydropower Recreation Assistance Program; and manages the National Natural Landmark program.

*Cultural Programs.*—Manages the National Register of Historic Places; reviews and certifies applications for Federal Tax Credits for Historic Preservation as a reimbursable activity; conducts cultural resources management planning through the National Historic Landmarks program, the Historic American Buildings Survey, the Historic American Engineering Record and the Historic American Landscapes Survey programs; advances

the application of science and technology in historic preservation and provides information distribution and skills training in the preservation and conservation of the Nation's significant historic and cultural resources through the National Center for Preservation Technology and Training; and coordinates the American Battlefield Protection Program Assistance Grants program, the Japanese American Confinement Site Grants program, and the Native American Graves Protection and Repatriation Grants program.

*Environmental Compliance and Review.*—Provides review and commentary on environmental impact statements, Federal licensing, permit applications, and other actions that may impact areas of National Park Service jurisdiction.

*Grants Administration.*—Provides administrative expenses associated with the Historic Preservation Fund grant programs, the Native American Graves Protection and Repatriation Grants program, the Japanese American Confinement Sites Grants, and the American Battlefield Protection Program Assistance Grants.

*International Park Affairs.*—Coordinates international assistance programs and the exchange and support functions that complement the Service's domestic role.

*Heritage Partnership Programs.*—Provides financial and technical assistance to Congressionally designated national heritage areas, managed by private or State organizations to promote the conservation of natural, historic, scenic, and cultural resources.

**URBAN PARK AND RECREATION FUND**

The Urban Park Recreation Recovery Act of 1978 authorizes matching grants and technical assistance to eligible economically distressed urban communities to revitalize and improve recreation opportunities. The program provides direct Federal grants to local governments to rehabilitate existing indoor and outdoor recreation facilities; to demonstrate innovative ways to enhance park and recreation opportunities; and to develop local Recovery Action Plans to identify needs, priorities and strategies for revital-

ization of the total recreation system. Last funded in FY 2004, minimal balances remain.

The Construction appropriation provides support to several National Park Service mission goals, including preserving park resources, providing for visitor enjoyment, and improving organizational effectiveness. In addition, this account contains activity related to reimbursable agreements.

The Construction appropriation is composed of five budget activities:

*Line item construction.*—This activity provides for the construction, re-habilitation, and replacement of facilities needed to accomplish the management objectives approved for each park.

*Special programs.*—This activity includes Emergency and Unscheduled Projects, Employee Housing, Dam Safety, and Equipment Replacement.

*Construction planning.*—This activity includes the project planning function to prepare working drawings, specification documents, and contracts needed to construct or rehabilitate National Park Service facilities.

*Construction program management and operations.*—This activity provides centralized design and engineering management services, as well as contracting services for park construction projects.

*Management planning.*—Under this activity, funding is used to prepare and update Unit Management Plans. The plans guide National Park Service actions for the protection, use, development, and management of each park unit. Funding also is used to conduct studies of alternatives for the protection of areas that may have potential for addition to the National Park System and for environmental impact planning and compliance.

The Land Acquisition and State Assistance appropriation uses funding derived from the Land and Water Conservation Fund to support National Park Service land acquisition activities and provide grants to States for the

LAND ACQUISITION AND STATE ASSISTANCE—Continued

purchase and development of land for outdoor recreation activities. The appropriation is composed of the following budget activities:

*Federal land acquisition administration.*—Provides for the administration of land acquisitions throughout the National Park System, ensuring compliance with existing guidelines and laws.

*Federal land acquisition.*—Provides for the acquisition of land and interests in land to preserve and protect, for public use and enjoyment, the historic, scenic, natural, and recreational values of congressionally authorized areas within the National Park System. Funds are also used for matching grants for the purchase of Civil War Battlefield lands by non-Federal entities. The 2017 Federal Land Acquisition program builds on efforts started in 2011 to strategically invest in interagency landscape-scale conservation projects while continuing to meet agency-specific programmatic needs. The Department of the Interior and the U.S. Forest Service collaborated extensively to develop a process to more effectively coordinate land acquisitions with government and local community partners to achieve the highest priority shared conservation goals.

*State conservation grants administration.*—Provides for the administration of matching grants to States and through States to local governments, for the acquisition and development of public outdoor recreation areas and facilities.

*State conservation grants.*—This activity provides matching grants to States and local units of government for the acquisition and development of land and facilities that will provide the public access to new opportunities to engage in outdoor recreation. The account includes both traditional formula and competitive grant programs for States.

*Outer Continental Shelf Oil Lease Revenues.*—The Gulf of Mexico Energy Security Act of 2006 (P.L. 109–432) allows a portion of the revenue collected from oil and gas leasing activities in qualified areas just becoming available for leasing in the Outer Continental Shelf (OCS) to be deposited to the Land and Water Conservation Fund and distributed to States in accordance with the Land and Water Conservation Act of 1965. The National Park Service portion of the revenue is 12.5 percent of total qualified OCS revenues. These new OCS receipts became available for expenditure as mandatory funding beginning in 2009. The Omnibus Appropriations Act, 2009 (P.L. 111–8) permits the use of up to three percent of the amounts authorized to be disbursed for costs of administration.

**Recreation Fee Program.**—The National Park Service and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act (FLREA). FLREA was passed on December 8, 2004, as part of the Omnibus Appropriations Act, 2005, which authorized this program through 2014. The Consolidated Appropriations Act, 2016, extended FLREA through fiscal year 2017. The Administration proposes to permanently reauthorize the Department of the Interior's and the Department of Agriculture's recreation fee programs in fiscal year 2017. Net proceeds are used for high-priority visitor service and facility maintenance projects throughout the National Park System. Up to 80 percent may be retained for use by the collecting park and the remainder retained for discretionary, Servicewide use by the National Park Service Director. Proceeds from the sale of the America the Beautiful passes, which allow access to all public lands that charge fees for a year, are distributed among the Federal land management agencies which offer them for sale, including the National Park Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, the Bureau of Reclamation and the U.S. Forest Ser-

vice, as determined by the Secretaries of the Department of the Interior and the Department of Agriculture in accordance with P.L. 108-447.

**Deed-restricted parks fee program.**—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with P.L. 105-327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

**Transportation systems fund.**—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transportation systems in accordance with section 501 of P.L. 105-391.

**Payment for tax losses on land acquired for Grand Teton National Park.**—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d-3).

The Historic Preservation Fund appropriation includes grant programs to facilitate the preservation of the Nation's historic and cultural resources. This appropriation provides grants-in-aid to States, Territories, and Indian Tribes. Grants-in-aid to States and local governments require a 40 percent funding match; grants to Tribes do not require matching funds. In addition to the traditional grants-in-aid described above, the account includes competitive grant programs. This includes grants for the survey and nomination of properties associated with communities currently underrepresented in the National Register and as National Historic Landmarks, grants to preserve the sites and stories of the Civil Rights Movement, and grants to repair and interpret historic structures on the campuses of Historically Black Colleges and Universities. The President's budget includes a legislative proposal to permanently extend the authority to annually deposit \$150 million in receipts from offshore oil and gas revenues into the Historic Preservation Fund.

*Park concessions franchise fees.*—Franchise fees for concessioner activities in the National Park System are deposited in this account and used for certain park operations activities in accordance with section 407 of P.L. 105–391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations.

*Concessions improvement accounts.*—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend

funds from such an account with the approval of the park superintendent for improvements to facilities that directly support concession visitor services but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

*Park buildings lease and maintenance fund.*—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of P.L. 105–391.

*Operation and maintenance of quarters.*—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

*Delaware Water Gap, Route 209 operations.*—Fees collected for use of Route 209 within the Delaware Water Gap National Recreation Area by commercial vehicles are used for management, operation, and maintenance of the route within the park as authorized by P.L. 98–63 (97 Stat. 329), section 117 of P.L. 98–151 (97 Stat. 977) as amended by P.L. 99–88 (99 Stat. 343), and section 702 of Division I of P.L. 104–333 (110 Stat. 4185). The authority expired on September 30, 2015. Minimal balances remain.

*Glacier Bay National Park resource protection.*—Of the revenues received from fees paid by tour boat operators or other permittees for entering Glacier Bay National Park, 60 percent are used for certain activities to protect resources of the Park from harm by permittees in accordance with section 703 of Division I of P.L. 104–333 (110 Stat. 4185).

*Filming and photography special use fees.*—The National Park Service is authorized to retain fee receipts that are collected from issuing permits to use park lands and facilities for commercial filming, still photography, and similar activities. Activities authorized for funding include acquisition of emergency response equipment to prevent harm to aquatic park resources from permittees and studies to quantify the impact of permittees' activities on wildlife and other natural resources of the park.

*Contributions to US Park Police annuity benefits.*—Necessary costs of benefit payments to annuitants under the pension program for United States Park Police officers hired prior to January 1, 1984, established under P.L. 85–157, are paid from the General Fund of the Treasury to the extent the payments exceed deductions from salaries of active duty employees in the program. Permanent funding for such payments was provided in the Department of the Interior and Related Agencies Appropriations Act, 2002. Before 2002, such payments were funded from appropriations made annually to the National Park Service.

The Operation of Indian Programs appropriation consists of a wide range of services and benefits provided primarily to Federally-recognized Indian Tribes, Alaskan Native groups, and individual American Indians and Alaska Natives, to fulfill Federal trust and treaty responsibilities and support tribal self-determination and nation building.

This account covers expenses associated with the following activities:

**Tribal Government.**—This activity promotes the sovereignty of Federally-recognized Tribes by supporting and assisting them in the development and maintenance of strong and stable governments capable of administering quality programs and developing economies. This activity also provides for the maintenance of Bureau of Indian Affairs (BIA) roads and bridges.

**Human services.**—This activity provides funding for social services, housing improvement, welfare assistance, and Indian child welfare. The objective of this activity is to improve the quality of life for individual Indians who live on or near Indian reservations and to protect children, the elderly, and disabled from abuse and neglect.

**Trust: Natural resources management.**—This activity provides for the management, development, protection, and resilience of Indian trust land and natural resource assets and related treaty rights. Natural resource programs in Indian Country include agriculture, forestry, water, fish, wildlife, and parks.

**Trust: Real estate.**—This activity promotes cooperative efforts with landowners for the optimal utilization, development, and enhancement of trust and restricted Federal Indian-owned lands. The activity includes general real estate services, probate, land title and records, environmental compliance, and other trust services and rights protection.

**Education.**—This activity supports Bureau of Indian Education (BIE) funded elementary and secondary school operations, other education programs for elementary-aged Indian children, tribal post-secondary schools, scholarships and adult education programs, education program management, and operations and facilities maintenance. The BIE-funded schools include 169 elementary and secondary BIE- and tribally-run schools, 14 dormitories, two post-secondary schools, and operating grants to eligible tribal colleges and universities.

**Public safety and justice.**—This activity funds law enforcement activities in Indian Country in over 25 States. Programs under this activity include investigative, police, and detention services; tribal courts; fire protection; and facilities maintenance.

**Community and economic development.**—This activity promotes the economic vitality of American Indians and Alaska Natives through Job Placement and Training, Economic Development, and Community Development. This activity also provides assistance for renewable and conventional energy and hard mineral development for the economic benefit of the Tribes and individual Indian allottees.

**Executive direction and administrative services.**—This activity supports the management of BIA's and BIE's finance, budget, acquisition, and property functions, as well as information technology resources, personnel services, facilities management, payment of GSA and direct rentals, and intra-governmental payments. Significant portions of Indian Affairs activities are executed under contracts or compacts with Federally-recognized Tribes to run tribal and Federal programs. Funding also supports BIA or BIE oversight and technical assistance for these activities in central and regional offices.

This appropriation funds a program to consolidate fractional interests in Indian lands and assist land owners with estate planning. Funds are used to purchase small interests in parcels of lands from willing individual Indian landowners and convey those interests to the tribe on whose reservation the land is located. Consolidation of these interests is expected to reduce the Government's costs for managing Indian lands and promote economic opportunity on these lands. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), the American Indian Probate Reform Act of 2004 (P.L. 108-374), and other authorities. No funding is requested in 2017 in this account. Implementation of the Individual Indian Money Account Litigation Settlement (P.L. 111-291, Title I) to address fractionation is in a separate account in the Office of the Secretary.

*Donations and contributed funds.*—The Secretary of the Interior may accept donations of funds or other property, and may use the donated property in accordance with the terms of the donation in furtherance of any program authorized by other provision of law for the benefit of Indians (25 U.S.C. 451).

ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts, and grants, either directly or in cooperation with States and other organizations.

Notwithstanding 25 U.S.C. 15, the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs for central office oversight and Executive Direction and Administrative Services (except executive direction and administrative services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Education, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

No funds available to the Bureau of Indian Education shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau of Indian Education school system as of October 1, 1995, except that the Secretary of the Interior may waive this prohibition to support expansion of up to one additional grade when the Secretary determines such waiver is needed to support accomplishment of the mission of the Bureau of Indian Education. Appropriations made available in this or any prior Act for schools funded by the Bureau shall be available, in accordance with the Bureau's funding formula, only to the schools in the Bureau school system as of September 1, 1996, and to any school or school program that was reinstated in fiscal year 2012. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1141 of the Education Amendments of 1978 (25 U.S.C. 2021)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter school's operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106-113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101-301, the Secretary shall continue to distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula.

Funds available under this Act may not be used to establish satellite locations of schools in the Bureau school system as of September 1, 1996, except that the Secretary may waive this prohibition in order for an Indian tribe to provide language and cultural immersion educational programs for non-public schools located within the jurisdictional area of the tribal government which exclusively serve tribal

members, do not include grades beyond those currently served at the existing Bureau-funded school, provide an educational environment with educator presence and academic facilities comparable to the Bureau-funded school, comply with all applicable Tribal, Federal, or State health and safety standards, and the Americans with Disabilities Act, and demonstrate the benefits of establishing operations at a satellite location in lieu of incurring extraordinary costs, such as for transportation or other impacts to students such as those caused by busing students extended distances: *Provided*, That no funds available under this Act may be used to fund operations, maintenance, rehabilitation, construction or other facilities-related costs for such assets that are not owned by the Bureau: *Provided further*, That the term "satellite school" means a school location physically separated from the existing Bureau school by more than 50 miles but that forms part of the existing school in all other respects. This appropriation supports the functions of the Office of the Secretary of the Interior, including executive-level leadership, policy, guidance, and coordination of the responsibilities carried out by its bureaus and offices. In addition, the appropriation supports programmatic functions carried out by the Office of the Secretary including mineral revenue collections, the Take Pride in America program, the Department's quasi-judicial and appellate responsibilities, and the Office of Valuation Services. The appropriation also provides for workers and unemployment compensation payments for former Bureau of Mines employees.

*Office of Natural Resources Revenue (ONRR).*—The Office of Natural Resources Revenue's mission is to collect, disburse, and verify Federal and Indian energy and other natural resources revenues on behalf of all Americans. Revenues collected by ONRR represent a significant source of non-tax revenue to the Federal Government. The ONRR disburses mineral revenues to States, the Office of the Special Trustee for American Indians, other Federal agencies, and the General Fund of the United States Treasury. Through ONRR, the Administration will continue to implement mineral revenue collection and reporting reforms, including the implementation of the Extractive Industries Transparency Initiative, and the implementation

of recommendations from the Government Accountability Office, the Department's Inspector General, and others.

Under the Mineral Leasing Act, States receive fifty-percent of Federal revenues generated from mineral production occurring on Federal lands within that State's boundaries. Alaska is the exception, receiving a 90 percent share of receipts from Federal mineral leasing in that State (exclusive of the National Petroleum Reserve-Alaska). To partially cover the costs of administering the Federal mineral leasing program, the Bipartisan Budget Act permanently amended the Mineral Leasing Act (MLA) to deduct two percent from the required payments to States under the Act. These payments are administered by the Office of Natural Resources Revenue within the Department of the Interior's Office of the Secretary.

Flood control payments to States are shared according to the Flood Control Act of 1936 (33 U.S.C. 701 et seq.) which provides that 75 percent of revenue collected be shared with the State in which it was collected. These funds are to be expended as the State legislature may prescribe for the benefit of the public schools and roads in the county from which the revenue was collected, or for defraying other expenses of county government. These expenses include public obligations of levee and drainage districts for flood control and drainage improvements. Payments are administered by the Office of Natural Resources Revenue.

As of May 23, 1908 (16 U.S.C. 499), 25 percent of the revenues collected from onshore mineral leasing and production on national forest lands have been paid to the State in which the national forest resides. A State's payment is based on national forest acreage. Where a national forest is situated in several States, an individual State payment is proportionate to its area within that particular national forest. These payments are now administered by the Office of Natural Resources Revenue within the Department of the Interior's Office of the Secretary.

Terminate geothermal payments to counties.—The Budget proposes to repeal the 25 percent geothermal lease revenue sharing payments to counties established by the Energy Policy Act of 2005 (P.L. 109-58) and return to the traditional 50/50 Federal-State revenue sharing arrangement. States have the flexibility to allocate their share of revenue from Federal leases to counties, if appropriate.

The Gulf of Mexico Energy Security Act of 2006 (GOMESA, P.L. 109-432) provides that 37.5 percent of Outer Continental Shelf revenues from certain leases be distributed to four coastal States (Alabama, Louisiana, Mississippi, and Texas) and their local governments based on a complex allocation formula. These payments are administered by the Office of Natural Resources Revenue within the Department of the Interior's Office of the Secretary.

STATES SHARE FROM CERTAIN GULF OF MEXICO LEASES

(Legislative proposal, subject to PAYGO)

Beginning in FY 2018, the Budget proposes to repeal payments to four coastal States (Alabama, Louisiana, Mississippi, and Texas) and their local governments under the Gulf of Mexico Energy Security Act of 2006 (GOMESA, P.L. 109-432). The Budget proposes to redirect roughly half of the savings that result from repealing GOMESA revenue sharing payments to a new \$2 billion Coastal Climate Resilience program, which will provide resources over 10 years for at-risk coastal States, local governments, and their communities to prepare for and adapt to climate change. The remaining GOMESA repeal savings will be directed to the Treasury.

Title IV of the Department of the Interior and Related Agencies Appropriation Act, 1998 (P.L. 105-83) established the Environmental Improvement and Restoration Fund account. As required by law, 50 percent of the principal and 50 percent of the interest from the Alaska Escrow account are deposited into the Environmental Improvement and Restoration Fund. The law requires that the corpus of the Fund be invested. Twenty percent of the interest earned by the Fund is permanently appropriated to the Department of Commerce, and the unappropriated balance of interest remains in the fund. At this time, no budget authority is requested.

The Individual Indian Money Account Litigation Settlement (P.L. 111-291) established this fund to provide Indian land owners with an additional incentive to sell their fractionated interests, given that the market value associated with highly fractionated interests will be quite low in many cases. Not more than \$60 million may be transferred from the Trust Land Consolidation Fund to this fund for higher education scholarships for American Indians and Alaska Natives to be administered as described in the settlement agreement.

The Individual Indian Money Account Litigation Settlement (P.L. 111-291) established a new trust land consolidation fund for the buy-back and consolidation of fractionated interests in parcels of land from individual Indian landowners. The fund also covers administrative costs to undertake the process of acquiring fractionated interests and associated trust reform activities not to exceed 15 percent of the fund. The acquisition of fractionated interests is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), and the American Indian Probate Reform Act of 2004 (P.L. 108-374). The Settlement provides additional authority for the acquisition of interests held by persons who cannot be located after engaging in extensive efforts to notify them and locate them for a five-year period. The Settlement was finalized on November 24, 2012 and in accordance with the terms of the legislation, these funds remain available for ten years from the date of the Settlement.

TRUST TERRITORY OF THE PACIFIC ISLANDS

The Department of the Interior is seeking no additional appropriations for the Trust Territory of the Pacific Islands. Compacts of Free Association have been implemented with the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.

Remaining funds in the Trust Territory of the Pacific Islands account are being used to improve basic economic information and financial management capabilities in the insular areas; address compact impact related issues; and also for brown tree snake control.

The peoples of the Republic of the Marshall Islands, the Federated States of Micronesia and the Republic of Palau approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (P.L. 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free Association Amendments Act of 2003, P.L. 108-188, continues financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through 2023. The Compact of Free Association for the Republic of Palau was enacted on November 14, 1986 as P.L. 99-658, and was implemented on October 1, 1994. While the financial assistance provisions under the Compact of Free Association with the Republic of Palau were set to expire on September 30, 2009, subsequent appropriations in 2010 through 2016 have continued financial assistance to Palau at 2009 levels.

The mission of the Office of Inspector General is to promote excellence, accountability and integrity in the programs, operations and management of the Department of the Interior. The Office focuses on providing the Secretary and Congress timely and relevant information regarding the Department's most serious management and program challenges, with a special concentration on high-risk areas vulnerable to fraud, waste, and mismanagement. The Office is responsible for independently and objectively identifying risks and vulnerabilities that directly impact, or could impact, the Department's ability to accomplish its mission. The Office is required to keep the Secretary and Congress fully and currently informed about problems and deficiencies relating to the administration of departmental programs and operations. Effective implementation of this mandate addresses the public's demand for greater accountability and integrity in the administration of government programs and operations and the demand for programs that work better, cost less, and get the results Americans care about most.

P.L. 94-565 (31 U.S.C. 6901-07), as amended, authorizes payments in lieu of taxes ("PILT payments") to counties and other units of local government for lands within their boundaries administered by the Bureau of Land

Management, the U.S. Forest Service, the National Park Service, the Fish and Wildlife Service, and certain other agencies. The PILT payment formula is based on a number of factors, including the amount of Federal land within an eligible unit of local government, its population, and certain other Federal payments the local government may receive.

Since the inception of the PILT program in 1977 through FY 2007, PILT funding was subject to annual appropriations. The Emergency Economic Stabilization Act of 2008 provided a five-year (FYs 2008-2012) mandatory funding stream for PILT at the full authorization levels calculated using the existing PILT formula. The Moving Ahead for Progress in the 21st Century Act (P.L. 112-141) extended the mandatory authorization through 2013, and the Agricultural Act of 2014 (P.L. 113-79) extended the mandatory authorization through 2014. The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 and the Consolidated and Further Continuing Appropriations Act (P.L. 113-235) extended PILT payment authority through 2015 with a combination of discretionary and mandatory funds. The Consolidated Appropriations Act of 2016 (P.L. 114-113) provides discretionary PILT funding under the Office of the Secretary, Departmental Operations account to extend payment authority through 2016.

The Central Hazardous Materials Fund is used to fund remedial investigations/feasibility studies and cleanups of hazardous waste sites for which the Department of the Interior is liable. Authority is provided for amounts recovered from responsible parties to be credited to this account. Thus, the account may be composed of both annual appropriations of no-year funds and of offsetting collections. The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. Section 9601 *et seq.*) requires responsible parties, including Federal landowners, to investigate and clean up releases of hazardous substances.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments are performed in order to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, prepare for response to potential inland oil spills, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through cooperative assessment agreements, negotiated settlements, or other legal actions by the Department of the Interior. Responsible parties may also provide in-kind services to restore injured natural resources.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources and services; and, 3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a Department-wide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 *et seq.*), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 *et seq.*), the Oil Pollution Act of 1990 (33 U.S.C. 2701 *et seq.*), and the Act of July 27, 1990 (16 U.S.C. 19jj *et seq.*). Since 1992, amounts received by the United States from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

EXXON VALDEZ RESTORATION PROGRAM

The Budget reflects the receipts, transfers, and mandatory spending by the Department of the Interior associated with the civil and criminal settlements resulting from the 1989 Exxon Valdez oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and State of Alaska natural resource trustee agencies to restore the natural resources and services damaged by the spill. The Exxon Valdez Oil Spill Trustee Council consists of three State and three Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

The 2017 Budget proposes to amend the Balanced Budget and Emergency Deficit Control Act of 1985, as amended, to establish a new budget framework for the Wildland Fire Management program that is designed to provide stable funding for fire suppression, while minimizing the adverse impacts of fire transfers on the budgets of other fire and non-fire programs, as well as reduce fire risk, manage landscapes more comprehensively, and increase the resiliency of public lands and the communities that border them. In this proposed new budget framework, a portion of the funding needed for suppression response is funded within the discretionary spending limits and a portion is funded in an adjustment to those limits. The new framework does not increase overall discretionary spending, as it would reduce the ceiling for the existing disaster relief cap adjustment by an equivalent amount as is provided for wildfire suppression operations. More details are provided in the *Budget Process* chapter in the Analytical Perspectives volume.

**Preparedness.**—Funds the non-emergency and predictable aspects of the Department's wildland fire program, including the initial attack suppression action on wildfires. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence, and rural fire readiness, in which assistance is provided to local cooperators to enhance their capacity to protect remote communities and natural resources. It also includes activities related to program monitoring and evaluation, and integration of fire into land-use planning.

**Suppression Operations.**—Funds the emergency and unpredictable aspects of the Department's wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected consistent with resource objectives and land management plans. Emergency actions taken during and immediately following a wildfire to stabilize the soil and structures to prevent erosion, floods, landslides, and further resource damage are included in this activity. Emergency stabilization actions may be performed within one year of containment of a fire. In FY 2010 through 2016, funding for the ten-year average of inflation-adjusted suppression obligations is split between the FLAME Wildfire Suppression Reserve Fund and this appropriation. The Budget request proposes an adjustment to the discretionary spending limits as a new approach for responsibly budgeting for wildland fire suppression to minimize the risk of fire transfers and provide more stability and certainty of funding to other programs to invest in critical forest and rangeland management needs. The Budget proposes base level funding of 70 percent of the 10-year average of suppression costs to be funded within the discretionary cap. The proposed cap adjustment would fund the remaining identified need for Suppression. The base level of funds ensures that the cap adjustment is only used for the most severe fire activity since it is one percent of the fires that results in 30 percent of the costs. In FY 2017, 70 percent of the 10-year average is \$276 million. The amount requested in the cap adjustment equals the difference between the total amount of suppression

WILDLAND FIRE MANAGEMENT—Continued

expenditures projected for the fiscal year, based on the Outyear Forecast developed by the U.S. Forest Service's Southern Research Station, and the 70 percent of the 10-year suppression average that is requested within the discretionary budget caps. For 2017, the request for the budget cap adjustment is \$290 million. The DOI and Forest Service wildland fire management programs will continue to strengthen oversight and accountability of suppression spending and use risk management principles to guide decision-making at the strategic, program, and operational levels.

**Fire Risk Management.**—Is a new program activity proposed in FY 2017. It funds two programs, Fuels Management and Resilient Landscapes, previously included within Other Operations. The Fuels Management program conducts treatments aimed at mitigating risk to communities and their values, including areas in the wildland urban interface. The Resilient Landscapes program will conduct treatments that improve the integrity and resilience of our forests and rangelands. These treatments will be coordinated with and receive support, including bureau matching funds, from resource management programs of the Interior fire bureaus. The Fire Risk Management activity will contribute community adaption to fire and improve the ability to safely and appropriately respond to wildfire. The budgets for the Fire Risk Management activity cover the planning, operational aspects, and monitoring of treatments. Both programs will utilize such treatment methods as prescribed fire, mechanical, chemical, and biological treatments or a combination of methods.

**Other Operations.**—Funds all other aspects of the wildland fire management program, which includes Fire Facilities Construction and Maintenance, Burned Area Rehabilitation, and Joint Fire Science. The Fire Facilities Construction and Maintenance program funds construction and maintenance of facilities to house firefighters and equipment used in wildland firefighting, fuels management, and resilient landscapes activities. Facilities funded in this activity include crew quarters, warehouses, fire caches, dispatch centers, fire stations, engine storage, and aviation bases. The Burned Area Rehabilitation program begins the restoration process for lands and resources damaged by wildland fires that would not return to fire adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions. The Joint Fire Science subactivity funds the Department's share of the Joint Fire Science program, an inter-agency partnership that sponsors and delivers applied research to assist field managers with fuels treatment, post-fire rehabilitation, smoke management and many other related topics.

Amounts in the FLAME Fund include the portion of the ten-year average of suppression obligations, adjusted for inflation, intended to support the most severe, complex, and threatening fires. The Secretary may permit transfers from this account to cover these extreme fire events. The Secretary may also transfer funds in the event that DOI has exhausted its suppression resources due to an active fire season. In 2017, the Budget proposes to eliminate this account and will fund all suppression activities in the Wildland Fire Management account, with a portion of the suppression funds

requested within the discretionary budget cap and a portion of the funds requested in a budget cap adjustment.

The Working Capital Fund finances services and activities that can be performed more effectively and efficiently in a centralized manner, including business services provided by the Interior Business Center (IBC), formerly the National Business Center. Activities financed through the fund include information technology and security, systems hosting and help desk services, Departmental news and information, aircraft services, central reproduction, supplies and health services, and safety and health initiatives. Departmental administrative systems hosted within the fund include the Federal Personnel and Payroll System and the Financial and Business Management System (FBMS). The IBC provides financial management, acquisition, and human resources services as well as payroll services to other agencies as one of the Government-wide payroll providers selected by OPM. Through the National Indian Program Training Center, a component of DOI University, the Working Capital Fund provides training courses and other services related to Indian culture, law and programs to Federal government employees. The appropriated portion of the Working Capital Fund includes funding for FBMS operations and maintenance, Service First, the care and management of the Department's cultural collections, DATA Act and FITARA compliance activities, and activities related to improving the Department's cybersecurity capabilities.

Funding for the Justice Information Sharing Technology (JIST) account will provide for corporate investments in information technology (IT). Under the control of the DOJ Chief Information Officer, this centralized fund ensures that investments in information sharing technology are well-planned and aligned with the Department's overall IT strategy and enterprise architecture. The current major initiatives/projects are described below.

*Cybersecurity (Cross Agency Priority Goal).*—Enhancing cybersecurity remains a top priority for the Department and its leadership as DOJ supports a wide range of missions that include National Security, law enforcement, prosecution, and incarceration. For each of these critical missions, the systems that support them must be secured to protect the confidentiality of sensitive information, the availability of data and workflows crucial to mission execution, and the integrity of data guiding critical decision-making. For 2017, the Department devotes its enhancement request entirely toward cybersecurity further securing its posture at the enterprise level. In 2017, \$26.4 million will be invested for Justice Security Operations Center; for the Identity, Credentialing, and Access Management (ICAM) program; to enhance information security and continuous monitoring; and for a stronger Insider Threat program.

*Law Enforcement Information Sharing Program (LEISP).*—LEISP is a Department-wide strategy to facilitate the sharing of information about terrorism, criminal activity, and threats to public safety. LEISP will implement the IT tools needed to facilitate timely, appropriate, and secure sharing of information across the law enforcement community.

*IT Transformation.*—IT Transformation is a long-term, multiyear commitment that implements shared IT infrastructure for the Department and shifts investments to the most efficient computing platforms, including shared services and next generation storage, hosting, networking, and facilities. This directly supports the Federal CIO's 25 Point Plan to Reform Federal IT Management and the Portfolio Stat (PSTAT) process, and aligns the Department's IT operations with the Federal Data Center Consolidation and Shared First initiatives. Work on these initiatives began in 2012, and consists of the following projects: a) e-mail consolidation; b) data center consolidation) mobility and remote access; and c) desktops. In 2017, DOJ will continue to leverage Schedule A hiring authority with a goal of bringing onboard more than 20 private sector IT subject matter experts to progress IT transformation already underway within OCIO. These experts, with varied skill sets from data architects, application hosting, and business intelligence will assist OCIO and component customers to move forward on respective IT initiatives in support of the DOJ mission. Additionally, the OCIO will leverage U.S. Digital Service expertise in its effort to drive innovation in key IT management areas, such as with Digital Acquisition Innovation Labs. OCIO will also continue to leverage its authority under FITARA, through the Department's IT Investment Review Council (DIRC) and Investment Review Board (DIRB), and through the TechStat process, to ensure that all Department IT projects and initiatives are meeting expected milestones and remain with project scope and budget.

*Policy, Planning and Oversight.*—JIST funds the Office of the CIO and the Policy & Planning Staff (PPS), which supports CIO management in complying with the Clinger-Cohen Act, the Federal Information Technology Acquisition Reform Act (FITARA), and other applicable laws, rules, and regulations for federal information resource management. Within OCIO, PPS develops, implements, and oversees an integrated approach for effectively and efficiently planning and managing DOJ's information technology resources, including the creation of operational plans for JIST and monitoring the execution of funds against those plans. PPS is responsible for IT investment management including portfolio, program and project management. The investment management team manages the Department's IT investment and budget planning processes; develops and maintains the Department's general IT program policy and guidance documents; and coordin-

ates the activities of the DIRB DIRC. In addition, PPS performs reviews to examine planned IT acquisitions and procurements to ensure alignment with the Department's IT strategies, policies, and its enterprise road map.

This program includes the Office of the Pardon Attorney (OPA) and the Executive Office for Immigration Review (EOIR). The Pardon Attorney receives, reviews, and prepares recommendations to the President for all petitions for executive clemency, i.e., commutation of sentences and pardons, submitted by persons convicted of Federal crimes. EOIR was created on January 9, 1983 through an internal Department of Justice (DOJ) reorganization that combined the Board of Immigration Appeals (BIA) with the Immigration Judge function. Besides establishing EOIR as a separate agency within DOJ, this reorganization made the Immigration Courts independent of the agency charged with enforcement of federal immigration laws. Under delegated authority from the Attorney General, EOIR conducts

ADMINISTRATIVE REVIEW AND APPEALS—Continued

immigration court proceedings, appellate reviews, and administrative hearings. The Office of the Chief Administrative Hearing Officer was added in 1987. EOIR is headed by a Director, appointed by the Attorney General, who oversees 57 Immigration Courts nationwide, BIA, and the headquarters organization located in Falls Church.

The Office of the Inspector General (OIG) was statutorily established in the Department of Justice on April 14, 1989. The OIG investigates alleged violations of criminal and civil laws, regulations, and ethical standards arising from the conduct of the Department's employees. The OIG provides

leadership and assists management in promoting integrity, economy, efficiency, and effectiveness within the Department and in its financial, contractual, and grant relationships with others. Also by statute, the OIG reports to the Attorney General, the Congress, and the public on a semiannual basis regarding its significant activities.

The Audit function is responsible for independent audits and reviews of Department organizations, programs, functions, computer security and information technology systems, and financial statement audits. The Audit function also conducts or reviews external audits of expenditures made under Department contracts, grants, and other agreements.

The Investigations function investigates allegations of civil rights violations, bribery, fraud, abuse and violations of other laws, rules, and procedures that govern Department employees, contractors, and grantees. This function also develops these cases for criminal prosecution, civil action, or administrative action. In some instances, the OIG refers allegations to components within the Department and requests notification of their findings and of any disciplinary action taken.

The Evaluation and Inspections function conducts analyses and makes recommendations to decision makers for improvements in Department programs, policies, and procedures. In addition, this function also conducts shorter and more time-sensitive reviews and evaluations to provide managers with early warnings about possible program deficiencies.

The Oversight and Review function investigates allegations of significant interest to the American public and the Congress and of vital importance to the Department.

The Office of the General Counsel provides legal advice to OIG management and staff. It also drafts memoranda on issues of law; prepares administrative subpoenas; represents the OIG in personnel, contractual, ethics, and legal matters; and responds to Freedom of Information Act requests.

The Management and Planning function provides advice to OIG senior leadership on administrative and fiscal policy and assists OIG components in the areas of budget formulation and execution, security, personnel, training, travel, procurement, property management, information technology, computer network communications, telecommunications, records management, quality assurance, internal controls, and general support.

The United States Parole Commission is responsible for (1) making parole release and revocation decisions for all parole-eligible Federal and District of Columbia Code offenders; (2) setting and enforcing the conditions of supervised release for District of Columbia Code offenders; (3) making release decisions for United States citizens convicted of a crime in another country who voluntarily return to the United States for service of sentence; (4) performing parole-related functions for certain military and state offenders; and (5) exercising decision-making authority over state offenders who are on the state probation or parole, and are transferred to Federal authorities under the witness security program.

The Parole Commission works to reduce offender recidivism rates by implementing new revocation guidelines and establishing alternatives to incarceration for low-risk, non-violent offenders. In addition, the Commission seeks to improve the rehabilitation process by monitoring an effective offender supervision program through U.S. and District of Columbia probation officers and through research studies that evaluate the effectiveness of offender supervision programs. The Parole Commission has oversight responsibility for the supervision of District of Columbia parolees and supervised releases under the National Capital Revitalization and Self-Government Improvement Act (P.L. 105-33).

*Supreme Court proceedings and appellate matters.*—The Office of Solicitor General conducts substantially all litigation on behalf of the United States and its agencies in the Supreme Court of the United States, approves decisions to appeal and seek further review in cases involving the United States in the lower Federal courts, and supervises the handling of litigation in the Federal appellate courts.

*General tax matters.*—The mission of the Tax Division is to enforce the nation's tax laws fully, fairly, and consistently, through both criminal and civil litigation, in order to promote voluntary compliance with the tax laws, maintain public confidence in the integrity of the tax system, and promote the sound development of the law.

*Criminal matters.*—The Criminal Division develops, enforces, and supervises the application of all Federal criminal laws, except those specifically assigned to other divisions. The mission of the Criminal Division is to identify and respond to critical and emerging national and international criminal threats, and to lead the enforcement, regulatory, and intelligence communities in a coordinated nationwide response to reduce those threats.

*Claims, customs, and general civil matters.*—The Civil Division represents the Federal Government in civil litigation to defend Federal statutes, regulations, and policies, and to avoid payment of unjustified monetary claims. It also investigates and pursues perpetrators of financial, economic, health care, and other forms of fraud to recover billions of dollars owed to the Federal Government. Examples of non-monetary litigation include the defense of thousands of challenges to immigration enforcement decisions and to Federal activities involving counterterrorism, as well as enforcement of consumer protection laws.

*Environment and natural resource matters.*—The Environment and Natural Resources Division enforces the Nation's civil and criminal environmental laws and defends environmental challenges to Government action. Additionally, the Division represents the United States in virtually all matters concerning the use and development of the Nation's natural resources and public lands, wildlife protection, Indian rights and claims, worker safety, animal welfare, and the acquisition of Federal property.

*Legal opinions.*—The Office of Legal Counsel provides written opinions and oral advice in response to requests from the Counsel to the President, the various agencies of the executive branch, and offices within the Department, including the offices of the Attorney General and Deputy Attorney General.

*Civil rights matters.*—This program enforces the Nation's Federal civil rights laws. Through the enforcement of a wide range of anti-discrimination laws, the Division gives meaning to our Nation's promise of equal opportunity. The Division works to uphold and defend the civil and constitutional

rights of all individuals, particularly some of the most vulnerable members of our society. The Division enforces Federal statutes that prohibit discrimination and provide a remedy for constitutional violations.

**INTERPOL Washington.**—This program is the United States National Central Bureau and designated representative to INTERPOL on behalf of the Attorney General. Its mission includes, but is not limited to, facilitating international police cooperation; transmitting criminal justice, humanitarian and other law enforcement related information between U.S. law enforcement authorities and their foreign counterparts, and coordinating and integrating information for investigations of an international nature.

**Reimbursable programs.**—This reflects reimbursable funding for the following:

**Civil Division.**—For litigating cases under the National Childhood Vaccine Injury Act, and for litigating a number of extraordinarily large cases on behalf of the United States;

**Criminal Division.**—For activities related to healthcare fraud and drug prosecutions, international training programs and asset forfeiture related activities;

**Environment and Natural Resources Division.**—From numerous client agencies for personnel, automated litigation support and litigation consultant services for a variety of environmental, natural resource, land acquisition, and Native American cases, including from the Environmental Protection Agency (EPA) for Superfund enforcement litigation; and,

**Civil Rights Division.**—For activities related to the Division's Complaint Adjudication Office and Health Care Fraud activities.

The Antitrust Division administers and enforces antitrust and related statutes. This program primarily involves the investigation of suspected violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts, and the maintenance of competitive conditions.

The Federal Trade Commission (FTC) and the Department of Justice Antitrust Division are responsible for reviewing corporate mergers to ensure they do not promote anticompetitive practices. Revenue collected from pre-merger filing fees, known as Hart-Scott-Rodino (HSR) fees, are collected by the FTC and split evenly between the two agencies. In 2017, the Antitrust Division will continue to collect filing fees for pre-merger notifications and will retain these fees for expenditure in support of its programs. The Budget proposes to increase the HSR fees and index them for the percentage annual change in the gross national product. The fee proposal would also create a new merger fee category for mergers valued at over \$1 billion. Under the proposal, the fee increase would take effect in 2018.

There are 94 United States Attorneys' Offices located throughout the United States, Puerto Rico, the Virgin Islands, Guam, and the Northern Mariana Islands. The 93 U.S. Attorneys (Guam and the Northern Mariana Islands are under the direction of a single U.S. Attorney) prosecute criminal offenses against the United States, represent the Government in civil actions in which the United States is concerned, and initiate proceedings for the collection of fines, penalties, and forfeitures owed to the United States. For 2017, the U.S. Attorneys request \$27 million to support eDiscovery activities, countering violent extremism efforts, and hiring additional Prevention and Reentry Coordinators to help reduce recidivism, prevent crime, and create better outcomes for at-risk individuals.

The Federal Government is represented by a United States Marshal in each of the 94 judicial districts. The primary mission of the United States Marshals Service (USMS) is to protect, defend and enforce the American justice system by providing security of Federal court facilities and the safety of judges and other court personnel; apprehending fugitives and non-compliant sex offenders; exercising custody of Federal prisoners and providing for their security and transportation from arrest to incarceration; assuring the safety of protected government witnesses and their families; executing Federal warrants and court orders; managing seized assets acquired through illegal means and providing custody, management and disposal of forfeited assets. The USMS is the principal support force in the Federal judicial system and an integral part of the Federal law enforcement community.

Other Federal funds are derived from the Administrative Office of the U.S. Courts for the judicial facility security program, the Assets Forfeiture Fund for seized assets management and disposal, the Fees and Expenses of Witnesses appropriation for protected witnesses' security and relocation, the Organized Crime Drug Enforcement Task Force Program for multi-agency drug investigations, and the Office of National Drug Control Policy and the Centers for Disease Control for security services. Non-Federal funds are derived from State and local governments for witness protection and the transportation of prisoners pursuant to State writs, as well as fees collected from service of civil process and sales associated with judicial orders.

The Federal Prisoner Detention (FPD) account is responsible for the costs associated with the care of Federal detainees in the custody of the United States Marshals Service (USMS). The USMS must ensure the safe, secure, and humane confinement of persons in its custody while allowing unimpeded prisoner transportation operations. The FPD account provides for the care of Federal detainees in private, State, and local facilities, which includes housing, subsistence, transportation, medical care, and medical guard service.

For 2017, FPD requests funding for housing, medical, and transportation costs associated with the projected USMS detention population. The Federal Government utilizes various methods to house detainees. Detention bed space for Federal detainees is acquired to maximize efficiency and effectiveness for the Government through: (1) Federally-owned and managed detention facilities, where the Government has paid for construction and operation of the facility (funded in the Federal Bureau of Prisons' (BOP) account); (2) Intergovernmental Agreements (IGAs) with State and local jurisdictions, whose excess prison and jail bed capacity is utilized and paid via a daily rate; and (3) Private performance-based contract facilities, where a daily rate is paid. Over three-quarters of the USMS's Federally detained population will likely be housed in State, local, and private facilities.

The USMS continues to look for efficiencies and cost reductions and avoidance in detention through process and infrastructure improvements. The costs associated with these efforts will be funded from the FPD account. Improvements to date include implementation of eDesignate, which was developed to provide a more efficient workflow between the U.S. Courts, the USMS, and the BOP; establishment of Regional Transfer Centers and Ground Transfer Centers to accelerate the movement of prisoners to a designated BOP facility; and increased use of detention alternatives by providing funding to the Federal Judiciary to support alternatives to pretrial detention, such as electronic monitoring, halfway house placement, and drug testing and treatment. The USMS will continue to identify issues and develop solutions to drive further efficiencies.

The Community Relations Service (CRS) is an agency of the Department of Justice that provides assistance to state and local communities in the prevention and resolution of tension, violence, and civil disorders relating to actual or perceived discrimination on the basis of race, color, or national origin. The Service also works with communities to employ strategies to prevent and respond to violent hate crimes committed on the basis of actual or perceived race, color, national origin, gender, gender identity, sexual orientation, religion or disability. CRS helps local leaders, including community members, law enforcement, government officials, and affected parties work together on a voluntary basis to develop locally defined and locally implemented solutions. As a result, CRS builds community capacity to manage conflicts and create permanent mechanisms that communities can use to independently resolve future conflicts. By empowering communities to prevent hate violence and address tension associated with alleged discrimination, CRS helps law enforcement, community leaders and city officials avoid costly litigation, preserve scarce resources, protect public safety, and ultimately enhance community stability.

Title II of the James Zadroga 9/11 Health and Compensation Act of 2010 (P.L. 111-347) reopened the September 11th Victim Compensation Fund (VCF), extending eligibility for compensation associated with physical harm stemming from debris removal and extending the deadline for claims associated with harms not discovered before the Fund's original deadline. The VCF was established by the Air Transportation Safety and System Stabilization Act (P.L. 107-42) as an alternative to litigation, and had terminated operations in 2004 after making compensation payments of more than \$7 billion to survivors of 2,880 persons killed in the September 11, 2001 terrorist attacks and to 2,680 individuals who were injured in the attacks and subsequent rescue efforts. The James Zadroga 9/11 Health and Compensation Act of 2010 reopened the VCF and made \$2.775 billion available for the settlement of claim determinations issued on or before December 17, 2015. Once all claims in this group are resolved, any remaining funds will become available in the new Victims Compensation Fund. The Victims Compensation Fund will be available for the settlement of claim determinations issued after December 17, 2015.

*United States Trustee System Fund.*—The United States Trustees supervise the administration of bankruptcy cases and private trustees in the Federal Bankruptcy Courts and litigate against fraud and abuse in the system by debtors, creditors, attorneys, bankruptcy petition preparers, and others. The Bankruptcy Judges, U.S. Trustees and Family Farmer Bankruptcy Act of 1986 (Public Law 99-554) expanded the pilot trustee program to a twenty-one region, nationwide program encompassing 88 judicial districts. (Bankruptcy cases filed in Alabama and North Carolina are administered by the Administrative Office of the U.S. Courts.) The Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 (Public Law 109-8) expanded United States trustees' existing responsibilities to include, among other things, means testing, credit counseling/debtor education, and debtor audits. User fees that are assessed offset the annual appropriation.

The Comprehensive Crime Control Act of 1984 established the Assets Forfeiture Fund (AFF) as a repository for forfeited cash and the proceeds of sales of forfeited property under any law enforced and administered by the Department of Justice in accordance with 28 U.S.C. 524(c). Authorities of the AFF have been amended by various public laws enacted since 1984. Under current law, authority to use the AFF for certain investigative expenses shall be specified in annual appropriations acts. Expenses necessary to seize, detain, inventory, safeguard, maintain, advertise or sell property under seizure are funded through a permanent, indefinite appropriation. In addition, beginning in 1993, other general expenses of managing and operating the assets forfeiture program are paid from the permanent, indefinite portion of the AFF. Once all expenses are covered, the balance is maintained to meet ongoing expenses of the program. Excess unobligated balances may also be allocated by the Attorney General in accordance with 28 U.S.C. 524(c)(8)(E).

The Justice Prisoner and Alien Transportation System (JPATS) is responsible for transporting the majority of Federal prisoners and detainees, including sentenced and pretrial, in the custody of the United States Marshals Service or the Bureau of Prisons via coordinated air and ground systems. JPATS also transports prisoners and detainees on a reimbursable space-available basis, with the Department of Defense and other participating executive departments and State and local agencies without sacrificing the safety of the public, Federal employees, or those in custody. Customers are billed based on the number of flight hours and the number of seats utilized to move their prisoners.

The Interagency Crime and Drug Enforcement (ICDE) account primarily funds the Organized Crime Drug Enforcement Task Forces (OCDETF) Program. Along with the participation of its seven member federal law enforcement agencies, in cooperation with state and local investigators and with prosecutors from the U.S. Attorneys' Offices and the Criminal Division, OCDETF focuses on targeting and destroying major domestic and transnational criminal organizations who engage in high level drug trafficking, violence and money laundering, as well as national emerging drug threats such as heroin and other related criminal activities. The Program performs the following activities:

*Investigation.*—This activity includes resources for direct investigative, intelligence and support activities of OCDETF's multi-agency task forces, focusing on the disruption and dismantlement of major transnational criminal organizations engaged in the highest level of drug trafficking and money laundering, that supply illegal drugs to the U.S. and fuel the attendant violence. This includes resources for the OCDETF Fusion Center (OFC). The OFC is a multi-agency intelligence center whose mission is to analyze fused law enforcement financial and human intelligence information and produce actionable intelligence for use by OCDETF member agencies to disrupt and dismantle those criminal organizations, and their supporting financial structures, posing the greatest illegal drug threat to the United States. Organizations participating under the Investigations function are the Drug Enforcement Administration, Federal Bureau of Investigation, Internal Revenue Service, Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Coast Guard, U.S. Marshals Service, and Homeland Security Investigations. OCDETF also maintains 12 co-located Strike Forces. The Interagency Crime and Drug Enforcement account also supports transnational organized crime investigations through the International Organized Crime Intelligence and Operations Center (IOC-2), which is a multi-agency intelligence center whose mission is to significantly disrupt and dismantle those international criminal organizations posing the greatest threat to the United States. Multiple federal agencies participate in IOC-2 activities and related investigations. For 2017, ICDE seeks \$1.1 million in operational funding to pursue high value priority transnational organized crime (TOC) targets.

*Prosecution.*—This activity includes resources for the prosecution of cases generated through the investigative efforts of task force agents. Litigation efforts are intended to dismantle in their entirety those major transnational criminal organizations engaged in the highest level of drug trafficking, violence and money laundering, most notably by targeting the leaders of these organizations. This includes activities designed to secure the seizure and forfeiture of the assets of these enterprises. Participating agencies are the U.S. Attorneys, and the Department of Justice's Criminal

Division. For 2017, ICDE seeks \$3.8 million to fund 24 United States Attorneys and 12 support staff to target those priority criminal organizations operating along the Southwest Border which have a significant impact on the overall U.S. drug supply; these resources will also be used to provide full attorney support to the OCDETF Co-Located Strike Forces. ICDE also requests three attorney positions and one support position and \$436,000 to support the growing number of OCDETF cases handled by the Criminal Division's Narcotics and Dangerous Drug Section. Additionally, \$400,000 in operational funding is sought to pursue high value PTOC targets.

The mission of the FBI is to protect and defend the United States against terrorist and foreign intelligence threats, to uphold and enforce the criminal laws of the United States, and to provide leadership and criminal justice services assistance to federal, state, local, and international agencies and partners; and to perform these responsibilities in a manner that is responsive to the needs of the public and is faithful to the Constitution of the United States.

Protecting America in the current challenging national security and criminal environment requires that the FBI refocus its priorities; realign its workforce to address these priorities; and improve management policies and operating procedures to enhance flexibility, agility, effectiveness, and accountability. The FBI's strategic priorities are, in order:

- Protect the United States from terrorist attack,
- Protect the United States against foreign intelligence operations and espionage,
- Protect the United States against cyber-based attacks and high technology crimes,
- Combat public corruption at all levels of government,
- Protect civil rights,
- Combat transnational and national criminal organizations and enterprises,
- Combat major white-collar crime,
- Combat significant violent crime,
- Support federal, state, county, municipal, and international partners,
- Upgrade technology to successfully perform the FBI's mission.

FBI investigations and operations are conducted through a network of 56 major field offices and over 350 smaller offices (resident agencies); the FBI Academy, Laboratory, and engineering complex at Quantico, Virginia; a fingerprint identification and criminal justice information services center in Clarksburg, West Virginia; over 60 Legal Attaché (Legat) offices and more than 20 sub-offices in 70 foreign countries worldwide; and FBI Headquarters (HQ) divisions in the Washington, D.C metropolitan area.

A number of FBI activities are carried out on a reimbursable basis. For example, the FBI is reimbursed for its participation in Interagency Crime and Drug Enforcement programs and by other federal agencies for certain intelligence and investigative services, such as pre-employment background inquiries and fingerprint and name checks. The FBI is also authorized to conduct fingerprint and name checks for certain non-federal agencies.

For 2017, the FBI is requesting a total of \$8.719 billion, to include \$227.8 million in program enhancements for Cyber, Foreign Intelligence and Insider Threats, Going Dark, the Intelligence Community Information Technology Enterprise (IC ITE), Transnational Organized Crime, Surveillance, Biometrics Technology Center (BTC) Operations and Maintenance (O&M), and the National Instant Criminal Background Check System (NICS). The request includes a reduction of \$73.6 million for non-recurring program expenses, \$57.0 million from excess personnel funding, and a \$150 million cancellation of excess Criminal Justice Information Services (CJIS) surcharge balances. The request also includes a prior-year balance transfer to the FBI Construction account of \$85 million to complete the Department's Data Center Consolidation initiative.

For 2017, the FBI is requesting a total of \$783.5 million for construction projects to include Secure Work Environment (SWE) requirements, the Department of Justice's Data Center Consolidation initiative, renovations at the FBI Academy and the FBI headquarters consolidated project in the National Capital region.

Specifically, \$646 million is provided to the FBI, together with \$759 million to the General Services Administration, Federal Buildings Fund, for a total of \$1.4 billion to support the full consolidation of the FBI headquarters operations in a new, modern facility that will bring together all of the existing disparate FBI headquarters locations and functions. This project recognizes the importance of the FBI as a critical member of the United States intelligence community, as well as its role in national security and in enforcing the Nation's laws and protecting civil liberties.

The Drug Enforcement Administration's (DEA) mission is to enforce the controlled substances laws and regulations of the United States. DEA's major focus is the disruption and dismantlement of Priority Target Organizations (PTOs)—domestic and international drug trafficking and money laundering organizations having a significant impact on drug availability in the United States. DEA emphasizes PTOs with links to organizations on the Attorney General's Consolidated Priority Organization Target (CPOT) list, which represents the "Most Wanted" drug trafficking and money laundering organizations believed to be primarily responsible for the United States' illicit drug supply. DEA also places a high priority on targeting the financial infrastructure of major drug trafficking organizations and members of the financial community who facilitate the laundering of their proceeds. From the beginning of 2005 to 2015, DEA denied drug traffickers a cumulative total of \$33.1 billion in revenue through the seizure of both assets and drugs, with \$3.5 billion just in FY 2015. In addition to keeping drugs and drug-related violence out of the United States, DEA plays a vital role in the areas of national and border security.

DEA has 221 domestic offices organized in 21 divisions throughout the United States. Internationally, DEA has 89 offices in 68 countries and has responsibility for coordinating and pursuing U.S. drug investigations abroad. Federal, state, local, and international partnerships continue to play an important role in DEA's enforcement efforts. For nearly 42 years, DEA has led a task force program that today includes approximately 2,200 task force officers participating in 268 task forces. The El Paso Intelligence Center (EPIC) and Special Operations Divisions (SOD) have become vital resources for federal, state and local law enforcement. Through its Office of National Security Intelligence, DEA ensures that national security information obtained in the course of conducting its drug law enforcement mission is expeditiously shared with the Intelligence Community.

DEA's activities are divided into three main decision units:

**Domestic Enforcement.**—Through effective enforcement efforts and associated support functions, DEA disrupts and dismantles the leadership, command, control, and infrastructure of major drug trafficking syndicates, criminal organizations, and violent drug trafficking groups that threaten the United States. This decision unit contains most of DEA's resources, domestic enforcement groups, state and local task forces, other federal and local task forces, intelligence groups, and all the support functions essential to accomplishing their mission. Strategic objectives have been established as follows:

—Identify and target the national/regional organizations most responsible for the domestic distribution and manufacture of illicit drugs;

—Systematically disrupt or dismantle targeted organizations by arresting/convicting their leaders and facilitators, seizing and forfeiting their assets, targeting their money laundering operations, and destroying their command and control networks; and,

—Work with international offices to dismantle domestic organizations directly affiliated with international cartels.

**International Enforcement.**—DEA works with its foreign counterparts to attack the vulnerabilities in the leadership, production, transportation,

communications, finance, and distribution sectors of major international drug trafficking organizations. Strategic objectives include:

—Identify, prioritize, and target the most significant international drug and chemical trafficking organizations;

—Disrupt and dismantle the networks, financial infrastructures, operations, and the resource bases of targeted international drug and chemical trafficking organizations; and,

—Prevent drug trafficking organizations from funding terrorist organizations and activities.

**State and Local Assistance.**—DEA provides clandestine laboratory training and meets the hazardous waste cleanup needs of the U.S. law enforcement community. DEA supports state and local law enforcement with assistance and training so that state and local agencies can better address the methamphetamine threat in their communities and reduce the impact that methamphetamine has on the quality of life for American citizens. As a result, DEA's nation-wide contracts, container program, and established training programs allow DEA to provide state and local clan lab cleanup and training assistance in a cost-effective manner.

DEA also receives funding through reimbursable agreements. The primary reimbursements to DEA are for the Organized Crime Drug Enforcement Task Forces (OCDETF) Program and the Department of Justice's (DOJ) Assets Forfeiture Fund (AFF).

In 2017, DEA requests 42 positions (including 32 Special Agents and 4 Intelligence Analysts) and \$12,483,000 for increased heroin-related enforcement efforts. The funding will be used to establish four new enforcement groups to counteract increased heroin availability and abuse in the United States.

DEA also requests 11 positions (including 3 Special Agents) and \$7,561,000 to establish an insider threat program as mandated by Executive Order 13587, as well as to build and sustain additional capability and capacity to monitor DEA's increasingly large and complex classified and sensitive information systems from threats that could degrade DEA operations.

Public Law 102-395 established the Diversion Control Fee Account in 1993. Fees charged by the Drug Enforcement Administration under the Diversion Control Program are set at a level that ensures the recovery of the full costs of operating this program. By carrying out the mandates of the Controlled Substances Act (CSA), DEA ensures that adequate supplies of controlled drugs are available to meet legitimate medical, scientific, industrial, and export needs, while preventing, detecting, and eliminating diversion of these substances to illicit traffic. The CSA requires physicians, pharmacists, and chemical companies to register with the DEA in order to distribute or manufacture controlled substances or listed chemicals. Investigations conducted by DEA's Diversion Control Program fall into two distinct categories: the diversion of legitimately manufactured pharmaceutical controlled substances and the diversion of controlled chemicals (List I and II) used in the illicit manufacture of controlled substances. Strategic objectives include:

- Identify and target those responsible for the diversion of pharmaceutical controlled substances through traditional investigation and cybercrime initiatives to systematically disrupt and dismantle those entities involved in diversion schemes;
- Support the registrant population with improved technology, including e-commerce and customer support, while maintaining cooperation, support and assistance from the regulated industry;

Federal Prison Industries, Inc. (FPI), was created by Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train Federal inmates through a diversified work program providing products and services to other Federal agencies. These operations are conducted in a self sustaining manner so as to maximize meaningful inmate employment opportunities and minimize the effects of competition on private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

FPI operates as a revolving fund and does not receive an annual appropriation. The majority of revenues are derived from the sale of products and services to other federal departments, agencies, and bureaus. Operating expenses such as the cost of raw materials and supplies, inmate wages, staff salaries, and capital expenditures are applied against these revenues resulting in operating income or loss, which is reapplied toward operating costs for future production. In this regard, FPI makes capital investments in buildings and improvements, machinery, and equipment as necessary in the conduct of its industrial operation.

In order to increase inmate work opportunities, FPI continues to explore opportunities with commercial customers. In the Consolidated and Further Continuing Appropriations Act, 2012 (P.L. 112-55), FPI received two new authorities to increase inmate employment. The first enables FPI to recapture work that would otherwise be performed outside of the United States, also known as repatriation. The second authorized FPI to participate in the Prison Industries Enhancement Certification Program (PIECP), which allows FPI to partner with commercial businesses under a strict set of conditions to manufacture and sell prison-made goods in interstate commerce.

The 2017 Budget requests \$154,000,000 for the Office of Justice Programs' (OJP) Research, Evaluation, and Statistics appropriation. This appropriation includes programs that provide grants, contracts, and cooperative agreements for research, development and evaluation; develop and disseminate of quality statistical and scientific information; and nationwide support for law enforcement agencies.

Through leadership, funding, and technical support, OJP plays a significant role in the research and evaluation of new technologies to assist law enforcement, corrections personnel, and courts in protecting the public, and guides the development of new techniques and technologies in the areas of crime prevention, forensic science, and violence and victimization research. The research and statistical data compiled by OJP staff are used at all levels of government to guide decision making and planning efforts related to law enforcement, courts, corrections, and other criminal justice issues. Grants, technical assistance, and national leadership provided by OJP have supported efforts to provide and improve assistance to the Nation's Federal, state, local, and tribal law enforcement and criminal justice agencies. Additionally, the Administration has developed a strategy to address recent domestic terror incidents and the emergence of groups attempting to recruit Americans to take part in ongoing conflicts in foreign countries. As part of this effort, DOJ's Countering Violent Extremism (CVE) initiative is an Administration priority and supports the United Nations efforts to address foreign terrorist fighters. Additional resources are provided to support community led-efforts, including \$4 million to conduct research

targeted toward developing a better understanding of violent extremism and advancing evidence-based strategies for effective prevention and intervention.

*Research, Development, and Evaluation Program.*—The National Institute of Justice (NIJ) serves as the research and development agency of the Department of Justice, as authorized by 42 U.S.C. 3721–3723. The mission of NIJ is to advance scientific research, development, and evaluation to enhance the administration of justice and public safety by providing objective, independent, evidence-based knowledge, and tools to meet the challenges of crime and justice, particularly at the state and local levels. NIJ research, development, and evaluation (RD&E) efforts support practitioners and policy makers at all levels of government.

NIJ focuses its resources on crime control and related justice issues to provide objective, independent, evidence-based knowledge, and tools to meet the challenges of crime and justice, particularly at the state and local levels. Planned activities include but are not limited to: (1) Social science research addressing, among other topics: human trafficking; evaluation of anti-gang programs; policing; crime and justice; children exposed to violence; sentencing alternatives to incarceration; elder abuse; as well as demonstration field experiments in reentry and probation; (2) Provision of criminal justice-focused technology assistance to units of state, local and tribal government; (3) Criminal justice research infrastructure investments including funding for the National Criminal Justice Reference Service and the National Archive of Criminal Justice Data; (4) Development of equipment performance standards and conduct of compliance testing to help ensure the safety and effectiveness of the equipment used by criminal justice agencies, such as body armor, restraints, holsters, and video systems; and (5) Development of new tools and technologies for law enforcement, corrections, and forensic applications, including those aimed at improving officer safety, knowledge management, and community supervision.

In 2017, NIJ will continue to pursue research and evaluation projects to encourage the development and adoption of new crime-fighting tools, improve understanding of what works (and what does not) in criminal justice programs and policy, and expand understanding of complex criminal justice issues. The 2017 Budget proposes \$48,000,000 for the Research, Development, and Evaluation Program. Of this amount, \$3,000,000 is for Social Science Research on Indigent Defense, \$5,000,000 is for development of an improved means to conduct Digital Forensics of Large-Scale Computer Systems and Networks, and \$2,700,000 is for Civil Legal Aid Research.

*Forensic Science Improvement.*—Continuing improvement is needed in the forensic sciences, which are crucial to ensuring the accuracy of evidence presented in criminal justice trials. The 2017 Budget proposes \$6,000,000 for this program. Of this amount, \$3,000,000 will be transferred by NIJ to NIST for measurement science and standards in support of forensic science.

*Criminal Justice Statistics Program.*—The Bureau of Justice Statistics (BJS) serves as the principal statistical agency within the Department of Justice, as authorized by 42 U.S.C. 3721–3735, and assists state, local, and tribal governments in enhancing their statistical capabilities. It disseminates high quality information and statistics to inform policy makers, researchers, criminal justice practitioners, and the general public. The Criminal Justice Statistics Program encompasses a wide range of criminal justice topics, including: (1) victimization; (2) law enforcement; (3) prosecution; (4) courts and sentencing; (5) corrections; (6) recidivism and reentry; (7) tribal justice statistics; (8) justice expenditures and employment; (9) international justice systems; and (10) drugs, alcohol, and crime. In addition to collecting and analyzing statistical data, BJS administers the State Justice Statistics Program for the Statistical Analysis Centers (SACs). SACs have been established in all states and most territories to centralize and integrate criminal justice statistical functions. Through financial and technical assistance to the state SACs, BJS promotes efforts to coordinate statistical activities within the states and conducts the research as needed to estimate the impact of legislative and policy changes. The SACs also serve in a liaison role, assisting BJS with data gathering from respondent agencies within their states. Further, the Criminal Justice Statistics Program will expand on its

base of work in 2017 by enhancing the quality and availability of statistics in a number of areas including: (1) criminal victimization via the redesign the National Criminal Victimization Survey (NCVS), which is the sole continuous source of national information for many topics related to crime and victimization rates for the Administration and Congress, state and local law enforcement, and the research community; (2) law enforcement administration; (3) state & Federal adjudication and sentencing; (4) jail and prison statistics; (5) recidivism and reentry data; (6) white collar crime and (7) statistics on American Indians in the criminal justice system. The 2017 Budget proposes \$58,000,000 for the Criminal Justice Statistics program. Of this amount, \$6,000,000 is for the National Crime Victimization Survey Sample Boost for Subnational Estimates program; \$1,000,000 is for the National Survey of Public Defenders for Indigent Defense; and \$1,500,000 is for the National Public Defenders Reporting Program for Indigent Defense.

**Regional Information Sharing System (RISS).**—RISS is a national criminal intelligence system operated by and for state and local law enforcement agencies. The RISS regional centers facilitate information sharing and communications to support member agency investigative and prosecution efforts by providing state-of-the-art investigative support and training, analytical services, specialized equipment, secure information-sharing technology, and secure encrypted email and communications capabilities to over 6,000 municipal, county, state, and Federal law enforcement agencies nationwide. The 2017 Budget proposes \$25,000,000 for this program.

**Evaluation Clearinghouse.**—The 2017 Budget requests \$3,000,000 for the continued development and deployment of CrimeSolutions.gov, which uses rigorous research to inform practitioners and policymakers about what works in criminal justice, juvenile justice, and crime victim services.

**Research on Domestic Radicalization.**—The 2017 Budget requests \$4,000,000 for research targeted toward developing a better understanding of the domestic radicalization phenomenon, and advancing evidence-based strategies for effective intervention and prevention.

**NCS-X Implementation Program.**—The 2017 Budget requests \$10,000,000 to collect and report nation-wide incident-based crime statistics in order to inform the formulation and evaluation of crime control policies at the national, state and the local levels.

The 2017 Budget requests \$1,097,800,000 for the Office of Justice Programs' (OJP) State and Local Law Enforcement Assistance appropriation account, which includes programs that establish and build on partnerships with state, local, and tribal governments, and faith-based and community organizations. These programs provide Federal leadership on high-priority criminal justice concerns such as violent crime, criminal gang activity, illegal drugs, information sharing, and related justice system issues. OJP's formula and discretionary grant programs, coupled with training and technical assistance activities, assist law enforcement agencies, courts, local community partners, and other components of the criminal justice system in preventing and addressing violent crime, protecting the public, and ensuring that offenders are held accountable for their actions. Additionally, the Administration has developed a strategy to significantly improve the ability of communities and stakeholders to identify potential extremists and intervene where necessary to thwart radical behavior that may lead to violence. The Budget provides \$6 million to support community led-efforts to counter violent extremism and \$2 million for related training and technical assistance. OJP State and Local Law Enforcement Assistance funding will be used to support the following initiatives:

## STATE AND LOCAL LAW ENFORCEMENT ASSISTANCE—Continued

*Byrne Justice Assistance Grants (JAG).*—The Byrne Justice Assistance Grants program awards grants to state and local governments to support a broad range of activities that prevent and control crime based on local needs and conditions, including: law enforcement programs; prosecution and court programs; prevention and education programs; corrections and community corrections programs; drug treatment programs; and planning, evaluation, and technology improvement programs. The 2017 Budget proposes \$383,500,000 for this program. Of this total, \$2,000,000 is for the State and Local Anti-Terrorism Training program; \$2,000,000 is for a state and local assistance help desk and diagnostic center; \$2,000,000 is for Countering Violent Extremism training and technical assistance; \$15,000,000 for VALOR, a program that supports officer safety; \$20,000,000 is for an initiative to assist and support evidence-based policing, of which \$10,000,000 is for Body Worn Camera Demonstration; \$5,000,000 will fund Smart Prosecution Initiatives; \$22,500,000 is for the Bulletproof Vests Program; and \$7,500,000 is for the new National Training Center to Improve Police-Based Responses to People with Mental Illness.

*Byrne Incentive Grants.*—This new program will provide supplementary grants to states and localities using Byrne JAG formula grant funds for evidence-based purposes. These incentive grants will serve as inducements for states and localities to use formula funds (as well as state and local funds) to implement proven public safety strategies. The 2017 Budget proposes \$10,000,000 for this new initiative.

*Byrne Competitive Grants.*—The Byrne Competitive Grants program awards grants to state, local, and tribal government agencies, for-profit and non-profit organizations, and faith-based and community organizations to improve the functioning of the criminal justice system and assist victims of crime. The 2017 Budget proposes \$15,000,000 for this program.

*Residential Substance Abuse Treatment (RSAT).*—The Residential Substance Abuse Treatment program for state prisoners helps states and units of local government develop, implement, and improve residential substance abuse treatment programs in correctional facilities, and establish and maintain community-based aftercare services for probationers and parolees. Ultimately, the program's goal is to help offenders become drug-free and learn the skills needed to sustain themselves upon return to the community. The 2017 Budget proposes \$14,000,000 for this program.

*Prison Rape Prevention and Prosecution Program.*—This program supports the Prison Rape Elimination Act (PREA) Grant Program, including training and technical assistance to the grantees in meeting their PREA goals and objectives, training and technical assistance to the field at large in implementing PREA standards, and the development of a national set of measures by the Bureau of Justice Statistics (BJS) describing the circumstances surrounding incidents of sexual assault in correctional institutions. The data collections provide facility-level estimates of sexual assault for a 12-month period. The 2017 Budget proposes \$10,500,000 for this program.

*Capital Litigation Improvement Program.*—The Capital Litigation Improvement Program provides grants for the training of defense counsel, state and local prosecutors, and state trial judges, with the goal of improving the quality of representation and the reliability of verdicts in state capital cases. The training focuses on investigation techniques; pretrial and trial procedures, including the use of expert testimony and forensic science evidence; advocacy in capital cases; and capital case sentencing-phase procedures. The 2017 Budget proposes \$2,000,000 for this program.

*Drug Court Program.*—This program provides grants and training and technical assistance to state, local, and tribal governments to support the development, expansion, and enhancement of effective drug courts. The drug courts integrate evidence-based substance abuse treatment, mandatory drug testing, sanctions and incentives, and transitional ser-

vices in a judicially supervised court setting with jurisdiction over substance-abusing offenders. The 2017 Budget proposes \$42,000,000 for this program.

*Justice and Mental Health Collaboration Program (formerly Mentally Ill Offender Act Program).*—This program will provide grants, training, and technical and strategic planning assistance to help state, local, and tribal governments develop multi-faceted strategies that bring together criminal justice, social services, and public health agencies, as well as community organizations, to develop system-wide responses to the needs of mentally ill individuals involved in the criminal justice system. The 2017 Budget proposes \$14,000,000 for this program.

*Veterans Treatment Court Program.*—This program will provide grants, training and technical assistance to state, local, and tribal governments to support the creation and development of veterans treatment courts. These courts are a hybrid of existing drug and mental health court programs that use the problem solving courts model to serve veterans struggling with addiction, serious mental illness and/or co-occurring disorders. The Office of Community Oriented Policing Services (COPS) administers grant programs to assist law enforcement agencies in advancing public safety through the implementation of community policing strategies in jurisdictions of all sizes across the country. Community policing represents a shift from more traditional law enforcement and focuses on proactive collaborative efforts and the use of problem-solving techniques to prevent and respond to crime, social disorder, and fear of crime. COPS provides funding to state, local, and tribal law enforcement agencies and other public and private entities to hire and train community policing professionals, acquire and deploy cutting-edge crime-fighting technologies, and develop, test, and implement innovative policing strategies. COPS funding also provides training and technical assistance to community members, local government leaders, and all levels of state, local, and tribal law enforcement. Up to three percent of funds may be made available for research, evaluation and statistical purposes, in addition to any amounts that are otherwise available for such purposes. Additionally, the Administration has developed a strategy to significantly improve the ability of communities and stakeholders to identify potential extremists and intervene where necessary to thwart radical behavior that may lead to violence. The Budget provides \$3 million for demonstration projects that enhance the ability of law enforcement agencies nationwide to partner with local residents, business owners, community groups, and other stakeholders to counter violent extremism.

The FY 2017 request also includes an allowance of up to five percent of COPS Hiring Program (CHP) funding to be used to provide training and technical assistance to CHP grantees that select specific problem/priority areas on which their COPS-funded community policing officers will be focused.

The Budget requests \$489,000,000 for programs administered by the Office on Violence Against Women (OVW) to prevent and respond to violence against women and related victims. Of this amount, \$163,000,000 is requested as directly appropriated funding and \$326,000,000 is available through the Crime Victims Fund. OVW provides national leadership against domestic violence, dating violence, sexual assault, and stalking, and supports a multifaceted approach to responding to these crimes. Funding will support the Prevention and Prosecution of Violence Against Women and Related Victim Services Program. Up to three percent of funds may be made available for research and evaluation purposes, in addition to any amounts that are otherwise available for such purposes, except from funds provided for STOP Violence Against Women Formula Grant Program and the Sexual Assault Services Program. For 2017, funding requested for this account will support the following initiatives:

**STOP Violence Against Women Formula Grant Program.**—The STOP Program is designed to encourage the development and strengthening of effective law enforcement and prosecution strategies to combat violent crimes against women and the development and strengthening of victim services in cases involving violent crimes against women. The 2017 Budget proposes \$200,000,000 for this program.

**Transitional Housing Assistance Program.**—Transitional Housing grants support programs that provide assistance to victims of domestic violence, dating violence, sexual assault, and stalking who are in need of transitional housing, short-term housing assistance, and related support services. The 2017 Budget proposes \$30,000,000 for this program.

**Research on Violence Against Women (National Institute of Justice).**—This program supports research on violence against women. The 2017 Budget proposes \$3,000,000 for this program.

**Grants to Encourage Arrest Policies.**—This discretionary grant program is designed to encourage state, local, and tribal governments and state, local, and tribal courts to treat domestic violence, dating violence, sexual assault, and stalking as serious violations of criminal law requiring the coordinated involvement of the entire criminal justice system. The 2017 Budget proposes \$62,250,000 for this program.

**Homicide Reduction Initiative.**—This initiative is designed to use promising and evidence-based practices to address the urgent problem of domestic violence-related homicides by identifying high-risk offenders and providing an enhanced coordinated response to assist victims. For 2017, \$4,000,000 will be made available from the Grants to Encourage Arrest Policies Program.

**Domestic Violence Firearms Lethality Reduction.**—This initiative will identify and implement promising practices to improve the response of law enforcement, prosecutors, courts, and victim service providers in addressing the safety of victims in cases involving firearms. Demonstration projects will be funded in approximately 5 jurisdictions. For 2017, \$4,000,000 will be made available from the Grants to Encourage Arrest Program.

**Sexual Assault Services Program.**—This program provides funding for states and territories, tribes, state sexual assault coalitions, tribal coalitions, and culturally specific organizations. Overall, the purpose of this program is to provide intervention, advocacy, accompaniment, support services, and related assistance for adult, youth, and child victims of sexual assault, family and household members of victims, and those collaterally affected by sexual assault. The 2017 Budget proposes \$35,000,000 for this program.

**Rural Domestic Violence Program.**—This program enhances the safety of child, youth and adult victims of domestic violence, dating violence, sexual assault, and stalking by supporting projects uniquely designed to address and prevent these crimes in rural jurisdictions. The 2017 Budget proposes \$34,000,000 for this program.

**Grants to Reduce Violence Crimes Against Women on Campus.**—The Campus Program develops and strengthens victim services in cases involving violent crimes against women on campuses. The 2017 Budget proposes an increase of \$6 million in the Campus Program appropriation to improve the Campus Violence program to better meet the need on college campuses and in support of the implementation of the recommendations of the White House Task Force on Protecting Students from Sexual Assault. The 2017 Budget proposes \$26,000,000 for this program.

**Legal Assistance for Victims Grant Program.**—The Legal Assistance Program increases the availability of civil and criminal legal assistance in order to provide effective aid to victims who are seeking relief in legal matters arising as a consequence of abuse or violence. The 2017 Budget proposes \$52,500,000 for this program.

**Enhanced Training and Services to End Violence Against and Abuse of Women Later in Life.**—This program provides or enhances training and services to address elder abuse, neglect, and exploitation, including domestic violence, dating violence, sexual assault, or stalking, involving victims who are 50 years of age or older. The 2017 Budget proposes \$6,250,000 for this program.

**Education and Training to End Violence Against and Abuse of Women with Disabilities Grant Program.**—The Disabilities Grant Program builds the capacity of jurisdictions to address domestic violence, dating violence, stalking and sexual assault against individuals with disabilities through the creation of multi-disciplinary teams. The 2017 Budget proposes \$6,000,000 for this program.

The four programs included in the consolidation include: Services to Advocate for and Respond to Youth, Grants to Assist Children and Youth Exposed to Violence, Engaging Men and Youth in Preventing Domestic Violence, and Supporting Teens through Education. **National Resource Center on Workplace Response.**—The Violence Against Women Act of 2005 provided for an award to establish and operate a national resource center on workplace responses to assist victims of domestic and sexual violence. **Grants to Support Families in the Justice System.**—This funding will provide comprehensive support to victims of domestic violence and child

VIOLENCE AGAINST WOMEN PREVENTION AND PROSECUTION PROGRAMS—Continued sexual abuse and their families in family law matters in the civil justice system, including safe visitation and exchange services, improved court responses, and legal assistance to victims, protective parents, and their children. This program represents a consolidation of the Safe Havens and Court Training and Improvements program. The 2017 Budget proposes \$16,000,000 for this program.

**Tribal Special Domestic Violence Criminal Jurisdiction.**—This new grant program for tribal governments was first authorized in the Violence Against Women Reauthorization Act of 2013 (VAWA 2013). VAWA 2013 included an historic provision that recognizes the inherent power of "participating tribes" to exercise "special domestic violence criminal jurisdiction" over both Indians and non-Indians who assault Indian spouses, intimate partners, or dating partners, or who violate protection orders, in Indian country. To support tribes that chose to participate, the Act authorizes funding to strengthen tribal criminal justice systems, provide indigent defense counsel, develop appropriate jury pools, and assist victims. The 2017 Budget proposes \$5,000,000 for this program.

For 2017, funding requested for this account also will support Analysis and Research on Violence Against Indian Women, a program that is administered by the Office of Justice Programs and supports comprehensive research on violence against Native American women. The 2017 Budget proposes \$1,000,000 for this program.

The 2017 Budget requests \$334,400,000 for the Office of Justice Programs' (OJP) Juvenile Justice Programs. This appropriation account includes programs that support state, local, and tribal community efforts to develop and implement effective and coordinated prevention and intervention juvenile programs. Such programs are designed to reduce juvenile delinquency and crime, and improve the juvenile justice system so that it protects public safety, holds offenders accountable, and provides treatment and rehabilitative services tailored to the needs of juveniles and their families.

The Nation's youth face an ever-changing set of problems and barriers to successful lives. As a result, OJP is constantly challenged to develop enlightened policies and programs to address the needs and risks of those youth who enter the juvenile justice system. OJP remains committed to leading the nation in efforts addressing these challenges, which include: preparing juvenile offenders to return to their communities following release from secure correctional facilities; dealing with the small percentage of serious, violent, and chronic juvenile offenders; helping states address the disproportionate confinement of minority youth; and helping children who

have been victimized by crime and child abuse. This request includes the following programs:

**Part B: Formula Grants.**—This program supports state, local, and tribal efforts to develop and implement comprehensive state juvenile justice plans. Funds also may be used for research, evaluation, statistics, other informational activities, and training and technical assistance. Funding also is available to help small, nonprofit organizations, including faith-based organizations, with the federal grants process. The 2017 Budget proposes \$75,000,000 for this program.

**Youth Mentoring.**—The Youth Mentoring program supports faith and community-based, nonprofit, and for-profit agencies in the enhancement and expansion of existing mentoring strategies and programs, as well as assistance to develop, implement, and pilot test mentoring strategies and programs designed for youth in the juvenile justice, reentry, and foster care systems. In addition, OJP supports training and technical assistance to the sites to assist with adapting existing mentoring approaches to meet the needs of the target populations and to identify and maintain partnerships. The 2017 Budget proposes \$58,000,000 for this program.

**Delinquency Prevention Program.**—This program provides resources through state advisory groups to units of local government for a broad range of delinquency prevention programs and activities to benefit youth who are at risk of having contact with the juvenile justice system. The 2017 Budget proposes \$42,000,000 for this program. Of this total, \$10,000,000 will be used for Juvenile Justice and Education Collaboration Assistance, an initiative aimed at reducing the use of arrest and juvenile justice courts as a response to non-serious youth misbehaving in and around schools. This program will operate in concert with Department of Education School Climate Transformation Grants and other initiatives focused on improving school safety and climate.

**Community-Based Violence Prevention Initiatives.**—Based on the violence reduction work of several cities and public health research of recent years, OJP will provide funding for community-based strategies that focus on street-level outreach, conflict mediation, and the changing of community norms to reduce violence, particularly shootings. The 2017 Budget proposes \$18,000,000 for this program.

**National Forum on Youth Violence Prevention Initiative.**—This forum was created for participating localities to share challenges and promising strategies with each other and to explore how federal agencies can better support local efforts to curb youth and gang violence. The 2017 Budget proposes \$4,000,000 for this program.

**Juvenile Accountability Block Grant (JABG).**—The JABG program funds block grants to states to support a variety of accountability-based juvenile justice programs. The 2017 Budget proposes \$30,000,000 for this program.

**Smart on Juvenile Justice Initiative.**—This new initiative will provide supplementary incentive grant awards to assist states to foster better outcomes for system-involved youth. The 2017 Budget proposes \$20,000,000 for this program.

**Missing and Exploited Children Program.**—This program supports efforts to prevent the abduction and exploitation of children, including funding for the Internet Crimes Against Children and AMBER Alert Programs. The 2017 Budget proposes \$67,000,000 for this program.

**Competitive Grants Focusing on Girls in the Juvenile Justice System.**—The 2017 Budget requests \$2,000,000 for this program, which provides competitive demonstration grants focusing on girls in the juvenile justice system through responses and strategies that consider gender and the special needs of girls.

**Children of Incarcerated Parents (COIP) Web Portal.**—The 2017 Budget proposes \$500,000 for the COIP web portal, which consolidates information regarding federal resources, grant opportunities, best and promising practices, and ongoing government initiatives that address and support children of incarcerated parents and their caregivers.

**Victims of Crime Act (VOCA).**—The Improving Investigation and Prosecution of Child Abuse Program supports training and technical assist-

ance to professionals involved in investigating, prosecuting, and treating child abuse. This program also supports the development of Children's Advocacy Centers and/or multi-disciplinary teams designed to prevent the inadvertent revictimization of an abused child by the justice and social service system in their efforts to protect the child. The 2017 Budget proposes \$11,000,000 for this program.

*Child Abuse Training Programs for Judicial Personnel and Practitioners.*—This program supports training and technical assistance to improve the judicial system's handling of child abuse, neglect, and related cases, as authorized under the Victims of Child Abuse Act, 42 U.S.C. Section 13022. The 2017 Budget proposes \$1,500,000 for this program.

*Improving Juvenile Indigent Defense Program.*—This program provides funding and other resources to develop effective, well-resourced model juvenile indigent defender offices; and develop and implement standards of practice and policy for the effective management of such offices. The 2017 Budget proposes \$5,400,000 for this program.

The 2017 Budget is requesting \$116,300,000 for the Office of Justice Programs' Public Safety Officers Benefits (PSOB) appropriation, of which \$100,000,000 is a permanent indefinite (mandatory) appropriation for death benefits and \$16,300,000 is a discretionary appropriation for disability and education benefits. This appropriation account supports programs that provide benefits to public safety officers who are severely injured in the line of duty and to the families and survivors of public safety officers killed or mortally injured in the line of duty. These programs represent the continuation of a forty-year partnership among the Department of Justice, national public safety organizations, and state, local, and tribal public safety agencies. Created in 1976, the PSOB program oversees three types of benefits:

*Death Benefits.*—The Death Benefits program provides a one-time financial benefit to survivors of public safety officers whose deaths resulted from injuries sustained in the line of duty.

*Disability Benefits.*—The Disability Benefits program offers a one-time financial benefit to public safety officers permanently disabled by catastrophic injuries sustained in the line of duty.

*Education Benefits.*—This program provides financial support for higher education expenses to the eligible spouses and children of public safety officers killed or permanently disabled in the line of duty.

Programs supported by the Crime Victims Fund focus on providing compensation to victims of crime and survivors; supporting appropriate victims' services programs and victimization prevention strategies; and building capacity to improve response to crime victims' needs and increase offender accountability. The Fund was established to address the need for victim services programs, and to assist state, local, and tribal governments in providing appropriate services to their communities. The Fund is financed

by collections of fines, penalty assessments, and bond forfeitures from defendants convicted of Federal crimes. The 2017 Budget proposes to provide \$2,000,000,000 from collections and balances for crime victim compensation, services, and related needs. Of this amount, the Budget also proposes to use \$50,000,000 for Vision 21, which provides supplemental victims services and other victim-related programs and initiatives in areas like: research, legal services, capacity building, national and international victim assistance. Of the \$50 million for Vision 21, \$25,000,000 will support tribal assistance for crime victims. Also included is \$45,000,000 for the Victims of Trafficking Program to support ongoing collaborative efforts to identify, recover, and provide services for victims of human trafficking across the United States. Further, of the amounts available for obligation in 2017, \$326,000,000 is made available for the Office on Violence Against Women. Up to three percent of funds available from the fund for obligation may be made available to the National Institute of Justice and the Bureau of Justice Statistics for research, evaluation, or statistical purposes related to crime victims and related programs.

The Justice for Victims of Trafficking Act of 2015 (Public Law 114-22) created the Domestic Victims of Trafficking Fund (DTVTF) and authorizes grants to expand and improve services for victims of trafficking in the U.S. and victims of child pornography as authorized by the Victims of Child Abuse Act of 1990, the Trafficking Victims Protection Act of 2000, and the Trafficking Victims Protection Reauthorization Act of 2005. Collections from the federal courts may be used to pay for all forms of programming except for medical services; funding transferred from the Department of Health and Human Services may be used for the costs of medical services supported by the Fund's grant programs. All programs supported by DTVTF will be administered by OJP in consultation with the Department of Health and Human Services.

JUSTICE REFORM INCENTIVE FUND

The 2017 Budget invests \$500 million - reaching \$5 billion over 10 years - in the 21st Century Justice Initiative. By using Federal funding to address policies that have contributed to the rise of mass incarceration but have not made us safer, this initiative would create incentives for adoption of more innovative approaches to reduce both crime and unnecessary incarceration. Ten percent of the grant funding would go toward Federal systems reform, including reentry. The remainder of the grant funding will be distributed to States to tackle most systemic issues, such as the lack of critical data linkage across systems, mental health services, emergency housing, effective and cost-efficient treatment and community supervision interventions. This 21st Century Justice Grant program will be focused on achieving the following three objectives: (1) reduce crime; (2) reverse practices that have led to unnecessarily long sentences and unnecessary incarceration; and (3) build community trust and legitimacy. States would be able to use funding to focus on one or more of the following in both the adult and juvenile systems: (1) examining and changing state laws and policies that contribute to unnecessarily long sentences and unnecessary incarceration, without sacrificing public safety; (2) promoting critical advancements in community-oriented policing; and (3) providing comprehensive front-end and reentry services.

Enacted in 2014, the Workforce Innovation and Opportunity Act (WIOA) is the primary authorization for this appropriation account. The Act is intended to provide job seekers and workers with the labor market information, job search assistance, and training they need to get and keep good jobs, and to provide employers with skilled workers. Funds appropriated for this account generally are available on a July to June program year basis, and include substantial advance appropriation amounts. This account includes:

**Adult employment and training activities.**—Grants to provide financial assistance to States and territories to design and operate training and employment assistance programs for adults, including low-income individuals and public assistance recipients. The FY 2017 request for the Adult, Youth, and Dislocated Worker formula grant programs provides funding at the 2017 WIOA-authorized appropriation levels.

**Youth activities.**—Grants to support a wide range of activities and services to prepare low-income youth for academic and employment success, including summer and year-round jobs. The program links academic and occupational learning with youth development activities.

**Dislocated worker employment and training activities.**—Grants to provide reemployment services and retraining assistance to individuals dislocated from their employment. The Budget increases funding for the National Dislocated Worker Grants to support workers affected by the national transition from carbon-intensive to lower carbon energy sources. Along with funding already provided through the National Dislocated Worker Grants, this additional money will allow States and local areas to provide reemployment, training, and supportive services to transitioning coal workers to help them get back to work in good jobs and careers.

**Native Americans.**—Grants to Indian tribes and other Native American groups to provide training, work experience, and other employment-related services to Native Americans.

**Migrant and Seasonal Farmworkers.**—Grants to public agencies and nonprofit groups to provide training and other employability development services to economically disadvantaged youth and families whose principal livelihood is gained in migratory and other forms of seasonal farmwork.

**Reintegration of Ex-Offenders.**—Supports activities authorized under the Second Chance Act to help individuals exiting prison make a successful transition to community life and long-term employment through mentoring, job training, and other services. Using the authority of section 169 of the WIOA, the Department also provides competitive grants for a range of young ex-offenders and school dropouts, particularly those in high-poverty, high-crime areas with similar services. The Administration intends to devote funds to test and replicate evidence-based strategies for young ex-offenders. The Budget includes resources for a program for at-risk youth to explore careers in law enforcement. The Department of Labor will continue to coordinate closely with the Department of Justice and other relevant Agencies in carrying out the Ex-Offender program.

**Apprenticeship Grants.**—Activities that support Registered Apprenticeship programs at the state and local levels through a range of activities, such as state-specific outreach strategies, partnerships, economic development strategies, and expanded access to apprenticeship opportunities for under-represented populations through pre-apprenticeships and career pathways.

**Workforce Data Quality Initiative.**—Competitive grants to support the development of integrated and longitudinal data systems that integrate education and workforce data to provide timely and accessible information, including integrated performance information, to consumers, policymakers, and others.

**YouthBuild.**—Grants that impart education and occupational skills to program participants by providing them with academic training and occupational skills training, providing a clear path into a chosen career field.

**Technical Assistance.**—Technical assistance activities to support WIOA implementation.

Established in 1964 as part of the Economic Opportunity Act and authorized by the Workforce Innovation and Opportunity Act of 2014 (P.L. 113-128, Title 1, Subtitle C, section 141), Job Corps is the nation's largest federally-funded, primarily residential, training program for at-risk youth. Job Corps operates centers in all 50 states, Puerto Rico, and the District of Columbia. Job Corps provides economically disadvantaged youth with academic, career technical and marketable skills to enter the workforce, enroll in post-secondary education, or enlist in the military.

Job Corps serves and trains approximately 50,000 participants each year while emphasizing the attainment of academic credentials which include: a High School Diploma (HSD) or General Educational Development (GED) and career technical credentials, industry-recognized certifications, state

licenses, and pre-apprenticeship credentials. These portable credentials provide for long-term attachment to the workforce and economic mobility as Job Corps graduates advance through their careers. Furthermore, these credentials ensure that program graduates have gained the skills and knowledge necessary to effectively compete in today's workforce.

Large and small businesses, nonprofit organizations, Native American organizations and Alaskan Native corporations manage and operate the majority of the Job Corps centers through contractual agreements with the Department of Labor, while the remaining centers are operated through an interagency agreement with the U.S. Department of Agriculture. In 2015, Job Corps opened two new centers in New Hampshire and Wyoming, the last two States without Job Corps centers. Job Corps participants must be economically disadvantaged youth, ages 16-24, and meet one or more of the following criteria: basic skills deficient; a school dropout; homeless, a runaway, or a foster child; a parent; or in need of additional education, vocational training, or intensive counseling and related assistance in order to participate successfully in regular schoolwork or to secure and hold employment.

The 2017 Budget continues the Administration's commitment to strengthening and reforming the Job Corps program to improve students' outcomes. Beginning in 2016, the Department will undertake an external evaluation to holistically study the Job Corps program, with the goal of generating reform ideas. Additionally, the Budget proposes to continue exploring different models of serving at-risk youth through a suite of pilots, to ensure that the most effective strategies are being utilized. In addition, the Budget builds on the resources previously provided to continue strengthening oversight of the Job Corps program. These changes will allow the program to continue to provide high-quality services to disadvantaged youth while maintaining strong internal controls and ensuring that contracts are procured at the lowest risk and the best value to the Federal Government. The Budget also proposes new construction and programming investments to ensure student safety while on center.

Community Service Employment for Older Americans (CSEOA), authorized by Title V of the Older Americans Act as amended in 2006 (P.L. 109-365), is a federally-sponsored community service employment and training program for unemployed low-income individuals, ages 55 and older. The program, known as the Senior Community Service Employment Program (SCSEP), offers participants work-based community service training at non-profit or governmental agencies, so that they can gain on-the-job experience and prepare to enter or re-enter the workforce. The 2017 CSEOA budget reforms SCSEP by awarding more competitive grants, adjusting income eligibility requirements to serve those most in need, and promoting on-the-job training (OJT) models, including OJT at for-profit entities, through demonstration grants and flexibility for existing grantees in spending training funds on OJT activities.

The Trade Adjustment Assistance (TAA) Community College and Career Training program, which received appropriations in the Health Care and Education Reconciliation Act of 2010 (Section 1501 of P.L. 111–152, 124 Stat.1070), provided \$500 million annually in fiscal years 2011–2014 for competitive grants to eligible institutions of higher education. The program aims to improve education and employment outcomes for community college and other students, helping more Americans prepare to succeed in growing occupations. Funding allows for expansion and improvement of education and training programs that can be completed in 2 years or less, result in skills and credentials necessary for high-wage, in-demand jobs, and are suited for workers who are eligible for training under the TAA for Workers program. Grants support institutions that use evidence to design program strategies, are committed to using data for continuous improvement, and facilitate evaluation that can build evidence about effective practices. The Department is implementing this program in cooperation with the Department of Education.

*Unemployment compensation.*—State administration amounts provide administrative grants to State agencies that pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel and ex-servicemembers as well as trade readjustment allowances to eligible individuals. State administration amounts also provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through a comprehensive performance management system, UI Performs. The purpose is to effect continuous improvement in State performance and implement activities designed to reduce errors and prevent fraud, waste, and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies or non-State entities. A workload contingency reserve is included in State administration to meet increases in the costs of administering the program resulting from increases in the number of unemployment claims filed and paid. The appropriation automatically provides additional funds whenever unemployment claims workloads increase above levels specified in the appropriations language.

*Employment service.*—The public employment service is a nationwide system providing no-fee employment services to job-seekers and employers. State employment service activities are financed by grants provided by formula to States. Funding allotments are provided annually on a Program Year basis beginning July 1 and ending June 30 of the following year.

Employment service activities serving national needs are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended, and other legislation. States also receive funding under this activity for administration of the Work Opportunity Tax Credit, as well for amortization payments for those States that had independent retirement plans prior to 1980 in their State employment service agencies.

Years are program years running from July 1 of the year indicated through June 30 of the following year.

*Foreign Labor Certification.*—This activity provides for the administration and operation of the foreign labor certification programs within the Employment and Training Administration. Under these programs, U.S. employers that can demonstrate a shortage of qualified, available U.S. workers and that there would be no adverse impact on similarly situated U.S. workers may seek the Secretary of Labor's certification as a first step in the multi-agency process required to hire a foreign worker to fill critical permanent or temporary vacancies. Major programs include the permanent, H-2A temporary agricultural, H-2B temporary non-agricultural, and H-1B temporary highly skilled worker visas. The account is divided into Federal and State activities.

*Federal Administration.*—Federal Administration provides leadership, policy, budget, program operations including staffing (Federal and contractors), information technology, three national processing center facilities, and operational direction to Federal activities supporting the effective and efficient administration of foreign labor certification programs.

*State grants.*—Provides grants to State workforce agencies in 54 States and U.S. territories funding employment-related activities required for the administration of Federal foreign labor certification programs. Includes State Workforce Agency posting and circulation of job orders and other assistance to employers in the recruitment of U.S. workers, processing of employer requests for prevailing wage determinations for the permanent and temporary programs, State safety inspection of housing provided by employers to workers, and State development of prevailing wage and prevailing practice surveys used to set wages and standards in a defined geographic area.

*American Job Centers.*—These funds are used to support the joint Federal-State efforts to improve the comprehensive American Job Center system authorized under WIOA. This system provides workers and employers with quick and easy access to a wide array of enhanced career development and labor market information services. A portion of these funds supports a joint initiative between the Employment and Training Administration and the Office of Disability Employment Policy to improve the accessibility and accountability of the public workforce development system for individuals with disabilities.

*National Agricultural Workers Survey fee.*—The Department of Labor conducts the National Agricultural Workers Survey (NAWS), which collects information annually about the demographic, employment, and health

The Budget proposes authorizing legislation to establish and retain fees to cover the costs of operating its foreign labor certification programs, which ensure that employers proposing to bring in immigrant workers have checked to ensure that domestic workers cannot meet their needs, and that immigrant workers are being compensated appropriately. The ability to charge fees for these programs would give the Department of Labor a more reliable, workload-based source of funding for this function (as the Department of Homeland Security has), and ultimately eliminate the need for discretionary appropriations. Specifically, the proposal would: 1) charge employer fees for its permanent labor certification program; 2) charge employer fees for H-2B non-agricultural workers; and 3) increase the H-2A agricultural worker application fee. In addition, while the H-2A fees are currently deposited in the General Fund, the Budget proposes to retain this revenue. The fee levels would be set in regulation to ensure that the amounts are subject to review.

The Job-Driven Training Proposals include initiatives that equip workers with the skills they need to fill the in-demand jobs of the 21st century. The package includes the following proposals:

*Apprenticeship Training Fund.*—Provides \$2 billion over 5 years to help more employers provide high-quality on-the-job training through apprenticeship; to equip states and regions with the expertise and resources to assist employers in creating or expanding apprenticeships; and to provide groups historically under-represented in apprenticeship pathways to success in Registered Apprenticeship programs. This one time investment would help meet the President's goal to double the number of apprentices across the United States.

*American Talent Compact.*—A \$3 billion investment over 5 years to fund nearly half a million additional Americans to get access to training aligned to in-demand jobs in key regional sectors.

*Career Navigators and WIOA Workforce Data Science and Innovation Fund.*—A two-pronged \$2 billion investment over 5 years to provide Americans with the information they need to build their careers. \$1.5 billion will be provided to fund Career Navigators in American Job Centers who will proactively reach out to all long-term unemployed people, those who have dropped out of the labor force altogether, and people who are only able to find part time work and provide them with help looking for a job, identifying training options, and accessing additional supportive services. This proposal is paired with a \$190 million investment to provide in-person reemployment services to the one-third of Unemployment Insurance bene-

ficiaries most at risk of exhausting their benefits. An additional \$500 million will fund the creation of a Workforce Data Science and Innovation Fund, which will improve the quality and utility of existing data, curate those data to facilitate analysis, and create tools and products that connect consumers and policy makers to the resulting information.

*Opening Doors for Youth.*—A multi-faceted \$5.5 billion investment over 4 years to connect disadvantaged youth to educational and workforce pathways. \$1.5 billion will be provided by formula to support summer job opportunities while an additional \$2 billion will support first jobs for nearly 150,000 out-of-school, out-of-work youth. \$2 billion will be used to initiate a competitive grant program to municipalities to reengage disconnected youth by creating educational and workforce pathways for them.

This account provides for general fund financing of extended unemployment benefit programs under certain statutes. It is also the mechanism used to make general fund reimbursements for some or all of the benefits and administrative costs incurred for temporary Federal programs. These funds are transferred from the Payments to the Unemployment Trust Fund account to a receipt account in the Unemployment Trust Fund (UTF) so that resources may be transferred to the Employment Security Administration Account in the UTF for administrative costs or to the Extended Unemployment Compensation Account in the UTF for benefit costs.

Short Time Compensation (STC), also known as work sharing, is a layoff aversion strategy that enables workers to remain employed and employers to retain their trained staff during times of reduced business activity. The Middle Class Tax Relief and Job Creation Act of 2012 codified and expanded the definition of STC. Under the STC program, workers receive a percentage of the unemployment benefits they would have received if totally unemployed based upon the percentage of reduction in their hours of work. States that had been operating an STC program before enactment of the Act had two and a half years to amend their laws to conform to the new definition (the deadline for conformity was August 2014). As an incentive for states to enact state STC programs and promote the use of STC, the Act provided for 100 percent reimbursement of STC benefit costs paid under state law for up to 156 weeks, or three years (reimbursement is subject to sequestration). Grant funding was also available to states whose permanent STC laws meet the new Federal definition (the application deadline was December 31, 2014).

This account provides mandatory general revenue funding for a temporary program established under the American Recovery and Reinvestment Act of 2009 (Public Law 111-5) and subsequently extended. This program paid a supplement of \$25 on every week of unemployment compensation. It was last extended in Public Law 111-157 and paid benefits through its December 7, 2010, phaseout period.

## ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

For repayable advances to the Unemployment Trust Fund as authorized by sections 905(d) and 1203 of the Social Security Act, and to the Black Lung Disability Trust Fund as authorized by section 9501(c)(1) of the Internal Revenue Code of 1986; and for nonrepayable advances to the revolving fund established by section 901(e) of the Social Security Act, to the Unemployment Trust Fund as authorized by 5 U.S.C. 8509, and to the "Federal Unemployment Benefits and Allowances" account, such sums as may be necessary, which shall be available for obligation through September 30, [2017] 2018. (*Department of Labor Appropriations Act, 2016.*)

This account makes available funding for repayable advances (loans) to two accounts in the Unemployment Trust Fund (UTF): the Extended Unemployment Compensation Account (EUCA) which pays the Federal share of extended unemployment benefits, and the Federal Unemployment Account (FUA) which makes loans to States to fund unemployment benefits. In addition, the account has provided repayable advances to the Black Lung Disability Trust Fund (BLDTF) when its balances proved insufficient to make payments from that account. The BLDTF now has authority to borrow directly from the Treasury under the trust fund debt restructuring provisions of Public Law 110-343. Repayable advances are shown as borrowing authority within the UTF or the BLDTF, and they do not appear as budget authority or outlays in the Advances to the Unemployment Trust Fund and Other Funds account.

This account also makes available funding as needed for nonrepayable advances to the Federal Employees Compensation Account (FECA) to pay

the costs of unemployment compensation for former Federal employees and ex-servicemembers, and to the Federal Unemployment and Benefits and Allowances (FUBA) account to pay the costs of benefits and services under the Trade Adjustment Assistance for Workers (TAA) program. These advances are shown as budget authority and outlays in the Advances account. The 2014 appropriations language for this included new authority for nonrepayable advances to the revolving fund for the Employment Security Administration Account (ESAA) in the Unemployment Trust Fund. In turn, this revolving fund may provide repayable, interest-bearing advances to the ESAA account if it runs short of funds, and the borrowing authority will enable ESAA to cover its obligations despite seasonal variations in the account's receipts.

Advances were needed for the FUA and EUCA accounts in fiscal year 2014, and the Department estimates that no advances will be necessary in 2016 and 2017. Detail on the nonrepayable advances is provided above; detail on the repayable advances is shown separately in the UTF account.

To address the potential need for significant, and somewhat unpredictable advances to various accounts, the Congress appropriates such sums as necessary for advances to all of the potential recipient accounts. The fiscal year 2017 request continues this authority.

## PROGRAM ADMINISTRATION

For expenses of administering employment and training programs, [\$104,577,000] \$128,311,000, together with not to exceed [\$49,982,000] \$52,515,000, which may be expended from the Employment Security Administration Account in the Unemployment Trust Fund. (*Department of Labor Appropriations Act, 2016.*)

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund (UTF). All State and Federal unemployment tax receipts are deposited into the UTF and invested in Government securities until needed for benefit payments or administrative expenses. State payroll taxes pay for all regular State unemployment benefits. The Federal unemployment tax (FUTA) pays the costs of Federal and State administration of the unemployment insurance system, veterans' employment services, surveys of wages and employment, and about 97 percent of the costs of the Employment Service. In addition, the Federal tax pays for certain extended benefit payments. During periods of high State unemployment, there is a stand-by program of extended benefits (EB), financed one-half by State unemployment taxes and one-half by the FUTA payroll tax. The American Recovery and Reinvestment Act (Public Law 111-5), and subsequent legislation, temporarily made EB 100 percent federally financed. Temporary Federal EB programs, including the recently expired Emergency Unemployment Compensation program, are also funded from the Unemployment Trust Fund, either by the Federal tax or by reimbursement from Federal general revenues. The UTF also provides repayable advances (loans) to the States when the balances in their individual State accounts are insufficient to pay benefits. Federal accounts in the UTF may receive repayable advances from the general fund when they have insufficient balances to make advances to States, pay the Federal share of extended unemployment benefits, or pay for State and Federal administrative costs.

The Federal Employees Compensation Account (FECA) in the Trust Fund provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. In turn, the various Federal agencies reimburse FECA for benefits paid to their former employees. FECA is not funded out of Federal unemployment taxes. Any additional resources necessary to assure that the FECA account can make the required payments to States are provided from the Advances to the Unemployment Trust Fund and Other Funds appropriation.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from

the Unemployment Trust Fund, and receipts from a tax on railroad payrolls are deposited into the Trust Fund to meet expenses.

*Unemployment Insurance (UI) Reform.*—The Budget proposes a cost-neutral suite of reforms to update the UI program so that it reflects the modern economy and workforce. These reforms will mean that more workers will have access to UI if they lose a job, and will strengthen the program's connection to work, protect workers if they have to take a pay cut when starting a new job, make the UI program more responsive to economic downturns, and improve the solvency of State programs. Specifically, the Budget:

UNEMPLOYMENT TRUST FUND—Continued

Ensures that benefits are available to more workers who need them, including part-time workers, newer labor market entrants, certain low-income and intermittent earners, and workers who leave work for compelling family reasons (like to escape domestic violence).

Restores the standard UI maximum benefit duration to 26 weeks to give workers a meaningful opportunity to get back on their feet.

Establishes wage insurance for workers with at least three years of job tenure who lose their jobs and who take a new job that, at least initially, pays less than their prior job and less than \$50,000 per year.

Expands Short-Time Compensation (STC), which encourages employers to avoid layoffs by temporarily reducing workers' hours when their need for labor falls by providing employees with a partial UI benefit to help compensate for their lower wages.

Creates a new Extended Benefits program to provide up to 52 weeks of additional Federally-funded benefits for States seeing increased and high unemployment, with the number of weeks tied to the State's unemployment rate.

Improves UI system solvency by helping States rebuild their trust fund balances to repay their loans, cover current benefits, and create reserves so they are better prepared to weather the next economic downturn.

*Reemployment Services and Eligibility Assessments (RESEA).*—The Administration proposes a program integrity cap adjustment for 2017 to fund RESEAs for claimants identified as most likely to exhaust benefits. These assessments and supplemental services help ensure that benefits go only to eligible claimants and that they get the services they need to return to work. Beginning in 2018, the Budget proposes to provide mandatory funding for States to provide RESEAs to the one-third of claimants identified as most likely to exhaust benefits as well as to all returning service-members who receive UI benefits.

*UI Program Integrity.*—The Administration proposes a broad package of proposals aimed at improving the integrity of the UI program. Included in this package are proposals to: allow for data disclosure to contractors for the Treasury Offset Program; expand State use of the Separation Information Data Exchange System (SIDES), which already improves program integrity by allowing States and employers to exchange information on reasons for a claimant's separation from employment and thereby helping States to determine UI eligibility; mandate the use of the National Directory of New Hires to conduct cross-matches for program integrity purposes; allow the Secretary to set corrective action measures for poor State performance; require States to cross-match claimants against the Prisoner Update Processing System (PUPS), which is currently used by some States; and allow States to retain five percent of overpayment and tax investigation recoveries to fund program integrity activities.

The Pension Benefit Guaranty Corporation (PBGC) is a Federal corporation established under the Employee Retirement Income Security Act of 1974, as amended. It guarantees payment of basic pension benefits earned by more than 40,000,000 American workers in two separate insurance

programs. The single-employer program protects about 30,000,000 workers and retirees in over 22,000 pension plans. The multiemployer program protects over 10,000,000 workers and retirees in about 1,400 pension plans. The Corporation receives no funds from general tax revenues. Operations are financed by insurance premiums paid by companies that sponsor defined benefit pension plans, investment income, and assets from terminated plans. PBGC is requesting \$519,506,000 in spending authority for administrative purposes in 2017. The request includes costs to acquire a new lease for headquarters space, funds for the Office of Inspector General for additional Financial Statement Audit work, inflationary increases and a restoration of the 2016 sequestration cuts.

*Plan Preservation Efforts:* PBGC tries, first, to preserve plans and keep pension promises in the hands of the employers who make them. When companies undertake major transactions that might threaten their ability to pay pensions, PBGC negotiates protections for their pension plans. Last year, PBGC negotiated with dozens of companies, both in bankruptcy and otherwise, to preserve their plans. In 2015, PBGC

—Helped to protect 16,000 people by encouraging companies to keep their plans when they emerged from bankruptcy

—Negotiated almost \$563,000,000 in financial assurance to protect more than 116,000 people in plans at risk from corporate transactions

—Conducted compliance reviews of plan sponsor calculations for plans that end through a standard termination, resulting in almost 1,500 participants receiving corrected benefit amounts totaling \$5,800,000

*Stepping in to Insure Pensions When Plans Fail:* When plans do fail, PBGC steps in to ensure that a portion of benefits continue to be paid. Over the years, PBGC has become responsible for almost 1,500,000 people in nearly 4,800 failed plans. In 2015, PBGC:

—Paid \$5,600,000,000 to almost 826,000 retirees in more than 4,700 failed single-employer plans (an additional 560,000 workers will receive timely and accurate benefits when they retire)

—Provided \$103,000,000 in financial assistance to 57 multiemployer pension plans covering the benefits of 54,000 retirees (an additional 25,000 workers in these multiemployer plans will receive guaranteed benefits when they retire) over the past year

—Assumed responsibility for more than 25,000 people in 65 trusted single-employer plans

PROGRAM ACTIVITIES:

*Single-employer benefit payments.*—The single-employer program protects about 30,000,000 workers and retirees in about 22,000 pension plans. Under this program, a company may voluntarily seek to terminate its plan, or PBGC may seek termination. The PBGC must seek termination when a plan cannot pay current benefits. A plan that cannot pay all benefits may be ended by a "distress" termination, but only if the employer meets tests proving severe financial distress, such as proving that continuing the plan would force the company to go out of business. If a terminated plan cannot pay at least the PBGC-guaranteed level of benefits, PBGC uses its funds to ensure that guaranteed benefits are paid. A sponsor may terminate a plan in a "standard" termination only if plan assets are sufficient to pay all benefits. In a standard termination, the sponsor closes out the plan by purchasing annuities from an insurance company or by paying benefits in a lump sum. After a standard termination, the PBGC guarantee ends.

*Multiemployer financial assistance.*—The multiemployer insurance program protects over 10,000,000 workers and retirees in about 1,400 pension plans. Multiemployer pension plans are maintained under collective bargaining agreements involving unrelated employers, generally of the same industry. If a PBGC insured multiemployer plan is unable to pay guaranteed benefits when due, the PBGC will provide the plan with financial assistance (a loan to the plan) to continue paying guaranteed benefits.

*Investment management fees.*—PBGC contracts with professional financial services corporations to manage Trust Fund assets in accordance with an investment strategy approved by PBGC's Board of Directors. Investment management fees are determined by the amount of assets under management. They are a direct, programmatic expense required to maintain the

Trust Fund which supports single-employer benefit payments. PBGC expects to pay \$113,484,000 in investment management fees in 2017.

**ADMINISTRATIVE ACTIVITIES:**

PBGC's administrative activities comprise all expenditures and operations that support:

- Direct benefit payments to pension plan participants
- Direct financial assistance to distressed multiemployer pension plans
- Investment management fees

These operations include premium collections, purchase of U.S. Treasury securities using premium receipts, pre-trusteeship work, efforts to preserve pension plans, recovery of assets from former plan sponsors, and pension insurance program protection activities. This area also covers the expenditures that support activities related to trusteeship; plan asset management (excluding investment management fees) and trust accounting; as well as benefit payments and administration services. Finally, this area includes the administrative functions covering administrative and legal support, information technology infrastructure, and other shared program support for both PBGC's insurance and plan termination activities. These funds support the operations of the Pension and Plan Sponsor Advocate as well as the Inspector General and funding to support the required functions and efforts of that office, including training and participation in Council of the Inspector Generals on Integrity and Efficiency (CIGIE) activities.

Both the single-employer and multiemployer programs are underfunded, with combined liabilities exceeding assets by \$76 billion at the end of 2015. While the single-employer program's financial position is projected to improve over the next 10 years, the multiemployer program is projected to run out of funds in 2024. The Budget proposes to give the PBGC Board the authority to adjust premiums. The Budget directs the Board to raise \$15 billion in additional premium revenue within the Budget window only from the multiemployer program. This level of multiemployer premium revenue would nearly eliminate the risk of the multiemployer program becoming insolvent within 20 years.

In 2010, the Department of Labor abolished the Employment Standards Administration (ESA) to streamline administration of the programs. As the Department was reinvigorating its enforcement of worker protection laws, this reorganization supported the Administration's Worker Protection efforts by eliminating redundant management efforts by elevating program issues directly to the Secretarial level. It also reflected the importance of these programs and increased enforcement supporting the Secretary's Worker Protection goals. The Consolidated Appropriations Act, 2012 (P.L. 112-74) accepted the Administration's proposal to replace the appropriation for the Employment and Standards Administration by four individual appropriations for the component agencies and offices previously under the heading "Employment Standards Administration Salaries and Expenses." In the 2014 Budget, funding was requested separately for the Office of Workers' Compensation Programs, Wage and Hour Division, Office of Federal Contract Compliance Programs, and Office of Labor-Management Standards.

The Office of Workers' Compensation Programs (OWCP) administers the Federal Employees' Compensation Act (FECA), the Longshore and Harbor Workers' Compensation Act, the Energy Employees Occupational Illness Compensation Program Act (EEOICPA), and the Black Lung Benefits Act (Black Lung). These programs ensure that eligible disabled and injured workers or their survivors receive compensation and medical benefits and a range of services, including vocational rehabilitation, supervision of medical care, and technical and advisory counseling, to which they are entitled.

The Administration is working to address longstanding Government Accountability Office and Labor Inspector General recommendations to improve program integrity by cross-matching Office of Workers' Compensation Programs records with Social Security records. Such matching has the potential to reduce improper payments in the FECA, Black Lung, and EEOICPA programs by improving reporting of outside income for purposes of calculating benefit levels.

*Federal Employees' Compensation Act benefits.*—The Federal Employees' Compensation Act program provides monetary and medical benefits to Federal workers who sustain work-related injury or disease. Not all benefits are paid by the program, since the first 45 days of disability are usually covered by keeping injured workers in pay status with their employing agencies (the continuation-of-pay period). In 2017, 113,000 injured Federal workers or their survivors are projected to file claims; 43,500 are projected to receive long-term wage replacement benefits for job-related injuries, diseases, or deaths. Most of the costs of this account are charged back to the beneficiaries' employing agencies.

*Energy Employees' Compensation Act benefits.*—The Department of Labor is delegated responsibility to adjudicate and administer claims for benefits under the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA). In July 2001, the program began accepting claims from employees or survivors of employees of the Department

ENERGY EMPLOYEES OCCUPATIONAL ILLNESS COMPENSATION FUND—Continued of Energy (DOE) and of private companies under contract with DOE who suffer from a radiation-related cancer, beryllium-related disease, or chronic silicosis as a result of their work in producing or testing nuclear weapons. The Act authorizes a lump-sum payment of \$150,000 and reimbursement of medical expenses.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered under section 5 of the Radiation Exposure Compensation Act. Benefit payments under Part E began in 2005.

*Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) administration.*—Under Executive Order 13179 the Secretary of Labor is assigned primary responsibility for administering the EEOICPA program, while other responsibilities have been delegated to the Departments of Health and Human Services (HHS), Energy (DOE), and Justice (DOJ). The Office of Workers' Compensation Programs (OWCP) in the Department of Labor (DOL) is responsible for claims adjudication, and award and payment of compensation and medical benefits. DOL's Office of the Solicitor provides legal support and represents the Department in claimant appeals of OWCP decisions. HHS is responsible for developing individual dose reconstructions to estimate occupational radiation exposure, and developing regulations to guide DOL's determination of whether an individual's cancer was caused by radiation exposure at a DOE or atomic weapons facility. DOE is responsible for providing exposure histories at employment facilities covered under the Act, and other employment information. DOJ assists claimants who have been awarded compensation under the Radiation Exposure Compensation Act to file for additional compensation, including medical benefits, under EEOICPA.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered by the Radiation Exposure Compensation Act. Administrative expenses for Part E are covered through indefinite, mandatory appropriations provided in P.L. 108–767.

Title IV of the Federal Mine Safety and Health Act authorizes monthly benefits to coal miners disabled due to coal workers' pneumoconiosis (black lung), and to their widows and certain other dependents. Part B of the Act assigned the processing and paying of claims filed between December 30, 1969 (when the program originated) and June 30, 1973 to the Social Security Administration (SSA). P.L. 107-275 transferred Part B claims processing and payment operations from SSA to the Department of Labor's Office of Workers' Compensation Programs. This change was implemented on October 1, 2003.

This fund was established to provide for the accumulation of funds to meet the Panama Canal Commission's obligations to defray costs of workers' compensation which will accrue pursuant to the Federal Employees' Compensation Act (FECA). On December 31, 1999, the Commission was dissolved as set forth in the Panama Canal Treaty of 1977; however, the liability of the Commission for payments beyond that date did not end with its termination. The establishment of this fund, into which funds were deposited on a regular basis by the Commission, was in conjunction with the transfer of the administration of the Federal Employees' Compensation Act (FECA) program from the Commission to the Department of Labor, effective January 1, 1989.

The trust fund consists of all monies collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, as amended by the Consolidated Omnibus Budget Reconciliation Act of 1985, in the form of an excise tax on mined coal. These moneys are expended to

pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition, the fund pays all administrative costs incurred in the operation of Part C of the Black Lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health and Human Services. The Emergency Economic Stabilization Act of 2008, enacted on October 3, 2008, authorized restructuring of the Black Lung Disability Trust Fund (BLDTF) debt by (1) extending the current coal excise tax rates of \$1.10 per ton on underground-mined coal and \$0.55 per ton on surface-mined coal until December 31, 2018; (2) providing a one-time appropriation for the BLDTF to repay the market value of parts of the outstanding repayable advances and accrued interest; and (3) refinancing the remainder of the outstanding debt through the issuance of zero-coupon bonds, to be retired using the BLDTF's annual operating surplus until all of its remaining obligations have been paid.

The Patient Protection and Affordable Care Act (PPACA) of 2010 reinstated two provisions of the Black Lung Benefits Act that had been removed in 1981 for claims filed on or after January 1, 1982. These provisions include: automatic entitlement to benefits for survivors of miners who had been awarded benefits at the time of their death and a presumption that a miner who has at least 15 years of qualifying coal mine employment and has a totally disabling lung condition has pneumoconiosis even in the absence of a negative x-ray.

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and—pursuant to an annual assessment of the industry—for the general expenses of the fund under the Longshore and Harbor Workers' Compensation Act (LHWCA), as amended.

These trust funds are available for payments of additional compensation for second injuries. When a second injury is combined with a previous disability and results in increased permanent partial disability, permanent total disability, or death, the employer's liability for benefits is limited to a specified period of compensation payments, after which the fund provides continuing compensation benefits. In addition, the fund pays one-half of the increased benefits provided under the LHWCA for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

The Wage and Hour Division enforces the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act (FLSA), the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), the Family and Medical Leave Act (FMLA), certain provisions of the Immigration and Nationality Act (INA), the wage garnishment provisions in Title III of the Consumer Credit Protection Act (CCPA), and the Employee Polygraph Protection Act (EPPA). The Division also determines prevailing wages and enforces employment standards under various Government contract wage standards, including the Davis-Bacon and Related Acts (DBRA) and the McNamara-O'Hara Service Contract Act (SCA). Collectively, these labor standards cover most private, state, and local government employment. They protect over 135,000,000 workers in more than 7,300,000 establishments throughout the United States and its territories.

**Safety and Health Standards.**—This activity provides for the protection of workers' safety and health through development, promulgation, review, and evaluation of occupational safety and health standards and guidance, as specified under the Occupational Safety and Health Act of 1970 (OSH Act). Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically feasible; and (4) the standard is economically and technologically feasible when compared with alternative regulatory proposals providing equal levels of protection. This activity also ensures, through the SBREFA process, that small business concerns are taken into account in the process of developing standards.

**Federal Enforcement.**—This activity provides for ensuring the protection of employees through the enforcement of workplace standards promulgated under the OSH Act, through the physical inspection of worksites, and by providing guidance on how to comply with the requirements of OSHA standards. Enforcement programs are targeted to the investigation of imminent danger situations and employee complaints, investigation of fatal and catastrophic accidents, programmed inspections of firms with injury and illness rates that are above the national average, and special emphasis inspections for serious safety and health hazards. OSHA's enforcement strategy ranges from a selective targeting of inspections and related compliance activities to specific high hazard industries and worksites.

**Whistleblower Programs.**—This activity provides for the enforcement of twenty-two whistleblower protection statutes, including Section 11(c) of the OSH Act, which prohibits any person from discharging or in any manner retaliating against any employee because the employee has exercised rights under the Act, including complaining to OSHA and seeking an OSHA inspection, participating in an OSHA inspection, and participating or testifying in any proceeding related to an OSHA inspection. In addition to the OSH Act, this activity includes administration of twenty-one other whistleblower protection statutes that protect employees who report violations of various airline, commercial motor carrier, consumer product, environmental, financial reform, food safety, health care reform, nuclear, pipeline, public transportation agency, railroad, maritime, automotive manufacturing, and securities laws.

**State Programs.**—This activity supports states in assuming responsibility for administering occupational safety and health programs under State Plans approved by the Secretary. Under section 23 of the OSH Act, grants matching up to 50 percent of total program costs are made to States that meet the Act's criteria for establishing and implementing State programs that are at least as effective as the Federal OSHA program. State programs, like Federal OSHA, provide a mix of enforcement, outreach, training, and compliance assistance activities.

**Technical Support.**—This activity provides support for OSHA's emergency response activities, including responses to oil spills, hurricanes, tornados, and other natural or man-made disasters. This activity provides specialized technical expertise and advice in support of a wide range of program areas, including construction, standards setting, variance determinations, compliance assistance, and enforcement. Areas of expertise include laboratory accreditation, industrial hygiene, occupational health nursing, occupational medicine, chemical analysis, equipment calibration, safety engineering, environmental impact statements, technical and scientific databases, computer-based outreach products, and emergency preparedness.

**Federal Compliance Assistance.**—This activity supports a range of training, outreach, and cooperative programs that provide compliance assistance for employers and employees in protecting workers' safety and health, with particular emphasis on small business, temporary, immigrant, and other high-risk and hard-to-reach workers. OSHA works with employers and employees through Voluntary Protection Programs that recognize and promote effective safety and health management partnerships that focus on the development of extended cooperative relationships and Alliances that commit organizations to collaborative efforts with OSHA. This activity

also provides assistance to federal agencies in implementing and improving their job safety and health programs. Occupational safety and health training is provided at the OSHA Training Institute and affiliated Education Centers throughout the country. Compliance and technical assistance materials are prepared and disseminated to the public through various means, including the Internet.

**State Compliance Assistance: Consultation Grants.**—This activity supports 90 percent federally funded cooperative agreements with designated State agencies to provide free on-site consultation to small and medium-sized employers upon request. State agencies tailor workplans to specific needs in each State while maximizing their impact on injury and illness rates in smaller establishments. These projects offer a variety of services, including safety and health program assessment and assistance, hazard identification and control, and training of employers and their employees.

**Compliance Assistance: Training Grants.**—This activity supports safety and health grants to organizations that provide face-to-face training, education, technical assistance, and develop educational materials for employers and employees. These grants address safety and health education needs related to hard-to-reach workers and specific high-risk topics and industries identified by the agency.

**Safety and Health Statistics.**—This activity supports information technology infrastructure, management of information, OSHA's webpage and web-based compliance assistance services, and the statistical basis for OSHA's programs and field operations. These are provided through an integrated data network and statistical analysis and review. OSHA administers and maintains the recordkeeping system that serves as the foundation for the BLS survey on occupational injuries and illnesses and provides guidance on recordkeeping requirements to both the public and private sectors.

**Executive direction and administration.**—This activity supports executive direction, planning and evaluation, management support, legislative liaison, interagency affairs, federal agency liaison, administrative services, and budgeting and financial control.

**Enforcement.**—The enforcement strategy in 2017 will be an integrated approach toward the prevention of mining accidents, injuries, and occupational illnesses. This includes inspection of mines and other activities as mandated by the Federal Mine Safety and Health Act of 1977 (Mine Act), as amended by the Mine Improvement and New Emergency Response Act of 2006 (MINER Act), special emphasis initiatives that focus on persistent safety and health hazards, promulgation of federal mine safety and health standards, investigation of serious accidents, and on-site education and training. The desired outcome of these enforcement efforts is to prevent death, disease, and injury from mining and promote safe and healthful workplaces for the Nation's miners. In 2017, MSHA is proposing appropriations language that would provide the agency with additional flexibility to internally reallocate funding to ensure the enforcement programs have the necessary resources to effectively conduct mandated inspections or investigations.

**Office of Assessments and Special Enforcement.**— This activity assesses and collects civil monetary penalties for violations of safety and health standards and manages MSHA's accountability, special enforcement, and investigation functions.

**Educational Policy and Development.**—This activity develops and coordinates MSHA's mine safety and health education and training policies, and provides classroom instruction at the National Mine Health and Safety Academy for MSHA personnel, other governmental personnel, and the mining industry.

**Technical Support.**—This activity applies engineering and scientific expertise through field and laboratory forensic investigations to resolve technical problems associated with implementing the Mine Act and the MINER Act. Technical Support administers a fee program to approve equipment, materials, and explosives for use in mines and performs field and laboratory audits of equipment previously approved by MSHA. It also collects and analyzes data relative to the cause, frequency, and circumstances of mine accidents.

**Program Evaluation and Information Resources (PEIR).**—This activity provides program evaluation and information technology resource management services for the agency.

**Program Administration.**—This activity performs general administrative functions and is responsible for meeting performance requirements and developing MSHA's performance plan and Annual Performance Report.

*Jobs for Veterans State grants.*—The Jobs for Veterans Act (JVA) of 2002 provides the foundation for this budget activity. The JVA requires the Veterans' Employment and Training Service (VETS) to act on behalf of the Secretary in the promulgation of policies and regulations that ensure maximum employment and training opportunities for veterans and priority

of service for veterans (38 U.S.C. 4215) within the State workforce delivery system for employment and training programs funded in whole or in part by the U.S. Department of Labor. Under the JVA, resources are allocated to States to support Disabled Veterans' Outreach Program (DVOP) specialists and Local Veterans' Employment Representatives (LVERs).

Disabled Veterans' Outreach Program specialists (38 U.S.C. 4103A) provide intensive services to meet the employment needs of eligible veterans. DVOP specialists place maximum emphasis on assisting veterans with significant barriers to employment, or other populations defined by the Secretary or through appropriations language.

Local Veterans' Employment Representatives (38 U.S.C. 4104) conduct outreach to employers, employer associations, and business groups to promote the advantages of hiring veterans. LVERs also facilitate employment, training, and placement services provided to veterans under the applicable State employment service delivery system, including American Job Centers by educating all workforce partner staff on current employment initiatives and programs for veterans. In addition, each LVER provides reports to the manager of the State employment service delivery system and to the State Director for Veterans Employment and Training (38 U.S.C. 4103) regarding the State's compliance with Federal law and regulations with respect to special services and priorities for eligible veterans.

*Transition Assistance Program.*—This program provides employment workshops for departing service members in the continental U.S. and at major overseas installations. VETS coordinates with the Departments of Defense, Veterans Affairs, and Homeland Security to provide transition services to military service members separating from active duty. TAP is implemented worldwide and provides labor-market and employment-related information and other services to separating service members and their spouses. The goal of TAP is to expedite and facilitate the transition from military to civilian employment.

*Federal management.*—VETS' Federal management budget activity carries out programs and develops policies to provide veterans the maximum employment and training opportunities (38 U.S.C. 4102-4103A) and to investigate complaints received under the Uniformed Services Employment and Reemployment Rights Act (USERRA) (38 USC 4322). Veterans' Preference activities, which are intended to assist veterans in obtaining Federal employment (39 U.S.C. 4214), are also supported under this activity.

Resources under this activity are also used to evaluate the job training and employment assistance services provided to veterans under the Jobs for Veterans State Grants (38 U.S.C. 4102A), the Homeless Veterans Reintegration Program (Section 738 of the Stewart B. McKinney Homeless Assistance Act (MHAA) of July 1987, and amended by Section 5 of the Homeless Veterans Comprehensive Assistance Act (HVCAA of 2001)). This budget activity supports field activities and personnel who provide technical assistance to grantees to ensure they meet negotiated and mandated performance goals and other grant provisions.

This budget activity also supports the oversight and development of policies for the Transition Assistance Program (10 U.S.C. 1144 and 38 U.S.C. 4113). The activity funds outreach and education efforts, such as job fairs, that raise the awareness of employers about the benefits of hiring veterans. The activities of the Advisory Committee for Veterans Employment, Training, and Employer Outreach (38 U.S.C. 4110) also are supported.

*National Veterans' Employment and Training Services Institute.*—The National Veterans' Training Institute (NVTI) supplies competency-based training to Federal and State providers of services to veterans (38 U.S.C. 4109). NVTI also provides training for VETS personnel. NVTI is administered through a contract and supported by dedicated funds. NVTI ensures that these service providers receive a comprehensive foundation so they can effectively assist job-seeking veterans.

*Homeless Veterans' Reintegration Program.*—The Homeless Veterans' Reintegration Program (HVRP) (38 U.S.C. 2021) provides grants to States or other public entities, as well as to non-profits, including faith-based or

VETERANS EMPLOYMENT AND TRAINING—Continued

ganizations. Grant awards enable grantees to operate employment programs to reach out to homeless veterans and help them become employed. VETS partners with the Departments of Veterans Affairs and Housing and Urban Development to promote multi-agency-funded programs that integrate the different services needed by homeless veterans. HVRP grants are provided for both urban and rural areas.

# DEPARTMENT OF STATE AND OTHER INTERNATIONAL PROGRAMS

The Department of State, the U.S. Agency for International Development (USAID), and other international programs support strategic investments in instruments of national security, diplomatic power, and development priorities. The 2017 Budget supports the President's signature initiatives in global health, food security, and climate change; deepens our cooperation with Allies and regional partners; continues America's leadership in the United Nations and other multilateral organizations; supports democratic societies and advocates for human rights; and invests in and protects U.S. diplomatic personnel and facilities abroad. International programs also support economic development and job creation in the U.S. by increasing trade and expanding access for U.S. businesses to international markets. The 2017 Budget also advances our national security priorities by supporting efforts to destroy the Islamic State of Iraq and the Levant (ISIL) as well as by supporting regional partners and providing humanitarian assistance; continuing the transition in Afghanistan; countering Russia's aggressive actions; and advancing security, prosperity and economic growth in the Central America Region to address the root causes of immigration. At a time when the demand for U.S. leadership and engagement has never been greater, the 2017 Budget provides America's diplomats and development professionals with the tools they need to advance our nation's interests and build a safer and more prosperous world.

Diplomatic and Consular Programs (D&CP) are financed by this appropriation, fees for services, and reimbursements from other agencies (including for administrative and other services provided by the Department of State). As in previous years, two-year funding is requested for this account, except for funds requested for Worldwide Security Protection (WSP) and Conflict Stabilization Operations (CSO), which are to remain available until expended. D&CP is the Department of State's primary operating account and funds a broad range of activities from policy setting, planning and design, to implementation and operations and maintenance. The 2017 request includes base funding for the State Department operations in Iraq, Afghanistan, and Pakistan. The balance of the funding requested for operations in Iraq, Afghanistan, and Pakistan is included in the Overseas Contingency Operations (OCO) account request for the D&CP account.

Funds are requested in the following categories:

*Human Resources.*—This category supports American salaries at overseas and domestic United States diplomatic missions, including Department of State employees carrying out security protection activities. Professional development and training is a continuous process by which the Department ensures that its professionals have the skills, experience and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional area and language skills needed for the conduct of foreign relations in the Department and abroad. This activity also supports the management, recruitment, and performance evaluation of Foreign and Civil Service employees (including efforts to attract a diverse applicant pool) and locally employed staff.

*Overseas Programs.*—This category provides funding for the operational programs of all the regional bureaus of the Department of State, which are responsible for managing United States foreign policy through bilateral and multilateral relationships. Funds made available for 2017 will support 275 United States embassies, consulates, and other diplomatic posts worldwide. Resources for this activity are used to provide for: the political and economic reporting and analysis of interests to the United States; the representation of U.S. diplomatic and national interests to countries abroad; and the bilateral and multilateral negotiation of U.S. foreign policy objectives, including the hosting of and participation in various international conferences, meetings and other multilateral activities in the United States and abroad. Resources in this appropriation support the conduct of international informational programs of the United States. These resources are used to define, explain and advocate U.S. policies abroad and to seek to increase knowledge and understanding among foreign audiences of U.S. society and its values. This activity also encompasses medical programs for the Department of State, the Foreign Service and other U.S. Government departments and agencies overseas. Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave and separation of the Department's personnel and dependents is also included in this activity. This category also supports reconstruction and stabilization activities of the Conflict Stabilization Operations (CSO) Bureau.

*Diplomatic Policy and Support.*—This category supports the operational programs of the functional bureaus of the Department of State, which includes providing overall policy direction, coordination, and program management among United States missions abroad in pursuit of regional and global foreign policy objectives, including the hosting of various international conferences and meetings in the United States and abroad. Resources also fund the management of U.S. participation in arms control, nonproliferation, and disarmament negotiations and other verification and compliance activities, in addition to funds otherwise available for such purposes. The information management activity in D&CP includes resources that are used for the creation, collection, processing, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Components of the information management activity include: telecommunications, information security, information system services, pouch, mail and publishing services for both unclassified and classified information. These activities include domestic and overseas execution of Department programs, such as budget and financial management, contracting and procurement, domestic facilities and vehicles, and rental payments to GSA. These funds also provide for the development, lease, or exchange to foreign governments or international organizations of property owned by the United States at the International Center located in Washington, D.C. Funds also provide for operation of the Federal facility located at the International Center, for maintenance and security of those public improvements that have not been conveyed to a government or international organization and for surveys and plans related to development of additional areas within the Nation's Capital for chancery and diplomatic purposes.

*Security Programs.*—This category provides for the operation of security programs, including for Worldwide Security Protection (WSP) and the Bureau of Diplomatic Security, to protect diplomatic personnel, overseas diplomatic missions, residences, domestic facilities and information. The salaries paid to Department employees who carry out the security protection function worldwide are included in the Human Resources program activity. This activity identifies resources that are used in meeting security and counterterrorism responsibilities, both foreign and domestic. Programs covered in this activity include but are not limited to: security operations; engineering services, which are related to the technical defense of U.S. Government personnel and establishments abroad against electronic and physical attack; homeland security related activities; protection of Department personnel and foreign dignitaries; and physical security operations. Effective October 1, 2017 the Department intends to seek the establish-

ment of a standalone Worldwide Security Protection (WSP) account. WSP has grown considerably since it was first created, and now represents a sizeable percentage of the total D&CP appropriation. The Department has taken steps over recent years as part of its Security Realignment Initiative to consolidate all DS funding under the WSP umbrella, and the transfer of all DS domestic staff from D&CP to WSP in the FY 2017 request represents the final step toward complete realignment.

The Consular and Border Security Programs account (CBSP) uses revenue from consular fees and surcharges to fund programs and activities, consistent with applicable statutory authorities. These fees and surcharges include Machine Readable Visa (MRV) fees, Western Hemisphere Travel Initiative (WHTI) surcharges, Passport Security surcharge, Immigrant Visa Security surcharge, the Diversity Visa Lottery fee, the Affidavit of Support fee, and the Expedited Passport fee. In FY 2016 and prior years, these fees were credited in the Diplomatic and Consular Programs account as spending authority from offsetting collections. The FY 2017 President's Budget proposes a new standalone account to display fee-funded consular programs independent of the larger Diplomatic and Consular Programs account beginning in Fiscal Year 2018. This change will enable the Department to make financial reporting and budget estimates for these fees and surcharges more easily available to users of budget information and other stakeholders. Section 7048 of the general provisions provides the legislative language to establish the new account and transfer authority to accounts under the heading Administration of Foreign Affairs.

These consular fees and surcharges support an array of activities that play a vital role in ensuring U.S. border security remains strong, including routine and emergency services for American citizens overseas; the issuance of secure passports to American citizens at 29 passport facilities and a partner network of more than 8,000 passport acceptance facilities domestically; the adjudication of visa applications; the prevention and detection of fraud involving visas and passports; and the Department's information technology programs. Together with the Department of Homeland Security, the Department of Justice, the Intelligence Community, Department of the Treasury, and the law enforcement community, the Department has built

a layered visa and border security screening system that rests on training, technological advances, biometric innovations and expanded data sharing.

This appropriation provides funding for international exchange programs authorized by the Mutual Educational and Cultural Exchange Act of 1961, as amended, to support U.S. foreign, economic, and security policy objectives and to assist in the development of friendly, sympathetic, and peaceful relations between the United States and other countries. These goals are addressed by building increased mutual understanding through international exchange and professional development activities. Programs under this appropriation include:

**Academic Programs.**—Includes the J. William Fulbright Educational Exchange Program, which provides U.S. and foreign students, teachers, scholars, and administrators the opportunity to pursue degrees, teach, and conduct research in foreign and U.S. universities. Academic Programs also include English language programming and educational advising services. English language programs help train and develop foreign teachers of English, send Americans overseas to teach English and train instructors, teach English to disadvantaged students, and provide language learning materials and resources. Educational advising programming supports outreach to foreign students across the world to assist in the process of applying to U.S. universities and supports the President's 100,000 Strong educational exchange initiatives in the Americas and China. Additional academic programs such as the Benjamin A. Gilman International Scholarship Program provide opportunities for American participants with financial needs to study abroad.

**Professional/Cultural Exchanges.**—Includes exchanges linking U.S. and foreign participants in multiple fields directly tied to U.S. foreign policy goals. The International Visitor Leadership Program brings thousands of foreign leaders to the United States for intensive short-term professional exchanges to meet and confer with their American counterparts, gaining first-hand knowledge about U.S. society, culture and democratic values. Citizen Exchanges Program participants partner with an extensive network of organizations and experts from across the United States to conduct professional fellowships as well as arts, sports, and high school exchange programs focused on current and future leaders.

**Youth Leadership Initiatives.**—Includes three signature presidential priorities targeting young private, public, and civil sector leaders, including the Mandela Washington Fellowship for Young African Leaders, the Young Southeast Asian Leaders Initiative, and a new Young Leaders in the Americas Initiative.

**Program and Performance.**—Provides resources and opportunities to ECA exchange program alumni to build on participant exchange experience, developing growing and active alumni association networks. Funds also support on-going program performance measurement and independent evaluations.

**Exchanges Support.**—Includes all domestic staff and support costs managed by ECA; as well as government-wide exchanges coordination.

**East-West Center.**—For FY 2017, the Administration's request of \$10,800,000 for the East-West Center is proposed within the Educational and Cultural Exchange Programs heading.

Under the direction of the Secretary of State, the overall mission of the Bureau of Overseas Buildings Operations (OBO) is to provide U.S. diplomatic and consular missions abroad with safe, secure, and functional facilities that support the foreign policy objectives of the United States. Specific program functions include: providing guidance to posts, the regional bureaus and other foreign affairs agencies on the renovation, construction and operations of facilities; providing expert space and facilities planning; managing and overseeing the design, construction, and renovation of mission facilities; incorporating security features into overseas and domestic facilities; and ensuring the security of facilities during construction or renovation. In addition, OBO is responsible for establishing standards and policies for overseas housing, developing, in conjunction with posts, effective maintenance programs for post facilities, and monitoring and reporting the inventory of maintenance and backlog requirements. OBO also ensures the safety of the building occupants through the development of fire/life safety and accessibility compliance programs.

In 2017, the Department will manage the thirteenth year of the Capital Security Cost Sharing (CSCS) Program. This program has two main goals: accelerating the construction of new safe, secure and functional embassy and consulate compounds, and providing an incentive for all United States Government agencies to right-size their presence overseas through the use

of cost-sharing. The \$2.2 billion program is consistent with the Benghazi Accountability Review Board's recommended funding level for the construction of new secure facilities overseas. Funding sources include ESCM regular base and OCO appropriations, interagency contributions, and consular fee revenues.

The 2017 request continues the Maintenance Cost Sharing (MCS) Program to provide critically needed renovation, construction and repair of overseas facilities, to provide adequate working conditions for multi-agency staffs, and protect the U.S. taxpayer investment. Including cost sharing from other sources, MCS will be funded at \$400 million to maintain overseas facilities in 2017.

The objective of the Asset Management Program is to obtain the best use of diplomatic and consular properties overseas through sale of surplus or underutilized properties and reinvestment of the proceeds in properties that provide a greater return to the U.S. Government and/or improve the safety of mission personnel. In lieu of appropriated resources, OBO uses asset sales proceeds for long-term capital investment to minimize the growth of U.S. Government leasehold requirements (through property acquisition) or to address a high-priority need for new construction or fit-out of leased space.

This appropriation also provides for capital expenditures necessary to preserve, maintain, repair, and plan for buildings owned or leased by the Department of State overseas or in the United States, including the renovation of the Harry S Truman building where required.

The Taiwan Relations Act (Public Law 96-8) requires programs with respect to Taiwan to be carried out by or through the American Institute in Taiwan (AIT). AIT supports U.S. interests by promoting U.S. exports, economic and commercial services, and cultural and information exchange; facilitating military sales; providing consular related services for Americans and the people on Taiwan; and on behalf of the Department of State and various U.S. Government agencies, carrying out liaison with Taiwan's counterpart organizations.

The Department contracts with AIT to conduct commercial, cultural, and other relations with the people of Taiwan. The 2017 request includes funding for the American Institute in Taiwan that sustains previous increases provided to offset revenue loss due to Taiwan's entry into the visa waiver program. Consular related expenses for AIT are funded with fee revenue from the Border Security Program.

The current appropriation finances any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. The 2017 permanent appropriation provides a supplemental payment to the fund for disbursements attributable to the Foreign Service Pension System; and unfunded interest along with liability from military service for the Foreign Service Retirement and Disability System. In addition, the appropriation also finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions. The amount of the appropriation is determined by the annual evaluation of the Fund balance derived from current statistical actuarial data, which includes inflationary cost-of-living adjustments.

The Foreign Service National Defined Contributions Fund (FSN DCF) is an after-employment benefit plan for Locally Employed Staff (LE Staff) working for the Department of State and other Foreign Affairs agencies. The purpose of the fund is to accumulate and distribute U.S. Government (USG)-funded contributions for end-of-service benefits for LE Staff in countries where U.S. missions have determined that participation in the local social security system (LSSS) is not in the public interest of the USG. The Department determines which countries are eligible to participate in the fund. Upon separation, payments under this Plan shall be made consistent with the host country law, including any court order affecting payments to participants, unless decided otherwise by the Department.

This fund, authorized by sections 13 and 23 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684), finances on a reimbursable basis certain administrative services, such as printing and reproduction, editorial material, motor pool operations and dispatch agencies operations, inter-agency cooperative administrative support services, acquisition services, information technology desktop support, medical services, aviation services, and expenses of carrying out the Foreign Missions Act, including any acquisitions of property under the authority of the Foreign Missions Act.

Using the Working Capital Fund, the International Cooperative Administrative Support Services (ICASS) program was fully implemented in 1998. ICASS restructures overseas administrative support activities to allow more decision-making and managerial participation by all participating agencies, more equitable cost distribution, and incentives for efficient provision of services. Under ICASS, each agency represented at an overseas post chooses the services it wishes to receive and pays a proportional share of the cost of those services. Working through inter-agency councils at each overseas post, all agencies have a say in determining post administrative budgets and defining service standards, as well as reviewing costs and vendor performance.

This appropriation provides the U.S. share of operating expenses for ten treaty-based international fisheries commissions and organizations, two international marine science organizations, one whaling commission, the Arctic Council and the Antarctic Treaty Secretariat, as well as funding regional sea turtle and shark conservation, and travel expenses of non-government U.S. commissioners and their advisors. These commissions and organizations coordinate scientific studies of shared fish stocks and other living marine resources and their habitats and establish common management measures to be implemented by member governments based on their results. Many also oversee the allocation of fishing rights to their members. In addition, the Great Lakes Fishery Commission carries out a program to eradicate the invasive, parasitic sea lamprey. The marine science organizations coordinate international research on valuable fisheries, oceanography, and marine ecosystems and the results are publicly disseminated and used to advise member governments on fisheries and marine science policy.

Funding was appropriated in the Global HIV/AIDS Initiative account for this purpose through 2007. Beginning in 2008, funds were appropriated in the Global Health and Child Survival (now Global Health Programs) account, and will continue to be requested in that account.

The Global Health Programs account funds health-related foreign assistance for the Department of State (DOS) and the U.S. Agency for International Development (USAID), representing the majority of funds provided for the President's Global Health Initiative (GHI). GHI seeks to improve health outcomes by adopting a women, girls, and gender-equity approach to health; increasing impact through strategic integration and coordination; strengthening and leveraging multilateral institutions; encouraging country ownership and investing in country-led plans; building sustainability through health systems strengthening; improving metrics, monitoring and evaluation; and promoting research, development and innovation.

*Global Health Programs-State.*—Within GHI, the Global Health Programs (GHP-State) account supports the goal of creating an AIDS-free generation through the President's Emergency Plan for AIDS Relief (PEPFAR). The 2017 Budget requests over \$5.6 billion in the GHP-State account, representing the bulk of PEPFAR funding. PEPFAR is led by the Office of the Global AIDS Coordinator in DOS, which draws upon the expertise and experience of other USG partners such as the U.S. Agency for International Development (USAID), the Department of Health and Human Services, the Department of Defense, and the Peace Corps to bring the full force of our government's capacity to the fight against global AIDS. Programs work through expanded partnerships to build capacity for effective, innovative, country-led, and sustainable services, and to create a supportive and enabling policy environment for combating HIV/AIDS, including as part of the broader USG and country-level health and development approach. In addition, PEPFAR supports implementation of strong monitoring and evaluation systems to set benchmarks for outcomes and programmatic efficiencies through regularly assessed planning and reporting processes to ensure goals are being met. PEPFAR programs support strategic, scientifically sound investments to rapidly scale up core HIV/AIDS prevention, care, and treatment interventions within the context of strengthened health systems, particularly in terms of human resources in nations with severe health worker shortages and lack of service delivery capacity. As part of GHI, PEPFAR integrates its efforts with important programs in other areas of global health as well as other areas of development, including the areas of education, gender equity, and economic development. A contribution of \$1.35 billion to the Global Fund to Fight AIDS, Tuberculosis and Malaria is included in the GHP-State request.

**Global Health Programs-USAID.**—The 2017 Budget requests \$2.9 billion in the GHP-USAID account for a comprehensive and integrated approach to improve global health outcomes as outlined in GHI. USAID, working in partnership with foreign governments, local private sector and non-governmental organizations, and public-private partnerships, will build capacity, strengthen health systems, and promote sustainable integrated health care for vulnerable populations. Funding includes activities that support the goal of ending preventable child deaths, and—in synergy with the Feed the Future Initiative—support nutrition activities, addressing such issues as micronutrient deficiencies and community management of acute malnutrition. GHP-USAID funding will also promote voluntary family planning/reproductive health, pursue polio eradication, support activities directed at vulnerable children, reduce HIV transmission and the impact of the global HIV/AIDS epidemic in high-burden countries, and address the threat of other infectious diseases such as tuberculosis and multi-drug resistant tuberculosis, malaria, influenza and other pandemic diseases, and neglected tropical diseases in developing countries.
